

Subject Index to Volume 70

- Actin**
 Mechanism of actin polymerization by myosin subfragment-1 probed by dynamic light scattering (70) 53
- Actin polymerization**
 Mechanism of actin polymerization by myosin subfragment-1 probed by dynamic light scattering (70) 53
- Adenine**
 Electrochemical behaviour of 2,8-dihydroxyadenine at a glassy carbon electrode (70) 141
 Electrocatalytic properties of guanine, adenine, guanosine-5'-monophosphate, and ssDNA by Fe(II) bis(2,2':6',2''-terpyridine), Fe(II) tris(1,10-phenanthroline), and poly-Fe(II) tris(5-amino-1,10-phenanthroline) (70) 452
- Aggregation**
 Maxwell displacement current allows to study structural changes of gramicidin A in monolayers at the air–water interface (70) 469
- Air plasma activation**
 Electrochemical detection of *E. coli* 16S rDNA sequence using air-plasma-activated fullerene-impregnated screen printed electrodes (70) 481
- Alamethicin**
 Ion channels of N-terminally linked alamethicin dimers: Enhancement of cation-selectivity by substitution of Glu for Gln at position 7 (70) 380
- Albumin adsorption**
 Interactions of adsorbed albumin with underpotentially deposited copper on gold piezoelectrodes (70) 155
- Amperometry**
 Electrocatalytic activity of cobalt phthalocyanine CoPc adsorbed on a graphite electrode for the oxidation of reduced L-glutathione (GSH) and the reduction of its disulfide (GSSG) at physiological pH (70) 147
- Anaerobic**
 Optimization of the biological component of a bioelectrochemical cell (70) 165
- β- and γ-cyclodextrins**
 Cyclodextrin/chlorophyll *a* complexes as supramolecular photosensitizers (70) 39
- Anhydrous organic solvent**
 Electroenzymatic reactions with oxygen on laccase-modified electrodes in anhydrous (pure) organic solvent (70) 199
- Anionic surfactant**
 Comparative study on the interaction of DNA with three different kinds of surfactants and the formation of multilayer films (70) 301
- Antagonists**
 Simultaneous detection of L-glutamate and nitric oxide from adherently growing cells at known distance using disk shaped dual electrodes (70) 173
- Anthrax**
 Specific electrochemical phage sensing for *Bacillus cereus* and *Mycobacterium smegmatis* (70) 180
- Antibody**
 Impedance sensing of allergen–antibody interaction on glassy carbon electrode modified by gold electrodeposition (70) 257
- Antimicrobial**
 Electrochemical screening of anti-microbial peptide LL-37 interaction with phospholipids (70) 205
- Antioxidant**
 Study of the interaction between oxygen and bile salts (70) 524
- Antitumor**
 Studies of interactions among cobalt(III) polypyridyl complexes, 6-mercaptopurine and DNA (70) 446
- Aqueous solutions**
 Study on the aggregation and electrochemical properties of Rose Bengal in aqueous solution of cyclodextrins (70) 44
- Arcing**
 Increase of the roughness of the stainless-steel anode surface due to the exposure to high-voltage electric pulses as revealed by atomic force microscopy (70) 519
- Area-pressure isotherms**
 Maxwell displacement current allows to study structural changes of gramicidin A in monolayers at the air–water interface (70) 469
- Atomic force microscopy**
 Conformational change of membrane proteins leads to shape changes of red blood cells (70) 122
- Au electrode**
 Electrochemical piezoelectric quartz crystal impedance study on the interaction between concanavalin A and glycogen at Au electrodes (70) 348
- Bacteria**
 Optimization of the biological component of a bioelectrochemical cell (70) 165
- Bacterial elicitors**
 Application of cell-based biosensors for the detection of bacterial elicitor flagellin (70) 192
- Bacterial growth**
 Redox sensing by *Escherichia coli*: Effects of copper ions as oxidizers on proton-coupled membrane transport (70) 58
- Bacterial porin**
 Electrostatic properties and macroscopic electrodiffusion in OmpF porin and mutants (70) 320
- Bacteriophage**
 Specific electrochemical phage sensing for *Bacillus cereus* and *Mycobacterium smegmatis* (70) 180
- Benzylamine**
 Immobilization stress increases endogenous monoamine oxidase (MAO) inhibitor in rat liver (70) 308
- Bilayer lipid membrane**
 Simulation of electroporated cell by chronopotentiometry (70) 83
- Bile salts**
 Study of the interaction between oxygen and bile salts (70) 524
- Biochip**
 A new exposure system for the *in vitro* detection of GHz field effects on neuronal networks (70) 104
- Biosensor**
 Direct electrochemistry of glucose oxidase in a colloid Au–dihexadecylphosphate composite film and its application to develop a glucose biosensor (70) 335
 A simple method to fabricate a chitosan-gold nanoparticles film and its application in glucose biosensor (70) 342

- Biosensors
Direct electrochemistry of glucose oxidase immobilized on a hexagonal mesoporous silica-MCM-41 matrix (70) 250
- Boron doped diamond electrode
Electrochemical behaviors of native and thermally denatured fish DNA in the presence of cytosine derivatives and porphyrin by cyclic voltammetry using boron-doped diamond electrode (70) 435
- Boundary element method
Effects of T-tubules on dielectric spectra of skeletal muscle simulated by boundary element method with two-dimensional models (70) 532
- Brdicka reaction
Electrochemical determination of Ag-ions in environment waters and their action on plant embryos (70) 508
- Breakdown voltage
Determination of the lipid bilayer breakdown voltage by means of linear rising signal (70) 23
- BSA
Interactions of adsorbed albumin with underpotentially deposited copper on gold piezoelectrodes (70) 155
- Capacitance
Determination of the lipid bilayer breakdown voltage by means of linear rising signal (70) 23
- Carbon nanotube
Electrochemical parameters of ethamsylate at multi-walled carbon nanotube modified glassy carbon electrodes (70) 296
- Carbon paste electrode
Voltammetric determination of ethinylestradiol at a carbon paste electrode in the presence of cetyl pyridine bromine (70) 263
Electrochemical determination of Ag-ions in environment waters and their action on plant embryos (70) 508
- Catalysis
The effects of conductivity and electrochemical doping on the reduction of methemoglobin immobilized in nanoparticulate TiO₂ films (70) 221
- Cationic surfactant
Comparative study on the interaction of DNA with three different kinds of surfactants and the formation of multilayer films (70) 301
- Cell proliferation
Antiproliferative effect of millimeter radiation on human erythromyeloid leukemia cell line K562 in culture: Ultrastructural- and metabolic-induced changes (70) 214
- Cell shape
Conformational change of membrane proteins leads to shape changes of red blood cells (70) 122
- Cell suspension
