

## Subject Index to Volume 62

### Adaptation

Temperature-dependent changes in erythrocytes' cytosol state during natural and artificial hypobiosis (62) 187

### AE

Oxygen sensitivity of red cell membrane transporters revisited (62) 153

### Aging

Experiences in the measurement of RBC-bound IgG as markers of cell age (62) 175

### Alkyl- $\beta$ ,D-glucopyranosides

Effect of alkyl- $\beta$ ,D-glucopyranosides on hypertonic haemolysis of erythrocytes (62) 163

### Antibody

Effects of anti-GLUT antibodies on glucose transport into human erythrocyte ghosts (62) 195

### Apoptosis

Cell proliferation and apoptosis in rat mammary cancer after electrochemical treatment (EChT) (62) 57

### Band 3

Phosphotyrosine phosphatases acting on band 3 in human erythrocytes of different age: PTP1B processing during cell ageing (62) 169

### Ca<sup>2+</sup> concentration

Effect of the ionic strength and prostaglandin E<sub>2</sub> on the free Ca<sup>2+</sup> concentration and the Ca<sup>2+</sup> influx in human red blood cells (62) 127

### Ca<sup>2+</sup> influx

Effect of the ionic strength and prostaglandin E<sub>2</sub> on the free Ca<sup>2+</sup> concentration and the Ca<sup>2+</sup> influx in human red blood cells (62) 127

### Calcium oscillations

Local dissipation and coupling properties of cellular oscillators: A case study on calcium oscillations (62) 1

### Calf thymus DNA

Electrochemical characteristics of the immobilization of calf thymus DNA molecules on multi-walled carbon nanotubes (62) 29

### Ca<sup>2+</sup>-transient

Voltage activation and hysteresis of the non-selective voltage-dependent channel in the intact human red cell (62) 181

### Cell adhesion and proliferation

Adhesion and proliferation of cells on new polymers modified biomaterials (62) 19

### Cell coupling

Local dissipation and coupling properties of cellular oscillators: A case study on calcium oscillations (62) 1

### Cell culture

Adhesion and proliferation of cells on new polymers modified biomaterials (62) 19

### Cell membrane

Supra-physiological membrane potential induced conformational changes in K<sup>+</sup> channel conducting system of skeletal muscle fibers (62) 47

Electroporation of cell membranes supporting penetration of photo-dynamic active macromolecular chromophore dextrans (62) 95

### 1-Chloro-2,4-dinitrobenzene

Modulation of Gardos channel activity by oxidants and oxygen tension: effects of 1-chloro-2,4-dinitrobenzene and phenazine methosulphate (62) 147

### Chromophore dextrans

Electroporation of cell membranes supporting penetration of photo-dynamic active macromolecular chromophore dextrans (62) 95

### Complement

Experiences in the measurement of RBC-bound IgG as markers of cell age (62) 175

### Confocal microscopy

Red blood cell ghosts and intact red blood cells as complementary models in photodynamic cell research (62) 123

### Conformational changes

Supra-physiological membrane potential induced conformational changes in K<sup>+</sup> channel conducting system of skeletal muscle fibers (62) 47

### Cytosol

Temperature-dependent changes in erythrocytes' cytosol state during natural and artificial hypobiosis (62) 187

### Deformability

The cooperative role of membrane skeleton and bilayer in the mechanical behaviour of red blood cells (62) 107

### 2,4-dichlorophenoxyacetic acid

The immunosensors for measurement of 2,4-dichlorophenoxyacetic acid based on electrochemical impedance spectroscopy (62) 11

### Diols

Erythrocyte membrane permeability for a series of diols (62) 115

### Dissipation

Local dissipation and coupling properties of cellular oscillators: A case study on calcium oscillations (62) 1

### Dodecylmaltoside

Spherocyte shape transformation and release of tubular nanovesicles in human erythrocytes (62) 159

### Echinocyte

The cooperative role of membrane skeleton and bilayer in the mechanical behaviour of red blood cells (62) 107

### Electric field

Supra-physiological membrane potential induced conformational changes in K<sup>+</sup> channel conducting system of skeletal muscle fibers (62) 47

### Electric field-mediated gene delivery

Effects of pulse strength and pulse duration on in vitro DNA electromobility (62) 37

