

AUTHOR INDEX TO VOLUME 26 (1987)

- Acuña, A.U., González-Rodríguez, J., Lillo, M.P. and Razi Naqvi, K.
Protein structure probed by polarization spectroscopy. I. Evidence for rigidity from stationary fluorescence 55
- Acuña, A.U., González-Rodríguez, J., Lillo, M.P. and Razi Naqvi, K.
Protein structure probed by polarization spectroscopy. II. A time-resolved fluorescence study of human fibrinogen 63
- Ansari, A., Berendzen, J., Braunstein, D., Cowen, B.R., Frauenfelder, H., Hong, M.K., Iben, I.E.T., Johnson, J.B., Ormos, P., Sauke, T.B., Scholl, R., Schulte, A., Steinbach, P.J., Vittitow, J. and Young, R.D.
Rebinding and relaxation in the myoglobin pocket 337
- Bardsley, W.G., McGinlay, P.B. and Roig, M.G.
Conditions when statistical tests for model discrimination have high power. Some examples from pharmacokinetics, ligand binding, transient and steady-state enzyme kinetics 1
- Berendzen, J., see Ansari, A. 337
- Braunstein, D., see Ansari, A. 337
- Bräunig, R., Gushimana, Y. and Ilgenfritz, G.
Ionic strength dependence of the electric dissociation field effect. Investigation of 2,6-dinitrophenol and application to the acid-alkaline transition of metmyoglobin and methemoglobin 181
- Buchholtz, F. and Schneider, F.W.
Computer simulation of T3/T7 phase infection using lag times 171
- Calmettes, P., Eisenberg, H. and Zaccai, G.
Structure of halophilic malate dehydrogenase in multimolar KCl solutions from neutron scattering and ultracentrifugation 279
- Clegg, R.M., see Regenfuss, P. 83
- Corcia, A., see Pecht, I. 291
- Cowen, B.R., see Ansari, A. 337
- Diebler, H., Secco, F. and Venturini, M.
The binding of Mg(II) and Ni(II) to synthetic polynucleotides 193
- Diekmann, S. and Pörschke, D.
Electro-optical analysis of 'curved' DNA fragments 207
- Echegoyen, L., see Gokel, G.W. 225
- Eisenberg, H., see Calmettes, P. 279
- Epe, B., see Woolley, P. 367
- Eriksson, L.E.G.
Interaction of charged amphiphilic drugs with phosphatidylcholine vesicles studied by NMR 9
- Eyring, E.M., see Gokel, G.W. 225
- Fontana, W. and Schuster, P.
A computer model of evolutionary optimization 123
- Förster, W., see Sugar, I.P. 321
- Frauenfelder, H., see Ansari, A. 337
- Fujiyoshi, T., see Ogata, K. 71
- Gokel, G.W., Echegoyen, L., Kim, M.S., Eyring, E.M. and Petrucci, S.
Influence of solvent, anion and presence of nitrogen in the ring structure on the mechanism of complexation of alkali metal cations with crown ethers 225
- González-Rodríguez, J., see Acuña, A.U. 55
- González-Rodríguez, J., see Acuña, A.U. 63
- Greipel, J., Maass, G. and Mayer, F.
Complexes of the single-stranded DNA-binding protein from *Escherichia coli* (Eco SSB) with poly(dT). An investigation of their structure and internal dynamics by means of electron microscopy and NMR 149
- Grell, E., see Prahhananda, B.S. 217
- Grodzinsky, A.J., see Valleton, J.-M. 29
- Gushimana, Y., see Bräunig, R. 181
- Gutfreund, H.
Reflections on the kinetics of substrate binding 117
- Hahn, U., see MacKerell, A.D., Jr 247
- Hamori, E. and Jovin, T.M.
The B-Z conformational transition and aggregation of poly[(G-C)] induced by moderate concentrations of $Mg(ClO_4)_2$ 375
- Hess, B., see Müller, S.C. 357
- Hong, M.K., see Ansari, A. 337
- Iben, I.E.T., see Ansari, A. 337
- Ilgenfritz, G., see Bräunig, R. 181
- Johnson, J.B., see Ansari, A. 337
- Jovin, T.M., see Hamori, E. 375
- Kim, M.S., see Gokel, G.W. 225
- Lakowicz, J.R., see Wells, B.D. 39

