

Subject Index for Volume 26

A

- Acidity
 - dicarboxylic acids, 175
- Acylation
 - α -chymotrypsin by *N*-acylimidazoles, effect of leaving group, 119
- N*-Acylimidazoles
 - acylation of α -chymotrypsin, effect of leaving group, 119
- Addition reactions
 - oxidative, resorufin derivatives with 2-mercapto-ethanol, 63
- Alcohol dehydrogenase
 - binding of inhibiting adducts of ketones and NAD^+ (*Drosophila melanogaster*), 233
- Aldehyde dehydrogenase
 - cytosolic, and resorufin derivatives, covalent modification reactions involving, 75
- Alzheimer's disease
 - research importance of 3,4-dihydroxyphenylacetaldehyde, 45
- Aminoacylation
 - tRNA^{Glu}, catalyzed by glutamyl-tRNA synthetase, inhibition by glutamyl adenylate analogues, 1
- 5-(2-Aminoethyl)-dithio-2-nitrobenzoate
 - synthesis and reactions with thiol groups, 356
- Antiestrogens
 - MER 25, cyclopropyl analogues of, synthesis and biological evaluation, 15
- Antitubercular agents
 - 1,3,4-thiadiazolyl-substituted 1,2,4-triazines, microwave-assisted synthesis, 289
- Aprotic solutions
 - dicarboxylic acids, low-barrier hydrogen bonding in, spectroscopic study, 213
- Aqueous solutions
 - azaguanine tautomerism and protonation in, theoretical study, 345
 - dicarboxylic acids, low-barrier hydrogen bonding in, spectroscopic study, 213
 - strong hydrogen bonds in, 175
- Artificial enzymes
 - site-directed functionalization, 51
- Azaguanine
 - tautomerism and protonation in gas phase and aqueous solution, theoretical study, 345

B

- Basicity
 - imidazole in *cis*-urocanic acid derivatives, steric enhancement, 323
 - proton sponges, 175
- Bicarbonate
 - dehydration to carbon dioxide, role of carbamoyl phosphate synthetase (*Escherichia coli*), 255
- Biotin
 - vitamers of, synthesis, 157
- Bovine serum albumin
 - thiol groups in, electrostatic environments of, characterization with kinetic approach, 356
- Breast cancer cells
 - growth in culture, inhibition by cyclopropyl analogues of antiestrogen MER 25, 15
- ω -Bromoalkane-carboxylate ions
 - lactone formation from, enthalpy and entropy, 193

C

- Carbamoyl phosphate synthetase
 - role in dehydration of bicarbonate to carbon dioxide (*Escherichia coli*), 255
- Carbon dioxide
 - formation by bicarbonate dehydration, role of carbamoyl phosphate synthetase (*Escherichia coli*), 255
- Carboxylate group
 - in 4-oxalocrotonate tautomerase substrate, contribution to reaction mechanism, 141
- Carboxypeptidase A
 - active site, lowest-energy conformation of substrates in, search by Monte Carlo/energy minimization techniques, 295
- Chiral separation
 - tryptophan, phenylalanine, and histidine using polymeric transporters prepared by molecular imprinting, 309
- Chloride
 - $\text{S}_{\text{N}}2$ displacement from 1,2-dichloroethane at haloalkane dehalogenase active site, enzyme-substrate complex and transition state structures in, 169

- Chondroitin sulfate
 reaction with hypochlorous acid, IR and NMR studies, 33
- Chromatography
 phosphoenolpyruvate synthetase purification, 245
- Chromogenicity
 cleavable water-soluble cross-linking agent incorporating, synthesis, 201
- Chymotrypsin
 action of, model: steric enhancement of imidazole basicity in *cis*-urocanic acid derivatives, 323
- α -Chymotrypsin
 acylation by *N*-acylimidazoles, effect of leaving group, 119
- Conformation
 lowest-energy, substrates in carboxypeptidase A active site, search by Monte Carlo/energy minimization techniques, 295
 poly(ethylenimine) and derivatives, flexibility of, Vol. 25, p. 221; *erratum*, 61
- Crosslinking
 proteins, synthesis of chromogenic and cleavable water-soluble agent for, 201
- α -Crustacyanin
 fluorinated analogs, formation and spectroscopic characteristics, 365
- Cyclic diphosphonates
 analogs of isoprenylated pyrophosphate inhibiting protein:farnesyl transferase and protein:geranylgeranyl transferase I, synthesis and activity, 269
- β -Cyclodextrin
 on poly(ethylenimine), attachment of 1,5,9-triazacyclododecane near, 51
 poly(ethylenimine) containing, site-directed attachment of oximinato metal centers for construction of artificial metalloesterases, 103
 poly(ethylenimine) derivative containing, conformational flexibility, Vol. 25, p. 221; *erratum*, 61
- Cyclopropane antiestrogens
 synthesis and biological evaluation, 15
- D**
- Dehydration
 bicarbonate to carbon dioxide, role of carbamoyl phosphate synthetase (*Escherichia coli*), 255
- Desthiobiotin
 synthesis, 157
- Desulfovibrio vulgaris*
 tetrapyrrole biosynthetic pathway involving back conversion of sirohydrochlorin into porphyrins, 221
- 7,8-Diamino pelargonic acid
 synthesis, 157
- Dicarboxylic acids
 acidities, 175
 aprotic and aqueous solutions, low-barrier hydrogen bonding in, spectroscopic study, 213
- 1,2-Dichloroethane
 at haloalkane dehalogenase active site, S_N2 displacement of Cl^- from, enzyme-substrate complex and transition state structures in, 169
- Dienols
 reactivity in 4-oxalocrotonate tautomerase reaction, 141
- o,o'*-Dihydroxyazobenzene
 poly(ethylenimine) derivative containing, conformational flexibility, Vol. 25, p. 221; *erratum*, 61
- 3,4-Dihydroxyphenylacetaldehyde
 synthesis, 45
- N*-(3,3-Dimethylbutyl)-4(5)-nitroimidazole
 acylation of α -chymotrypsin, 119
- E**
- Enantioselective polymeric transporters
 for tryptophan, phenylalanine, and histidine, preparation by molecular imprinting, 309
- Energy minimization
 combined with Monte Carlo techniques, search for lowest-energy conformation of substrates in carboxypeptidase A active site, 295
- Enthalpy
 in ring closure reactions, 193
- Entropy
 in ring closure reactions, 193
- Enzyme-substrate complexes
 structure in S_N2 displacement of Cl^- from 1,2-dichloroethane at haloalkane dehalogenase active site, 169
- G**
- Glutamyl adenylate
 analogues of, inhibition of glutamyl-tRNA synthetase, 1
- Glutamyl-tRNA synthetase
 inhibition by glutamyl adenylate analogues, 1
