

SUBJECT INDEX TO VOLUME 6

Each page number refers to the first page of a given reference

- Absorption spectrum, of chlorophyll a in liquid crystal, 369
Acetylcholinesterase, kinetics of inhibition, 15
Acridine orange, fluorescence properties when bound to DNA, 279
Actin, complex with ADP, 101
ADP, complex to actin, 101
Alcohol dehydrogenase, pressure dependence of kinetics, 351
2-Aminopurine, association with thymidine, 223
2-Aminopurine, autoassociation of, 213
Antibiotics, monovalent cation binding to, 239
Aspartate transcarbamylase, binding of succinate to, 1
Association, 2-aminopurine with thymidine, 223
Association (intramolecular), of 9,9'-[1,3-propylene]-bis-2-aminopurine, 231
Association, of 2-aminopurine, 213
Association, of oxyhaemoglobin, 191
- Binding, monovalent cations to antibiotics, 239
Binding, of ADP to actin, 101
Binding, of daunomycin to DNA, 363
Binding, of dioxane to chlorophyll, 77
Binding, of Na⁺ to monensin, 345
Binding, of pseudoisocyanine to DNA, 31
Binding, polyamines to sickling red blood cell, 321
Binding, with curved Scatchard plots, 65
- Casein, colloidal stability of micelles, 263
Casein, distribution of micelle size, 59
Chlorophyll a, spectral properties in liquid crystal, 369
Chlorophyll, association with dioxane in mono- and multilayers, 77
Chymosin, casein micelles treated by, 263
Cooperativity, enzyme, 95
- Daunomycin, thermodynamics of interaction with DNA, 363
Dehydrogenase, alcohol, 351
- Dextranucrase, high pressure kinetics of, 87
Diffusion coefficient, of amphiphilic molecules in model membranes, 167
Dioxane, interaction with chlorophyll, 77
DNA, binding of pseudoisocyanine to, 31
DNA, effect of nuclease on hybridization, 337
DNA, fluorescence of acridine orange and proflavine bound to, 279
DNA, sedimentation, 23
DNA, thermodynamics of interaction with daunomycin, 363
- Ethidium bromide, fluorescence of complex with poly(rA-rU), 311
Enzymatic clotting, kinetics of, 253
Enzyme, cooperativity, 95
Enzyme, high pressure kinetics of, 87
- Fibrin clots, sonication of, 161
Fibrin oligomers, from sonicated fibrin clots, 161
Flow dichroism, of DNA-pseudoisocyanine complex, 31
Fluctuations, in proteins, 117
Fluctuations, in proteins, 131
Fluorescence decay, of acridine orange and proflavine bound to DNA, 279
Fluorescence, of ethidium-poly (rA-rU) complex, 311
Fluorescence, of tyrosine in histones, 379
Fluorescence polarization, of actin-ADP complex, 101
Fluorescence scanning, in gel permeation, 299
Fluorescence quantum yield, in autoassociating systems, 213
Fluorescence quantum yield, in hetero-associating system, 223
Fluorescence quantum yield, of acridine orange and proflavine bound to DNA, 279
Fluorescence quantum yield, of compound with intramolecular stacking, 231
Fluorescence quenching, of 2-aminopurine, 213

