Publisher's note

**Synthesis and Evaluation of Methyl Ether Derivatives of the
Vancomycin, Teicoplanin, and Ristocetin Aglycon Methyl Esters
[Bioorg. Med. Chem. Lett. 13 (2003) 2933]☆**

Casey C. McComas, Brendan M. Crowley, Inkyu Hwang and Dale L. Boger*

*Department of Chemistry and the Skaggs Institute for Chemical Biology, The Scripps Research Institute, 10550 North Torrey Pines Road,
La Jolla, CA 92037, USA*

The Publisher regrets that the above paper, which was intended for the special issue “*Antibacterial Agents: Solutions for the Evolving Problems of Resistance*” was erroneously published in a regular issue of the journal.

The article is included loose leaf in its entirety at the back of the printed issue.

We apologise unreservedly for any inconvenience or embarrassment caused.
