

AUTHOR INDEX TO VOLUME 24 (1986)

- Altig, J.A., G.E. Wesenberg and W.E. Vaughan
Dielectric behavior of polyelectrolytes. IV. Electric
polarizability of rigid biopolymers in electric fields 221
- Augustin, J., see Baláz, Š. 135
- Bakarudin, I., see Slifkin, M.A. 169
- Baláz, Š., E. Šturdík and J. Augustin
Kinetics of unidirectional transport in multimem-
brane systems as influenced by binding to macro-
molecules 135
- Bovalini, L., see Niccolai, N. 217
- Boykin, D.W., see Wilson, W.D. 101
- Briggs, W.E.
A probabilistic model for fitting MWC polynomials
in protein-ligand binding 311
- Briggs, W.E., see Connelly, P.R. 295
- Brunori, M., see Zolla, L. 319
- Bucci, E.
Average quantities accessible to the analysis of sedi-
mentation equilibrium data for self-association sys-
tems 47
- Byth, B., see Hatley, R.H.M. 41
- Caplan, S.R., see Slifkin, M.A. 169
- Chandrasekaran, S., see Wilson, W.D. 101
- Cherek, H., see Keating-Nakamoto, S.M. 79
- Coletta, M., see Zolla, L. 319
- Connelly, P.R., C.H. Robert, W.E. Briggs and S.J. Gill
Analysis of zeros of binding polynomials for tetra-
meric hemoglobins 295
- Cordone, L., A. Cupane, M. Leone and E. Vitano
Optical absorption spectra of deoxy- and oxyhe-
moglobin in the temperature range 300–20 K. Rela-
tion with protein dynamics 259
- Cupane, A., see Cordone, L. 259
- Day, H., see Hatley, R.H.M. 41
- Day, H., see Hatley, R.H.M. 187
- Delfini, M., see Valensin, G. 25
- Delville, A., P. Laszlo and R. Schyns
Displacement of sodium ions by surfactant ions
from DNA. A ^{23}Na -NMR investigation 121
- Di Cera, E., see Zolla, L. 319
- Endre, Z.H. and P.W. Kuchel
Viscosity of concentrated solutions and of human
erythrocyte cytoplasm determined from NMR mea-
surement of molecular correlation times. The depen-
dence of viscosity on cell volume 337
- Franks, F., see Hatley, R.H.M. 41
- Franks, F., see Hatley, R.H.M. 187
- Gaggelli, E., see Valensin, G. 25
- Gajewski, E., see Goldberg, R.N. 13
- Gavach, C., see Heitz, F. 143
- Giardina, B., see Zolla, L. 319
- Gill, S.J., see Connelly, P.R. 295
- Goldberg, R.N., E. Gajewski, D.K. Steckler and Y.B.
Tewari
Thermodynamics of the conversion of aqueous L-
aspartic acid to fumaric acid and ammonia 13
- Goldberg, R.N., see Tewari, Y.B. 291
- Gonnelli, M. and G.B. Strambini
The rate of equine liver alcohol dehydrogenase de-
naturation by urea. Dependence on temperature and
denaturant concentration 161
- Grodzinsky, A.J., see Valleton, J.-M. 277
- Gryczynski, I., see Lakowicz, J.R. 97
- Gursky, G.V., see Nechipurenko, Y.D. 195
- Hamanaka, T., see Kawaguchi, T. 5
- Hamed, M.M., see Hilal, R. 71
- Hatley, R.H.M., F. Franks and H. Day
Subzero-temperature preservation of reactive fluids
in the undercooled state. II. The effect on the oxida-
tion of ascorbic acid of freeze concentration and
undercooling 187
- Hatley, R.H.M., F. Franks, H. Day and B. Byth
Subzero-temperature preservation of reactive fluids
in the undercooled state. I. the reduction of potas-
sium ferricyanide by potassium cyanide 41
- Heitz, A., see Heitz, F. 149
- Heitz, F., A. Heitz and Y. Trudelle
Conformations of gramicidin A and its 9,11,13,15-
phenylalanyl analog in dimethyl sulfoxide and chlo-
roform 149
- Heitz, F., C. Gavach, G. Spach and Y. Trudelle
Analysis of the ion transfer through the channel of
9,11,13,15-phenylalanylgramidicin A 143
- Hilal, R., M.M. Hamed and H. Moustafa
INDO-MO investigation of gas-phase acidities of
carbamates and thiocarbamates 71
- Hvidt, S.
Differences in thermal stability of frog and rabbit
 $\alpha\alpha$ - and $\alpha\beta$ -tropomyosins determined by optical
rotatory dispersion 211
- Jelen, F. and E. Paleček
Chemically reversible electroreduction of guanine in
a polynucleotide chain 285

