

Guide for Authors

Submission of Manuscripts

Authors should submit *three* copies of their manuscripts, one complete set of original illustrations and two copies to:

Principal Editor

D. Walz
Lerchenstrasse 21
CH-4059 Basel
Switzerland
Tel: ++41-61-361-4370
Fax: ++41-61-361-4371
E-mail: ed.off.bioele@magnet.ch

To expediate the reviewing process, authors must submit the details of their manuscript by using the manuscript submission form published in the end-pages of the journal and included in the online Guide for Authors at:

<http://authors.elsevier.com/journal/bioelechem>

It is essential to give a fax number and e-mail address when submitting a manuscript. Articles must be written in good English.

Submission of an article implies that the work described has not been published previously (except in the form of an abstract or as part of a published lecture or academic thesis), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere in the same form, in English or in any other language, without the written consent of the Publisher.

Upon acceptance of an article, authors will be asked to transfer copyright (for more information on copyright see <http://authors.elsevier.com>). This transfer will ensure the widest possible dissemination of information. A letter will be sent to the corresponding author confirming receipt of the manuscript. A form facilitating transfer of copyright will be provided.

If excerpts from other copyrighted works are included, the author(s) must obtain written permission from the copyright owners and credit the source(s) in the article. Elsevier has preprinted forms for use by authors in these cases: contact Elsevier Rights Department, phone: (+44) 1865 843830, fax: (+44) 1865 853333, e-mail: permissions@elsevier.com.

Requests may also be completed online via the Elsevier homepage (<http://www.elsevier.com/locate/permissions>).

Should authors be requested by the Editor to revise the text, the revised version should be submitted within 12 weeks. After this period, the article will be regarded as a new submission.

Electronic Format Requirements for Accepted Manuscripts

General points

We accept most wordprocessing formats, but Word, WordPerfect or LaTeX is preferred. An electronic version of the text should be submitted together with the final hardcopy of the manuscript. The electronic version must match the hardcopy exactly. Always keep a backup copy of the electronic file for reference and safety. Label storage media with your name, journal title, and software used. Save your files using the default extension of the program used. No changes to the accepted version are permissible without the explicit approval of the Editor. Electronic files can be stored on 3½ inch diskette, ZIP-disk or CD (either MS-DOS or Macintosh).

Wordprocessor documents

It is important that the file be saved in the native format of the wordprocessor used. The text should be in single-column format. Keep the layout of the text as simple as possible. Most formatting codes will be removed and replaced on processing the article. In particular, do not use the wordprocessor's options to justify text or to hyphenate words. However, do use bold face, italics, subscripts, superscripts etc. Do not embed 'graphically designed' equations or tables, but prepare these using the wordprocessor's facility. When preparing tables, if you are using a table grid, use only one grid for each individual table and not a grid for each row. If no grid is used, use tabs, not spaces, to align columns. The electronic text should be prepared in a way very similar to that of conventional manuscripts (see also the Author Gateway's Quickguide: <http://authors.elsevier.com>). Do not import the figures into the text file but, instead, indicate their approximate locations directly in the electronic text and on the manuscript. See also the section on [Preparation of electronic illustrations](#). To avoid unnecessary errors you are strongly advised to use the 'spellchecker' function of your wordprocessor.

LaTeX documents

If the LaTeX file is suitable, proofs will be produced without rekeying the text. The article should preferably be written using Elsevier's document class 'elsart', or alternatively the standard document class 'article'.

The Elsevier LaTeX package (including detailed instructions for LaTeX preparation) can be obtained from the Author Gateway's Quickguide: <http://authors.elsevier.com> or from the Comprehensive TeX Archive Network (CTAN): see below. It consists of the files: elsart.cls (use this file if you are using LaTeX2e, the current version of LaTeX), elsart.sty and elsart12.sty (use these two files if you are using LaTeX2.09, the previous version of LaTeX), guidelines for users of elsart, a template file for quick start, and the instruction booklet "Preparing articles with LaTeX".

Author Enquiries

Although Elsevier can process most wordprocessor file formats, should your electronic file prove to be unusable, the article will be typeset from the hardcopy printout.

