

Subject Index for Volume 31

A

- Ab initio calculations
 - cyclopropyl group effects on conformation of chemotactic formyl tripeptides, 99
- Acrolein
 - minor adducts of 2'-deoxyguanosine, synthesis and generation in oligomeric DNA, 136
- Active sites
 - riboflavin synthase, reaction intermediate in, 278
- S-Adenosylmethionine:tRNA ribosyltransferase-isomerase
 - in biosynthesis of 7-deazaguanosine-hypermodified nucleosides of tRNA, 24
- β -Adrenergic receptor blockers
 - synthesis, 1-chloro-3-(1-naphthoxy)-2-propanol intermediate in, kinetic resolution, 259
- Albumin
 - interactions with bendalene, NMR study, 378
- Alcohol dehydrogenase
 - hydrogen tunneling with, at sub-zero temperatures, probing with photolabile caged substrates, 172
- 1-Alkylation
 - synthesis of minor acrolein adducts of 2'-deoxyguanosine, 136
- 5-Alkylresorcinol
 - biosynthesis in rice: incorporation of putative fatty acid unit in carbon chain, 437
- 4-(2'-Alkyl-sulfanyl-vinyl)-pyridine derivatives
 - transglycosidation, catalysis by NAD⁺ glycohydrolases: generation of chromophoric NAD⁺ analogs, 288
- α -Amino acids
 - modification of schizophyllan/poly(C) triple strands, effect on thermal stability, 163
- Antiestrogenic activity
 - 3,17-substituted-16,17-seco-estratriene derivatives, screening, 475
- Antimicrobial activity
 - farnesyl diphosphate mimetics, 80

- Antimicrobial peptides
 - cathelicidins, proteolytic processing and protease resistance, 425
- Apple fruit
 - enzymatic lactonization of γ,δ -epoxy esters, 199
- Arabinogalactan
 - effect on boronic acid inhibition of pancreatic elastase, trypsin, chymotrypsin, and leucine aminopeptidase, 464
- Archaeosine
 - biosynthesis, 24
- Arginine
 - introduction into schizophyllan/poly(C) triple strands, effect on thermal stability, 163
- Azaadenine
 - base pairs with thymine, structure and energy of, 367
- Azaguanine
 - base pairs with cytosine, structure and energy of, 367

B

- Bacillus subtilis*
 - protoporphyrinogen oxidase Val311Met point mutation, effect on oxyfluorfen resistance, 389
- Base pairing
 - in non-natural bases of nucleic acids, structure and energy of, 367
- Bendalene
 - interactions with albumin, NMR study, 378
- Beta blockers
 - synthesis, 1-chloro-3-(1-naphthoxy)-2-propanol intermediate in, kinetic resolution, 259
- Bis(β -cyclodextrin)s
 - organoselenium-bridged, selective binding of chiral molecules of cinchona alkaloid, 11
- Bisubstrate analog inhibitors
 - for serotonin *N*-acetyltransferase, properties, 398

Boronic acids
effects on hydrolytic activity of pancreatic elastase, trypsin, chymotrypsin, and leucine aminopeptidase, 464

Bromotryptophan
in cathelicidins, resistance to proteases, 425

C

Candida albicans
antimicrobial activity of farnesyl diphosphate mimetics, 80

Cantharidin analogues
synthesis and inhibition of growth in selected tumor cell lines, 68

Carboxyamidation
in cathelicidins: resistance to proteases, 425

Carboxylate
adjacent negative charge, catalysis of decarboxylation, theoretical study, 271

Cathelicidins
proteolytic processing and protease resistance, 425

Cathelin domain
removal from cathelicidins: liberation of active antimicrobial peptide, 425

Chemotaxis
formyl peptides with activity in, conformation, effect of cyclopropyl group, 99
induction by esapeptide analogue of prototypical *N*-formylmethionyl peptide, 322

Chiral molecules
cinchona alkaloid, selective binding by β - and γ -cyclodextrins and organoselenium-bridged bis(β -cyclodextrin)s, 11

