

Keyword List

Keywords: With each submission please supply four keywords from this list.

Acridines	Eicosanoids	Oxygenation
Agonists	Electron spin resonance	Penams/penems
AIDS see Antivirals	Electron transfer	Penicillins
Alkaloids	Electrostatic effects	Peptides and polypeptides
Allergies	Enediynes	Peptoids
Amino acids and derivs	Enzymes and enzyme reactions	Phages
Analgesics	Enzyme inhibitors	Pheromones
Antagonists		Phospholipids
Antibacterials	Fluorescence	Phosphonamides
Antibiotics	Fungi	Phosphonic acids and derivs
Anticholinergics		Phosphopeptides
Anticoagulants	Gastrointestinal activity	Phosphoric acid and derivs
Anticonvulsants	Glycolipids	Phosphorylation
Antigens	Glycopeptides/glycoproteins	Pigments
Antihypertension	Glycosidation	Plants
Antiinflammatory Agents	Glycosides	Polycyclic heterocyclic compds
Antimicrobial compds	Glycosylation	Polymerase chains reactions
Antineoplastics		Polymers
Antioxidants	Herbicides	Porphyrins and analogues
Antiparasitics	HIV see Antivirals	Potassium channel openers
Antiproliferative Agents	Hormones	Prostaglandins
Antispasmodics	Hydroxamic acids	Proteins
Antithrombotics see Anticoagulants	Hypocholesteremic agents	
Antitumour compds	Hypotensive agents see	Quinazolines
Antivirals	Antihypertension	
Azetidinones		Radical scavengers
	Immunological activity	Radioprotective agents
Bacteria	Inositols	Receptors
Benzazepines	Isosteres	Resolution
Benzodiazepines	Isotope effects	Reviews
Benzothiophenes		Shikimic acid and derivs
Biomimetic reactions	Kinetics	Solid phase synthesis
Biosynthesis	Labelling	Solvents and solvent effects
Bronchodilators	Lectins	Stereospecificity
	Leukemia	Steroids and sterols
Calcium channel blockers	Leukotrienes	Substituent effects
Carbacyclins	Lipids	
Carbohydrates		Tachykinins
Cardiovascular activity	Macrolides	Terpenes and terpenoids
Cephalosporins	Marine metabolites	Tetrazoles
Cephams/cephems	Membranes	Theoretical calculations
Chemotherapy	Mimetics	Thermochemistry
Chloride channel blockers	Molecular modelling/mechanics	Tranquilizers
Cholecystokinins	Mutagenesis	
Cholesterolaemia		Urea cycle
Cholinergic activity	Natural products	
Chromans	Neurologically active compds	Vaccines
Chromenes	Neuroprotective agents	Vasoconstrictors
Cloning	Neurotransmitters	Vasodilators
Complexation	NMR	Vitamins
Coumarins		
Cyclodextrins	Nucleic acids	X-ray crystal structures
Cytotoxins	Nucleosides	
	Nucleotides	
Depsipeptides	Oxygen	
Dynes		
DNA
