The term  $-k_2[\text{E-I-X}][\text{AH}]$  should be deleted from Eq. (40). The inability of Scheme 3, especially Eq. (33), to fit the experimental data has since been proven by direct experimentation (M. Bakovic and

H.B. Dunford, *J. Biol. Chem.*, 271 (1996) 2048). We thank E.A. Redding and S.N. Kryloc for helpful discussions.