Lifson, S.		Ruf, H.	
Chemical selection, diversity, teleonomy and the second law of thermodynamics. Reflections on Eigen's theory of self-organization of matter	303	The kinetics of binding of <i>o</i> -methyl red to the outer surface of unilamellar spherical phospholipid vesicles	313
Lillo, M.P., see Acuña, A.U.	55	Saenger, W., see MacKerell, A.D., Jr	247
Lillo, M.P., see Acuña, A.U.	63	Sauke, T.B., see Ansari, A.	337
Maass, G., see Greipel, J.	149	Schneider, F.W., see Buchholtz, F.	171
MacKerell, A.D., Jr, Rigler, R., Nilsson, L., Hahn, U. and Saenger, W.		Scholl, R., see Ansari, A.	337
Protein dynamics. A time-resolved fluorescence, energetic and molecular dynamics study of ribonuclease T ₁	247	Schulte, A., see Ansari, A.	337
Mayer, F., see Greipel, J.	149	Schuster, P., see Fontana, W.	123
McGinlay, P.B., see Bardsley, W.G.	1	Schwarz, G.	
Müller, S.C., Plessner, T. and Hess, B.		Basic kinetics of binding and incorporation with supramolecular aggregates	163
Three-dimensional representation of chemical gradients	357	Secco, F., see Diebler, H.	193
Neumann, E., see Sugar, I.P.	321	Selegny, E., see Valleton, J.-M.	29
Nilsson, L., see MacKerell, A.D., Jr	247	Selegny, E., see Vincent, J.-C.	45
Ogata, K., Toko, K., Fujiyoshi, T. and Yamafuji, K.		Steinbach, P.J., see Ansari, A.	337
Electric inhomogeneity in membranes of Characean internode influenced by light/dark transition, O ₂ , N ₂ , CO ₂ -free air and extracellular pH	71	Steinhäuser, K.G., see Woolley, P.	367
Ormos, P., see Ansari, A.	337	Stucki, J., see Vcuthey, A.-L.	19
Pecht, I. and Corcia, A.		Sugar, I.P., Förster, W. and Neumann, E.	
Stimulus-secretion coupling mechanisms in mast cells	291	Model of cell electrofusion. Membrane electroporation, pore coalescence and percolation	321
Petrucci, S., see Gokel, G.W.	225	Toko, K., see Ogata, K.	71
Plessner, T., see Müller, S.C.	357	Valleton, J.-M., Grodzinsky, A.J. and Selegny, E.	
Pohl, F.M.		Theoretical study of mechano-chemical couplings in a compartmental enzyme system. I. Analytical treatment	29
Hysteretic behaviour of a Z-DNA-antibody complex	385	Venturini, M., see Diebler, H.	193
Pörschke, D., see Diekmann, S.	207	Vcuthey, A.-L. and Stucki, J.	
Prabhananda, B.S., Rittger, E. and Grell, E.		The adenylate kinase reaction acts as a frequency filter towards fluctuations of ATP utilization in the cell	19
Kinetics and mechanism of anionic ligand binding to carbonic anhydrase	217	Vincent, J.-C. and Selegny, E.	
Razi Naqvi, K., see Acuña, A.U.	55	Immobilized cycling enzyme active transport systems. pH feedback control	45
Razi Naqvi, K., see Acuña, A.U.	63	Vittitow, J., see Ansari, A.	337
Regenfuss, P. and Clegg, R.M.		Wells, B.D. and Lakowicz, J.R.	
Diffusion-controlled association of a dye, 1-anilinonaphthalene-8-sulfonic acid, to a protein, bovine serum albumin, using a fast-flow microsecond mixer and stopped-flow	83	Intensity and anisotropy decays of the Wye base of yeast tRNA ^{Phe} as measured by frequency-domain fluorometry	39
Reichardt, W.		Woolley, P., Steinhäuser, K.G. and Epe, B.	
Computation of optical motion by movement detectors	263	Förster-type energy transfer. Simultaneous 'forward' and 'reverse' transfer between unlike fluorophores	367
Riesner, D., see Rosenbaum, V.	235	Wróbel, D.	
Rigler, R., see MacKerell, A.D., Jr	247	Resonance Raman spectra of chlorophylls dissolved in liquid crystal matrices. I. The interaction between chlorophylls and a liquid crystalline MBBA + EBBA mixture	91
Rittger, E., see Prabhananda, B.S.	217	Yamafuji, K., see Ogata, K.	71
Roig, M.G., see Bardsley, W.G.	1	Young, R.D., see Ansari, A.	337
Rosenbaum, V. and Riesner, D.		Zaccari, G., see Calmettes, P.	279
Temperature-gradient gel electrophoresis. Thermodynamic analysis of nucleic acids and proteins in purified form and in cellular extracts	235
