

Keyword List

Keywords: Authors should include up to four keywords, selected from the list, for indexing purposes. Insert, following the Abstract, type size 10 pt, heading 'Keywords:' keywords separated by semicolons and followed by two lines space.

Acridines	Eicosanoids	Oxygenation
Agonists	Electron spin resonance	Penams/penems
AIDS see Antivirals	Electron transfer	Penicillins
Alkaloids	Electrostatic effects	Peptides and polypeptides
Allergies	Enediynes	Peptoids
Amino acids and derivs	Enzymes and enzyme reactions	Phages
Analgesics	Enzyme inhibitors	Pheromones
Antagonists	Fluorescence	Phospholipids
Antibacterials	Fungi	Phosphonamides
Antibiotics	Gastrointestinal activity	Phosphonic acids and derivs
Anticholinergics	Glycolipids	Phosphopeptides
Anticoagulants	Glycopeptides/glycoproteins	Phosphoric acid and derivs
Anticonvulsants	Glycosidation	Phosphorylation
Antigens	Glycosides	Pigments
Antihypertension	Glycosylation	Plants
Antiinflammatories	Herbicides	Polycyclic heterocyclic compds
Antimicrobial compds	HIV see Antivirals	Polymerase chains reactions
Antineoplastics	Hormones	Polymers
Antioxidants	Hydroxamic acids	Porphyrins and analogues
Antiparasitics	Hypocholesteremic agents	Potassium channel openers
Antiproliferative Agents	Hypotensive agents see	Prostaglandins
Antispasmodics	Antihypertension	Proteins
Antithrombotics see Anticoagulants	Immunological activity	Quinazolines
Antitumour compds	Inositols	Radical scavengers
Antivirals	Isosteres	Radioprotective agents
Azetidinones	Isotope effects	Receptors
Bacteria	Kinetics	Resolution
Benzazepines	Labelling	Reviews
Benzodiazepines	Lectins	Shikimic acid and derivs
Benzothiofenenes	Leukemia	Solid phase synthesis
Biomimetic reactions	Leukotrienes	Solvents and solvent effects
Biosynthesis	Lipids	Stereospecificity
Bronchodilators	Macrolides	Steroids and sterols
Calcium channel blockers	Marine metabolites	Substituent effects
Carbacyclins	Membranes	Tachykinins
Carbohydrates	Mimetics	Terpenes and terpenoids
Cardiovascular activity	Molecular modelling/mechanics	Tetrazoles
Cephalosporins	Mutagenesis	Theoretical calculations
Cephams/cephems	Natural products	Thermochemistry
Chemotherapy	Neurologically active compds	Tranquilizers
Chloride channel blockers	Neuroprotective agents	Urea cycle
Cholecystokinins	Neurotransmitters	Vaccines
Cholesterolaemia	NMR	Vasoconstrictors
Cholinergic activity	Nucleic acids	Vasodilators
Chromans	Nucleosides	Vitamins
Chromenes	Nucleotides	X-ray crystal structures
Cloning	Oxygen	
Complexation		
Coumarins		
Cyclodextrins		
Cytotoxins		
Depsipeptides		
Dienes		
DNA