1-Chloro-3-(1-naphthyloxy)-2-propanol
kinetic resolution and synthesis studies, 259

Chymotrypsin
nucleophilic hydrolytic activity, effects of boronic acids in presence of arabinogalactan, 464

Cinchona alkaloids
chiral, selective binding by β - and γ -cyclodextrins and organoselenium-bridged bis(β -cyclodextrin)s, 11

Conformation
chemotactic formyl tripeptides, effect of cyclopropyl group, 99
polynucleotide, effect on formation of complexes with polysaccharides, 216

Cooperative binding
chiral molecules of cinchona alkaloid by β - and γ -cyclodextrins and organoselenium-bridged bis(β -cyclodextrin)s, 11

β -Cyclodextrins
selective binding of chiral molecules of cinchona alkaloid, 11

γ -Cyclodextrins
selective binding of chiral molecules of cinchona alkaloid, 11

Cyclopropyl group
effect on conformation of chemotactic formyl tripeptides, 99

Cytosine
base pairs with azaguanine, structure and energy of, 367

D

Davis reagent
synthesis of 3,4-dihydroxyphenylacetaldehyde and 3,4-dihydroxyphenylglycolaldehyde with, 191

1-Deaza-FAD
UDP-galactopyranose mutase reconstitution with, analysis and mechanistic implications, 494

5-Deaza-FAD
UDP-galactopyranose mutase reconstitution with, analysis and mechanistic implications, 494

7-Deazaguanosine
tRNA nucleosides hypermodified by, biosynthesis, 24

Decarboxylation
catalysis by adjacent negative charge, theoretical study, 271

2'-Deoxyguanosine
minor acrolein adducts of, synthesis and generation in oligomeric DNA, 136

3-Deoxy-D-manno-2-octulosonate-8-phosphate synthase
binding of natural substrates and products, ^{31}P and ^{13}C solution NMR study, 306

3,4-Dihydroxyphenylacetaldehyde
synthesis, 191

3,4-Dihydroxyphenylglycolaldehyde
synthesis, 191

Diol cleavage
in synthesis of minor acrolein adducts of 2'-deoxyguanosine, 136

Diphenyl ether herbicides
resistance to, effect of *Bacillus subtilis* protoporphyrinogen oxidase Val311Met point mutation, 389

Disaccharides
effect on inhibition of pancreatic elastase, trypsin, chymotrypsin, and leucine aminopeptidase by boronic acids, 464

DNA

- oligomeric, generation of minor acrolein adducts of 2'-deoxyguanosine in, 136
- (6-4) photoproducts of, photoreactivation, model studies, 357

L-Dopa

- uncompetitive tyrosinase inhibition by *N*-hydroxybenzyl-*N*-nitrosohydroxylamines with respect to, 129

D

Editorial, 1

Electron paramagnetic resonance

- radical formation and coupling of hydroxycinnamic acids containing 1,2-dihydroxy substituents, 206

Electron transfer

- in release of nitric oxide from HbSNO, 3
- role in repair of (6-4) photoproducts, 357

Electrostatics

- role in binding of bisubstrate analog inhibitors to serotonin *N*-acetyltransferase, 398

Entropy

- enzyme binding to substrates in ground state, 485

Enzymes

- binding to substrates in ground state, physicochemical requirement, 485

 γ,δ -Epoxy esters

- enzymatic lactonization by apple fruit and Jerusalem artichoke bulb, 199

Escherichia coli

- tRNA-guanine transglycosylase, nucleophilic catalysis and ping-pong kinetic mechanism, 331

Esterase

- pig liver, selectivity towards anti-HIV pronucleotide diastereomers, HPLC and MS analysis, 237

Estrogenic activity

- 3,17-substituted-16,17-seco-estratriene derivatives, screening, 475

Ethanol

- and lactic acid, fermentations of, comparison of isotopic fractionation in, 227