- Kawaguchi, T., T. Hamanaka and Y. Kito
Kinetic study of transfer of 11-*cis*-retinal between rod outer segment membranes using regeneration of rhodopsin 5
- Keating-Nakamoto, S.M., H. Cherek and J.R. Lakowicz
Analysis of multi-component fluorescence emission by phase-sensitive detection using one modulation frequency 79
- Kito, Y., see Kawaguchi, T. 5
- Korn, A.P.
Charge redistribution in proteins via linear hydrogen-bond chains 235
- Kourai, H., see Yoshikawa, K. 111
- Kranjc, Z., see Lapanje, S. 179
- Kuchel, P.W., see Endre, Z.H. 337
- Kuiper, H., see Zolla, L. 319
- Kusuma, S., see Wilson, W.D. 101
- Kuznetsova, I.M., see Turoverov, K.K. 327
- Laczko, G., see Lakowicz, J.R. 97
- Lakowicz, J.R., G. Laczko and I. Gryczynski
Picosecond resolution of oxytocin tyrosyl fluorescence by 2 GHz frequency-domain fluorometry 97
- Lakowicz, J.R., see Keating-Nakamoto, S.M. 79
- Lapanje, S., E. Žerovnik and Z. Kranjc
Interactions of myoglobin with urea and some alkylureas. II. Calorimetric and circular dichroic studies 179
- Lapanje, S., see Žerovnik, E. 53
- Laszlo, P., see Delville, A. 121
- Leone, M., see Cordone, L. 259
- Martelli, P., see Niccolai, N. 217
- Matsubara, Y., see Yoshikawa, K. 111
- Moustafa, H., see Hilal, R. 71
- Nechipurenko, Y.D. and G.V. Gursky
Cooperative effects on binding of proteins to DNA 195
- Niccolai, N., L. Bovalini and P. Martelli
The mechanisms of interaction between furanochromones and DNA. A heteronuclear Overhauser effect study on the khellin-thymidine model system 217
- Omochi, T., see Yoshikawa, K. 111
- Paleček, E., see Jelen, F. 285
- Pauly, H., see Reboiras, M.D. 249
- Pfister, H., see Reboiras, M.D. 249
- Reboiras, M.D., H. Pfister and H. Pauly
Activity coefficients of salts in highly concentrated protein solutions. II. Potassium salts in isoionic bovine serum albumin solutions 249
- Robert, C.H., see Connelly, P.R. 295
- Schyns, R., see Delville, A. 121
- Sculley, M.J.
Calculation of ionic flocculation concentrations for biological membranes bearing ionizable groups 33
- Shnyrov, V.L. and A.G. Sukhomudrenko
Dynamic properties of bacteriorhodopsin in purple membranes upon heat treatment 1
- Slezak, A. and B. Turczynski
Modification of the Kedem-Katchalsky equations 173
- Slifkin, M.A., I. Bakarudin and S.R. Caplan
Photoacoustic spectroscopy of purple membrane fragments. Evidence for disorder during photocycle 169
- Spach, G., see Heitz, F. 143
- Steckler, D.K., see Goldberg, R.N. 13
- Stilbs, P., see Stokkeland, I. 61
- Stokkeland, I. and P. Stilbs
 ^1H , ^7Li and ^{133}Cs multicomponent self-diffusion NMR study on ion binding of Li^+ and Cs^+ to nucleotides and aggregation of nucleotides in aqueous solution 61
- Strambini, G.B., see Gonnelli, M. 161
- Študič, E., see Baláz, Š. 135
- Sukhomudrenko, A.G., see Shnyrov, V.L. 1
- Tewari, Y.B. and R.N. Goldberg
Thermodynamics of carbohydrate isomerization reactions. The conversion of aqueous allose to psicose 291
- Tewari, Y.B., see Goldberg, R.N. 13
- Trudelle, Y., see Heitz, F. 143
- Trudelle, Y., see Heitz, F. 149
- Turczynski, B., see Slezak, A. 173
- Turoverov, K.K. and I.M. Kuznetsova
What causes the variation of polarization degree across the emission spectrum of proteins? 327
- Valensin, G., M. Delfini and E. Gaggelli
Selective ^1H -NMR relaxation investigations of membrane-bound drugs in vitro. 2. Angiotensin II 25
- Valleton, J.-M. and A.J. Grodzinsky
Conductivity-mediated regulation in a compartmental enzyme system. Superactivation and conductance bistability 277
- Vaughan, W.E., see Altig, J.A. 221
- Vitrano, E., see Cordone, L. 259
- Wang, Y.-H., see Wilson, W.D. 101
- Wesenberg, G.E., see Altig, J.A. 221
- Wilson, W.D., Y.-H. Wang, S. Kusuma, S. Chandrasekaran and D.W. Boykin
The effect of intercalator structure on binding strength and base-pair specificity in DNA interactions 101
- Yoshikawa, K., T. Omochi, Y. Matsubara and H. Kourai
A possibility to recognize chirality by an excitable artificial liquid membrane 111

Žerovnik, E. and S. Lapanje

Interactions of myoglobin with urea and some alkylureas. I. Solvation in urea and alkylurea solutions 53
 Žerovnik, E., see Lapanje, S. 179

Zolla, L., M. Coletta, E. Di Cera, B. Giardina, H. Kuiper and M. Brunori

Discrimination of tertiary and quaternary Bohr effect in the O₂ binding of *Helix pomatia* β -hemocyanin

319
