

Subject Index to Volume 64

Acidithiobacillus ferrooxidans

Oxidative dissolution of chalcopyrite by *Acidithiobacillus ferrooxidans* analyzed by electrochemical impedance spectroscopy and atomic force microscopy (64) 79

Alkaline phosphatase

The measurement of alkaline phosphatase at nanomolar concentration within 70 s using a disposable microelectrochemical transistor (64) 53

Allosteric effect

Electrochemical investigation of the chloride effect on hemoglobin (64) 23

Ammonium trioxovanadate(V)–cysteine, voltammetry

Redox behaviour of cysteine in the presence of ammonium trioxovanadate(V) (64) 1

Amperometric biosensors

Phenols monitoring and Hill coefficient evaluation using tyrosinase-based amperometric biosensors (64) 47

Analyte

The demonstration of an enhanced microelectrochemical transistor for measurements in neutral solution at low analyte concentration (64) 15

Analytical strategy

DNA sensor for *o*-dianisidine (64) 85

Ascorbate

Electrocatalytic oxidation of ascorbate by heme-Fe^{III}/heme-Fe^{II} redox couple of the HRP and its effect on the electrochemical behaviour of an L-lactate biosensor (64) 71

Ascorbic acid

Imidazole facilitates electron transfer from organic reductants (64) 7

Atomic force microscopy (AFM)

Oxidative dissolution of chalcopyrite by *Acidithiobacillus ferrooxidans* analyzed by electrochemical impedance spectroscopy and atomic force microscopy (64) 79

Azithromycin

Studies on electrochemical oxidation of azithromycin and its interaction with bovine serum albumin (64) 91

Bioelectrochemistry

Electrochemical investigation of the dynamics of *Mycobacterium smegmatis* cells' transformation to dormant, nonculturable form (64) 125

Bioelectromagnetism

Modelling the internal field distribution in human erythrocytes exposed to MW radiation (64) 39

Biosensor

Electrocatalytic oxidation of ascorbate by heme-Fe^{III}/heme-Fe^{II} redox couple of the HRP and its effect on the electrochemical behaviour of an L-lactate biosensor (64) 71

Bovine serum albumin

Studies on electrochemical oxidation of azithromycin and its interaction with bovine serum albumin (64) 91

Carbon nanotube paste electrode

A comparison between the use of a redox mediator in solution and of surface modified electrodes in the electrocatalytic oxidation of nicotinamide adenine dinucleotide (64) 157

Carbon paste electrode

Electrocatalytic oxidation of ascorbate by heme-Fe^{III}/heme-Fe^{II} redox couple of the HRP and its effect on the electrochemical behaviour of an L-lactate biosensor (64) 71

Chalcopyrite

Oxidative dissolution of chalcopyrite by *Acidithiobacillus ferrooxidans* analyzed by electrochemical impedance spectroscopy and atomic force microscopy (64) 79

Chloride

Electrochemical investigation of the chloride effect on hemoglobin (64) 23

Computer processing

Electrochemical investigation of the dynamics of *Mycobacterium smegmatis* cells' transformation to dormant, nonculturable form (64) 125

Controlled potential electrolysis

A study on bovine erythrocyte superoxide dismutase by controlled potential electrolysis and Raman spectra (64) 33

Cu₂ZnSOD

A study on bovine erythrocyte superoxide dismutase by controlled potential electrolysis and Raman spectra (64) 33

Cyclic voltammetry

Imidazole facilitates electron transfer from organic reductants (64) 7

Cyclic voltammetry

A comparison between the use of a redox mediator in solution and of surface modified electrodes in the electrocatalytic oxidation of nicotinamide adenine dinucleotide (64) 157

Diffusion coefficient

Simultaneous determination of charge number and diffusion coefficient of 2-chloro-1,4-dimethoxybenzene in acetonitrile using potential-step chronoamperometry (64) 109

3,4-Dihydroxybenzaldehyde

A comparison between the use of a redox mediator in solution and of surface modified electrodes in the electrocatalytic oxidation of nicotinamide adenine dinucleotide (64) 157

Direct electrochemistry

Electrochemical investigation of the chloride effect on hemoglobin (64) 23

Direct electron transfer

Electrocatalytic oxidation of ascorbate by heme-Fe^{III}/heme-Fe^{II} redox couple of the HRP and its effect on the electrochemical behaviour of an L-lactate biosensor (64) 71

Disposable microelectrochemical transistor

The measurement of alkaline phosphatase at nanomolar concentration within 70 s using a disposable microelectrochemical transistor (64) 53