### Electric injury

Supra-physiological membrane potential induced conformational changes in K<sup>+</sup> channel conducting system of skeletal muscle fibers (62) 47

### Electrochemical characteristics

Electrochemical characteristics of the immobilization of calf thymus DNA molecules on multi-walled carbon nanotubes (62) 29

- Electrochemical impedance spectroscopy  
The immunosensors for measurement of 2,4-dichlorophenoxyacetic acid based on electrochemical impedance spectroscopy (62) 11
- Electrochemical treatment (EChT)  
Cell proliferation and apoptosis in rat mammary cancer after electrochemical treatment (EChT) (62) 57
- Electrochemistry  
Adhesion and proliferation of cells on new polymers modified biomaterials (62) 19
- Electroporation  
Setting optimal parameters for in vitro electrotransfection of B16F1, SA1, LPB, SCK, L929 and CHO cells using predefined exponentially decaying electric pulses (62) 73  
Electroporation of subcutaneous mouse tumors by rectangular and trapezium high voltage pulses (62) 83  
Electroporation of cell membranes supporting penetration of photo-dynamic active macromolecular chromophore dextrans (62) 95
- Endocrine pathologies  
Estimation of erythrocyte population state by the spherical index distribution (62) 119
- Erythrocyte  
Effect of alkyl- $\beta$ ,D-glucopyranosides on hypertonic haemolysis of erythrocytes (62) 163  
Temperature-dependent changes in erythrocytes' cytosol state during natural and artificial hypobiosis (62) 187  
Effects of anti-GLUT antibodies on glucose transport into human erythrocyte ghosts (62) 195
- Erythrocyte ghosts  
Red blood cell ghosts and intact red blood cells as complementary models in photodynamic cell research (62) 123
- Erythrocyte membrane  
Erythrocyte membrane permeability for a series of diols (62) 115  
Spherocyte shape transformation and release of tubular nanovesicles in human erythrocytes (62) 159
- Erythrocytes  
Estimation of erythrocyte population state by the spherical index distribution (62) 119  
Experiences in the measurement of RBC-bound IgG as markers of cell age (62) 175  
Activity of membrane-bound NADH-methemoglobin reductase and physical state of lipids in erythrocyte membranes (62) 191
- Erythrocyte shape  
Spherocyte shape transformation and release of tubular nanovesicles in human erythrocytes (62) 159
- Ethidium bromide  
Electrochemical characteristics of the immobilization of calf thymus DNA molecules on multi-walled carbon nanotubes (62) 29
- Gap junctions  
Local dissipation and coupling properties of cellular oscillators: A case study on calcium oscillations (62) 1
- Gardos channel  
Modulation of Gardos channel activity by oxidants and oxygen tension: effects of 1-chloro-2,4-dinitrobenzene and phenazine methosulphate (62) 147
- Gating system  
Supra-physiological membrane potential induced conformational changes in  $K^+$  channel conducting system of skeletal muscle fibers (62) 47
- Ghost  
Oxygen dependence of  $K^+ - Cl^-$  cotransport in human red cell ghosts and sickle cells (62) 141  
Effects of anti-GLUT antibodies on glucose transport into human erythrocyte ghosts (62) 195
- GLUT  
Oxygen sensitivity of red cell membrane transporters revisited (62) 153
- GLUT1  
Effects of anti-GLUT antibodies on glucose transport into human erythrocyte ghosts (62) 195
- Haemoglobinopathy  
Oxygen dependence of  $K^+ - Cl^-$  cotransport in human red cell ghosts and sickle cells (62) 141
- Human erythrocytes  
Red blood cell ghosts and intact red blood cells as complementary models in photodynamic cell research (62) 123
- Human red cells  
Voltage activation and hysteresis of the non-selective voltage-dependent channel in the intact human red cell (62) 181
- Hypertonic haemolysis  
Effect of alkyl- $\beta$ ,D-glucopyranosides on hypertonic haemolysis of erythrocytes (62) 163
- Hysteresis  
Voltage activation and hysteresis of the non-selective voltage-dependent channel in the intact human red cell (62) 181
- IDA electrodes  
The immunosensors for measurement of 2,4-dichlorophenoxyacetic acid based on electrochemical impedance spectroscopy (62) 11
- Immobilization  
Electrochemical characteristics of the immobilization of calf thymus DNA molecules on multi-walled carbon nanotubes (62) 29
- Immunosensor  
The immunosensors for measurement of 2,4-dichlorophenoxyacetic acid based on electrochemical impedance spectroscopy (62) 11
- Interstitial transport  
Effects of pulse strength and pulse duration on in vitro DNA electromobility (62) 37
- Ionic strength  
Effect of the ionic strength and prostaglandin  $E_2$  on the free  $Ca^{2+}$  concentration and the  $Ca^{2+}$  influx in human red blood cells (62) 127
- Ionic transfer  
Potentiometric investigation of the effect of the pH on the ionic transfer of some amino acids at the interface between two immiscible electrolyte solutions (62) 67
- Ion transport inhibitors  
Inhibitors of the  $K^+(Na^+)/H^+$  exchanger of human red blood cells (62) 135
- KCC  
Oxygen sensitivity of red cell membrane transporters revisited (62) 153
- KCl cotransport  
Oxygen dependence of  $K^+ - Cl^-$  cotransport in human red cell ghosts and sickle cells (62) 141
- $K^+$  channel  
Supra-physiological membrane potential induced conformational changes in  $K^+$  channel conducting system of skeletal muscle fibers (62) 47
- $K^+$  leak  
Inhibitors of the  $K^+(Na^+)/H^+$  exchanger of human red blood cells (62) 135
- $K^+(Na^+)/H^+$  exchanger  
Inhibitors of the  $K^+(Na^+)/H^+$  exchanger of human red blood cells (62) 135