Enquiries

Authors can also keep a track on the progress of their accepted article, and set up e-mail alerts informing them of changes to their manuscript's status, by using the "Track a Paper" feature of Elsevier's Author Gateway <http://authors.elsevier.com>. For privacy, information on each article is password-protected. The author should key in the "Our Reference" code (which is in the letter of acknowledgement sent by the publisher on receipt of the accepted article) and the name of the corresponding author. In case of problems or questions, authors may contact the Author Service Department, E-mail: authorsupport@elsevier.com.

Preparation of Manuscripts

Presentation of Manuscript

Please write your text in good English (American or British usage is accepted, but not a mixture of these). Italics are not to be used for expressions of Latin origin, for example, *in vivo*, *et al.*, *per se*. Use decimal points (not commas); use a space for thousands (10 000 and above).

Authors in Japan kindly note that: Upon request, Elsevier Japan will provide a list of people who can check and improve the English of an article before submission. Contact our Tokyo office: Elsevier, 4F Higashi-Azabu, 1 Chome Bldg, 1-9-15 Higashi-Azabu, Minato-ku, Tokyo 106-0044, Japan; tel.: 03-5561-5032; fax: 03-5561-5045; e-mail: jp.info@elsevier.com.

Print the entire manuscript on one side of the paper only, using double spacing and wide (3 cm) margins. (Avoid full justification, i.e., do not use a constant right-hand margin.) Ensure that each new paragraph is clearly indicated. Present

tables and figure legends on separate pages at the end of the manuscript. If possible, consult a recent issue of the journal to become familiar with layout and conventions. Number all pages consecutively.

Provide the following data on the title page (in the order given).

Title. Concise and informative. Titles are often used in information-retrieval systems. Avoid abbreviations and formulae where possible.

Author names and affiliations. Where the family name may be ambiguous (e.g., a double name), please indicate this clearly. Present the authors' affiliation addresses (where the actual work was done) below the names. Indicate all affiliations with a lower-case superscript letter immediately after the author's name and in front of the appropriate address. Provide the full postal address of each affiliation, including the country name, and, if available, the e-mail address of each author.

Corresponding author. Clearly indicate who is willing to handle correspondence at all stages of refereeing and publication, also post-publication. **Ensure that telephone and fax numbers (with country and area code) are provided in addition to the e-mail address and the complete postal address.**

Present/permanent address. If an author has moved since the work described in the article was done, or was visiting at the time, a 'Present address' (or 'Permanent address') may be indicated as a footnote to that author's name. The address at which the author actually did the work must be retained as the main, affiliation address. Superscript Arabic numerals are used for such footnotes.

Abstract. A concise and factual abstract is required. The abstract should state briefly the purpose of the research, the principal results and major conclusions. An abstract is often presented separate from the article, so it must be able to stand alone.

References should therefore be avoided, but if essential, they must be cited in full, without reference to the reference list.

Non-standard or uncommon abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself.

Keywords. Immediately after the abstract, provide a maximum of 6 keywords, to be chosen from the standard list published in the journal (see the Author Gateway page of this journal, <http://authors.elsevier.com>). These keywords will be used for indexing purposes.

Abbreviations. Define abbreviations that are not standard in this field at their first occurrence in the article: in the abstract

but also in the main text after it. A list of common abbreviations is given in the journal (see the home page), but these abbreviations should be defined in the article, too. Ensure consistency of abbreviations throughout the article.

N.B. Acknowledgements. Collate acknowledgements in a separate section at the end of the article and do **not**, therefore, include them on the title page, as a footnote to the title or otherwise.

Tables. Number tables consecutively in accordance with their appearance in the text. Place footnotes to tables below the table body and indicate them with superscript lowercase letters. Avoid vertical rules. Be sparing in the use of tables and ensure that the data presented in tables do not duplicate results described elsewhere in the article.