Protein influence on the plasma membrane dielectric properties: In vivo study utilizing dielectric spectroscopy and fluorescence microscopy (70) 542
- Cell ultrastructure
Antiproliferative effect of millimeter radiation on human erythromyeloid leukemia cell line K562 in culture: Ultrastructural- and metabolic-induced changes (70) 214
- Cell volume
Na-nitroprusside and HgCl₂ modify the water permeability and volume of human erythrocytes (70) 462
- Cell-based biosensors
Application of cell-based biosensors for the detection of bacterial elicitor flagellin (70) 192
- Cell-pathogen interaction
Application of cell-based biosensors for the detection of bacterial elicitor flagellin (70) 192
- Cetyl pyridine bromide
Voltammetric determination of ethinylestradiol at a carbon paste electrode in the presence of cetyl pyridine bromine (70) 263
- CFU number
Effect of electromagnetic fields on the denitrification activity of *Paracoccus denitrificans* (70) 91
Effects of low-frequency magnetic fields on the viability of yeast *Saccharomyces cerevisiae* (70) 115
- Channel selectivity
Electrostatic properties and macroscopic electrodiffusion in OmpF porin and mutants (70) 320
- Charge selectivity
Ion channels of N-terminally linked alamethicin dimers: Enhancement of cation-selectivity by substitution of Glu for Gln at position 7 (70) 380
- Chemical analytics
Electrochemical oxidation of morin and interaction with DNA (70) 356
- Chemically modified electrode
Direct electrochemistry of glucose oxidase immobilized on a hexagonal mesoporous silica-MCM-41 matrix (70) 250
- ChEt
Development of cholesterol biosensor based on immobilized cholesterol esterase and cholesterol oxidase on oxygen electrode for the determination of total cholesterol in food samples (70) 375
- Chitosan
Electrochemical detection of short sequences related to the hepatitis B virus using MB on chitosan-modified CPE (70) 245
A simple method to fabricate a chitosan-gold nanoparticles film and its application in glucose biosensor (70) 342
- Chlorophyll *a*
Cyclodextrin/chlorophyll *a* complexes as supramolecular photosensitizers (70) 39
- Cholesterol biosensor
Development of cholesterol biosensor based on immobilized cholesterol esterase and cholesterol oxidase on oxygen electrode for the determination of total cholesterol in food samples (70) 375
- ChOX
Development of cholesterol biosensor based on immobilized cholesterol esterase and cholesterol oxidase on oxygen electrode for the determination of total cholesterol in food samples (70) 375
- Chronocoulometry
Preliminary electrochemical studies of the flavohaemoprotein from *Ralstonia eutropha* entrapped in a film of methyl cellulose: Activation of the reduction of dioxygen (70) 185
- Chronopotentiometry
Simulation of electroporated cell by chronopotentiometry (70) 83
- Cobalt phthalocyanine
Electrocatalytic activity of cobalt phthalocyanine CoPc adsorbed on a graphite electrode for the oxidation of reduced L-glutathione (GSH) and the reduction of its disulfide (GSSG) at physiological pH (70) 147
- Cobalt polypyridyl complexes
Studies of interactions among cobalt(III) polypyridyl complexes, 6-mercaptopurine and DNA (70) 446
- Coenzymes Q₁₀ and Q₀
Cathodic reduction of coenzyme Q₁₀ on glassy carbon electrode in acetic acid-acetonitrile solutions (70) 495
- Colloid Au
Direct electrochemistry of glucose oxidase in a colloid Au-dihexadecylphosphate composite film and its application to develop a glucose biosensor (70) 335
- Complex 1:1
Interfacial tension of the lipid membrane formed from lipid-fatty acid and lipid-amine systems (70) 28
- Complex permittivity
Effects of T-tubules on dielectric spectra of skeletal muscle simulated by boundary element method with two-dimensional models (70) 532
- Computationally efficient simulation
Electric field mediated DNA motion model (70) 101

- Concanavalin A
Electrochemical piezoelectric quartz crystal impedance study on the interaction between concanavalin A and glycogen at Au electrodes (70) 348
- Conductivity
Protein influence on the plasma membrane dielectric properties: In vivo study utilizing dielectric spectroscopy and fluorescence microscopy (70) 542
- Copper ions
Redox sensing by *Escherichia coli*: Effects of copper ions as oxidizers on proton-coupled membrane transport (70) 58
- Current-clamp experiment
Simulation of electroporated cell by chronopotentiometry (70) 83
- Current/voltage characteristics
Nonlinear current-voltage relationship of the plasma membrane of single CHO cells (70) 71
- Cu-u.p.d.
Interactions of adsorbed albumin with underpotentially deposited copper on gold piezoelectrodes (70) 155
- Cyclic voltammetry
Preliminary electrochemical studies of the flavohaemoprotein from *Ralstonia eutropha* entrapped in a film of methyl cellulose: Activation of the reduction of dioxygen (70) 185
Sodium dodecyl sulfate-modified carbon paste electrodes for selective determination of dopamine in the presence of ascorbic acid (70) 408
Electrochemical behaviors of native and thermally denatured fish DNA in the presence of cytosine derivatives and porphyrin by cyclic voltammetry using boron-doped diamond electrode (70) 435
Studies of interactions among cobalt(III) polypyridyl complexes, 6-mercaptopurine and DNA (70) 446
Cathodic reduction of coenzyme Q₁₀ on glassy carbon electrode in acetic acid-acetonitrile solutions (70) 495
- Cyclodextrins
Study on the aggregation and electrochemical properties of Rose Bengal in aqueous solution of cyclodextrins (70) 44
- L-Cysteine
Direct electrochemistry behavior of cytochrome *c*/L-cysteine modified electrode and its electrocatalytic oxidation to nitric oxide (70) 416
- Cytochrome *c*
Direct electrochemistry behavior of cytochrome *c*/L-cysteine modified electrode and its electrocatalytic oxidation to nitric oxide (70) 416
- Cytoplasmic ion mobility
On the temperature dependence of the dielectric membrane properties of human red blood cells (70) 134
- 3D electrode
Using a micro electroporation chip to determine the optimal physical parameters in the uptake of biomolecules in HeLa cells (70) 363
- Denatured DNA
Electrochemical behaviors of native and thermally denatured fish DNA in the presence of cytosine derivatives and porphyrin by cyclic voltammetry using boron-doped diamond electrode (70) 435
- Dendrimers
Influence of ionic strength, pH and aptamer configuration for binding affinity to thrombin (70) 127
- Denitrification
Effect of electromagnetic fields on the denitrification activity of *Paracoccus denitrificans* (70) 91
- Deoxyribonucleate acid (DNA)
Electrochemical oxidation of morin and interaction with DNA (70) 356
- Detection
Specific electrochemical phage sensing for *Bacillus cereus* and *Mycobacterium smegmatis* (70) 180
