

Bioorganic Chemistry

Volume 31, Number 2, April 2003

CONTENTS

Allan D. Headley, Rajeswari Ganesan, and Jaewook Nam. The effect of the cyclopropyl group on the conformation of chemotactic formyl tripeptides	99
Ivana Cacciatore, Antonio Di Stefano, Silvestro Duprè, Enrico Morera, Francesco Pinnen, and Alessandra Spirito. Synthesis and biological evaluation of the disulfide form of the glutathione analogue γ -(L-glutamyl)-L-cysteinyl-L-aspartyl-L-cysteine.	109
Hua Fu, Bo Han, Yu-Fen Zhao, Guang-Zhong Tu, Li Xu, Qiang Lu, Jing-Zun Wang, and Hong-Zhan Xiao. Synthesis and hydrolysis of a phenylalanyl adenylate pentacoordinated phosphorane	122
Mitsuhiro Shiino, Yumi Watanabe, and Kazuo Umezawa. Synthesis and tyrosinase inhibitory activity of novel <i>N</i> -hydroxybenzyl- <i>N</i> -nitrosohydroxylamines	129
Yanhe Huang, M. Cecilia Torres, Charles R. Iden, and Francis Johnson. Synthesis of the minor acrolein adducts of 2'-deoxyguanosine and their generation in oligomeric DNA.	136
Zhiyong Cheng, Jie Ren, Guangtao Yan, Yuanzong Li, Wenbao Chang, and Zhida Chen. Quantitative elucidation of the molecular mechanisms of hydroxyl radical quenching reactivity of phenolic compounds	149
Munenori Numata, Takahiro Matsumoto, Mariko Umeda, Kazuya Koumoto, Kazuo Sakurai, and Seiji Shinkai. Polysaccharide–polynucleotide complexes (15): thermal stability of schizophyllan (SPG)/poly(C) triple strands is controllable by α -amino acid modification.	163
Shiou-Chuan Tsai and Judith P. Klinman. De Novo design and utilization of photolabile caged substrates as probes of hydrogen tunneling with horse liver alcohol dehydrogenase at sub-zero temperatures: a cautionary note.	172
Jayan Narayanan, Yoshio Hayakawa, Junfa Fan, and Kenneth L. Kirk. Convenient syntheses of biogenic aldehydes, 3,4-dihydroxyphenylacetaldehyde and 3,4-dihydroxyphenylglycolaldehyde.	191
