

SUBJECT INDEX TO VOLUME 13

- Aggregation, of casein/ Ca^{2+} mixtures (kinetics), 307
 Apolipoproteins, mixed interaction between, 29
 Arsenazo III, binding to Ca^{2+} , 125
- Bilayer membranes, *T*-jump method applied to, 329
 Binding, of divalent metal ions to dextrasulfate, 65
 Binding, of divalent metal ions to polyelectrolytes, 55
 Bovine plasma albumin, potentiometric titration and SAX, 97
- Calorimetry, of helix-coil transition in deoxyribonucleotide, 141
 Calorimetry, of lactalbumin unfolding, 181
 Casein, aggregation: in presence of Ca^{2+} (kinetics), 307
 Charge relay system, in serine proteases, 223
 Chromatin, ethidium binding sites in, 89
 Chromatin, fluorescence study of ethidium binding to, 77
 Chymotrypsin, enzymatic activity, 39
 Circular dichroism, of nucleic acid with ruthenium red, 151
 Complexing, of metal with metallochromic indicator, 117
 Computer simulation, of isoelectric focusing, 193
- Deoxyribonucleotide ATGCAT, helix-coil transition, 141
 Dextrasulfate, binding of divalent metal ions to, 65
 Dielectric increment, theory for polyelectrolytes, 265
 Dipolar correlation function, for counterions on surface of polyelectrolyte cylinder, 265
 Distamycin, binding to DNA, 1
 DNA, bending by binding of oligopeptides, 1
 DNA, kinetic mechanism for binding of aromatic peptides to, 283
 DNA, thermodynamics of sonication, 275
 Dynamic Kerr effect, on photoreceptor disk membranes, 49
- Energy barriers, for transport of ions through pores in membranes, 203
- Enzymatic activity, role of proton transfer, 39
 Enzyme catalysis, effect of modifiers on, 291
 ESR, a spin label study of phosphatidylcholine vesicles, 253
 Ethidium bromide, binding sites in chromatin, 89
 Ethidium bromide, fluorescence anisotropy decay when bound to chromatin, 77
- Fibrin clots, rheology of, 15
 Fibrin clots, shear modulus and creep compliance, 25
 Fibronectin, influence on rheology of fibrin clots, 25
 Flash photolysis, kinetics of binding to hemoglobin, 173
 Fluorescence anisotropy decay, of ethidium bound to chromatin, 77
 Fluorescence anisotropy (steady state), of ethidium bound to chromatin, 89
- Gelation, influence of non-binding molecules on sickle cell hemoglobin, 245
 Glycine, thermodynamics of esterification, 167
- Helix-coil transition, in deoxyribonucleotide ATGCAT, 141
 Hemoglobin, gelation of sickle cell, 245
 Hemoglobin, kinetics of binding of CO and O_2 , 173
- Interaction, of apolipoproteins evaluated by sedimentation, 29
 Interactions, of non-polar molecules with biological membranes, 315
 Ion transport, in transmembrane protein channels, 105
 Ion transport, rate of transfer through lipid membranes, 329
 Ion transport, through pores in membranes, 203
 Isoelectric focusing, computer simulation studies, 193
 Isotopic exchange, in polypeptides studied as random walk problem, 213
- Kinetics, binding of aromatic peptides to DNA, 283
 Kinetics, of aggregation of casein/ Ca^{2+} mixtures, 307

- Kinetics, of CO and O₂ binding to hemoglobin, 173
 Kinetics, of transfer of ions across lipid membranes interface, 329
- Lactalbumin, thermodynamics of unfolding, 181
 Light scattering, for studying aggregation of casein/Ca²⁺ mixtures, 307
 Luminescence, of terbium complexes with proteins, 233
- Membranes, energy barriers for passage of ions, 203
 Membranes, interactions of non-polar molecules with biological, 315
 Metabolic oscillations, model, 325
 Metallochromic indicators, analysis of complexing, 117
 Metallochromic indicators, binding of arsenazo III to Ca²⁺, 125
 Model calculations, for interaction of small molecules with biological membranes, 315
 Model calculations, for metabolic oscillations, 325
 Model calculations, for serine proteases charge relay system, 223
 Molecular dynamics, for ion transport in transmembrane protein channels, 105
- Nearest neighbor interactions, in enzyme catalysis, 291
 Nucleic acid, interaction with ruthenium red cation, 151
- Oscillations, model for metabolic, 325
- Peptides, kinetic mechanism for binding to DNA, 283
 Phosphatidylcholine vesicles, surface potential effects, 253
 Photoreceptor disk membranes, dynamic Kerr effect, 49
 Polyelectrolytes, binding of divalent metal ions to, 55, 65
 Polyelectrolytes, theory of dielectric behaviour, 265
- Polyriboinosinic acid, voltammetry of, 187
 Potentiometric titration, of bovine plasma albumin, 97
 Proteins, luminescence of terbium complexes, 233
 Proton transfer, in enzymatic activity, 39
 Proton transfer, in thiol- subtilisin, 133
- Random walk, applied to isotope exchange in polypeptides, 213
 Rheology, of fibrin clots, 15, 25
 Ruthenium red, interaction with nucleic acid helices, 151
- Sedimentation, study of apolipoprotein interaction, by, 29
 Serine proteases, charge relay system, 223
 Sick cell hemoglobin, influence of non-binding molecules on gelation of, 245
 Small angle X-ray scattering, of bovine plasma albumin, 97
 Sonication, thermodynamics for DNA, 275
 Spectrophotometry, applied to binding of arsenazo III to Ca²⁺, 125
 Spectrophotometry, applied to binding of divalent metal ions to polyelectrolytes, 55
 Spectrophotometry, of helix-coil transition of dextroribonucleotide, 141
 Surface potential, of phosphatidylcholine vesicles, 253
- Terbium, luminescence of protein complexes of, 233
 Thermodynamics, of DNA sonication, 275
 Thermodynamics, of glycine esterification, 167
 Thermodynamics, of lactalbumin unfolding, 181
 Thiol-subtilisin, inactivity of, 133
 Transmembrane protein channels, ion transport in, 105
- Viscosity, of DNA-Distamycin complexes, 1
 Voltammetry, of polyriboinosinic acid, 187
