

## ERRATA

### BIOPHYSICAL CHEMISTRY VOL. 14 (1981)

p. 277, the first line of eq. (2) should read:

$$k_{\text{lim}} = 4\pi DN \times \left( 1000 \int_{R_0}^{\infty} e^{U(r)/kT} \mathrm{d}r/r^2 \right)^{-1}$$

p. 278, left-hand column, final line of text should read:

as shown by Chou et al. \* [5,6]. Nevertheless, the

p. 278, the footnote pertaining to the final line of text should read:

\* *Note added in proof.* It has been pointed out by Chou et al. [5,6] that the process of association between biomolecules is generally accompanied by excitation or annihilation of low-frequency phonons. This reflects the flexibility or the so-called 'interior movement' which is one of the characteristics of biomacromolecules.

p. 279, the first line of eq. (13) should read:

$$L_l(\theta, \phi) = \sum_{m=-l}^l \frac{(l-m)!}{(l+m)!} P_l^m(\cos \theta) e^{im\phi}$$
