

Subject Index to Volume 75

β -Galactosidase

Reaction mechanism; Association kinetics; Fluorescence correlation spectroscopy; CEDIATM (Meyer-Almes, F.-J. (75) 151)

γ -Crystallins

Liquid–liquid phase separation; Oligomerization; Crosslinking (Asherie, N. (75) 213)

1, *N*⁶-etheno-adenosine nucleotide

Fluorescence microscopy; Visualization of F-actin; Nucleotide binding of actin (Nakayama, H. (75) 1)

a.c. Conductivity

Phospholipase A₂ (PLA₂); Electronic structure; Biological activity; Frontier orbital (Wang, Q. (75) 129)

Acid-activated mitomycin C

Cyclic voltammetry; Anti-cancer drug; Hanging mercury drop electrode; DNA-modified electrode; Mitomycin C–DNA interaction (Marín, D. (75) 87)

Actin filament

Force generation; Myosin; Sliding movement (Hatori, K. (75) 81)

Alkanethiols

Phospholipids; Bilayers; Kinetic study; Surface plasmon resonance (Hubbard, J.B. (75) 163)

Amino acid composition

Molecular chaperones; Hydrophobic and charged patches; Medium- and long-range interactions (Kumarevel, T.S. (75) 105)

Anti-cancer drug

Cyclic voltammetry; Hanging mercury drop electrode; Acid-activated mitomycin C; DNA-modified electrode; Mitomycin C–DNA interaction (Marín, D. (75) 87)

Association kinetics

β -Galactosidase; Reaction mechanism; Fluorescence correlation spectroscopy; CEDIATM (Meyer-Almes, F.-J. (75) 151)

Bilayer thickness

Deuterium-labeled sterols; Oriented bilayers; Plant lipids; Side chain dynamics (Marsan, M.P. (75) 45)

Bilayers

Alkanethiols; Phospholipids; Kinetic study; Surface plasmon resonance (Hubbard, J.B. (75) 163)

Binding free energy

Protein–protein interaction; Continuum model; Electrostatics; Hydrophobic effect; Molecular association (Olson, M.A. (75) 115)

Biological activity

Phospholipase A₂ (PLA₂); Electronic structure; a.c. Conductivity; Frontier orbital (Wang, Q. (75) 129)

Blood coagulation

Thrombin modulation; Fragment 1; Fragment 2; Thrombin inhibition; Proteolysis (Shi, F. (75) 187)

CEDIATM

β -Galactosidase; Reaction mechanism; Association kinetics; Fluorescence correlation spectroscopy (Meyer-Almes, F.-J. (75) 151)

Carboxyhemoglobin

Hemoglobin; MWC; Monod, Wyman and Changeux; Oxygenation curves (Senozan, N.M. (75) 141)

Charged cylinders

Stretching of duplex DNA; Poisson–Boltzmann model; Salt effects; Force-extension data; Cooperative unwinding (Stigter, D. (75) 229)

Compressibility

Peptides; Hydration; Ionization of terminal groups; Side chains; Volume (Chalikian, T.V. (75) 57)

Computer model

Signal transduction; Oxidative phosphorylation; Regulation; Energy demand; Isolated mitochondria (Korzeniewski, B. (75) 73)

Confocal scanning laser microscopy

Cross-correlation; ICCS; Membrane dynamics; Photobleaching; Transferrin receptors (Srivastava, M. (75) 201)

Continuum model

Protein-protein interaction; Binding free energy; Electrostatics; Hydrophobic effect; Molecular association (Olson, M.A. (75) 115)

Cooperative unwinding

Stretching of duplex DNA; Charged cylinders; Poisson-Boltzmann model; Salt effects; Force-extension data (Stigter, D. (75) 229)

Cross-correlation

Confocal scanning laser microscopy; ICCS; Membrane dynamics; Photobleaching; Transferrin receptors (Srivastava, M. (75) 201)

Crosslinking

Liquid-liquid phase separation; γ -Crystallins; Oligomerization (Asherie, N. (75) 213)

Cyclic voltammetry

Anti-cancer drug; Hanging mercury drop electrode; Acid-activated mitomycin C; DNA-modified electrode; Mitomycin C-DNA interaction (Marín, D. (75) 87)

DNA-modified electrode

Cyclic voltammetry; Anti-cancer drug; Hanging mercury drop electrode; Acid-activated mitomycin C; Mitomycin C-DNA interaction (Marín, D. (75) 87)

