

# BIOPHYSICAL CHEMISTRY

*An International Journal devoted to the Physics and Chemistry of Biological Phenomena*

## Aims and Scope of the Journal

The journal is devoted to the interpretation of biological phenomena in terms of the principles and methods of physics and chemistry. It is receptive to articles which deal with biological molecules and systems, and to papers which treat systems serving as models for these. Treatments, phenomenological as well as molecular, of the interactions, structure and biological functions of individual biological macromolecules and of supramolecular structures are also within the journal's domain.