Supplementary data. Elsevier now accepts electronic supplementary material to support and enhance your scientific research. Supplementary files offer the author additional possibilities to publish supporting applications, movies, animation sequences, high-resolution images, background datasets, sound clips and more. Supplementary files supplied will be published online alongside the electronic version of your article in Elsevier web products, including ScienceDirect: <http://www.sciencedirect.com>. In order to ensure that your submitted material is directly usable, please ensure that data is provided in one of our recommended file formats. Authors should submit the material in electronic format together with the article and supply a concise and descriptive caption for each file. For more detailed instructions please visit our Author Gateway at <http://authors.elsevier.com>.

Files can be stored on 3½ inch diskette, ZIP-disk or CD (either MS-DOS or Macintosh). This journal offers electronic submission services and supplementary data files can be uploaded via the Author Gateway page of this journal via <http://authors.elsevier.com>.

References

Citations in the text. Please ensure that every reference cited in the text is also present in the reference list (and vice versa). References should be numbered in the order that they first appear in text and listed in numerical sequence on a separate sheet. Any references cited in the abstract must be given in full. Unpublished results and personal communications should not be in the reference list, but may be mentioned in the text. Citation of a reference as ‘in press’ implies that the item has been accepted for publication. In the references list, periodicals [1], books, [2], and multi-author books [3] should accord with the following examples:

- [1] M. Caplow, J. Shanks, Evidence that a single monolayer tubulin-GTP cap is both necessary and

sufficient to stabilize microtubules, *Mol. Biol. Cell* 7 (1996) 663–675.

- [2] S.W. Hui, D.A. Stenger, Effects of intercellular forces on electrofusion, in: D.C. Chang, B.M. Chassy, J.A. Saunders, A.E. Sowers (Eds.), *Guide to Electroporation and Electrofusion*, Academic Press, San Diego, 1992, pp. 167–178.
- [3] D.W.R. Gruen, S. Marcelja, V.A. Parsigian, Water structure near the membrane surface, in: A.S. Perelson, C. DeLisi, F.W. Wiegel (Eds.), *Cell Surface Dynamics, Concepts and Models*, Marcel Dekker, New York, 1984, pp. 59–91.

Journal names should be abbreviated according to CAS (Chemical Abstracts Service): <http://www.cas.org/>

Preparation of Illustrations

Preparation of Electronic Illustrations

Submitting your artwork in an electronic format helps us to produce your work to the best possible standards, ensuring accuracy, clarity and a high level of detail.

- Always supply high-quality printouts of your artwork, in case conversion of the electronic artwork is problematic.
- Make sure you use uniform lettering and sizing of your original artwork.
- Save text in illustrations as “graphics” or enclose the font.
- Only use the following fonts in your illustrations: Arial, Courier, Helvetica, Times, Symbol.
- Number the illustrations according to their sequence in the text.
- Use a logical naming convention for your artwork files, and supply a separate listing of the files and the software used.
- Provide all illustrations as separate files and as hardcopy printouts on separate sheets.
- Provide captions to illustrations separately.
- Produce images near to the desired size of the printed version.

Files can be stored on 3½ inch diskette, ZIP-disk or CD (either MS-DOS or Macintosh). This journal offers electronic submission services and graphic files can be uploaded via the Author Gateway page of this journal via <http://authors.elsevier.com>.

A detailed guide on electronic artwork is available on our website: <http://authors.elsevier.com/artwork>

You are urged to visit this site; some excerpts from the detailed information are given here.

Formats

Regardless of the application used, when your electronic artwork is finalised, please “save as” or convert the images to

one of the following formats (Note the resolution requirements for line drawings, halftones, and line/halftone combinations given below.):

EPS:	Vector drawings. Embed the font or save the text as “graphics”.
TIFF:	Colour or greyscale photographs (halftones): always use a minimum of 300 dpi.
TIFF:	Bitmapped line drawings: use a minimum of 1000 dpi.
TIFF:	Combinations bitmapped line/half-tone (colour or greyscale): a minimum of 500 dpi is required.
DOC, XLS or PPT:	If your electronic artwork is created in any of these Microsoft Office applications please supply “as is”.