- Determination
Electrochemical parameters of ethamsylate at multi-walled carbon nanotube modified glassy carbon electrodes (70) 296
- 4',6-diamidino-2-phenylindole (DAPI)
DNA biosensor based on the electrochemiluminescence of Ru(bpy)₃²⁺ with DNA-binding intercalators (70) 228
- Dielectric model
Dielectric properties of aqueous zwitterionic liposome suspensions (70) 328
- Dielectric relaxation
Effects of T-tubules on dielectric spectra of skeletal muscle simulated by boundary element method with two-dimensional models (70) 532
- Dielectric spectra
Dielectric properties of aqueous zwitterionic liposome suspensions (70) 328
- Differential pulse voltammetry
Study on the electrochemical behavior and differential pulse voltammetric determination of rhein using a nanoparticle composite film-modified electrode (70) 369
Sodium dodecyl sulfate-modified carbon paste electrodes for selective determination of dopamine in the presence of ascorbic acid (70) 408
- Digital simulation
Cathodic reduction of coenzyme Q₁₀ on glassy carbon electrode in acetic acid-acetonitrile solutions (70) 495
- Dihexadecylphosphate
Direct electrochemistry of glucose oxidase in a colloid Au-dihexadecylphosphate composite film and its application to develop a glucose biosensor (70) 335
- 2,8-dihydroxyadenine
Electrochemical behaviour of 2,8-dihydroxyadenine at a glassy carbon electrode (70) 141
- Dimethyl sulfoxide
Electroenzymatic reactions with oxygen on laccase-modified electrodes in anhydrous (pure) organic solvent (70) 199
- Dioxygen reduction activation
Preliminary electrochemical studies of the flavohaemoprotein from *Ralstonia eutropha* entrapped in a film of methyl cellulose: Activation of the reduction of dioxygen (70) 185
- Direct electrochemistry
Direct electrochemistry of glucose oxidase immobilized on a hexagonal mesoporous silica-MCM-41 matrix (70) 250
Layer-by-layer films of hemoglobin or myoglobin assembled with zeolite particles: Electrochemistry and electrocatalysis (70) 311
- DNA
Biomolecule-nanoparticle hybrid systems for bioelectronic applications (70) 2
Electrochemical behaviour of 2,8-dihydroxyadenine at a glassy carbon electrode (70) 141
DNA/Poly(*p*-aminobenzenesulfonic acid) composite bi-layer modified glassy carbon electrode for determination of dopamine and uric acid under coexistence of ascorbic acid (70) 235
Studies of interactions among cobalt(III) polypyridyl complexes, 6-mercaptopurine and DNA (70) 446
Electrocatalytic properties of guanine, adenine, guanosine-5'-monophosphate, and ssDNA by Fe(II) bis(2,2':6',2''-terpyridine), Fe(II) tris(1,10-phenanthroline), and poly-Fe(II) tris(5-amino-1,10-phenanthroline) (70) 452
- DNA aptamers
Influence of ionic strength, pH and aptamer configuration for binding affinity to thrombin (70) 127
- DNA biosensor
DNA biosensor based on the electrochemiluminescence of Ru(bpy)₃²⁺ with DNA-binding intercalators (70) 228
Electrochemical detection of short sequences related to the hepatitis B virus using MB on chitosan-modified CPE (70) 245
- DNA electrotransfer
Real time electroporation control for accurate and safe in vivo non-viral gene therapy (70) 501
- DNA hybridization detection
DNA biosensor based on the electrochemiluminescence of Ru(bpy)₃²⁺ with DNA-binding intercalators (70) 228

- DNA vaccine
A single HBsAg DNA vaccination in combination with electroporation elicits long-term antibody responses in sheep (70) 269
- DNA-binding intercalator
DNA biosensor based on the electrochemiluminescence of Ru(bpy)₃²⁺ with DNA-binding intercalators (70) 228
- Dopamine
DNA/Poly(*p*-aminobenzenesulfonic acid) composite bi-layer modified glassy carbon electrode for determination of dopamine and uric acid under coexistence of ascorbic acid (70) 235
Sodium dodecyl sulfate-modified carbon paste electrodes for selective determination of dopamine in the presence of ascorbic acid (70) 408
- Doping
The effects of conductivity and electrochemical doping on the reduction of methemoglobin immobilized in nanoparticulate TiO₂ films (70) 221
- DPSTE
The effect of the ionophore valinomycin on biomimetic solid supported lipid DPSTE/EPC membranes (70) 387
- Drug and gene delivery
Electric field mediated DNA motion model (70) 101
- Drugs
Simultaneous detection of L-glutamate and nitric oxide from adherently growing cells at known distance using disk shaped dual electrodes (70) 173
- dsDNA
Comparative study on the interaction of DNA with three different kinds of surfactants and the formation of multilayer films (70) 301
Electrooxidation of dissolved dsDNA backed by *in situ* UV-Vis spectroscopy (70) 440
- Dual electrode
Simultaneous detection of L-glutamate and nitric oxide from adherently growing cells at known distance using disk shaped dual electrodes (70) 173
- Dynamic light scattering
Focus on the aggregation processes of Photosystem II complexes (70) 33
Dielectric properties of aqueous zwitterionic liposome suspensions (70) 328
- E. coli*
Redox sensing by *Escherichia coli*: Effects of copper ions as oxidizers on proton-coupled membrane transport (70) 58
- E. coli* 16S rDNA
Electrochemical detection of *E. coli* 16S rDNA sequence using air-plasma-activated fullerene-impregnated screen printed electrodes (70) 481
- Egg-PC
The effect of the ionophore valinomycin on biomimetic solid supported lipid DPSTE/EPC membranes (70) 387
- Electric cell parameters
On the temperature dependence of the dielectric membrane properties of human red blood cells (70) 134
- Electric field
Modeling the induction of lipid membrane electroporation (70) 64
- Electrical Conductivity
High electrical field effects on cell membranes (70) 275
- Electrical conductivity
In vivo electrical impedance measurements during and after electroporation of rat liver (70) 287
- Electrical impedance
In vivo electrical impedance measurements during and after electroporation of rat liver (70) 287
- Electroanalysis
Voltammetric determination of ethinylestradiol at a carbon paste electrode in the presence of cetyl pyridine bromine (70) 263
- Electrocatalysis
Study on the electrochemical behavior and differential pulse voltammetric determination of rhein using a nanoparticle composite film-modified electrode (70) 369
Direct electrochemistry behavior of cytochrome *c*/L-cysteine modified electrode and its electrocatalytic oxidation to nitric oxide (70) 416
- Electrocatalytic properties of guanine, adenine, guanosine-5'-monophosphate, and ssDNA by Fe(II) bis(2,2':6',2''-terpyridine), Fe(II) tris(1,10-phenanthroline), and poly-Fe(II) tris(5-amino-1,10-phenanthroline) (70) 452
- Electrochemical
Specific electrochemical phage sensing for *Bacillus cereus* and *Mycobacterium smegmatis* (70) 180
- Electrochemical catalysis