F

Farnesyl diphosphate mimetics

- synthesis and antimicrobial evaluation, 80

Farnesyl-protein transferase

- effects of farnesyl diphosphate mimetics, 80

Fatty acid

- odd-carbon, incorporation in carbon chain of 5-alkylresorcinol, 437

Fermentation

- ethanol and lactic acid, isotopic fractionation in, comparison, 227

Fluorescence spectroscopy

- binding of chiral molecules of cinchona alkaloid by β - and γ -cyclodextrins and organoselenium-bridged bis(β -cyclodextrin)s, 11
- (3*S*,4*R*)-4-(4-Fluorophenyl)-3-hydroxymethyl-1-methylpiperidine

- synthesis of paroxetine metabolites from, 248

N-Formylmethionyl peptide

- prototypical, chemotactic esapeptide analogue of, properties, 322

Formyl tripeptides

- chemotactic, conformation of, effect of cyclopropyl group, 99

G

Galactosidase

- 3D structure, effect on solid-state isotope exchange of hydrogen with spillover hydrogen, 453

Ginkgo biloba

- cell suspension cultures, substrate specificity for hydroxylation of polyoxygenated 4(20),11-taxadienes, 345

- γ -(L-Glutamyl)-L-cysteinyl-L-aspartyl-L-cysteine disulfide form, synthesis and biological evaluation, 109

 γ -Glutamyl-transferase

- activity of disulfide form of γ -(L-glutamyl)-L-cysteinyl-L-aspartyl-L-cysteine with, 109

Glutathione analogues

- γ -(L-glutamyl)-L-cysteinyl-L-aspartyl-L-cysteine, disulfide form, synthesis and biological evaluation, 109

Glutathione reductase

- activity of disulfide form of γ -(L-glutamyl)-L-cysteinyl-L-aspartyl-L-cysteine with, 109

H

Helianthus tuberosus (Jerusalem artichoke)

- bulb of, enzymatic lactonization of γ,δ -epoxy esters, 199

Hemoglobin

- nitrosylated, nitric oxide release and internal electron transfer, 3

High-performance liquid chromatography

- analysis of enzymatic hydrolysis of anti-HIV pronucleotide diastereomers, 237

- neo*- and *L-chiro*-inositol hexakisphosphates, 44

Human immunodeficiency virus

pronucleotide diastereomers acting against, enzymatic hydrolysis, HPLC and MS analysis, 237

Hydrogen

solid-state isotope exchange in polypeptides with spillover hydrogen, effect of 3D structure, 453

Hydrogen bonding

role in binding of bisubstrate analog inhibitors to serotonin *N*-acetyltransferase, 398

Hydrogen transfer

in lactic acid and ethanol fermentations, comparison, 227

Hydrogen tunneling

with alcohol dehydrogenase at sub-zero temperatures, probing with photolabile caged substrates, 172

Hydrolysis

anti-HIV pronucleotide diastereomers by pig liver esterase, HPLC and MS analysis, 237

by pancreatic elastase, trypsin, chymotrypsin, and leucine aminopeptidase, inhibition by boronic acids, 464

phenylalanyl adenylate pentacoordinated phosphorane, 122

stereoselective, acyl derivatives of 1-chloro-3-(1-naphthylxy)-2-propanol, kinetic resolution by, 259

N-Hydroxybenzyl-*N*-nitrosohydroxylamines

synthesis and tyrosinase inhibitory activity, 129

Hydroxycinnamic acids

1,2-dihydroxy substituent-containing, radical formation and coupling of, 206

 γ -Hydroxy- δ -lactones

production by enzymatic lactonization of γ,δ -epoxy esters by apple fruit and Jerusalem artichoke bulb, 199

 δ -Hydroxy- γ -lactones

production by enzymatic lactonization of γ,δ -epoxy esters by apple fruit and Jerusalem artichoke bulb, 199

Hydroxylation

polyoxygenated 4(20),11-taxadienes by *Ginkgo* cell suspension cultures, substrate specificity, 345

