Biophysical Chemistry 73 (1998) 283–287

Biophysical
Chemistry

Subject Index to Volume 73

¹⁷O NMR

Jeener–Broekaert experiment; Four-quantum filtration experiment; Quadrupolar splittings (Wickstead, B. (73) 129)

²³Na NMR; Mitochondria; Erythrocytes; Multiple-quantum filled NMR (Grieve, S.M. (73) 137)

²³Na NMR

¹⁷O NMR; Mitochondria; Erythrocytes; Multiple-quantum filled NMR (Grieve, S.M. (73) 137)

α -helix

Thermophilic protein; Quasi-continuity model; Rigid-body oscillation; Microwave absorption (Ptak, D. (73) 121)

Absorption

Liposome; Retinol; Retinol palmitate; Fluorescence; Binding; Viscosity; Lysis; Delivery (Singh, A.K. (73) 155)

Anesthesia

Dipole; Quadrupole; Polarizability; Fluorobenzene; Drug binding (Trudell, J.R. (73) 7)

Apparent equilibrium constant

Enthalpy; Entropy; Thermodynamics; Tryptophan synthase (Kishore, N. (73) 265)

Aqueous solutions

DL-Aminobutyric acid; Thermodynamic model (Vera, J.H. (73) 77)

Arrhenius analysis

Flash-photolysis; Photochemistry; Sensory rhodopsin; *Na-tronobacterium pharaonis* (Takao, K.-i. (73) 145)

Attractor coexistence

Hormonal systems; Negative feedback coupling; Quasaiperiodicity; Chaos (Londergan, C.H. (73) 85)

Bacterial cell

Supercoiled DNA; Phase separation; Liquid crystal; Nucleoid; Proteins (Okjik, T. (73) 23)

Binding

Liposome; Retinol; Retinol palmitate; Absorption; Fluorescence; Viscosity; Lysis; Delivery (Singh, A.K. (73) 155)

Chaos

Hormonal systems; Negative feedback coupling; Attractor coexistence; Quasaiperiodicity (Londergan, C.H. (73) 85)

Chemical probing

Curved DNA; dA_n-tracts (Paleček, E. (73) 205)

Complex dynamics

Extracellular signal transduction system; Hormone–receptor interaction; Cycle of G protein; Computer simulation (Barsegov, V. (73) 31)

Computer simulation

Extracellular signal transduction system; Hormone–receptor interaction; Cycle of G protein; Complex dynamics (Barsegov, V. (73) 31)

Curved DNA

dA_n-tracts; Chemical probing (Najedlý, K. (73) 205)

Cycle of G protein

Extracellular signal transduction system; Hormone–receptor interaction; Complex dynamics; Computer simulation (Barsegov, V. (73) 31)

Cytochrome P450

Molecular orbital calculations; Hydroxylation (Zakharieva, O. (73) 189)

dA_n-tracts

Curved DNA; Chemical probing (Najedlý, K. (73) 205)

Daunomycin

Doxorubicin; Solvatochromism; Fluorescence spectrum; Deconvolution; Reverse micelles (Karukstis, K.K. (73) 249)

Deconvolution

Doxorubicin; Daunomycin; Solvatochromism; Fluorescence spectrum; Reverse micelles (Karukstis, K.K. (73) 249)

Delivery

Liposome; Retinol; Retinol palmitate; Absorption; Fluorescence; Binding; Viscosity; Lysis (Singh, A.K. (73) 155)

Dipole

Quadrupole; Polarizability; Anesthesia; Fluorobenzene; Drug binding (Trudell, J.R. (73) 7)

Doxorubicin

Daunomycin; Solvatochromism; Fluorescence spectrum; Deconvolution; Reverse micelles (Karukstis, K.K. (73) 249)

DL-Aminobutyric acid

Aqueous solutions; Thermodynamic model (Vera, J.H. (73) 77)

Drug binding

Dipole; Quadrupole; Polarizability; Anesthesia; Fluorobenzene (Trudell, J.R. (73) 7)

EGFR

Time resolved fluorescence; Fluorescence of phenylalanine; Molecular dynamics; Transmembrane domains; ErbB-2 (Duneau, J.P. (73) 109)