Layer-by-layer films of hemoglobin or myoglobin assembled with zeolite particles: Electrochemistry and electrocatalysis (70) 311
- Electrochemical deposition
A simple method to fabricate a chitosan-gold nanoparticles film and its application in glucose biosensor (70) 342
- Electrochemical detection
Electrocatalytic activity of cobalt phthalocyanine CoPc adsorbed on a graphite electrode for the oxidation of reduced L-glutathione (GSH) and the reduction of its disulfide (GSSG) at physiological pH (70) 147
- Electrochemical hybridization detection
Electrochemical detection of *E. coli* 16S rDNA sequence using air-plasma-activated fullerene-impregnated screen printed electrodes (70) 481
- Electrochemical impedance spectroscopy
The effect of the ionophore valinomycin on biomimetic solid supported lipid DPSTE/EPC membranes (70) 387
- Electrochemical impedance spectroscopy (EIS)
Impedance sensing of allergen-antibody interaction on glassy carbon electrode modified by gold electrodeposition (70) 257
- Electrochemical Impedance Spectroscopy (EIS)
Electrical probing of endothelial cell behaviour on a fibronectin/polystyrene/thiol/gold electrode by Faradaic electrochemical impedance spectroscopy (EIS) (70) 401
- Electrochemical indicators
Influence of ionic strength, pH and aptamer configuration for binding affinity to thrombin (70) 127
- Electrochemical piezoelectric quartz crystal impedance
Electrochemical piezoelectric quartz crystal impedance study on the interaction between concanavalin A and glycogen at Au electrodes (70) 348
- Electrochemical study
Comparative study on the interaction of DNA with three different kinds of surfactants and the formation of multilayer films (70) 301
- Electrochemiluminescence (ECL)
DNA biosensor based on the electrochemiluminescence of Ru(bpy)₃²⁺ with DNA-binding intercalators (70) 228
- Electrochemistry
Biomolecule-nanoparticle hybrid systems for bioelectronic applications (70) 2
Electrochemical parameters of ethamsylate at multi-walled carbon nanotube modified glassy carbon electrodes (70) 296
- Electrochemotherapy
Electrochemotherapy of Mycosis fungoides by interferon- α (70) 283
Real time electroporation control for accurate and safe in vivo non-viral gene therapy (70) 501
- Electrodiffusion
Electrostatic properties and macroscopic electrodiffusion in OmpF porin and mutants (70) 320
- Electroenzymatic reaction
Electroenzymatic reactions with oxygen on laccase-modified electrodes in anhydrous (pure) organic solvent (70) 199
- Electro-generated superoxide ion
Study of the interaction between oxygen and bile salts (70) 524
- Electrogenesis
Optimization of the biological component of a bioelectrochemical cell (70) 165
- Electrolysis
Increase of the roughness of the stainless-steel anode surface due to the exposure to high-voltage electric pulses as revealed by atomic force microscopy (70) 519

- Electrolytic gel
Electric field modulation in tissue electroporation with electrolytic and non-electrolytic additives (70) 551
- Electron transfer resistance (R_{CT})
Impedance sensing of allergen–antibody interaction on glassy carbon electrode modified by gold electrodeposition (70) 257
- Electrooxidation
Electrooxidation of dissolved dsDNA backed by *in situ* UV–Vis spectroscopy (70) 440
- Electropermeabilization
Real time electroporation control for accurate and safe *in vivo* non-viral gene therapy (70) 501
Electric field modulation in tissue electroporation with electrolytic and non-electrolytic additives (70) 551
- Electrophoresis
Electric field mediated DNA motion model (70) 101
- Electroporation
Modeling the induction of lipid membrane electropermeabilization (70) 64
Evaluation of cytotoxic effect of photodynamic therapy in combination with electroporation *in vitro* (70) 78
Simulation of electroporated cell by chronopotentiometry (70) 83
A single HBsAg DNA vaccination in combination with electroporation elicits long-term antibody responses in sheep (70) 269
High electrical field effects on cell membranes (70) 275
In vivo electrical impedance measurements during and after electroporation of rat liver (70) 287
Real time electroporation control for accurate and safe *in vivo* non-viral gene therapy (70) 501
Increase of the roughness of the stainless-steel anode surface due to the exposure to high-voltage electric pulses as revealed by atomic force microscopy (70) 519
Electric field modulation in tissue electroporation with electrolytic and non-electrolytic additives (70) 551
- Electropore resealing
Simulation of electroporated cell by chronopotentiometry (70) 83
- Electroreduction
Cathodic reduction of coenzyme Q₁₀ on glassy carbon electrode in acetic acid–acetonitrile solutions (70) 495
- Electrorotation
On the temperature dependence of the dielectric membrane properties of human red blood cells (70) 134
- EMF
A new exposure system for the *in vitro* detection of GHz field effects on neuronal networks (70) 104
- Encapsulation
Interactions between PAMAM dendrimers and gallic acid molecules studied by spectrofluorimetric methods (70) 50
- Endogenous MAO inhibitor
Immobilization stress increases endogenous monoamine oxidase (MAO) inhibitor in rat liver (70) 308
- Endothelial cell
Electrical probing of endothelial cell behaviour on a fibronectin/polystyrene/thiol/gold electrode by Faradaic electrochemical impedance spectroscopy (EIS) (70) 401
- Enzymes
Biomolecule–nanoparticle hybrid systems for bioelectronic applications (70) 2
- EPC
The effect of the ionophore valinomycin on biomimetic solid supported lipid DPPTE/EPC membranes (70) 387
- EQCN
Interactions of adsorbed albumin with underpotentially deposited copper on gold piezoelectrodes (70) 155
- Erythrocyte
Conformational change of membrane proteins leads to shape changes of red blood cells (70) 122
- Erythrocytes
On the temperature dependence of the dielectric membrane properties of human red blood cells (70) 134
- Ethamsylate
Electrochemical parameters of ethamsylate at multi-walled carbon nanotube modified glassy carbon electrodes (70) 296
- Ethinylestradiol
Voltammetric determination of ethinylestradiol at a carbon paste electrode in the presence of cetyl pyridine bromine (70) 263
- Fermentation
Redox sensing by *Escherichia coli*: Effects of copper ions as oxidizers on proton-coupled membrane transport (70) 58
- Fibronectin
Electrical probing of endothelial cell behaviour on a fibronectin/polystyrene/thiol/gold electrode by Faradaic electrochemical impedance spectroscopy (EIS) (70) 401
- Film-modified electrodes
Electrocatalytic properties of guanine, adenine, guanosine-5'-monophosphate, and ssDNA by Fe(II) bis(2,2':6',2''-terpyridine), Fe(II) tris(1,10-phenanthroline), and poly-Fe(II) tris(5-amino-1,10-phenanthroline) (70) 452