Hydroxyl radicals

quenching reactivity of phenolic compounds, molecular mechanisms of, quantitative analysis, 149

I

Inclusion complexation

chiral molecules of cinchona alkaloid with β - and γ -cyclodextrins and organoselenium-bridged bis(β -cyclodextrin)s, 11

L-chiro-Inositol hexakisphosphate

chemical synthesis and enzymatic conversion by yeast phytases, 44

neo-Inositol hexakisphosphate

chemical synthesis and enzymatic conversion by yeast phytases, 44

Interaction energy

base pairing in non-natural bases of nucleic acids, 367

Ionic strength

effect on complexation of schizophyllan and single-stranded homo RNAs, 216

Isotope exchange

solid-state, hydrogen in polypeptides with spillover hydrogen, effect of 3D structure, 453

Isotope ratio mass spectrometry

analysis of isotopic fractionation in lactic acid and ethanol fermentations, 227

Isotopic fractionation

in lactic acid and ethanol fermentations, comparison, 227

J

Jerusalem artichoke bulb

enzymatic lactonization of γ,δ -epoxy esters, 199

K

KDO8P synthase

binding of natural substrates and products, ^{31}P and ^{13}C solution NMR study, 306

Kinetic resolution

1-chloro-3-(1-naphthylxy)-2-propanol intermediate in synthesis of β -adrenergic receptor blockers, 259

L

Lactic acid

and ethanol, fermentations of, comparison of isotopic fractionation in, 227

Lactonization

enzymatic, γ,δ -epoxy esters by apple fruit and Jerusalem artichoke bulb, 199

- Leucine aminopeptidase
nucleophilic hydrolytic activity, effects of boronic acids in presence of arabinogalactan, 464
- Lignin
incorporation of phenylpropanoid radicals containing 1,2-dihydroxy substituents, 206
- Linker peptides
for circularly permuted variants of ribonuclease T1, sequences of, effect on RNase T1 stability, 412
- Lysine
introduction into schizophyllan/poly(C) triple strands, effect on thermal stability, 163
- Lysozyme
release, induction by esapeptide analogue of prototypical *N*-formylmethionyl peptide, 322

M

- Malus silvestris* (apple)
fruit of, enzymatic lactonization of γ,δ -epoxy esters, 199
- Mass spectrometry
enzymatic hydrolysis of anti-HIV pronucleotide diastereomers, 237
isotopic fractionation in lactic acid and ethanol fermentations, 227
- O*-Methyl transferases
radical formation and coupling of hydroxycinnamic acids containing 1,2-dihydroxy substituents, 206
- Monosaccharides
effect on inhibition of pancreatic elastase, trypsin, chymotrypsin, and leucine aminopeptidase by boronic acids, 464
- Mutations
Bacillus subtilis protoporphyrinogen oxidase Val311Met, effect on oxyfluorfen resistance, 389

N

- NAD⁺ analogs
chromophoric, generation by transglycosidation of 4-(2'-alkyl-sulfanyl-vinyl)-pyridine derivatives by NAD⁺ glycohydrolases, 288
- NAD⁺ glycohydrolases
transglycosidation of 4-(2'-alkyl-sulfanyl-vinyl)-pyridine derivatives: generation of chromophoric NAD⁺ analogs, 288
- Negative charge
adjacent to carboxylate, catalysis of decarboxylation, theoretical study, 271

- Neighboring-group effect
enzyme binding to substrates in ground state, 485
- Neutrophils
human, properties of chemotactic esapeptide analogue of prototypical *N*-formylmethionyl peptide, 322
- Nitric oxide
release from HbSNO and internal electron transfer, 3
- Nuclear magnetic resonance
bendalene–albumin interactions, 378
binding studies
chiral molecules of cinchona alkaloid by β - and γ -cyclodextrins and organoselenium-bridged bis(β -cyclodextrin)s, 11
natural substrates and products to KDO8P synthase, 306
cyclopropyl group effects on conformation of chemotactic formyl tripeptides, 99
isotopic fractionation in lactic acid and ethanol fermentations, 227
- Nucleic acids
non-natural bases, base pairing in, structure and energy of, 367
- Nucleosides
7-deazaguanosine-hypermodified, in tRNA, biosynthesis, 24