DNA-electrochemical biosensors

Electrochemical study of quercetin–DNA interactions: Part I. Analysis in incubated solutions (64) 133

DNA-electrochemical biosensors

Electrochemical study of quercetin–DNA interactions: Part II. In situ sensing with DNA biosensors (64) 143

DNA sensor

DNA sensor for *o*-dianisidine (64) 85

- Dosimetry
Modelling the internal field distribution in human erythrocytes exposed to MW radiation (64) 39
- Drug analysis
Voltammetric analysis of drugs (64) 99
- Drug management
Voltammetric analysis of drugs (64) 99
- Dynamics of bacterial transformation
Electrochemical investigation of the dynamics of *Mycobacterium smegmatis* cells' transformation to dormant, nonculturable form (64) 125
- Electrochemical approach
Electrochemical investigation of the dynamics of *Mycobacterium smegmatis* cells' transformation to dormant, nonculturable form (64) 125
- Electrochemical behavior
A study on bovine erythrocyte superoxide dismutase by controlled potential electrolysis and Raman spectra (64) 33
- Electrochemical impedance spectroscopy (EIS)
Oxidative dissolution of chalcopryrite by *Acidithiobacillus ferrooxidans* analyzed by electrochemical impedance spectroscopy and atomic force microscopy (64) 79
- Electrochemistry
DNA sensor for *o*-dianisidine (64) 85
- Electrochemistry
Studies on electrochemical oxidation of azithromycin and its interaction with bovine serum albumin (64) 91
- Electrochemistry
Electrochemical study of quercetin–DNA interactions: Part I. Analysis in incubated solutions (64) 133
- Electrochemistry
Electrochemical study of quercetin–DNA interactions: Part II. In situ sensing with DNA biosensors (64) 143
- Electrochemotherapy
Techniques of signal generation required for electroporation. Survey of electroporation devices (64) 113
- Electromotive force
Study of salt permeation process into *Vigna angularis* using Ag/AgCl electrodes (64) 29
- Electronic spectra
Redox behaviour of cysteine in the presence of ammonium trioxovanadate(V) (64) 1
- Electron mediator
Simultaneous determination of charge number and diffusion coefficient of 2-chloro-1,4-dimethoxybenzene in acetonitrile using potential-step chronoamperometry (64) 109
- Electroporation
Techniques of signal generation required for electroporation. Survey of electroporation devices (64) 113
- Enzymatic electrodes
An amperometric nitrate reductase–phenosafranin electrode: kinetic aspects and analytical applications (64) 61
- Erythrocyte
Modelling the internal field distribution in human erythrocytes exposed to MW radiation (64) 39
- Flavonoids
Electrochemical study of quercetin–DNA interactions: Part I. Analysis in incubated solutions (64) 133
- Flavonoids
Electrochemical study of quercetin–DNA interactions: Part II. In situ sensing with DNA biosensors (64) 143
- Gene transfection
Techniques of signal generation required for electroporation. Survey of electroporation devices (64) 113
- Growth
Static and 50 Hz magnetic fields of 0.35 and 2.45 mT have no effect on the growth of *Saccharomyces cerevisiae* (64) 151
- Hemoglobin
Electrochemical investigation of the chloride effect on hemoglobin (64) 23
- Horseradish peroxidase
Electrocatalytic oxidation of ascorbate by heme-Fe^{III}/heme-Fe^{II} redox couple of the HRP and its effect on the electrochemical behaviour of an L-lactate biosensor (64) 71
- Hydroquinone
Imidazole facilitates electron transfer from organic reductants (64) 7
- Imidazole
Imidazole facilitates electron transfer from organic reductants (64) 7
- Instrumentation
Techniques of signal generation required for electroporation. Survey of electroporation devices (64) 113
- Lignin
Simultaneous determination of charge number and diffusion coefficient of 2-chloro-1,4-dimethoxybenzene in acetonitrile using potential-step chronoamperometry (64) 109
- Magnetic field
Static and 50 Hz magnetic fields of 0.35 and 2.45 mT have no effect on the growth of *Saccharomyces cerevisiae* (64) 151
- Membrane cell
Modelling the internal field distribution in human erythrocytes exposed to MW radiation (64) 39
- Metabolism level
Electrochemical investigation of the dynamics of *Mycobacterium smegmatis* cells' transformation to dormant, nonculturable form (64) 125
- Microdisk electrode
Simultaneous determination of charge number and diffusion coefficient of 2-chloro-1,4-dimethoxybenzene in acetonitrile using potential-step chronoamperometry (64) 109
- Microelectrochemical transistor
The demonstration of an enhanced microelectrochemical transistor for measurements in neutral solution at low analyte concentration (64) 15
- Modified electrode
Studies on electrochemical oxidation of azithromycin and its interaction with bovine serum albumin (64) 91
- Modified electrode
A comparison between the use of a redox mediator in solution and of surface modified electrodes in the electrocatalytic oxidation of nicotinamide adenine dinucleotide (64) 157
- Multiwalled carbon nanotube
Studies on electrochemical oxidation of azithromycin and its interaction with bovine serum albumin (64) 91
- Mutant
Static and 50 Hz magnetic fields of 0.35 and 2.45 mT have no effect on the growth of *Saccharomyces cerevisiae* (64) 151
- Mycobacterium smegmatis*
Electrochemical investigation of the dynamics of *Mycobacterium smegmatis* cells' transformation to dormant, nonculturable form (64) 125
- NADH oxidation
A comparison between the use of a redox mediator in solution and of surface modified electrodes in the electrocatalytic oxidation of nicotinamide adenine dinucleotide (64) 157