- Finite element modeling
Real time electroporation control for accurate and safe *in vivo* non-viral gene therapy (70) 501
- Flagellin
Application of cell-based biosensors for the detection of bacterial elicitor flagellin (70) 192
- Flavohaemoprotein
Preliminary electrochemical studies of the flavohaemoprotein from *Ralstonia eutropha* entrapped in a film of methyl cellulose: Activation of the reduction of dioxygen (70) 185
- Fluorescence
Interactions between PAMAM dendrimers and gallic acid molecules studied by spectrofluorimetric methods (70) 50
Protein influence on the plasma membrane dielectric properties: *In vivo* study utilizing dielectric spectroscopy and fluorescence microscopy (70) 542
- Fluorescence anisotropy
Probing organization and communication at layered interfaces (70) 421
- Fluorescence quenching
Focus on the aggregation processes of Photosystem II complexes (70) 33
- Food sample analysis
Development of cholesterol biosensor based on immobilized cholesterol esterase and cholesterol oxidase on oxygen electrode for the determination of total cholesterol in food samples (70) 375
- Fullerene impregnated screen printed electrodes
Electrochemical detection of *E. coli* 16S rDNA sequence using air-plasma-activated fullerene-impregnated screen printed electrodes (70) 481
- Gallic acid
Interactions between PAMAM dendrimers and gallic acid molecules studied by spectrofluorimetric methods (70) 50
- Gene therapy
Real time electroporation control for accurate and safe *in vivo* non-viral gene therapy (70) 501
Electric field modulation in tissue electroporation with electrolytic and non-electrolytic additives (70) 551
- Glassy carbon electrode
Electrochemical determination of Ag-ions in environment waters and their action on plant embryos (70) 508

- Glassy carbon electrode (GCE)
 Electrochemical oxidation of morin and interaction with DNA (70) 356
- Glucose
 Direct electrochemistry of glucose oxidase immobilized on a hexagonal mesoporous silica-MCM-41 matrix (70) 250
 Direct electrochemistry of glucose oxidase in a colloid Au-di-hexadecyl-phosphate composite film and its application to develop a glucose biosensor (70) 335
- Glucose metabolism
 Antiproliferative effect of millimeter radiation on human erythromyeloid leukemia cell line K562 in culture: Ultrastructural- and metabolic-induced changes (70) 214
- Glucose oxidase
 Direct electrochemistry of glucose oxidase immobilized on a hexagonal mesoporous silica-MCM-41 matrix (70) 250
 Direct electrochemistry of glucose oxidase in a colloid Au-di-hexadecyl-phosphate composite film and its application to develop a glucose biosensor (70) 335
 A simple method to fabricate a chitosan-gold nanoparticles film and its application in glucose biosensor (70) 342
- Glutamate
 Simultaneous detection of L-glutamate and nitric oxide from adherently growing cells at known distance using disk shaped dual electrodes (70) 173
- L-glutathione
 Electrocatalytic activity of cobalt phthalocyanine CoPc adsorbed on a graphite electrode for the oxidation of reduced L-glutathione (GSH) and the reduction of its disulfide (GSSG) at physiological pH (70) 147
- Glycogen
 Electrochemical piezoelectric quartz crystal impedance study on the interaction between concanavalin A and glycogen at Au electrodes (70) 348
- Gold electrodeposition
 Impedance sensing of allergen-antibody interaction on glassy carbon electrode modified by gold electrodeposition (70) 257
- Gold nanoparticles
 A simple method to fabricate a chitosan-gold nanoparticles film and its application in glucose biosensor (70) 342
- Gramicidin A
 Maxwell displacement current allows to study structural changes of gramicidin A in monolayers at the air-water interface (70) 469
- Graphite electrodes
 Effect of electromagnetic fields on the denitrification activity of *Paracoccus denitrificans* (70) 91
- Growth curve
 Effects of low-frequency magnetic fields on the viability of yeast *Saccharomyces cerevisiae* (70) 115
- Guanine
 Electrocatalytic properties of guanine, adenine, guanosine-5'-monophosphate, and ssDNA by Fe(II) bis(2,2':6',2''-terpyridine), Fe(II) tris(1,10-phenanthroline), and poly-Fe(II) tris(5-amino-1,10-phenanthroline) (70) 452
- H₂ production
 Redox sensing by *Escherichia coli*: Effects of copper ions as oxidizers on proton-coupled membrane transport (70) 58
- HBsAg
 A single HBsAg DNA vaccination in combination with electroporation elicits long-term antibody responses in sheep (70) 269
- HBV
 Electrochemical detection of short sequences related to the hepatitis B virus using MB on chitosan-modified CPE (70) 245
- HeLa cells
 Using a micro electroporation chip to determine the optimal physical parameters in the uptake of biomolecules in HeLa cells (70) 363
- Hemoglobin
 The effects of conductivity and electrochemical doping on the reduction of methemoglobin immobilized in nanoparticulate TiO₂ films (70) 221
 Layer-by-layer films of hemoglobin or myoglobin assembled with zeolite particles: Electrochemistry and electrocatalysis (70) 311
- Hexagonal mesoporous silica
 Direct electrochemistry of glucose oxidase immobilized on a hexagonal mesoporous silica-MCM-41 matrix (70) 250
- HgCl₂
 Na-nitroprusside and HgCl₂ modify the water permeability and volume of human erythrocytes (70) 462
- High Field
 High electrical field effects on cell membranes (70) 275
- Higher plants
 Lipid content in higher plants under osmotic stress (70) 12
- Host-guest systems
 Interactions between PAMAM dendrimers and gallic acid molecules studied by spectrofluorimetric methods (70) 50
- Human erythrocyte
 Na-nitroprusside and HgCl₂ modify the water permeability and volume of human erythrocytes (70) 462
- Hybridization
 Electrochemical detection of short sequences related to the hepatitis B virus using MB on chitosan-modified CPE (70) 245
- Immobilization stress (IMMO)
 Immobilization stress increases endogenous monoamine oxidase (MAO) inhibitor in rat liver (70) 308
- Immune memory
 A single HBsAg DNA vaccination in combination with electroporation elicits long-term antibody responses in sheep (70) 269
- Impedance
 Electrochemical screening of anti-microbial peptide LL-37 interaction with phospholipids (70) 205
- Impedance spectroscopy
 Sodium dodecyl sulfate-modified carbon paste electrodes for selective determination of dopamine in the presence of ascorbic acid (70) 408
- Inclusion complexes
 Study on the aggregation and electrochemical properties of Rose Bengal in aqueous solution of cyclodextrins (70) 44
- In-situ UV-Vis spectroelectrochemistry
 Electrooxidation of dissolved dsDNA backed by *in situ* UV-Vis spectroscopy (70) 440
- Interfacial electron transfer