O

- Osmium tetroxide
catalysis of synthesis of minor acrolein adducts of 2'-deoxyguanosine, 136
- Oxyfluorfen
resistance to, effect of *Bacillus subtilis* protoporphyrinogen oxidase Val311Met point mutation, 389

P

- Pancreatic elastase
nucleophilic hydrolytic activity, effects of boronic acids in presence of arabinogalactan, 464
- Paroxetine
major metabolites of, synthesis, 248
- Peptides
chemotactic esapeptide analogue of prototypical *N*-formylmethionyl peptide, properties, 322
linking circularly permuted variants of ribonuclease T1, sequences of, effect on RNase T1 stability, 412

pH

effect on complexation of schizophyllan and single-stranded homo RNAs, 216

Phenolic compounds

hydroxyl radicals quenching reactivity, molecular mechanisms of, quantitative analysis, 149

Phenylalanyl adenylate pentacoordinated phosphorane

synthesis and hydrolysis, 122

Phosphoramidates

anti-HIV nucleoside derivatives, enzymatic hydrolysis, HPLC and MS analysis, 237

Photolabile caged substrates

de novo design and use as probes of hydrogen tunneling with alcohol dehydrogenase at sub-zero temperatures, 172

(6-4) Photoproducts

photoreactivation, model studies, 357

Photoreactivation

(6-4) photoproducts, model studies, 357

Phytases

yeast, stereo- and regiospecificity: chemical synthesis and enzymatic conversion of *neo*- and *L-chiro*-inositol hexakisphosphates, 44

Pichia rhodanensis

phytase stereo- and regiospecificity: chemical synthesis and enzymatic conversion of *neo*- and *L-chiro*-inositol hexakisphosphates, 44

Pig liver esterase

selectivity towards anti-HIV pronucleotide diastereomers, HPLC and MS analysis, 237

Ping-pong kinetics

tRNA-guanine transglycosylase from *Escherichia coli*, 331

Poly(C)

triple-strand complex with schizophyllan, thermal stability, control by α -amino acid modification, 163

Poly(ethylene glycol)

in biosynthesis of 5-alkylresorcinol, 437

Polypeptides

3D structure, effect on solid-state isotope exchange of hydrogen with spillover hydrogen, 453

Polysaccharide–polynucleotide complexes

formation, dependence on hydrogen ion and salt concentrations, 216

Proline-rich sequences

cathelicidins, resistance to proteases, 425

Pronucleotide diastereomers

anti-HIV, enzymatic hydrolysis, HPLC and MS analysis, 237

Proteases

resistance of cathelicidins to, 425

Proteins

3D structure, effect on solid-state isotope exchange of hydrogen with spillover hydrogen, 453

Proteolysis

cathelicidins, 425

Protoporphyrinogen oxidase

Bacillus subtilis, Val311Met point mutation, effect on resistance to oxyfluorfen, 389

Pseudomonas aeruginosa

antimicrobial activity of farnesyl diphosphate mimetics, 80

Pyrimidine(6-4)pyrimidone adducts

photoreactivation, model studies, 357

Q

Quantitative structure–activity relationship

hydroxyl radical quenching reactivity of phenolic compounds, 149

Quantum chemistry

molecular mechanisms of hydroxyl radical quenching reactivity of phenolic compounds, 149

Queuosine

biosynthesis, 24

R

Reconstitution

UDP-galactopyranose mutase with 1-deaza-FAD and 5-deaza-FAD, analysis and mechanistic implications, 494

Regiospecificity

yeast phytases: chemical synthesis and enzymatic conversion of *neo*- and *L-chiro*-inositol hexakisphosphates, 44

Resistance

to oxyfluorfen, effect of *Bacillus subtilis* protoporphyrinogen oxidase Val311Met point mutation, 389