Nanomolar concentration

The measurement of alkaline phosphatase at nanomolar concentration within 70 s using a disposable microelectrochemical transistor (64) 53

Neutral solution

The demonstration of an enhanced microelectrochemical transistor for measurements in neutral solution at low analyte concentration (64) 15

Nitrate

An amperometric nitrate reductase–phenosafranin electrode: kinetic aspects and analytical applications (64) 61

Nitrate Reductase

An amperometric nitrate reductase–phenosafranin electrode: kinetic aspects and analytical applications (64) 61

Nonculturable and dormant bacteria

Electrochemical investigation of the dynamics of *Mycobacterium smegmatis* cells' transformation to dormant, nonculturable form (64) 125

o-Dianisidine

DNA sensor for *o*-dianisidine (64) 85

Oxidation

Electrochemical study of quercetin–DNA interactions: Part I. Analysis in incubated solutions (64) 133

Oxidation

Electrochemical study of quercetin–DNA interactions: Part II. In situ sensing with DNA biosensors (64) 143

Partial starvation stress

Electrochemical investigation of the dynamics of *Mycobacterium smegmatis* cells' transformation to dormant, nonculturable form (64) 125

Phenols

Phenols monitoring and Hill coefficient evaluation using tyrosinase-based amperometric biosensors (64) 47

Phenosafranin/Phenosafranine

An amperometric nitrate reductase–phenosafranin electrode: kinetic aspects and analytical applications (64) 61

Pith cavity

Study of salt permeation process into *Vigna angularis* using Ag/AgCl electrodes (64) 29

p-methylamino-phenolsulphate

A comparison between the use of a redox mediator in solution and of surface modified electrodes in the electrocatalytic oxidation of nicotinamide adenine dinucleotide (64) 157

Potential-step chronoamperometry

Simultaneous determination of charge number and diffusion coefficient of 2-chloro-1,4-dimethoxybenzene in acetonitrile using potential-step chronoamperometry (64) 109

Proliferation

Static and 50 Hz magnetic fields of 0.35 and 2.45 mT have no effect on the growth of *Saccharomyces cerevisiae* (64) 151

Quercetin

Electrochemical study of quercetin–DNA interactions: Part I. Analysis in incubated solutions (64) 133

Quercetin

Electrochemical study of quercetin–DNA interactions: Part II. In situ sensing with DNA biosensors (64) 143

Radical scavenging activity

Electrochemical study of quercetin–DNA interactions: Part I. Analysis in incubated solutions (64) 133

Radical scavenging activity

Electrochemical study of quercetin–DNA interactions: Part II. In situ sensing with DNA biosensors (64) 143

Revealing latent pathogens

Electrochemical investigation of the dynamics of *Mycobacterium smegmatis* cells' transformation to dormant, nonculturable form (64) 125

Saccharomyces cerevisiae

Static and 50 Hz magnetic fields of 0.35 and 2.45 mT have no effect on the growth of *Saccharomyces cerevisiae* (64) 151

Square wave voltammetry

DNA sensor for *o*-dianisidine (64) 85

Tyrosinase

Phenols monitoring and Hill coefficient evaluation using tyrosinase-based amperometric biosensors (64) 47

Vigna angularis

Study of salt permeation process into *Vigna angularis* using Ag/AgCl electrodes (64) 29

Voltammetry

Voltammetric analysis of drugs (64) 99

Yeast

Static and 50 Hz magnetic fields of 0.35 and 2.45 mT have no effect on the growth of *Saccharomyces cerevisiae* (64) 151
