|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Indirect electrochemical reduction of nicotinamide coenzymes<br>K. Vuorilehto, S. Lütz and C. Wandrey . . . . .                                                                                                                                                                    | 1  |
| Effects of palmitic acid and cholesterol on proton transport across black lipid membranes<br>K. Brunaldi, M.A. Miranda, F. Abdulkader, R. Curi and J. Procopio . . . . .                                                                                                           | 9  |
| A novel immunosensor based on immobilization of hepatitis B surface antibody on platinum electrode modified colloidal gold and polyvinyl butyral as matrices <i>via</i> electrochemical impedance spectroscopy<br>D. Tang, R. Yuan, Y. Chai, J. Dai, X. Zhong and Y. Liu . . . . . | 15 |
| The effect of polyamidoamine dendrimers on human erythrocyte membrane acetylcholinesterase activity<br>B. Klajnert, M. Sadowska and M. Bryszewska . . . . .                                                                                                                        | 23 |
| Surface area involved in transdermal transport of charged species due to skin electroporation<br>U. Pliquet and C. Gusbeth . . . . .                                                                                                                                               | 27 |
| An amperometric hydrogen peroxide biosensor based on immobilizing horseradish peroxidase to a nano-Au monolayer supported by sol-gel derived carbon ceramic electrode<br>C.-X. Lei, S.-Q. Hu, N. Gao, G.-L. Shen and R.-Q. Yu . . . . .                                            | 33 |
| Direct determination of brucine by square wave voltammetry on 4-amino-2-mercaptopyrimidine self-assembled monolayer gold electrode<br>X.-H. Zhang, S.-F. Wang and N.-J. Sun . . . . .                                                                                              | 41 |
| Direct spectroelectrochemical titration of glutathione<br>V. Reipa . . . . .                                                                                                                                                                                                       | 47 |
| Study on the enhancement of catalytic activity for hemoglobin by quinhydrone in poly( <i>o</i> -aminophenol) film<br>W. Tao, Y. Liu, D. Pan, L. Nie and S. Yao . . . . .                                                                                                           | 51 |
| Strong static magnetic field effects on yeast proliferation and distribution<br>M. Iwasaka, M. Ikehata, J. Miyakoshi and S. Ueno . . . . .                                                                                                                                         | 59 |
| Redox kinetic measurements of glutathione at the mercury electrode by means of square-wave voltammetry. The role of copper, cadmium and zinc ions<br>M. Mladenov, V. Mirčeski, I. Gjorgoski and B. Jordanoski . . . . .                                                            | 69 |
| Electrochemical cleavage of DNA in the presence of copper-sulfosalicylic acid complex<br>Y.-L. Wang, Y.-C. Liu, Z.-S. Yang and G.-C. Zhao . . . . .                                                                                                                                | 77 |
| Deactivation of bilirubin oxidase by a product of the reaction of urate and O <sub>2</sub><br>C. Kang, H. Shin, Y. Zhang and A. Heller . . . . .                                                                                                                                   | 83 |