Riboflavin synthase

active site, reaction intermediate in, 278

Ribonuclease T1

circularly permuted variants, stability, effect of linker sequence, 412

RNA

single-stranded homo RNAs, complexation with schizophyllan, dependence on hydrogen ion and salt concentrations, 216

S

Saccharomyces cerevisiae

antimicrobial activity of farnesyl diphosphate mimetics, 80

phytase stereo- and regiospecificity: chemical synthesis and enzymatic conversion of *neo*- and *L-chiro*-inositol hexakisphosphates, 44

Salmonella typhimurium

antimicrobial activity of farnesyl diphosphate mimetics, 80

Salt concentration

effect on complexation of schizophyllan and single-stranded homo RNAs, 216

Schizophyllan

complexation with single-stranded homo RNAs, dependence on hydrogen ion and salt concentrations, 216

triple strand complex with poly(C), thermal stability, control by α -amino acid modification, 163

Schizosaccharomyces pombe

antimicrobial activity of farnesyl diphosphate mimetics, 80

16,17-Seco-estratriene derivatives

3,17-substituted, synthesis, structure, and screening of estrogenic and antiestrogenic activity, 475

Serine

introduction into schizophyllan/poly(C) triple strands, effect on thermal stability, 163

Serotonin *N*-acetyltransferase

bisubstrate analog inhibitors of, properties, 398

Spillover hydrogen

solid-state isotope exchange with hydrogen in polypeptides, effect of 3D structure, 453

Squalene synthase

effects of farnesyl diphosphate mimetics, 80

Stability constants

chiral molecules of cinchona alkaloid bound to β - and γ -cyclodextrins and organoselenium-bridged bis(β -cyclodextrin)s, 11

Stereochemistry

reaction intermediate in riboflavin synthase active site, 278

Stereoselective hydrolysis

acyl derivatives of 1-chloro-3-(1-naphthyl-oxy)-2-propanol, kinetic resolution by, 259

Stereospecificity

yeast phytases: chemical synthesis and enzymatic conversion of *neo*- and *L-chiro*-inositol hexakisphosphates, 44

Superoxide anion

production, induction by esapeptide analogue of prototypical *N*-formylmethionyl peptide, 322

T

4(20),11-Taxadienes

polyoxygenated, hydroxylation by *Ginkgo* cell suspension cultures, substrate specificity, 345

Thermal stability

schizophyllan/poly(C) triple strands, control by α -amino acid modification, 163

Thymine

base pairs with azaadenine, structure and energy of, 367

Transfer RNA

7-deazaguanosine-hypermodified nucleosides, biosynthesis, 24

Transglycosidation

4-(2'-alkyl-sulfanyl-vinyl)-pyridine derivatives by NAD^+ glycohydrolases: generation of chromophoric NAD^+ analogs, 288

Transition state theory

enzyme binding to substrates in ground state, 485

Trisaccharides

effect on inhibition of pancreatic elastase, trypsin, chymotrypsin, and leucine aminopeptidase by boronic acids, 464

tRNA-guanine transglycosylase

in biosynthesis of 7-deazaguanosine-hypermodified nucleosides of tRNA, 24

Escherichia coli, nucleophilic catalysis and ping-pong kinetic mechanism, 331

Trypsin

nucleophilic hydrolytic activity, effects of boronic acids in presence of arabinogalactan, 464

Tumor cells

growth, inhibition by cantharidin analogues, 68

Tyrosinase

inhibition by *N*-hydroxybenzyl-*N*-nitrosohydroxylamines, 129

U

- UDP-galactopyranose mutase
 - reconstitution with 1-deaza-FAD and 5-deaza-FAD, analysis and mechanistic implications, 494
- Uracil oxetane adducts
 - synthesis and photosensitized splitting, 357

X

- X-ray crystallography
 - riboflavin synthase active site: analysis of reaction intermediate, 278
 - 3,17-substituted 16,17-seco-estratriene derivatives, 475
