

Subject Index¹

Volume 11

A

- O*-(2-Acetamido-2-deoxy- α -D-galactopyranosyl)-*N*-acetyl-L-serine 8-methoxycarbonyloc-tanamide
 synthesis, characterization, **11**, 85
- O*-(2-Acetamido-2-deoxy- α -D-galactopyranosyl)-*N*-8-methoxycarbonyloctanoyl-L-serine methylamide
 synthesis, characterization, **11**, 85
- Acid dissociation constants
 cyclooctaamylose, comparison and correla-tions among members of homologous se-ries, **11**, 274
- Adenosine deaminase
 biphasic kinetics, **11**, 24
- Adenosine nucleotide
 D-amino acid oxidase inhibition, inferences concerning physiological function, **11**, 350
- Affinity
 labelling by periodate-oxidized ATP, **11**, 55
- Alkanoates
 selective recognition by β -cyclodextrine capped with chromophore, **11**, 108
- [Z] - 4 - Alkylidene - 1, 3, 2 - benzodioxaphos-phorinane 2 - oxides
 stereospecific cyclization of
 2-alkylketophenyl phosphates, **11**, 457
 2-alkylketophenyl phosphonates, **11**, 457
- 2-Alkylketophenyl phosphates
 stereospecific cyclization, [Z]-4-alkylidene-1,3,2-benzodioxaphosphorinane 2-oxides, **11**, 457
- 2-Alkylketophenyl phosphonates
 stereospecific cyclization, [Z]-4-alkylidene-1,3,2-benzodioxaphosphorinane 2-oxides, **11**, 457
- D-Amino acid oxidase
 mammalian, inhibition by metabolites and drugs, inferences concerning physiological function, **11**, 350
- Aminolysis
 and hydrolysis, benzylpenicillin mediation by Zn-Tris chelate, **11**, 4

- Arogenic acid
 synthesis (*Synechocystis sp.*), **11**, 32
- ATP
 -periodate-oxidized, preparation, structure, and properites, **11**, 55
- Atrolactic hydrazide
 stereoselective action of acylated crude pa-pain, **11**, 251
- 2'-Azidoaminopterin
 potential photoaffinity label for folate-utilizing enzymes, synthesis and characterization, **11**, 281
- Azo dyes
 complexation with α -cyclodextrin, **11**, 420

B

- Benzylpenicillin
 hydrolysis and aminolysis mediated by Zn-Tris system, **11**, 4
- Bis(isopropylidene adenosine)
 base stacking of distereoisomers, **11**, 24
- Boswellia carterii*
 incensole synthesis through cembrenol, **11**, 1
- 3-Bromopyruvate
 carbonyl reactivity, **11**, 478
- Butyrylcholinesterase
 inhibition with *N,N*-dimethyl-2-phenylaziridi-nium ion, kinetic analysis, **11**, 394

C

- Chloro-*o,o'*-dinitrophenyl
 derivatives, properties and use in protein chemistry, **11**, 262
- Chlorotetrolic acid
 use of acetylenic function for direct chemical modification, **11**, 463
- Cholesterol esterase
 mammalian, kinetics in homogeneous aqueous solutions, **11**, 19
 microbial, kinetics in homogeneous aqueous solutions, **11**, 19

¹ Boldface numbers indicate volume; lightface numbers indicate pagination.

Chromophore

β -cyclodextrin-capped, selective recognition of alkanates, 11, 108

 σ complexes

as biochemical and biophysical probes, development of reporter group delivery system, 11, 43

 α -Cyclodextrin

complexation with azo dyes, 11, 420

 β -Cyclodextrin

capped with environmentally sensitive chromophore

guest-induced conformational change, 11, 72

selective recognition of alkanates, 11, 108

Cyclooctaamylose

acid dissociation constants, 11, 274

Cyclopentenoid

metabolites, aromatic origin, 11, 338

D

Dextran

synthesis, dextranucrase role, 11, 115

Dextranucrase

role in dextran synthesis and formation of acceptor products, 11, 115

Dihydrolipoic acid

and dihydrolipoylamido derivatives, reaction with *p*-nitrophenyl esters, effects of cationic micelles, 11, 428

3,4-Dihydroxyphenylalanine

o-quinone intermediate, isolation and characterization, 11, 101

4-(Dimethylamino)nitrosobenzene

pyruvate decarboxylase action, enzymatic generation of *N*-[4-(dimethyl amino)phenyl] acetohydroxamic acid, 11, 328

N-4-Dimethylamino)phenyl acetohydroxamic acid

enzymatic generation by action of pyruvate decarboxylase on 4-(dimethylamino)nitrosobenzene, 11, 328

N,N-Dimethyl-2-phenylaziridinium

ion, butyrylcholinesterase inhibition, kinetic analysis, 11, 394

 α -Dimyristoyl phosphatidyl choline

coenzyme model reaction in lipid bilayers, 11, 412

1,1-Diphenyl-2-picrylhydrazyl

reaction with 3-*N*-ribosyluric acid, 11, 436

reaction with uric acid, 11, 436

Diterpenes

pimarane class, biogenetic-type synthesis, 11, 219

E

Enzymes

folate-utilizing, 2'-azidoaminopterin as potential photoaffinity label, synthesis and characterization, 11, 281

