

Subject Index for Volume 27

A

- Acetylation
 - hydroxymethylated phenolic compounds, chemoselective enzyme-catalyzed reactions, 119
- Acetylcholinesterase
 - erythrocyte, kinetic inhibition by tacrine and tacrine derivatives (human), 197
- Active sites
 - yeast OMP decarboxylase, probing with UMP, thio-substituted UMP analogues, and CMP-6-carboxylate, 297
- [ω -(Adenosin-5'-*O*-yl)alkyl]cobalamins
 - inhibitory properties toward ribonucleotide triphosphate reductase from *Lactobacillus leichmanii*, kinetic evaluation, 451
- Advanced glycation end products
 - formation from low molecular weight model compounds, 443
- Aeromonas hydrophila* AE036
 - metallo- β -lactamase, hydroxamate inhibitors of, 35
- Alcohol dehydrogenase
 - native and single-point mutants, catalysis of NAD⁺ reduction by PhCH₂OH, $\log(k_{\text{cat}}/K_m)$ for, linear dependence on distance between reactants, 289
- 5-Alkenyl-1-pyrroline 1-oxide-5-carboxylic esters
 - reactions leading to synthesis of tropanes and related azabicycloalkanes, 91
- sec*-Alkyl 2-methyl-3-oxobutyrate
 - reduction with yeast keto ester reductase: construction of plural stereocenters remote from reaction center, 3
- Alkylpiperidines
 - incubation with *Beauveria bassiana*, hydroxylation products of, 81
- Amino acids
 - acetylated, low molecular weight model compounds with, formation of advanced glycation end products, 443
 - side chains, effects on peptide conformation, modeling, 434
- 1-Aminocyclopentane-1,3-dicarboxylic acid
 - analogues, selective modulation of metabotropic glutamate receptors, 20

- Aminoglycoside antibiotics
 - modification by kanamycin nucleotidyltransferase from *Staphylococcus aureus*, kinetic mechanism, 395
- 2-Amino-6-mercapto-7-methylpurine ribonucleoside
 - phosphate-independent hydrolysis by purine nucleoside phosphorylase, 307
- (*S*)-2-Amino-4-phosphonobutyric acid
 - analogues, selective modulation of metabotropic glutamate receptors, 20
- Aphthovirus 2A
 - protein cleavage mechanism, 55
- Aureolic acid antibiotics
 - biosynthesis, 41
- Azabicycloalkanes
 - tropane-related, versatile synthesis and reactivity, 91

B

- Beauveria bassiana*
 - biohydroxylation reactions with, 81
- (*RS*)-*N*-Benzoylalanine hydroxamate
 - inhibition of *Aeromonas hydrophila* AE036 metallo- β -lactamase, 35
- (*RS*)-*N*-Benzoyl-*O*-benzylalanine hydroxamate
 - inhibition of *Aeromonas hydrophila* AE036 metallo- β -lactamase, 35
- Benzyl alcohol
 - reduction of NAD⁺ with horse liver alcohol dehydrogenase and mutants, $\log(k_{\text{cat}}/K_m)$ for, linear dependence on distance between reactants, 289
- (*RS*)-*O*-Benzyl-*N*-phenoxyacetylalanine hydroxamate
 - inhibition of *Aeromonas hydrophila* AE036 metallo- β -lactamase, 35
- (*RS*)-*O*-Benzyl-*N*-phenoxyacetylphenylalanine hydroxamate
 - inhibition of *Aeromonas hydrophila* AE036 metallo- β -lactamase, 35
- Biohydroxylation
 - reactions catalyzed by enzymes and whole-cell systems, 81
- Bis-[4'-azido-2,2':6',2'-terpyridine platinum(II)] complexes
 - with rigid and extended linkers, design and synthesis

- for study of DNA topology by photoaffinity labeling, 477
- Bis(benzoxazole)
 - metabolite UK-1 produced by *Streptomyces*, Mg^{2+} -dependent binding to DNA and inhibition of human topoisomerase II, 326
- Bleomycin
 - biosynthesis in *Streptomyces verticillus*: model of hybrid peptide and polyketide biosynthesis, 155
- Blood parameters
 - in albino mice, effects of products of electrochemical oxidation of 4-hydroxyindole, 239
- Breast cancer
 - triphenylethylene dimers for treatment of, synthesis and cytotoxic activity *in vitro*, 27, 383

C

- C1027
 - biosynthesis, 172
- Calicheamicin
 - biosynthetic cascade, 172
- Candida rugosa* lipase
 - catalysis of chemoselective transesterification reactions on hydroxymethylated phenolic compounds, 119
- Carbohydrates
 - low molecular weight model compounds with, formation of advanced glycation end products, 443
- L-2-(Carboxycyclopropyl)glycine
 - analogues, selective modulation of metabotropic glutamate receptors, 20
- Chelation
 - cobalt in biosynthesis of vitamin B₁₂ corrin ring component, 100
- Chromoprotein enediynes
 - biosynthesis, 172
- Cobalamin
 - corrin ring component, biosynthesis, 100
- Cobalt
 - chelation in biosynthesis of vitamin B₁₂ corrin ring component, 100
 - Co–C bond homolysis, intermediate formed by, adenosylcobalamin competitive inhibitors mimicking, kinetic evaluation, 451
- Conformation
 - peptides, effects of amino acid side chains, modeling, 434
- Crosslinking
 - photoinduced, by dibenzoyldiazomethane–oligodeoxynucleotide conjugate, mechanistic study, 227
- Cycloaddition
 - substitution effects in 2 + 2 reaction of phenylpropa-noids, 339

- synthesis of tropanes and related azabicycloalkanes, 91
- Cyclohexene
 - retinal chromophore moiety in rhodopsin, role in pigment bioactivity, 372
- 16 α ,17 α -Cyclohex-3'-eno-progesterone
 - ³H-labeled, synthesis as probe for steroid–receptor binding studies, 207
- Cytidine 5'-monophosphate-6-carboxylate
 - in probing of yeast OMP decarboxylase active sites, 297
- Cytochrome P450cam monooxygenase
 - isolated Y96A mutant, biohydroxylation reactions with, 81

D

- Deacetylation
 - hydroxymethylated phenolic compounds, chemoselective enzyme-catalyzed reactions, 119
- N-Deoxyribosyltransferases
 - glycosyl transfer reactions catalyzed by, 135
- Dibenzoyldiazomethane–oligodeoxynucleotide conjugate
 - photoinduced crosslinking and cleavage at guanine by, mechanistic study, 227
- Diterpenoid resins
 - classification by solid state NMR, 409
- DNA
 - Mg^{2+} -dependent binding to UK-1, 326
 - operator sequences with isoteric base-pair analogues, in analysis of *trp* repressor–operator complex interface, 215
 - topology, analysis by photoaffinity labeling, bis-intercalators with rigid and extended linkers for, design and synthesis, 477
- DNA topoisomerase II
 - inhibition by UK-1 (human), 326

E

- Electrochemical oxidation
 - 4-hydroxyindole, products of, effects on blood parameters of albino mice, 239
- Enediyne
 - biosynthesis and self-resistance, 172
- N-Eptyl-tacrine
 - kinetic inhibition of acetylcholinesterase from human erythrocytes, 197
- Erythrocytes
 - acetylcholinesterase, kinetic inhibition by tacrine and tacrine derivatives (human), 197
- Estrogen receptor
 - triphenylethylene dimers inhibiting, synthesis and cytotoxicity *in vitro*, 27, 383
