

AUTHOR INDEX TO VOLUME 18 (1983)

- Almog, R.
A study on the positive ellipticity in the circular dichroism of ribonuclease A 391
- Antonini, E., M. Brunori, A. Colosimo, H.A. Kuiper and L. Zolla
Kinetic and thermodynamic parameters for oxygen binding to the allosteric states of *Panulirus interruptus* hemocyanin 117
- Ausió, J. and P. Suau
Structural heterogeneity of reconstituted complexes of DNA with typical and intermediate protamines 257
- Ballini, J.P., P. Vigny and M. Daniels
Synchrotron excitation of DNA fluorescence. Decay time evidence for excimer emission at room temperature 61
- Bellemare, F., see Fragata, M. 207
- Bishop, W.H.
Local effects in hydrophobicity. Electrostatic interactions in the restructuring of highly polar solvent around less polar solute 339
- Brickmann, J., see Fischer, W. 323
- Briggs, W.E.
A new measure of cooperativity in protein-ligand binding 67
- Brunori, M., see Antonini, E. 117
- Caplan, S.R., see Stucki, M. 101
- Charlier, M. and J.-C. Maurizot
Nonspecific binding of *lac* repressor to DNA. I. An absorption and circular dichroism study 303
- Charlier, M., J.-C. Maurizot and G. Zaccari
Nonspecific binding of *lac* repressor to DNA. II. A small-angle neutron-scattering study 313
- Chay, T.R., see Lee, Y.S. 25
- Chun, P.W., see Oeswein, J.Q. 35
- Colosimo, A., see Antonini, E. 117
- Compiani, M., see Stucki, J.W. 101
- Craney, C.L. and H. Krakauer
Light-scattering studies of the α -ketoglutarate dehydrogenase complex from *Escherichia coli*. I. Characterization of the self-association of the complex 15
- Daniels, M., see Ballini, J.P. 61
- Davis, L.C. and G.A. Radke
Broad-zone active-enzyme chromatography. Ketoacid dehydrogenases as associating systems 241
- De Kepper, P., see Dulos, E. 211
- Dulos, E. and P. De Kepper
Experimental study of synchronization phenomena under periodic light irradiation of a nonlinear chemical system 211
- Dunford, H.B., see Lambeir, A.-M. 195
- Echevarria Gorostidi, G., see Muñoz, F. 249
- Endo, S. and A. Wada
Theoretical and experimental studies on zone-interference chromatography as a new method for determining macromolecular kinetic constants 291
- Fischer, W. and J. Brickmann
Ion-specific diffusion rates through transmembrane protein channels. A molecular dynamics study 323
- Ford, C.L., D.J. Winzor, L.W. Nichol and M.J. Sculley
Effects of thermodynamic nonideality in ligand binding studies
- Fragata, M. and F. Bellemare
Toward a multistep mechanism of cytochrome *c* reactivity. Answer to a comment 207
- Fujisaki, Y., see Kubota, Y. 225
- Fujisaki, Y., see Kubota, Y. 233
- Gallez, D.
Repulsive stabilization in black lipid membranes. A hydrodynamic model 165
- Garcia Blanco, F., see Muñoz, F. 249
- Garcia de la Torre, J., see López Martinez, M.C. 269
- Gavach, G., see Heitz, F. 153
- Heitz, F. and C. Gavach
 Ca^{2+} -gramicidin A interactions and blocking effects on the ionic channel 153
- Heremans, K., see Lambeir, A.-M. 195
- Hobish, M.K. and D.A. Powers
The binding of physiologically significant protons to 2,3-diphosphoglycerate 407
- Kaufmann, K. and I. Silman
The induction by protons of ion channels through lipid bilayer membranes 89
- Keszthelyi, L. and P. Ormos
Displacement current on purple membrane fragments oriented in a suspension 397
- Klonowski, W.
Simplifying principles for chemical and enzyme reaction kinetics 73

Koda, S., H. Nomura and M. Nagasawa Raman spectroscopic studies on the interaction between divalent counterion and polyion	361	Oeswein, J.Q. and P.W. Chun Interaction of human serum apolipoprotein B with sodium deoxycholate	35
Koppenol, W.H. Is cytochrome <i>c</i> reactivity determined by dipole moment or by local charges?	203	Panosjan, G.H., see Vardapetjan, R.R.	11
Krakauer, H., see Craney, C.L.	15	Permyakov, E.A. and V.L. Shnyrov A spectrofluorometric study of the environment of tryptophans in bacteriorhodopsin	145
Kubota, Y., Y. Motoda, Y. Fujisaki and R.F. Steiner Fluorescence decay studies of modified dinucleoside monophosphates containing 1- <i>N</i> ⁶ -ethenoadenosine	225	Plessner, T., see Markus, M.	349
Kubota, Y., A. Sanjoh, Y. Fujisaki and R.F. Steiner Fluorescence decay studies of poly(riboadenylic acid) containing 1- <i>N</i> ⁶ -ethenoadenosine	233	Pocovi, M., see Muñoz, F.	249
Kuiper, H.A., see Antonini, E.	117	Powers, D.A., see Hobish, M.K.	407
Lambeir, A.-M., K. Heremans and H.B. Dunford High-pressure effect on the equilibrium and kinetics of cyanide binding to chloroperoxidase	195	Radke, G.A., see Davis, L.C.	241
