

Subject Index for Volume 28

A

- Acetylamino acids
 - hydrolysis by porcine aminoacylase, structure–activity relationship, 205
- N*-Acetyl-oligopeptides
 - neutrophil activation by, 252
- Active sites
 - binding in chimeric aspartic proteinases, 374
 - serine β -lactamase, interactions with thiono substrates, 338
 - UDP-galactose 4-epimerase, NAD⁺ reduction at, rate enhancement by uridine nucleotides, 29
- Adenosylcobalamin
 - glutamate mutase dependent on, review, 176
- Alkali metals
 - regulation of DNA cleavage by propargylic sulfone-armed lariat crown ethers, 98
- Allantoin
 - racemization, kinetics and mechanism, 62
- Aminoacylase
 - porcine, hydrolysis of acetylamino acids, structure–activity relationship, 205
- Antitumor agents
 - pyrrolo[1,2-*a*]benzimidazole-based, targeting DNA major groove, rational design, 324
- Aryl acylamidase
 - butyrylcholinesterase activity as, effect of benzalkonium chloride, 242
- Aspartic proteinases
 - chimeric, analysis of active site binding, 374

B

- Bacteria
 - effects of BOMPHOS and PHOMPHOS, 214
- Bacterial assay
 - effects of nucleoside analogs on native and site-directed mutants of HTLV type 1 reverse transcriptase, 293
- Benzalkonium chloride
 - distinct effects on esterase and aryl acylamidase activities of butyrylcholinesterase, 242
- BOMPHOS
 - antimicrobial and biological effects on bacterial and yeast cells, 214

- Bruice, Thomas C.
 - special issue dedicated to, introduction, 315
- Butyrylcholinesterase
 - aryl acylamidase and esterase activities, effects of benzalkonium chloride, 242

C

- Calcineurin
 - activation by metal ions, structure–function relationship, 17
- Cancer enantioselection
 - by pyrrolo[1,2-*a*]benzimidazole-based antitumor agents targeting DNA major groove, 324
- Candida albicans*
 - effects of BOMPHOS and PHOMPHOS, 214
- Carbonyl J
 - derivatives of, inhibition of HIV-1 integrase, 140
- Carboxyl groups
 - intramolecular, participation in metal ion catalysis of hydrolysis of esters of 2-hydroxy-1,10-phenanthroline, effects of metal ions, 357
- Carboxypeptidase A
 - ester and peptide hydrolysis reactions catalyzed by, inhibition effects in, 226
- Chemotaxis
 - neutrophils
 - effects of for-Met-Leu-Phe-OMe: role of methionine configuration, 39
 - effects of *N*-formyl and *N*-acetyl-oligopeptides, 252
- Chorismate synthase
 - reaction catalyzed by, secondary β deuterium kinetic isotope effect, 191
- Chymotrypsin
 - interaction with 3,4-dihydro-3-(2-hydroxyethyl)-6-nitro-2*H*-1,3-benzothiazin-2-thione and 6-nitrochromone, 73
 - interaction with 3,4-dihydro-3,4,6-trimethyl-2*H*,8*H*-pyrano-[3,2*g*]-1,3-benzoxazin-2,8-dione, 273
- Circular dichroism
 - metabolically stable α -methylpolyamines: comparison with naturally occurring polyamines, 395

- Cobalt
activation of calcineurin, structure–function relationship, 17
- Coenzyme B₁₂
glutamate mutase dependent on, review, 176
- Conformation
allantoin, NMR and computational analysis, 62
- Cooperative binding
effects with monomeric enzyme, 226
- Crown ethers
propargylic sulfone-armed lariat crown ethers, alkali-metal-regulated cleavage of DNA, 98
- Cyclization
lanthanide-catalyzed, uridine 3'-*p*-nitrophenyl phosphate, 283
- Cytochrome P450eryF
serine-246, role in catalysis of 6-deoxyerythronolide B hydroxylation, 306
- Cytotoxicity
enantioselective, pyrrolo[1,2-*a*]benzimidazole-based antitumor agents targeting DNA major groove, 324
N-thiazolyl and *N*-thiadiazolylcantharidinimides against human hepatocellular carcinoma cells, 266
- D
- 6-Deoxyerythronolide B
hydroxylation catalyzed by cytochrome P450eryF, role of serine-246, 306
- Deoxythymidine
effects on native and site-directed mutants of HTLV type 1 reverse transcriptase, 293
- Deuterium
secondary kinetic $\beta^2\text{H}$ isotope effect in chorismate synthase reaction, 191
solvent isotope effect on binding of β -D-galactopyranosyl derivatives to β -galactosidase, 49
- Dihydrodeoxythymidine
effects on native and site-directed mutants of HTLV type 1 reverse transcriptase, 293
- Dideoxyadenosine
effects on native and site-directed mutants of HTLV type 1 reverse transcriptase, 293
- Dideoxyinosine
effects on native and site-directed mutants of HTLV type 1 reverse transcriptase, 293
- Dihydroflavin
reductive cleavage of dihydroflavin–tetrahydronaphthalene epoxide adducts, mechanistic study, 163
- 3,4-Dihydro-3-(2-hydroxyethyl)-6-nitro-2*H*-1,3-benzothiazin-2-thione
hydrolysis and interaction with chymotrypsin, 73
- 3,4-Dihydro-3,4,6-trimethyl-2*H*,8*H*-pyrano-[3,2*g*]-1,3-benzoxazin-2,8-dione
synthesis and interaction with chymotrypsin, 273
- DNA
major groove, pyrrolo[1,2-*a*]benzimidazole-based antitumor agents targeting, rational design, 324
supercoiled, alkali metal ion-regulated cleavage by propargylic sulfone-armed lariat crown ethers, 98
- DT-diaphorase
interaction with pyrrolo[1,2-*a*]benzimidazole-based antitumor agents targeting DNA major groove, 324
- E
- Editorial
introduction to special issue dedicated to Thomas C. Bruice, 315
- Elimination reaction
chorismate synthase-catalyzed, secondary β deuterium kinetic isotope effect in, 191
- Escherichia coli*
assay of effects of nucleoside analogs on native and site-directed mutants of HTLV type 1 reverse transcriptase, 293
 β -galactosidase, binding of β -D-galactopyranosyl derivatives, solvent deuterium isotope effect on, 49
- Esterase
butyrylcholinesterase activity as, effect of benzalkonium chloride, 242
fluorogenic reporter group reagent for, synthesis and interaction with chymotrypsin, 273
- Esters
carboxypeptidase A-catalyzed hydrolysis reactions, inhibition effects in, 226
- F
- Ferryl intermediate
solvent inaccessibility in prolyl-4-hydroxylase-catalyzed hydroxylation reaction, 261
- Fish oil
biological effects on yeast cells, comparison with BOMPHOS and PHOMPHOS, 214
- N*-Formyl-oligopeptides
neutrophil activation by, 252
- N*-Formylpeptides
for-Met-Leu-Phe-OMe biological activities, role of methionine configuration, 39
- Free energy
barriers in lumazine synthase reaction, 89
