

Bioorganic Chemistry

Volume 32, Number 5, October 2004

Special Issue on Mechanistic Enzymology

CONTENTS

Christian P. Whitman. Editorial	291
Felix Rohdich, Adelbert Bacher, and Wolfgang Eisenreich. Perspectives in anti-infective drug design. The late steps in the biosynthesis of the universal terpenoid precursors, isopentenyl diphosphate and dimethylallyl diphosphate	292
Ronald W. Woodard. Unique biosynthesis of dehydroquinic acid?	309
Eileen K. Jaffe. The porphobilinogen synthase catalyzed reaction mechanism. . .	316
E. Neil G. Marsh, Anjali Patwardhan, and Marja S. Huhta. <i>S</i> -Adenosylmethionine radical enzymes.	326
Ralph M. Pollack. Enzymatic mechanisms for catalysis of enolization: ketosteroid isomerase.	341
John P. Richard and Tina L. Amyes. On the importance of being zwitterionic: enzymatic catalysis of decarboxylation and deprotonation of cationic carbon. . . .	354
Timothy D.H. Bugg. Diverse catalytic activities in the $\alpha\beta$ -hydrolase family of enzymes: activation of H_2O , HCN , H_2O_2 , and O_2	367
Gerrit J. Poelarends and Christian P. Whitman. Evolution of enzymatic activity in the tautomerase superfamily: mechanistic and structural studies of the 1,3-dichloropropene catabolic enzymes	376
Rongson Pongdee and Hung-wen Liu. Elucidation of enzyme mechanisms using fluorinated substrate analogues	393
Xiaoye Yang, Min Wang, and Michael C. Fitzgerald. Analysis of protein folding and function using backbone modified proteins	438
