

SUBJECT INDEX TO VOLUME 4

Each page number refers to the first page of a given reference

- Adenosine-5-triphosphate, self-association of, 55
Adsorption, of DNA, 79
 α -lactalbumin, nanosecond fluorometry, 203
Allosteric enzymes, cooperativity in, 159
Anomalous osmosis, through model membranes, 305
Association-dissociation, of ribosomes, 253
Association, equilibrium sedimentation studies, 259
Association, of adenosine-5-triphosphate, 55
Association, of β -lactoglobulin, 181
Association, of DNA intercalating ellipticine derivatives, 275
Association, of pyrimidines in aqueous solutions, 131
- Birefringence, rhodopsin transient electric, 199
 β -lactoglobulin, self association of, 181
Bohr effect, of human hemoglobin, 223
Bound counterions, NMR studies in polyelectrolyte solutions, 143
- Calorimetry, of lysozyme denaturation, 33
Circular dichroism, of adenosine-5-triphosphate, 55
Co²⁺-complex, with X-537A (antibiotic) in methanol, 363
Cooperativity, in allosteric enzymes, 159
Cylindrical flow, of DNA, 51
- Denaturation, calorimetry of lysozyme, 33
Denaturation, of DNA by adsorption, 79
Dichroism, study of DNA-ethidium bromide complex, 191
Differential hydrogen titration, of histidine residues in haemocyanin, 343
Diffusion coefficient, hemoglobin mutual, 287
Diffusion, coupled with association in Lac repressor-operator system, 367
DNA, adsorption and surface denaturation, 79
DNA, complex with ethidium bromide, 191
DNA, radial migration in cylindrical flow, 51
DNA, self-association in presence of ellipticine derivatives, 275
- Electrophoresis, theory for hemolytic plaque assay, 349
Electrostatic free energy, for charged lipid membranes, 309
Ellipticine, intercalation of derivatives in DNA, 275
Enthalpies of reactions, of hexokinase catalyzed reactions, 215
Enzyme catalyzed reactions, thermodynamics of, 215
ESR, temperature dependence for met-hemoglobin, 281
Ethidium bromide, complex with DNA, 191
- Fluorescent polarization, of oriented pigment molecules, 65
Fluorescent probes, in nerve membranes, 1
Fluorometry, of α -lactalbumin and lysozyme, 203
Flux equations, effect of heteroporosity of membranes on, 237
Flux equations, of neutral solute through sieving membranes, 229
Free energy, electrostatic contribution in charged lipid membranes, 309
Frequency sensitive reactions, 249
Gel permeation, in protein interaction studies, 171
- Haemocyanin, titration of histidine residues in, 343
Hemoglobin, mutual diffusion coefficient, 287
Hemoglobin, valency hybrids of human, 223
Hemolytic plaque assay, theory in presence of electric field, 349
Histidine, titration in haemocyanin of residues of, 343
Hydrophobic interactions, in self-association of pyrimidines, 131
- Inhomogeneous stationary states, in reaction-diffusion systems, 151
Ion condensation, thermodynamics and kinetics with polynucleotides, 383
- Kinetics, diffusional flow coupled to association in Lac repressor-operator system, 367
Kinetics, of outer sphere complex formed by Mg²⁺ and polynucleotides, 383

Kinetics, transformation of poly(L-tyrosine), 15

Lac repressor—operator system, coupling of association and diffusion, 367

Lysozyme, denaturation by guanidine hydrochloride, 33

Lysozyme, nanosecond fluorometry, 203

Lysozyme, thermodynamic description, 41

Membranes, anomalous osmosis through model, 305

Membranes, effect of heteroporosity on flux equations through, 237

Membranes, effects of pH and cations on structure of charged membranes, 319

Membranes, electrostatic free energy and phase transitions in charged, 309

Membranes, flux equations through porous sieving, 229

Membranes, spectroscopic studies in nerve, 1

Membranes, thermal potential across charged, 269

Met-Hemoglobin, ESR spectra temperature dependence, 281

Mg²⁺-complex, thermodynamics and kinetics of polynucleotides outer sphere complex, 383

Microcalorimetry, of hexokinase catalyzed reactions, 215

Nanosecond fluorometry, of α -lactalbumin and lysozyme, 203

Nerve membranes, spectroscopic studies in, 1

NMR, in polyelectrolyte solutions, 143

NMR, relaxation, of ions in polyphosphate solutions, 103

NMR, self-association studies of DNA intercalating ellipticine derivatives, 275

NMR, studies of complexation of X-537A with Co²⁺ in methanol, 363

NMR, studies on interaction of paramagnetic ions with phospholipids by, 297

Operon control circuit, sustained oscillations in, 113

Oscillations, in operon control circuit, 113

Osmometry, of pyrimidines in aqueous solutions, 131

Osmosis, anomalous osmosis through model membranes, 305

Paramagnetic ions, NMR studies of interaction with phospholipids, 297

Phase transitions, in charged lipid membranes, 309

Phase transitions, in charged membranes by pH and salt concentration, 319

Phospholipids, NMR studies of interaction with paramagnetic ions, 297

Plastocyanin, secondary and tertiary structure, 123

Polarography, of DNA, 79

Poly(L-tyrosine), kinetics of transformation, 15

Polynucleotides, kinetics and thermodynamics of outer sphere complex with Mg²⁺, 383

Polyphosphate, NMR relaxation of ions in solutions of, 103

Polystyrenesulphonate solutions, model membranes of, 305

Pressure-jump relaxation, studies in association-dissociation of ribosomes, 253

Protein interactions, studies by gel permeation, 171

Protein oligomers, sedimentation, 93

Proteins, thermodynamic functions, 23

Reaction-diffusion systems, 151

Relaxation, NMR relaxation of ions in polyphosphate solutions, 103

Relaxation, pressure jump relaxation in ribosome studies, 253

Rhodopsin, transient electric birefringence of, 199

Ribosomes, association-dissociation studies by pressure jump relaxation, 253

Sedimentation, equilibrium sedimentation of heterogeneously associating species, 259

Sedimentation, of protein oligomers, 93

Self-association of DNA intercalating ellipticine derivatives, 275

Self-association, of adenosine-5-triphosphate, 55

Self-association, of β -lactoglobulin, 181

Self-association, of pyrimidines in aqueous solutions, 131

Sieving membranes, equations for flux across, 229

Structure, plastocyanin's secondary and tertiary, 123

Spectroscopy in nerve membranes, 1

Thermal membrane potential, across charged membranes, 269

Thermodynamic functions, of lysozyme, 41

Thermodynamic functions, of proteins, 23

Thermodynamics, of hexokinase catalyzed reaction, 215

Thermodynamics, of lysozyme, 41

- Thermodynamics, of lysozyme denaturation, 33
- Thermodynamics, of outer sphere complex formed
by Mg^{2+} and polynucleotides, 383
- Thermodynamics, of proteins, 23
- Threshold phenomena, in operon control circuit, 113
- Transient electric birefringence, of rhodopsin, 199
- X-537A (antibiotic), complexation with Co^{2+} in
methanol, 363