- Fluorescence quenching, of 9,9'-[1,3-propylene]-bis-2-aminopurine, 231
- Gel permeation, fluorescence detection in, 299
- Globular proteins, denaturation of, 131
- Glycolytic periodicities, 95
- GpU, NMR studies on, 151
- Helix, unwinding angle in polyribonucleic acids, 311
- Hemocyanine, subunit structure, 47
- Hill coefficient, of phosphofructokinase reaction, 95
- Histones, fluorescence of tyrosine in, 379
- Hydrophobic interactions, in statistical thermodynamics of proteins, 131
- Kinetics, effect of nuclease on nucleic acid hybridization, 337
- Kinetics, for three steady state situation, 107
- Kinetics, high pressure enzyme, 87
- Kinetics, of acetylcholinesterase inhibition, 15
- Kinetics, of 2-aminopurine association with thymidine, 223
- Kinetics, of 2-aminopurine autoassociation, 213
- Kinetics, of enzyme triggered coagulation, 253
- Kinetics, of Na⁺ binding to monensin, 345
- Kinetics, of 9,9'-[1,3-propylene]-bis-2-aminopurine intramolecular association, 231
- Kinetics, of TMV protein polymerization, 173
- Kinetics, pressure dependence of dehydrogenase, 351
- Lifetime, in hetero-associating system, 223
- Lifetime, of autoassociating compound, 213
- Lifetime, of compound with intramolecular stacking, 231
- Linear dichroism, of actin-ADP complex, 101
- Linear dichroism, of DNA-pseudoisocyanine complex, 31
- Lysozyme, binding of methyl N-acetyl glucosaminides to, 201
- Membranes, NMR studies on models, 167
- Membranes, thermoosmosis through charged, 271
- Metabolic oscillation, 95
- Methyl N-acetyl glucosaminides, binding to lysozyme, 201
- Micelles, instability of chymosin treated casein, 263
- Micelles, size distribution of casein, 59
- Monensin, kinetics of Na⁺ binding to, 345
- NMR, association studies of oxyhaemoglobin by relaxation, 191
- NMR, binding studies by relaxation, 1
- NMR, of oligonucleotides, 151
- NMR (pulsed), studies of model membranes, 167
- NMR, spectrum and relaxation of monensin-Na⁺, 345
- NMR, study of enzyme-inhibitor complex, 201
- NMR, Tertiary structure of tRNA in solution by, 291
- Nuclease, effect on nucleic acid hybridization, 337
- Oligonucleotides, conformational studies of, 151
- Oxyhaemoglobin, self association studies by NMR, 191
- Partition, by gel permeation, 299
- Phosphofructokinase reaction, 95
- Proflavine, fluorescence properties when bound to DNA, 279
- 9,9'-[1,3-propylene]-bis-2-aminopurine, intramolecular association, 231
- Proteins, denaturation of, 131
- Proteins, statistical thermodynamics of, 117
- Polyamines, binding to sickling red blood cell, 321
- Polyelectrolyte solutions, thermodynamics of, 9
- Polymerization, kinetics for TMV protein, 173
- Poly(rA-rU), fluorescence of complex with ethidium, 311
- Pseudoisocyanine, binding to DNA, 31
- Pulsed NMR, studies of model membranes, 167
- Pulse fluorometry, of ethidium-poly (rA-rU) complex, 311
- Relaxation, binding to antibiotics, 239
- Relaxation (NMR), enzyme-inhibitor complex studies by, 1
- Relaxation (NMR), of monensin-Na⁺, 345
- Relaxation (NMR), of oligonucleotides, 151
- Relaxation (NMR), of oxyhaemoglobin solutions, 191
- Relaxation (NMR), of water bound to red blood cell, 321
- Relaxation (NMR), study of enzyme-inhibitor complex, 201
- RNA, effect of nuclease on hybridization, 337
- Scatchard plots, analysis of curved, 65
- Sedimentation coefficient, dependence on centrifuge speed for DNA, 23
- Sedimentation, of fibrin oligomers, 161

- Sickling red blood cell, interaction with polyamines, 321
- Spin labeled acetylcholine analogs, 15
- Statistical thermodynamics, protein model, 117
- Structural changes, in proteins, 117
- Structural changes, in proteins, 131
- Succinate, binding to transcarbamylase, 1
- Thermodynamics, of 2-aminopurine association with thymidine, 223
- Thermodynamics, of 2-aminopurine autoassociation, 213
- Thermodynamics, of daunomycine-DNA interaction, 363
- Thermodynamics, of globular protein denaturation, 131
- Thermodynamics, of polyelectrolyte solutions, 9
- Thermodynamics, of 9,9'-[1,3-propylene]-bis-2-aminopurine intramolecular association, 231
- Thermodynamics, statistical model for proteins, 117
- Thermoosmosis, through charged membranes, 271
- Three steady state situation, in open chemical reaction system, 107
- Thymidine, association with 2-aminopurine, 223
- TMV (Tobacco Mosaic Virus), kinetics of protein polymerization, 173
- tRNA, NMR study of structure in solution, 291
- Tyrosine, fluorescence in histones, 379
- UpG, NMR studies on, 151