- Lyapunov exponents  
Local dissipation and coupling properties of cellular oscillators: A case study on calcium oscillations (62) 1
- Membrane elastic properties  
The cooperative role of membrane skeleton and bilayer in the mechanical behaviour of red blood cells (62) 107
- Membrane permeability  
Inhibitors of the  $K^+(Na^+)/H^+$  exchanger of human red blood cells (62) 135
- Membrane shear energy  
Spherocyte shape transformation and release of tubular nanovesicles in human erythrocytes (62) 159
- Micropipette aspiration  
The cooperative role of membrane skeleton and bilayer in the mechanical behaviour of red blood cells (62) 107
- Multi-walled carbon nanotubes  
Electrochemical characteristics of the immobilization of calf thymus DNA molecules on multi-walled carbon nanotubes (62) 29
- NADH-methemoglobin reductase  
Activity of membrane-bound NADH-methemoglobin reductase and physical state of lipids in erythrocyte membranes (62) 191
- $Na^+/K^+$  pump  
Oxygen sensitivity of red cell membrane transporters revisited (62) 153
- Nanovesicles  
Spherocyte shape transformation and release of tubular nanovesicles in human erythrocytes (62) 159
- Naturally occurring antibodies  
Experiences in the measurement of RBC-bound IgG as markers of cell age (62) 175
- Neuronal cell lines  
Adhesion and proliferation of cells on new polymers modified biomaterials (62) 19
- NKCC  
Oxygen sensitivity of red cell membrane transporters revisited (62) 153
- Non-selective voltage-dependent cation channel  
Voltage activation and hysteresis of the non-selective voltage-dependent channel in the intact human red cell (62) 181
- Non-viral gene delivery  
Effects of pulse strength and pulse duration on in vitro DNA electromobility (62) 37
- $O_2$   
Oxygen dependence of  $K^+-Cl^-$  cotransport in human red cell ghosts and sickle cells (62) 141  
Oxygen sensitivity of red cell membrane transporters revisited (62) 153
- Oxidative stress  
Activity of membrane-bound NADH-methemoglobin reductase and physical state of lipids in erythrocyte membranes (62) 191
- Oxygen  
Modulation of Gardos channel activity by oxidants and oxygen tension: effects of 1-chloro-2,4-dinitrobenzene and phenazine methosulphate (62) 147
- Permeability  
Erythrocyte membrane permeability for a series of diols (62) 115  
Temperature-dependent changes in erythrocytes' cytosol state during natural and artificial hypobiosis (62) 187
- pH  
Cell proliferation and apoptosis in rat mammary cancer after electrochemical treatment (EChT) (62) 57  
Potentiometric investigation of the effect of the pH on the ionic transfer of some amino acids at the interface between two immiscible electrolyte solutions (62) 67
- Phenazine methosulphate  
Modulation of Gardos channel activity by oxidants and oxygen tension: effects of 1-chloro-2,4-dinitrobenzene and phenazine methosulphate (62) 147
- Phenylhydrazine  
Effect of alkyl- $\beta$ ,D-glucopyranosides on hypertonic haemolysis of erythrocytes (62) 163
- Pheophorbide *a*  
Red blood cell ghosts and intact red blood cells as complementary models in photodynamic cell research (62) 123
- Photodynamic therapy  
Red blood cell ghosts and intact red blood cells as complementary models in photodynamic cell research (62) 123
- Plasmid electromobility  
