

Subject Index for Volume 23

A

- Acetaldehyde
 reactions with Tris buffer, NMR characterization, 119
- N*^α-Acetyl-*N*^ε-allyl-L-arginine
 inhibition of bovine cerebral nitric-oxide synthase, 144
- N*^α-Acetyl-*N*^ε-allyl-L-arginine methyl ester
 inhibition of bovine cerebral nitric-oxide synthase, 144
- O*-(α -Acylamino-2-styrylacryloyl)-L- β -phenyllactates
 carboxypeptidase A-catalyzed hydrolysis, 183
- Acyl nitrene
 in insertion reaction for synthesis of norbornyl dipeptide analogues, 397
- ψ -Aglycoristocetin
 and complexes with bacterial cell-wall mimetic peptides, high-field NMR study, 54
- Alcohol oxidase
 substituted alcohols as mechanistic probes, 42
- Aldehydes
 low-molecular-weight, Tris buffer reactivity with, NMR study, 119
- Alkylation
 sulfhydryl groups in proteins, trifunctional reagents for, synthesis, 152
- S-Alkylation
 chemoselective, *R*_p and *S*_p dinucleoside phosphorothioates with iodoalkyl acylates, in model studies for development of oligonucleoside phosphorothioate prodrugs, 1
- S-Alkyl phosphorothiolates
 preparation by chemoselective S-alkylation of *R*_p and *S*_p dinucleoside phosphorothioates with iodoalkyl acylates, 1
- N*^ε-Allyl-L-arginine
 inhibition of bovine cerebral nitric-oxide synthase, 144
- N*^ε-Allyl-L-arginine methyl ester
 inhibition of bovine cerebral nitric-oxide synthase, 144
- 2-Amino-4*H*-3,1-benzothiazin-4-one
 and corresponding benzoxazinone, activities in chymotrypsin inactivation, comparison, 72
- 2-Amino-4*H*-3,1-benzoxazin-4-one
 and corresponding benzothiazinone, activities in chymotrypsin inactivation, comparison, 72
- 5-[[3-(2-Amino-2-carboxyethyl)-5-hydroxy-1*H*-indol-4-yl]oxy]-[3-(2-amino-2-carboxyethyl)-1*H*-indole
 oxidation chemistry, 227
- 1-Amino-2-hydroxybicyclo[2.2.1]heptane-7-carboxylic acid
 derivatives, synthesis as mimics of transition state and torsionally distorted ground state of peptides, 397
- 2-Amino-7-hydroxy-5,5-dimethyl-4-thiaheptanoic acid
 synthesis, 89
- Aminophenylmercuric acetate
 in elucidation of mechanism of prostromelysin activation, 415
- Anhydrides
 accumulation in hydrolysis of ester substrates by carboxypeptidase A, 183
- Antibiotics
 vancomycin-type glycopeptide, role of phenolic group, 54
- Antibodies, *see* Autoantibodies
- Arginine vasopressin
 and oxytocin, thiol-disulfide exchange reactions with captopril and penicillamine, 109
- Autoantibodies
 against DNA, structural patterns: molecular modeling study, 482

B

- Benzaldehyde
 reactions with Tris buffer, NMR characterization, 119
- 2-Benzoylamino-4*H*-3,1-benzothiazin-4-one
 and corresponding benzoxazinone, activities in chymotrypsin inactivation, comparison, 72
- 2-Benzoylamino-4*H*-3,1-benzoxazin-4-one
 and corresponding benzothiazinone, activities in chymotrypsin inactivation, comparison, 72
- Benzyl alcohol
 as mechanistic probe of alcohol oxidase, 42

- Biotechnology
strategies for metabolic flux manipulation, 439
- 2-Bromoethanol
as mechanistic probe of alcohol oxidase, 42
- N*-Butyloxalamidine
synthesis and reactivities, 217
- C
- Captopril
and penicillamine, thiol–disulfide exchange reactions with arginine vasopressin and oxytocin, 109
- Carboxylate group
lone pairs, stereoelectronic effects, computational model, 256
- Carboxypeptidase A
catalysis of *O*-(α -acylamino-2-styrylacryloyl)-*L*- β -phenyllactate hydrolysis, 183
- Cell lines
Hep3B and HepG2 (human hepatoma), growth, inhibition by thioalkyl derivatives of vitamin K₃ and vitamin K₃ oxide, 101
- 2-Chloroethanol
as mechanistic probe of alcohol oxidase, 42
- 5-Chlorolevulinate
interactions with *Bradyrhizobium japonicum* porphobilinogen synthase, 450
- Cholecalciferol
des-CD analogs, members retiferol RAD₁ and RAD₂, synthesis, 22
- Chromophores
related properties, in ester substrates hydrolyzed by carboxypeptidase A, 183
- Chymotrypsin
inactivation by 3,1-benzothiazin-4-ones and 3,1-benzoxazin-4-ones, comparison, 72
- α -Chymotrypsin
related research by Jeremy R. Knowles, review, 303
- Coenzyme-A
pantoic acid moiety, conformation, ¹³C NMR and ¹H-¹H NOEs, 169
- Conformational studies
pantoic acid moiety of coenzyme-A, with ¹³C NMR and ¹H-¹H NOEs, 169
- Cyclic(6)-oxalamidine
synthesis and reactivities, 217
- Cyclic(7)-oxalamidine
synthesis and reactivities, 217
- Cysteine
and cysteinyl derivatives, reactions with dopamine-*o*-quinone, 193
- 5-*S*-Cysteinyl dopamine
oxidation chemistry, analysis by reaction of cysteine and cysteinyl derivatives with dopamine-*o*-quinone, 193
- D
- Dinucleoside phosphorothioates
R_p and *S_p*, chemoselective S-alkylation with iodoalkyl acylates, in model studies for development of oligonucleoside phosphorothioate prodrugs, 1
- DNA
autoantibodies against, structural patterns: molecular modeling study, 482
- Dopamine-*o*-quinone
reactions with cysteine and cysteinyl derivatives, 193
- E
- Elongation factor
in identification of RA-VII as peptidyltransferase inhibitor, 460
- Enzymes
as catalysts, evolution, 355
Fourteenth Enzyme Mechanisms Conference, meeting summary, 263
- Epidermal growth factor receptor
functional sites, dissection, review, 369
- Ethanol
as mechanistic probe of alcohol oxidase, 42
- N*-Ethyloxalamidine
synthesis and reactivities, 217
- Evolution
functional proteins, 355
- F
- Felinine, *see* 2-Amino-7-hydroxy-5,5-dimethyl-4-thiaheptanoic acid
- Festschrift
Jeremy R. Knowles, 301
- 2-Fluoroethanol
as mechanistic probe of alcohol oxidase, 42
- G
- Genetic engineering
pore-forming proteins with built-in triggers and switches, 340
- Glyceraldehyde 3-phosphate
reactions with Tris buffer, NMR characterization, 119
