The coefficients in eqs (3), (4) and (6)–(8) are incorrect. The correct equations are as follows.

$$\log \text{ESA} = -0.709 - 0.315 \log k \quad (3)$$

$$\log \text{ESA} = 0.532 - 0.0579 \text{ prolog } P - 0.522V_x \quad (4)$$

$$\log \text{ESA} = 0.157 - 0.041R_2 + 0.143\pi_2^H + 0.240\Sigma\alpha_2^H + 0.244\Sigma\beta_2^H - 0.730V_x \quad (6)$$

$$\log \text{ESA} = 0.195 + 0.123\pi_2^H + 0.224\Sigma\alpha_2^H + 0.258\Sigma\beta_2^H - 0.756V_x \quad (7)$$

$$\log \text{ESA} = 0.498 + 0.280\Sigma\beta_2^H - 0.711V_x \quad (8)$$
