

ANNOUNCEMENTS

Bioorganic & Medicinal Chemistry Symposia-in-Print comprise collections of original research papers (including experimental sections) covering timely areas of bioorganic, bioinorganic and medicinal chemistry.

Each symposium is organized by a Symposium Editor who will invite authors active in the selected field to submit original articles covering current research. These papers will be rapidly reviewed and processed for publication by the Symposium Editor under the usual refereeing system.

Authors who have not already been invited, and who may have obtained recent significant results in the area of the announced symposium, may also submit contributions for Editorial consideration and possible inclusion. Before submitting such papers authors should send an abstract to the Symposium Editor for preliminary evaluation. Firm deadlines for receipt of papers will allow sufficient time for completion and presentation of ongoing work without loss of the freshness and timeliness of the research.