Esterolysis

by sulfhydryl proteases, mechanisms, 11, 96

F

 (\pm) Farnesiferol A

biogenetic-type cyclization, 11, 171

 (\pm) Farnesiferol C

biogenetic-type cyclization, 11, 171

Folate

-utilizing enzymes, 2'-azidoaminopterin as potential photoaffinity label, synthesis and characterization, 11, 281

H

 β -Halopyruvamides

carbonyl reactivity, 11, 478

 β -Halopyruvic acids

carbonyl reactivity, 11, 478

Histidine

interaction with *p*-nitrophenyl acetate, kinetics, 11, 383

Hydrolysis

and aminolysis, benzylpenicillin mediation by Zn-Tris chelate, 11, 4

I

Incenseole

cembrenol transformation through epoxidation (*Boswellia carterii*), 11, 1

K

Kidney

inhibition of mammalian D-amino acid oxidase by metabolites and drugs, inferences concerning physiological function, 11, 350

L

 β -Lactamase

Zn-dependent, model for catalysis and aminolysis of benzylpenicillin mediated by Zn-Tris chelate, 11, 4

Liver

enzymatic 7β hydroxylation of 4,4,10 β -trimethyl-*trans*-decal-3 β -ol (rat), **11**, 371

M

Mandelic hydrazide

stereoselective action of acylated crude papain, **11**, 251

Methionine

reaction with DOPA *o*-quinone, **11**, 101

Methyl chlorotetrolate

direct chemical modification, use of acetylenic function, **11**, 463

Methyl farnesate

cyclization, **11**, 133

Methyl(\pm)-10,11-oxidofarnesate

cyclization, **11**, 133

Models

coenzyme reactions in lipid bilayers, **11**, 412

Molecular orbital theory

role of environment around catalytic triad in β -trypsin, **11**, 322

N

Nerve

transmission, inhibition of mammalian D-amino acid oxidase by metabolites and drugs, inferences concerning physiological function, **11**, 350

1-Nitro-9-aminoacridine

molecular distortions, **11**, 443

1-Nitro-9-methylacridine

molecular distortion, **11**, 443

p-Nitrophenyl acetate

interaction with amino and imidazole groups of histidine, kinetics, **11**, 383

p-Nitrophenyl esters

reaction with dihydrolipoic acid and dihydroli-poylamido derivatives, effects of cationic micelles, **11**, 428

O

(\pm)-10,11-Oxidofarnesyl acetate

cyclization, **11**, 133

14,15-Oxidogeranyl geranyl acetate

cyclization studies, **11**, 197

P

Papain

acylated crude, stereoselective action toward atrolactic hydrazide, **11**, 251
mandelic hydrazide, **11**, 251

Phytotoxin

host-specific, analogs produced by *Helmintho-sporium maydis*, race T, synthesis, **11**, 300
biological activities, **11**, 313

Pimaranes

biogenetic-type synthesis of hydroxylated tri-cyclic diterpenes, **11**, 219

Proteases

sulfhydryl, esterolytic mechanisms, compari-son, **11**, 96

Proteins

direct chemical modification, use of acetylenic function, **11**, 463
microbial, arogenic acid synthesis (*Synecho-cystis sp.*), **11**, 32

Pyruvate decarboxylase

action on 4-(dimethylamino)nitrosobenzene, enzymatic generation of *N*-[4-dimethy-lamino]phenyl]acetohydroxamic acid, **11**, 328

R

Reporter group delivery system

chemical modification of proteins and investi-gation of enzyme mechanisms by σ com-plexes, **11**, 43

3-*N*-Ribosyluric acid

reaction with 1,1-diphenyl-2-picrylhydrazyl, **11**, 436

S

Synechocystis

synthesis of chiral arogenic acid via immobi-lized microbial proteins, **11**, 32

T

5,6,7,8-Tetrahydroretinal

isomers, visual pigment analogs, role of tri-methylcyclohexyl ring in pigment forma-tion, **11**, 404

Trimethylcyclohexyl

ring, visual pigment analogs from isomers of 5,6,7,8-tetrahydroretinal, **11**, 404

- 4,4,10-Trimethyl-*trans*-decalin-3 β ,7 β -diol
 enzymatic 7 β hydroxylation of 4,4,10 β -tri-
 methyl-*trans*-decal-3 β -ol (rat liver), **11**,
 371
- 4,4,10 β -Trimethyl-*trans*-decal-3-ol
 enzymatic 7 β hydroxylation (rat liver), **11**, 371
- Triphenyl methane dyes
 coenzyme model reaction in lipid bilayers, **11**,
 412
- Tris(hydroxymethyl)aminomethane
 –Zn chelate, catalysis of hydrolysis and ami-
 nolysis of benzylpenicillin mediated by,
 11, 4
- β -Trypsin
 role of environment around catalytic triad, mo-
 lecular orbital study, **11**, 322
- T_N specificity
 synthesis of glycopeptidic haptens, **11**, 85
- U
- Uric acid
 reaction with 1,1-diphenyl-2-picrylhydrazyl, **11**,
 436
- Z
- Zinc
 –Tris chelate, effect on hydrolysis and aminol-
 ysis of benzylpenicillin, **11**, 4