Enthalpy

Apparent equilibrium constant; Entropy; Thermodynamics; Tryptophan synthase (Kishore, N. (73) 265)

Entropy

Enthalpy; Apparent equilibrium constant; Thermodynamics; Tryptophan synthase (Kishore, N. (73) 265)

Enzyme kinetics

Multi type Poisson processes; Erlangian distribution; Metabolic control analysis; Multiple nutrient limitation of algal growth (Koojman, S.A.L.M. (73) 179)

ErbB-2

Time resolved fluorescence; Fluorescence of phenylalanine; Molecular dynamics; Transmembrane domains; EGFR (Duneau, J.P. (73) 109)

Erlangian distribution

Multi type Poisson processes; Enzyme kinetics; Metabolic control analysis; Multiple nutrient limitation of algal growth (Koojman, S.A.L.M. (73) 179)

Erythrocytes

^{17}O NMR; ^{23}Na NMR; Mitochondria; Multiple-quantum filled NMR (Grieve, S.M. (73) 137)

Extracellular signal transduction system

Hormone–receptor interaction; Cycle of G protein; Complex dynamics; Computer simulation (Barsegov, V. (73) 31)

Flash-photolysis

Photochemistry; Arrhenius analysis; Sensory rhodopsin; *Na-tronobacterium pharaonis* (Takao, K.-i. (73) 145)

Fluorescence of phenylalanine

Time resolved fluorescence; Molecular dynamics; Transmembrane domains; EGFR; ErbB-2 (Duneau, J.P. (73) 109)

Fluorescence spectrum

Doxorubicin; Daunomycin; Solvatochromism; Deconvolution; Reverse micelles (Karukstis, K.K. (73) 249)

Fluorescence

Liposome; Retinol; Retinol palmitate; Absorption; Binding; Viscosity; Lysis; Delivery (Singh, A.K. (73) 155)

Fluorobenzene

Dipole; Quadrupole; Polarizability; Anesthesia; Drug binding (Trudell, J.R. (73) 7)

Fluorophore

Quencher; Phosphorescence (Zelent, B. (73) 53)

Four-quantum filtration experiment

Jeener–Broekaert experiment; ^{17}O NMR; Quadrupolar splittings (Wickstead, B. (73) 129)

Fractal dimension

Melanin; Light scattering; Polymerization; Hydrodynamic radius; Radius of gyration (Bridelli, M.G. (73) 227)

Glycyl group

Partial molar heat capacity; Partial molar volume; Model compound; Unfolded protein (Häkel, M. (73) 163)

Hormonal systems

Negative feedback coupling; Attractor coexistence; Quasi-periodicity; Chaos (Londergan, C.H. (73) 85)

Hormone–receptor interaction

Extracellular signal transduction system; Cycle of G protein; Complex dynamics; Computer simulation (Barsegov, V. (73) 31)

Hydrodynamic radius

Melanin; Light scattering; Polymerization; Radius of gyration; Fractal dimension (Bridelli, M.G. (73) 227)

Hydroxylation

Cytochrome P450; Molecular orbital calculations (Zakharieva, O. (73) 189)

Internal motions

Lysozyme; Principal component analysis; Molecular dynamics (Laatikaninen, R. (73) 1)

Jeener–Broekaert experiment

Four-quantum filtration experiment; ^{17}O NMR; Quadrupolar splittings (Wickstead, B. (73) 129)

Kinetics

Renaturation; Two-state transition; Metastable denatured state (Potekhin, S.A. (73) 241)

Laser pH jump

Photoacoustics; Volume changes; Proton transfer (Viappiani, C. (73) 13)

Light scattering

Melanin; Polymerization; Hydrodynamic radius; Radius of gyration; Fractal dimension (Bridelli, M.G. (73) 227)

Liposome

Retinol; Retinol palmitate; Absorption; Fluorescence; Binding; Viscosity; Lysis; Delivery (Singh, A.K. (73) 155)

Liquid crystal

Supercoiled DNA; Bacterial cell; Phase separation; Nucleoid; Proteins (Odijk, T. (73) 23)