 Probing organization and communication at layered interfaces (70) 421
- Interfacial polarization
 Effects of T-tubules on dielectric spectra of skeletal muscle simulated by boundary element method with two-dimensional models (70) 532
- Interfacial tension
 Interfacial tension of the lipid membrane formed from lipid-fatty acid and lipid-amine systems (70) 28
- Interferon- α
 Electrochemotherapy of Mycosis fungoides by interferon- α (70) 283
- Interquinone electron transfer
 Enthalpy/entropy driven activation of the first interquinone electron transfer in bacterial photosynthetic reaction centers embedded in vesicles of physiologically important phospholipids (70) 18
- Ion channel
 Ion channels of N-terminally linked alamethicin dimers: Enhancement of cation-selectivity by substitution of Glu for Gln at position 7 (70) 380
- Ionophores
 The effect of the ionophore valinomycin on biomimetic solid supported lipid DPTE/EPC membranes (70) 387
- Ireversible electroporation
 Electric field modulation in tissue electroporation with electrolytic and non-electrolytic additives (70) 551
- Jurkat cells
 Cyclodextrin/chlorophyll *a* complexes as supramolecular photosensitizers (70) 39

- K562 cells
Antiproliferative effect of millimeter radiation on human erythromyeloid leukemia cell line K562 in culture: Ultrastructural- and metabolic-induced changes (70) 214
- KClO₄
Study on the aggregation and electrochemical properties of Rose Bengal in aqueous solution of cyclodextrins (70) 44
- Laccase
Electroenzymatic reactions with oxygen on laccase-modified electrodes in anhydrous (pure) organic solvent (70) 199
- Large pores
Nonlinear current–voltage relationship of the plasma membrane of single CHO cells (70) 71
- Layer-by-layer assembly
Layer-by-layer films of hemoglobin or myoglobin assembled with zeolite particles: Electrochemistry and electrocatalysis (70) 311
- LiClO₄
Study on the aggregation and electrochemical properties of Rose Bengal in aqueous solution of cyclodextrins (70) 44
- Linear rising signal
Determination of the lipid bilayer breakdown voltage by means of linear rising signal (70) 23
- Lipid A
Electrochemical screening of anti-microbial peptide LL-37 interaction with phospholipids (70) 205
- Lipid bilayer
Determination of the lipid bilayer breakdown voltage by means of linear rising signal (70) 23
- Lipid Membrane
High electrical field effects on cell membranes (70) 275
- Lipid monolayers
Maxwell displacement current allows to study structural changes of gramicidin A in monolayers at the air–water interface (70) 469
- Lipids
Lipid content in higher plants under osmotic stress (70) 12
- Liposome suspension
Dielectric properties of aqueous zwitterionic liposome suspensions (70) 328
- Liposomes
Enthalpy/entropy driven activation of the first interquinone electron transfer in bacterial photosynthetic reaction centers embedded in vesicles of physiologically important phospholipids (70) 18
- Liquid chromatography
Electrochemical determination of Ag-ions in environment waters and their action on plant embryos (70) 508
- Liver
In vivo electrical impedance measurements during and after electroporation of rat liver (70) 287
- LL-37
Electrochemical screening of anti-microbial peptide LL-37 interaction with phospholipids (70) 205
- Low-frequency electromagnetic field
Effect of electromagnetic fields on the denitrification activity of *Paracoccus denitrificans* (70) 91
Effects of low-frequency magnetic fields on the viability of yeast *Saccharomyces cerevisiae* (70) 115
- Mass spectrometry
Lipid content in higher plants under osmotic stress (70) 12
- Maxwell displacement currents
Maxwell displacement current allows to study structural changes of gramicidin A in monolayers at the air–water interface (70) 469
- MB
Electrochemical detection of short sequences related to the hepatitis B virus using MB on chitosan-modified CPE (70) 245
- Membrane capacitance
On the temperature dependence of the dielectric membrane properties of human red blood cells (70) 134
- Membrane electroporation
Nonlinear current–voltage relationship of the plasma membrane of single CHO cells (70) 71
- Membrane permeability
Using a micro electroporation chip to determine the optimal physical parameters in the uptake of biomolecules in HeLa cells (70) 363
- MEMS
Using a micro electroporation chip to determine the optimal physical parameters in the uptake of biomolecules in HeLa cells (70) 363
- Mercury
Electrochemical screening of anti-microbial peptide LL-37 interaction with phospholipids (70) 205
- Metal adatom probe method
Interactions of adsorbed albumin with underpotentially deposited copper on gold piezoelectrodes (70) 155
- Methyl cellulose
Preliminary electrochemical studies of the flavohaemoprotein from *Ralstonia eutropha* entrapped in a film of methyl cellulose: Activation of the reduction of dioxygen (70) 185
- Methylene blue
Influence of ionic strength, pH and aptamer configuration for binding affinity to thrombin (70) 127
- Micro electroporation
Using a micro electroporation chip to determine the optimal physical parameters in the uptake of biomolecules in HeLa cells (70) 363
- Microbial *electrochemical* cell
Optimization of the biological component of a bioelectrochemical cell (70) 165
- Micro-sensor chip
A new exposure system for the *in vitro* detection of GHz field effects on neuronal networks (70) 104
- Millimeter radiation
Antiproliferative effect of millimeter radiation on human erythromyeloid leukemia cell line K562 in culture: Ultrastructural- and metabolic-induced changes (70) 214
- Model membrane
Modeling the induction of lipid membrane electroporabilization (70) 64
- Modified carbon paste electrode
Sodium dodecyl sulfate-modified carbon paste electrodes for selective determination of dopamine in the presence of ascorbic acid (70) 408
- Modified electrode
Electrocatalytic activity of cobalt phthalocyanine CoPc adsorbed on a graphite electrode for the oxidation of reduced L-glutathione (GSH) and the reduction of its disulfide (GSSG) at physiological pH (70) 147
Electrochemical parameters of ethamsylate at multi-walled carbon nanotube modified glassy carbon electrodes (70) 296
- Modified electrodes
Myoglobin modified electrodes as anchors for *d* metal cationic complexes (70) 394
- Molecular Dynamics
High electrical field effects on cell membranes (70) 275
- Monoamine oxidase (MAO)
Immobilization stress increases endogenous monoamine oxidase (MAO) inhibitor in rat liver (70) 308
- Monte Carlo
Modeling the induction of lipid membrane electroporabilization (70) 64
- Morin binding
Electrochemical oxidation of morin and interaction with DNA (70) 356
- MTT assay
Evaluation of cytotoxic effect of photodynamic therapy in combination with electroporation *in vitro* (70) 78

