

ANNOUNCEMENT

The Bioelectrical Society (BES) has been founded with the aim of stimulating cooperation among electrochemists, biochemists, biologists, electrophysiologists, biophysicists and all scientists interested in the investigation, interpretation and practical utilization (e.g. biomedical applications, energy conversion, etc.) of biological phenomena by using electrochemical theories and techniques.

For information apply to the Secretary General:

Prof. Dr. H.W. Nürnberg
Institute of Chemistry 4 Applied Physical Chemistry
Nuclear Research Center