Lysis

Liposome; Retinol; Retinol palmitate; Absorption; Fluorescence; Binding; Viscosity; Delivery (Singh, A.K. (73) 155)

Lysozyme

Principal component analysis; Internal motions; Molecular dynamics (Laatikaninen, R. (73) 1)

Melanin

Light scattering; Polymerization; Hydrodynamic radius; Radius of gyration; Fractal dimension (Bridelli, M.G. (73) 227)

Metabolic control analysis

Multi type Poisson processes; Erlangian distribution; Enzyme kinetics; Multiple nutrient limitation of algal growth (Koojman, S.A.L.M. (73) 179)

Metastable denatured state

Kinetics; Renaturation; Two-state transition (Potekhin, S.A. (73) 241)

Microwave absorption

Thermophilic protein; Quasi-continuity model; Rigid-body oscillation; α -helix (Ptak, D. (73) 121)

Mitochondria

^{17}O NMR; ^{23}Na NMR; Erythrocytes; Multiple-quantum filled NMR (Grieve, S.M. (73) 137)

Model compound

Partial molar heat capacity; Partial molar volume; Glycyl group; Unfolded protein (Häkel, M. (73) 163)

Molecular dynamics

Lysozyme; Principal component analysis; Internal motions (Laatikaninen, R. (73) 1)

Time resolved fluorescence; Fluorescence of phenylalanine; Transmembrane domains; EGFR; ErbB-2 (Duneau, J.P. (73) 109)

Molecular orbital calculations

Cytochrome P450; Hydroxylation (Zakharieva, O. (73) 189)

Multi type Poisson processes

Erlangian distribution; Enzyme kinetics; Metabolic control analysis; Multiple nutrient limitation of algal growth (Koojman, S.A.L.M. (73) 179)

Multiple nutrient limitation of algal growth

Multi type Poisson processes; Erlangian distribution; Enzyme kinetics; Metabolic control analysis (Koojman, S.A.L.M. (73) 179)

Multiple-quantum filled NMR; ^{17}O NMR; ^{23}Na NMR; Mitochondria; Erythrocytes (Grieve, S.M. (73) 137)

***Naatronobacterium pharaonis*;**

Flash-photolysis; Photochemistry; Arrhenius analysis; Sensory rhodopsin (Takao, K.-i. (73) 145)

Negative feedback coupling

Hormonal systems; Attractor coexistence; Quasiperiodicity; Chaos (Londergan, C.H. (73) 85)

Nucleoid

Supercoiled DNA; Bacterial cell; Phase separation; Liquid crystal; Proteins (Odijk, T. (73) 23)

***Ortho*-aminobenzoyl amino acids**

Peptide fluorescent probe; Peptide synthesis; Peptide-lipid interaction (Turchiello, R.F. (73) 217)

Partial molar heat capacity

Partial molar volume; Glycyl group; Model compound; Unfolded protein (Häkel, M. (73) 163)

Partial molar volume

Partial molar heat capacity; Glycyl group; Model compound; Unfolded protein (Häckel, M. (73) 163)

Peptide fluorescent probe

Peptide synthesis; Peptide-lipid interaction; *Ortho*-aminobenzoyl amino acids (Turchiello, R.F. (73) 217)

Peptide synthesis

Peptide fluorescent probe; Peptide-lipid interaction; *Ortho*-aminobenzoyl amino acids (Turchiello, R.F. (73) 217)

Peptide-lipid interaction

Peptide fluorescent probe; Peptide synthesis; *Ortho*-aminobenzoyl amino acids (Turchiello, R.F. (73) 217)

Phase separation

Supercoiled DNA; Bacterial cell; Liquid crystal; Nucleoid; Proteins (Odijk, T. (73) 23)

Phosphorescence

Fluorophore; Quencher (Zelent, B. (73) 53)

Photoacoustics

Volume changes; Proton transfer; Laser pH jump (Viappiani, C. (73) 13)

Photochemistry

Flash-photolysis; Arrhenius analysis; Sensory rhodopsin; *Na-tronobacterium pharaonis* (Takao, K.-i. (73) 145)