- Multi-electrode array
A new exposure system for the *in vitro* detection of GHz field effects on neuronal networks (70) 104
- Multilayer film
Comparative study on the interaction of DNA with three different kinds of surfactants and the formation of multilayer films (70) 301
- Muscle cell
Effects of T-tubules on dielectric spectra of skeletal muscle simulated by boundary element method with two-dimensional models (70) 532
- Mycosis fungoides
Electrochemotherapy of Mycosis fungoides by interferon- α (70) 283
- Myoglobin
Layer-by-layer films of hemoglobin or myoglobin assembled with zeolite particles: Electrochemistry and electrocatalysis (70) 311
Myoglobin modified electrodes as anchors for *d* metal cationic complexes (70) 394
- Myosin subfragment-1
Mechanism of actin polymerization by myosin subfragment-1 probed by dynamic light scattering (70) 53
- Na nitroprusside
Na-nitroprusside and HgCl₂ modify the water permeability and volume of human erythrocytes (70) 462
- Nanobiotechnology
Biomolecule–nanoparticle hybrid systems for bioelectronic applications (70) 2
- Nanoparticle
The effects of conductivity and electrochemical doping on the reduction of methemoglobin immobilized in nanoparticulate TiO₂ films (70) 221
- Nanoparticle composite film-modified electrode
Study on the electrochemical behavior and differential pulse voltammetric determination of rhein using a nanoparticle composite film-modified electrode (70) 369
- Nanoparticles
Biomolecule–nanoparticle hybrid systems for bioelectronic applications (70) 2
- Nanostructure
DNA/Poly(*p*-aminobenzenesulfonic acid) composite bi-layer modified glassy carbon electrode for determination of dopamine and uric acid under coexistence of ascorbic acid (70) 235
- Nitric oxide
Simultaneous detection of L-glutamate and nitric oxide from adherently growing cells at known distance using disk shaped dual electrodes (70) 173
Direct electrochemistry behavior of cytochrome *c*/L-cysteine modified electrode and its electrocatalytic oxidation to nitric oxide (70) 416
- Nonionic surfactant
Comparative study on the interaction of DNA with three different kinds of surfactants and the formation of multilayer films (70) 301
- Oligonucleotides
Electrochemical response of oligonucleotides on carbon paste electrode (70) 488
- OmpF
Electrostatic properties and macroscopic electrodiffusion in OmpF porin and mutants (70) 320
- Osmotic stress
Lipid content in higher plants under osmotic stress (70) 12
- Oxidation
Electrochemical behaviour of 2,8-dihydroxyadenine at a glassy carbon electrode (70) 141
- Oxidative damage
Electrochemical behaviour of 2,8-dihydroxyadenine at a glassy carbon electrode (70) 141
- Oxygen
Study of the interaction between oxygen and bile salts (70) 524
- PAMAM dendrimers
Interactions between PAMAM dendrimers and gallic acid molecules studied by spectrofluorimetric methods (70) 50
- Paracoccus denitrificans*
Effect of electromagnetic fields on the denitrification activity of *Paracoccus denitrificans* (70) 91
- PEF food processing
Increase of the roughness of the stainless-steel anode surface due to the exposure to high-voltage electric pulses as revealed by atomic force microscopy (70) 519
- Peptides
The effect of the ionophore valinomycin on biomimetic solid supported lipid DPTE/EPC membranes (70) 387
- Permittivity
Protein influence on the plasma membrane dielectric properties: In vivo study utilizing dielectric spectroscopy and fluorescence microscopy (70) 542
- Phase diagram
Using a micro electroporation chip to determine the optimal physical parameters in the uptake of biomolecules in HeLa cells (70) 363
- Phosphatidylcholine
Interfacial tension of the lipid membrane formed from lipid-fatty acid and lipid-amine systems (70) 28
- Phospholipid
Electrochemical screening of anti-microbial peptide LL-37 interaction with phospholipids (70) 205
- Photodynamic therapy
Cyclodextrin/chlorophyll *a* complexes as supramolecular photosensitizers (70) 39
- Photodynamic tumor therapy
Evaluation of cytotoxic effect of photodynamic therapy in combination with electroporation in vitro (70) 78
- Photoelectrochemistry
Biomolecule–nanoparticle hybrid systems for bioelectronic applications (70) 2
- Photosensitizers
Evaluation of cytotoxic effect of photodynamic therapy in combination with electroporation in vitro (70) 78
- Photosystem II
Focus on the aggregation processes of Photosystem II complexes (70) 33
- Planar BLM
Ion channels of N-terminally linked alamethicin dimers: Enhancement of cation-selectivity by substitution of Glu for Gln at position 7 (70) 380
- Polarography
Study of the interaction between oxygen and bile salts (70) 524
- Poly(*p*-aminobenzenesulfonic acid)
DNA/Poly(*p*-aminobenzenesulfonic acid) composite bi-layer modified glassy carbon electrode for determination of dopamine and uric acid under coexistence of ascorbic acid (70) 235
- Polystyrene
Electrical probing of endothelial cell behaviour on a fibronectin/polystyrene/thiol/gold electrode by Faradaic electrochemical impedance spectroscopy (EIS) (70) 401
- POPC
The effect of the ionophore valinomycin on biomimetic solid supported lipid DPTE/EPC membranes (70) 387
- Potential inversion
Cathodic reduction of coenzyme Q₁₀ on glassy carbon electrode in acetic acid–acetonitrile solutions (70) 495
- Pre-pore
Modeling the induction of lipid membrane electropermeabilization (70) 64
- Protein aggregation
Focus on the aggregation processes of Photosystem II complexes (70) 33
- Protein conformation
Conformational change of membrane proteins leads to shape changes of red blood cells (70) 122
- Protein–metal interaction
Myoglobin modified electrodes as anchors for *d* metal cationic complexes (70) 394

- Proton and potassium transport
 Redox sensing by *Escherichia coli*: Effects of copper ions as oxidizers on proton-coupled membrane transport (70) 58
- Proton NMR
 Na-nitroprusside and HgCl₂ modify the water permeability and volume of human erythrocytes (70) 462
- Protoplasts
 Lipid content in higher plants under osmotic stress (70) 12
- QCM
 Influence of ionic strength, pH and aptamer configuration for binding affinity to thrombin (70) 127
- Rat liver
 Immobilization stress increases endogenous monoamine oxidase (MAO) inhibitor in rat liver (70) 308
- Reaction centers
 Enthalpy/entropy driven activation of the first interquinone electron transfer in bacterial photosynthetic reaction centers embedded in vesicles of physiologically important phospholipids (70) 18
- Recombinant allergen
 Impedance sensing of allergen-antibody interaction on glassy carbon electrode modified by gold electrodeposition (70) 257
- Red blood cell