Please do not:

- Supply embedded graphics in your wordprocessor (spreadsheet, presentation) document;
- Supply files that are optimised for screen use (like GIF, BMP, PICT, WPG); the resolution is too low;
- Supply files that are too low in resolution;
- Submit graphics that are disproportionately large for the content.

Non-Electronic Illustrations

Provide all illustrations as high-quality printouts, suitable for reproduction (which may include reduction) without retouching. Number illustrations consecutively in the order in which they are referred to in the text. They should accompany the manuscript, but should not be included within the text. Clearly mark all illustrations on the back (or – in case of line drawings – on the lower front side) with the figure number and the author’s name and, in cases of ambiguity, the correct orientation.

Mark the appropriate position of a figure in the article.

Captions

Ensure that each illustration has a caption. Supply captions on a separate sheet, not attached to the figure. A caption should comprise a brief title (**not** on the figure itself) and a description of the illustration. Keep text in the illustrations themselves to a minimum but explain all symbols and abbreviations used.

Line Drawings

Supply high-quality printouts on white paper produced with black ink. The lettering and symbols, as well as other details, should have proportionate dimensions, so as not to become illegible or unclear after possible reduction; in general, the figures should be designed for a reduction factor of two to three. The degree of reduction will be determined by the Publisher. Illustrations will not be enlarged. Consider

the page format of the journal when designing the illustrations.

Photocopies are not suitable for reproduction. Do not use any type of shading on computer-generated illustrations.

Photographs (halftones)

Please supply original photographs for reproduction, printed on glossy paper, very sharp and with good contrast. Remove non-essential areas of a photograph. Do not mount photographs unless they form part of a composite figure. Where necessary, insert a scale bar in the illustration (not below it), as opposed to giving a magnification factor in the legend.

Note that photocopies of photographs are not acceptable.

Colour Illustrations

Submit colour illustrations as original photographs, high-quality computer prints or transparencies, close to the size expected in publication, or as 35 mm slides. Please make sure that artwork files are in an acceptable format (TIFF, EPS or MS Offices files) and with the correct resolution. Polaroid colour prints are *not* suitable. **If, together with your accepted article, you submit usable colour figures then Elsevier will ensure, at no additional charge, that these figures will appear in colour on the web (e.g., ScienceDirect and other sites) regardless of whether or not these illustrations are reproduced in colour in the printed version.** Please indicate your preference for colour on the web (free of charge) or in print and on the web (charged) when submitting your article. For colour reproduction in print, you will receive information regarding the costs from Elsevier after receipt of your accepted article. For further information on the preparation of electronic artwork, please see <http://authors.elsevier.com/artwork>.

Please note: Because of technical complications which can arise by converting colour figures to ‘grey scale’ (for the printed version should you not opt for colour in print) please submit, in addition, usable black and white versions of all the colour illustrations.

Proofs

When your manuscript is received by the Publisher it is considered to be in its final form. Proofs are not to be regarded as ‘drafts’.

One set of page proofs in PDF format will be sent by e-mail to the corresponding author, to be checked for typesetting/editing. No changes in, or additions to, the accepted (and subsequently edited) manuscript will be allowed at this stage. Proofreading is solely your responsibility.

A form with queries from the Copyeditor may accompany your proofs. Please answer all queries and make any corrections or additions required.

The Publisher reserves the right to proceed with publication if corrections are not communicated.

Return corrections within 2 days of receipt of the proofs. Should there be no corrections, please confirm this.

Elsevier will do everything possible to get your article corrected and published as quickly and accurately as possible. In order to do this we need your help. When you receive the (PDF) proof of your article for correction, it is important to ensure that all of your corrections are sent back to us in one communication. Subsequent corrections will not be possible, so please ensure your first sending is complete. Note that this does not mean you have any less time to make your corrections, just that only one set of corrections will be accepted.

Offprints

Twenty-five offprints are supplied to authors free of charge. Additional offprints may be ordered at prices shown on the offprint order form which will accompany the proofs. This order form should be returned promptly since the price of offprints ordered after publication is substantially higher.

For complete up-to-date addresses of Editors please check the link to Editorial Board at the beginning of these instructions.