Polarizability

Dipole; Quadrupole; Anesthesia; Fluorobenzene; Drug binding (Trudell, J.R. (73) 7)

Polymerization

Melanin; Light scattering; Hydrodynamic radius; Radius of gyration; Fractal dimension (Bridelli, M.G. (73) 227)

Principal component analysis

Lysozyme; Internal motions; Molecular dynamics (Laatikainen, R. (73) 1)

Proteins

Supercoiled DNA; Bacterial cell; Phase separation; Liquid crystal; Nucleoid (Odijk, T. (73) 23)

Proton transfer

Photoacoustics; Volume changes; Laser pH jump (Viappiani, C. (73) 13)

Quadrupolar splittings

Jeener-Broekaert experiment; Four-quantum filtration experiment; ^{17}O NMR (Wickstead, B. (73) 129)

Quadrupole

Dipole; Polarizability; Anesthesia; Fluorobenzene; Drug binding (Trudell, J.R. (73) 7)

Quasaiperiodicity

Hormonal systems; Negative feedback coupling; Attractor co-existence; Chaos (Londergan, C.H. (73) 85)

Quasi-continuity model

Thermophilic protein; Rigid-body oscillation; α -helix; Microwave absorption (Ptak, D. (73) 121)

Quencher

Fluorophore; Phosphorescence (Zelent, B. (73) 53)

Radius of gyration

Melanin; Light scattering; Polymerization; Hydrodynamic radius; Fractal dimension (Bridelli, M.G. (73) 227)

Renaturation

Kinetics; Two-state transition; Metastable denatured state (Potekhin, S.A. (73) 241)

Retinol palmitate

Liposome; Retinol; Absorption; Fluorescence; Binding; Viscosity; Lysis; Delivery (Singh, A.K. (73) 155)

Retinol

Liposome; Retinol palmitate; Absorption; Fluorescence; Binding; Viscosity; Lysis; Delivery (Singh, A.K. (73) 155)

Reverse micelles

Doxorubicin; Daunomycin; Solvatochromism; Fluorescence spectrum; Deconvolution (Karukstis, K.K. (73) 249)

Rigid-body oscillation

Thermophilic protein; Quasi-continuity model; α -helix; Microwave absorption (Ptak, D. (73) 121)

Sensory rhodopsin

Flash-photolysis; Photochemistry; Arrhenius analysis; *Na-tronobacterium pharaonis* (Takao, K.-i. (73) 145)

Solvatochromism

Doxorubicin; Daunomycin; Fluorescence spectrum; Deconvolution; Reverse micelles (Karukstis, K.K. (73) 249)

Supercoiled DNA

Bacterial cell; Phase separation; Liquid crystal; Nucleoid; Proteins (Odijk, T. (73) 23)

Thermodynamic model; DL-Aminobutyric acid; Aqueous solutions (Soto, A. (73) 77)

Thermodynamics

Enthalpy; Apparent equilibrium constant; Entropy; Tryptophan synthase (Kishore, N. (73) 265)

Thermophilic protein

Quasi-continuity model; Rigid-body oscillation; α -helix; Microwave absorption (Ptak, D. (73) 121)

Time resolved fluorescence

Fluorescence of phenylalanine; Molecular dynamics; Transmembrane domains; EGFR; ErbB-2 (Duneau, J.P. (73) 109)

Transmembrane domains

Time resolved fluorescence; Fluorescence of phenylalanine; Molecular dynamics; EGFR; ErbB-2 (Duneau, J.P. (73) 109)

Tryptophan synthase

Enthalpy; Apparent equilibrium constant; Entropy; Thermodynamics (Kishore, N. (73) 265)

Two-state transition

Kinetics; Renaturation; Metastable denatured state (Potekhin, S.A. (73) 241)

Unfolded protein

Partial molar heat capacity; Partial molar volume; Glycyl group; Model compound (Häckel, M. (73) 163)

Viscosity

Liposome; Retinol; Retinol palmitate; Absorption; Fluorescence; Binding; Lysis; Delivery (Singh, A.K. (73) 155)

Volume changes

Photoacoustics; Proton transfer; Laser pH jump (Viappiani, C. (73) 13)