 Conformational change of membrane proteins leads to shape changes of red blood cells (70) 122
- Redox potential
 Redox sensing by *Escherichia coli*: Effects of copper ions as oxidizers on proton-coupled membrane transport (70) 58
- Reduction
 Electrochemical behaviour of 2,8-dihydroxyadenine at a glassy carbon electrode (70) 141
- Reversal potential
 Ion channels of N-terminally linked alamethicin dimers: Enhancement of cation-selectivity by substitution of Glu for Gln at position 7 (70) 380
- Rhein
 Study on the electrochemical behavior and differential pulse voltammetric determination of rhein using a nanoparticle composite film-modified electrode (70) 369
- Rose Bengal
 Study on the aggregation and electrochemical properties of Rose Bengal in aqueous solution of cyclodextrins (70) 44
- S. oneidensis* MR-1
 Optimization of the biological component of a bioelectrochemical cell (70) 165
- Saccharomyces cerevisiae*
 Effects of low-frequency magnetic fields on the viability of yeast *Saccharomyces cerevisiae* (70) 115
- SAM
 Myoglobin modified electrodes as anchors for *d* metal cationic complexes (70) 394
- Screen-printed electrodes
 Application of cell-based biosensors for the detection of bacterial elicitor flagellin (70) 192
- Sensor
 The effects of conductivity and electrochemical doping on the reduction of methemoglobin immobilized in nanoparticulate TiO₂ films (70) 221
- Sheep
 A single HBsAg DNA vaccination in combination with electroporation elicits long-term antibody responses in sheep (70) 269
- Silver ions
 Electrochemical determination of Ag-ions in environment waters and their action on plant embryos (70) 508
- Simultaneous detection
 Simultaneous detection of L-glutamate and nitric oxide from adherently growing cells at known distance using disk shaped dual electrodes (70) 173
- Single cell configuration
 Nonlinear current-voltage relationship of the plasma membrane of single CHO cells (70) 71
- Size effect
 Using a micro electroporation chip to determine the optimal physical parameters in the uptake of biomolecules in HeLa cells (70) 363
- Sodium dodecyl sulfate
 Sodium dodecyl sulfate-modified carbon paste electrodes for selective determination of dopamine in the presence of ascorbic acid (70) 408
- Solid supported biomimetic lipid bilayer membranes
 The effect of the ionophore valinomycin on biomimetic solid supported lipid DPPTE/EPC membranes (70) 387
- Somatic embryos
 Electrochemical determination of Ag-ions in environment waters and their action on plant embryos (70) 508
- Spectroelectrochemistry
 Preliminary electrochemical studies of the flavohaemoprotein from *Ralstonia eutropha* entrapped in a film of methyl cellulose: Activation of the reduction of dioxygen (70) 185
- Square wave voltammetry
 Electrochemical response of oligonucleotides on carbon paste electrode (70) 488
- Stability
 Development of cholesterol biosensor based on immobilized cholesterol esterase and cholesterol oxidase on oxygen electrode for the determination of total cholesterol in food samples (70) 375
- Stearic acid
 Interfacial tension of the lipid membrane formed from lipid-fatty acid and lipid-amine systems (70) 28
- Stearylamine
 Interfacial tension of the lipid membrane formed from lipid-fatty acid and lipid-amine systems (70) 28
- Structure/signal relationship
 Electrochemical response of oligonucleotides on carbon paste electrode (70) 488
- Surface potential
 Maxwell displacement current allows to study structural changes of gramicidin A in monolayers at the air-water interface (70) 469
- Surface topography
 Increase of the roughness of the stainless-steel anode surface due to the exposure to high-voltage electric pulses as revealed by atomic force microscopy (70) 519
- Surface-modification
 Probing organization and communication at layered interfaces (70) 421
- Tag-free detection
 Protein influence on the plasma membrane dielectric properties: In vivo study utilizing dielectric spectroscopy and fluorescence microscopy (70) 542
- The association constant
 Electrochemical piezoelectric quartz crystal impedance study on the interaction between concanavalin A and glycogen at Au electrodes (70) 348
- The F₀F₁-ATPase
 Redox sensing by *Escherichia coli*: Effects of copper ions as oxidizers on proton-coupled membrane transport (70) 58
- Thin layer chromatography
 Lipid content in higher plants under osmotic stress (70) 12
- Thiolipids
 The effect of the ionophore valinomycin on biomimetic solid supported lipid DPPTE/EPC membranes (70) 387
- Thrombin
 Influence of ionic strength, pH and aptamer configuration for binding affinity to thrombin (70) 127
- Tris-(2,2'-bipyridyl)ruthenium(II)
 DNA biosensor based on the electrochemiluminescence of Ru(bpy)₃²⁺ with DNA-binding intercalators (70) 228

- T-tubule
Effects of T-tubules on dielectric spectra of skeletal muscle simulated by boundary element method with two-dimensional models (70) 532
- Tuberculosis
Specific electrochemical phage sensing for *Bacillus cereus* and *Mycobacterium smegmatis* (70) 180
- UMTS
A new exposure system for the *in vitro* detection of GHz field effects on neuronal networks (70) 104
- Unilamellar vesicles
Probing organization and communication at layered interfaces (70) 421
- Uric acid
DNA/Poly(*p*-aminobenzenesulfonic acid) composite bi-layer modified glassy carbon electrode for determination of dopamine and uric acid under coexistence of ascorbic acid (70) 235
- Valinomycin
The effect of the ionophore valinomycin on biomimetic solid supported lipid DPPTE/EPC membranes (70) 387
- Voltammetry
Electrochemical behaviour of 2,8-dihydroxyadenine at a glassy carbon electrode (70) 141
The effects of conductivity and electrochemical doping on the reduction of methemoglobin immobilized in nanoparticulate TiO₂ films (70) 221
- Electrooxidation of dissolved dsDNA backed by *in situ* UV-Vis spectroscopy (70) 440
- Water permeability coefficient
Na-nitroprusside and HgCl₂ modify the water permeability and volume of human erythrocytes (70) 462
- Wave-guide
A new exposure system for the *in vitro* detection of GHz field effects on neuronal networks (70) 104
- Whole cell clamp
Nonlinear current-voltage relationship of the plasma membrane of single CHO cells (70) 71
- Yeast
Effects of low-frequency magnetic fields on the viability of yeast *Saccharomyces cerevisiae* (70) 115
Protein influence on the plasma membrane dielectric properties: In vivo study utilizing dielectric spectroscopy and fluorescence microscopy (70) 542
- Zeolite
Layer-by-layer films of hemoglobin or myoglobin assembled with zeolite particles: Electrochemistry and electrocatalysis (70) 311
- Zwitterionic liposome
Dielectric properties of aqueous zwitterionic liposome suspensions (70) 328
