### ADVANCED STUDY INSTITUTE OPTICALLY ACTIVE POLYMERS (OAP) Forges-les-Eaux, France, 28 June – 6 July 1975

A Summer School on this topic, sponsored by NATO and the University of Rouen, will be held in the spa-town Forges-les-Eaux, France from 28 June to 6 July 1975. Topics include: Theory of optical activity; ways and methods of synthesis of chiral macromolecules; interrelations between structure and properties; interactions of OAP with molecules and ions; uses such as catalysis, pharmaceutical or separation with OAP.

It is an explicit aim of the Institute to stimulate exchange of information and discussions between specialists on synthetic and/or natural macromolecules.

For more information write to: Professor Eric Selegni, Director ASI-OAP, Fac. Sci. 76130 Mont Saint Aignan, France; or to the co-Directors: Professor P. Pino, ETH, Zurich, Switzerland; Professor C. Overberger, University of Michigan, Ann Arbor, Michigan 48104, USA.
