

## Subject Index to Volume 61

### Adsorption

Investigation of electrochemical properties of FMN and FAD adsorbed on titanium electrode (61) 39

### Aprotic media

Studies on electrochemical properties and scavenge of superoxide anion in aprotic media by using carbon nanotubes powder microelectrode (61) 51

### Belousov–Zhabotinski reaction

Electromagnetic acceleration of the Belousov–Zhabotinski reaction (61) 93

### Bioheat equation

Theoretical analysis of the thermal effects during in vivo tissue electroporation (61) 99

### BLM

Impedance analysis of phosphatidylcholine membranes modified with gramicidin D (61) 21

### Carbon nanotubes

Studies on electrochemical properties and scavenge of superoxide anion in aprotic media by using carbon nanotubes powder microelectrode (61) 51

### Carboxymethyl cellulose

Electrochemical and electrocatalytic properties of myoglobin and hemoglobin incorporated in carboxymethyl cellulose films (61) 29

### Cyclic voltammetry

Investigation of electrochemical properties of FMN and FAD adsorbed on titanium electrode (61) 39

### Dielectric spectroscopy

Monitoring of water content and water distribution in ischemic hearts (61) 85

### Direct electrochemistry

Electrochemical and electrocatalytic properties of myoglobin and hemoglobin incorporated in carboxymethyl cellulose films (61) 29

### DNA-modified electrode

Sequential-injection stripping analysis of nifuroxime using DNA-modified glassy carbon electrodes (61) 57

### EIS

Impedance analysis of phosphatidylcholine membranes modified with gramicidin D (61) 21

### Electrical breakdown

Electrical breakdown of human erythrocytes: a technique for the study of electro-haemolysis (61) 9

### Electrochemical catalysis

Electrochemical and electrocatalytic properties of myoglobin and hemoglobin incorporated in carboxymethyl cellulose films (61) 29

### Electrochemical quartz microbalance

Electrochemistry of nano-scale bacterial surface protein layers on gold (61) 1

### Electrochemotherapy

Theoretical analysis of the thermal effects during in vivo tissue electroporation (61) 99

### Electrogenotherapy

Theoretical analysis of the thermal effects during in vivo tissue electroporation (61) 99

### Electromagnetic acceleration

Electromagnetic acceleration of the Belousov–Zhabotinski reaction (61) 93

### Electron transfer

Energetics and mechanisms of high efficiency of charge separation and electron transfer processes in *Rhodobacter sphaeroides* reaction centers (61) 73

### Electropermeabilization

Theoretical analysis of the thermal effects during in vivo tissue electroporation (61) 99

### Erythrocyte

Electrical breakdown of human erythrocytes: a technique for the study of electro-haemolysis (61) 9

### FAD

Investigation of electrochemical properties of FMN and FAD adsorbed on titanium electrode (61) 39

### Fluorescence microscopy

Sub-microsecond, intense pulsed electric field applications to cells show specificity of effects (61) 65

### FMN

Investigation of electrochemical properties of FMN and FAD adsorbed on titanium electrode (61) 39

### Gold

Electrochemistry of nano-scale bacterial surface protein layers on gold (61) 1

### Gramicidin D dimers

Impedance analysis of phosphatidylcholine membranes modified with gramicidin D (61) 21

### Haemolysis

Electrical breakdown of human erythrocytes: a technique for the study of electro-haemolysis (61) 9

### Heart

Monitoring of water content and water distribution in ischemic hearts (61) 85

### Hemoglobin

Electrochemical and electrocatalytic properties of myoglobin and hemoglobin incorporated in carboxymethyl cellulose films (61) 29

### Homogeneous solution

Electromagnetic acceleration of the Belousov–Zhabotinski reaction (61) 93

### Hydrogen bond

Energetics and mechanisms of high efficiency of charge separation and electron transfer processes in *Rhodobacter sphaeroides* reaction centers (61) 73

### Iodide

Sub-microsecond, intense pulsed electric field applications to cells show specificity of effects (61) 65

- Ischemia  
Monitoring of water content and water distribution in ischemic hearts (61) 85
- Joule heating  
Theoretical analysis of the thermal effects during in vivo tissue electroporation (61) 99
- Membrane  
Electrical breakdown of human erythrocytes: a technique for the study of electro-haemolysis (61) 9
- Membrane potential  
Sub-microsecond, intense pulsed electric field applications to cells show specificity of effects (61) 65
- Modified electrode  
Sequential-injection stripping analysis of nifuroxime using DNA-modified glassy carbon electrodes (61) 57
- Myoglobin  
Electrochemical and electrocatalytic properties of myoglobin and hemoglobin incorporated in carboxymethyl cellulose films (61) 29
- Nifuroxime  
Sequential-injection stripping analysis of nifuroxime using DNA-modified glassy carbon electrodes (61) 57
- Nonequilibrium cofactor state  
Energetics and mechanisms of high efficiency of charge separation and electron transfer processes in *Rhodobacter sphaeroides* reaction centers (61) 73
- Phosphatidylcholine  
Impedance analysis of phosphatidylcholine membranes modified with gramicidin D (61) 21
- Powder microelectrode  
Studies on electrochemical properties and scavenge of superoxide anion in aprotic media by using carbon nanotubes powder microelectrode (61) 51
- Propidium  
Sub-microsecond, intense pulsed electric field applications to cells show specificity of effects (61) 65
- Pulsed electric field  
Sub-microsecond, intense pulsed electric field applications to cells show specificity of effects (61) 65
- Reaction center  
Energetics and mechanisms of high efficiency of charge separation and electron transfer processes in *Rhodobacter sphaeroides* reaction centers (61) 73
- Relaxation process  
Energetics and mechanisms of high efficiency of charge separation and electron transfer processes in *Rhodobacter sphaeroides* reaction centers (61) 73
- Riboflavin  
Investigation of electrochemical properties of FMN and FAD adsorbed on titanium electrode (61) 39
- Scanning force microscopy  
Electrochemistry of nano-scale bacterial surface protein layers on gold (61) 1
- Scavenging activity  
Studies on electrochemical properties and scavenge of superoxide anion in aprotic media by using carbon nanotubes powder microelectrode (61) 51
- Sequential-injection stripping analysis  
Sequential-injection stripping analysis of nifuroxime using DNA-modified glassy carbon electrodes (61) 57
- S-layers crystallization  
Electrochemistry of nano-scale bacterial surface protein layers on gold (61) 1
- Specificity  
Sub-microsecond, intense pulsed electric field applications to cells show specificity of effects (61) 65
- Superoxide anion  
Studies on electrochemical properties and scavenge of superoxide anion in aprotic media by using carbon nanotubes powder microelectrode (61) 51
- Thermal effects  
Theoretical analysis of the thermal effects during in vivo tissue electroporation (61) 99
- Tissue model  
Monitoring of water content and water distribution in ischemic hearts (61) 85
- Titanium  
Investigation of electrochemical properties of FMN and FAD adsorbed on titanium electrode (61) 39
- Water content  
Monitoring of water content and water distribution in ischemic hearts (61) 85
- Water distribution  
Monitoring of water content and water distribution in ischemic hearts (61) 85
- XPS  
Electrochemistry of nano-scale bacterial surface protein layers on gold (61) 1