Effects of pulse strength and pulse duration on in vitro DNA electromobility (62) 37
- Polymers  
Adhesion and proliferation of cells on new polymers modified biomaterials (62) 19
- Potentiometric investigation  
Potentiometric investigation of the effect of the pH on the ionic transfer of some amino acids at the interface between two immiscible electrolyte solutions (62) 67
- Preset parameters  
Electroporation of subcutaneous mouse tumors by rectangular and trapezium high voltage pulses (62) 83
- Prostaglandin  
Effect of the ionic strength and prostaglandin  $E_2$  on the free  $Ca^{2+}$  concentration and the  $Ca^{2+}$  influx in human red blood cells (62) 127
- Protein 4.1  
Phosphotyrosine phosphatases acting on band 3 in human erythrocytes of different age: PTP1B processing during cell ageing (62) 169
- PTP1B  
Phosphotyrosine phosphatases acting on band 3 in human erythrocytes of different age: PTP1B processing during cell ageing (62) 169
- Rat  
Cell proliferation and apoptosis in rat mammary cancer after electrochemical treatment (EChT) (62) 57
- Red blood cell ageing  
Phosphotyrosine phosphatases acting on band 3 in human erythrocytes of different age: PTP1B processing during cell ageing (62) 169
- Red blood cells  
The cooperative role of membrane skeleton and bilayer in the mechanical behaviour of red blood cells (62) 107  
Effect of the ionic strength and prostaglandin  $E_2$  on the free  $Ca^{2+}$  concentration and the  $Ca^{2+}$  influx in human red blood cells (62) 127  
Inhibitors of the  $K^+(Na^+)/H^+$  exchanger of human red blood cells (62) 135
- Red cell  
Oxygen dependence of  $K^+-Cl^-$  cotransport in human red cell ghosts and sickle cells (62) 141
- Screen-printed sensor  
The immunosensors for measurement of 2,4-dichlorophenoxyacetic acid based on electrochemical impedance spectroscopy (62) 11
- Shapes  
The cooperative role of membrane skeleton and bilayer in the mechanical behaviour of red blood cells (62) 107
- Skin tumor  
Electroporation of subcutaneous mouse tumors by rectangular and trapezium high voltage pulses (62) 83
- Spherical index  
Estimation of erythrocyte population state by the spherical index distribution (62) 119

## Temperature

Effect of alkyl- $\beta$ ,D-glucopyranosides on hypertonic haemolysis of erythrocytes (62) 163

 $\beta$ -Thalassemia intermedia

Experiences in the measurement of RBC-bound IgG as markers of cell age (62) 175

## Transfection

Setting optimal parameters for in vitro electrotransfection of B16F1, SA1, LPB, SCK, L929 and CHO cells using predefined exponentially decaying electric pulses (62) 73

## Trapezium pulse

Electroporation of subcutaneous mouse tumors by rectangular and trapezium high voltage pulses (62) 83

## Tumor cells

Setting optimal parameters for in vitro electrotransfection of B16F1, SA1, LPB, SCK, L929 and CHO cells using predefined exponentially decaying electric pulses (62) 73

## Tumour

Cell proliferation and apoptosis in rat mammary cancer after electrochemical treatment (EChT) (62) 57

## Tyr-kinase

Phosphotyrosine phosphatases acting on band 3 in human erythrocytes of different age: PTP1B processing during cell ageing (62) 169

## Vesiculation

Phosphotyrosine phosphatases acting on band 3 in human erythrocytes of different age: PTP1B processing during cell ageing (62) 169