Denaturation

Supercoiled DNA; Monte Carlo (Kundu, S. (75) 177)

Deuterium-labeled sterols

Bilayer thickness; Oriented bilayers; Plant lipids; Side chain dynamics (Marsan, M.P. (75) 45)

Effect of serum protein

Electrophilicity; Hydrophobicity (Kodaka, M. (75) 259)

Electron spin resonance

Liposomes; Polymer-lipids; Spin label; Spectrophotometry (Belsito, B. (75) 33)

Electronic structure

Phospholipase A₂ (PLA₂); a.c. Conductivity; Biological activity; Frontier orbital (Wang, Q. (75) 129)

Electrophilicity

Hydrophobicity; Effect of serum protein (Kodaka, M. (75) 259)

Electrophoretic mobility

Multistranded DNA; Frayed wires; Gel electrophoresis; Reptation plot (Protozanova, E. (75) 249)

Electrostatics

Protein-protein interaction; Continuum model; Binding free energy; Hydrophobic effect; Molecular association (Olson, M.A. (75) 115)

Energy demand

Signal transduction; Oxidative phosphorylation; Regulation; Computer model; Isolated mitochondria (Korzeniewski, B. (75) 73)

Fluorescence correlation spectroscopy

β -Galactosidase; Reaction mechanism; Association kinetics; CEDIATM (Meyer-Almes, F.-J. (75) 151)

Fluorescence microscopy

Visualization of F-actin; 1,*N*⁶-etheno-adenosine nucleotide; Nucleotide binding of actin (Nakayama, H. (75) 1)

Force generation

Actin filament; Myosin; Sliding movement (Hatori, K. (75) 81)

Force-extension data

Stretching of duplex DNA; Charged cylinders; Poisson-Boltzmann model; Salt effects; Cooperative unwinding (Stigter, D. (75) 229)

Fragment 1

Thrombin modulation; Fragment 2; Thrombin inhibition; Blood coagulation; Proteolysis (Shi, F. (75) 187)

Fragment 2

Thrombin modulation; Fragment 1; Thrombin inhibition; Blood coagulation; Proteolysis (Shi, F. (75) 187)

Frayed wires

Multistranded DNA; Gel electrophoresis; Electrophoretic mobility; Reptation plot (Protozanova, E. (75) 249)

Frontier orbital

Phospholipase A₂ (PLA₂); Electronic structure; a.c. Conductivity; Biological activity (Wang, Q. (75) 129)

Gel electrophoresis

Multistranded DNA; Frayed wires; Electrophoretic mobility; Reptation plot (Protozanova, E. (75) 249)

Hanging mercury drop electrode

Cyclic voltammetry; Anti-cancer drug; Acid-activated mi-

tomycin C; DNA-modified electrode; Mitomycin C–DNA interaction (Marín, D. (75) 87)

Hemoglobin

Carboxyhemoglobin; MWC; Monod, Wyman and Changeux; Oxygenation curves (Senozan, N.M. (75) 141)

Hydration

Peptides; Ionization of terminal groups; Side chains; Volume; Compressibility (Chalikian, T.V. (75) 57)

Hydrophobic and charged patches

Molecular chaperones; Amino acid composition; Medium- and long-range interactions (Kumarevel, T.S. (75) 105)

Hydrophobic effect

Protein–protein interaction; Continuum model; Binding free energy; Electrostatics; Molecular association (Olson, M.A. (75) 115)

Hydrophobicity

Electrophilicity; Effect of serum protein (Kodaka, M. (75) 259)

ICCS

Cross-correlation; Confocal scanning laser microscopy; Membrane dynamics; Photobleaching; Transferrin receptors (Srivastava, M. (75) 201)

Ionization of terminal groups

Peptides; Hydration; Side chains; Volume; Compressibility (Chalikian, T.V. (75) 57)

Isolated mitochondria

Signal transduction; Oxidative phosphorylation; Regulation; Computer model; Energy demand (Korzeniewski, B. (75) 73)

Kinetic study

Alkanethiols; Phospholipids; Bilayers; Surface plasmon resonance (Hubbard, J.B. (75) 163)

Liposomes

Polymer-lipids; Spin label; Electron spin resonance; Spectrophotometry (Belsito, S. (75) 33)

Liquid–liquid phase separation

γ -Crystallins; Oligomerization; Crosslinking (Asherie, N. (75) 213)

MWC

Hemoglobin; Carboxyhemoglobin; Monod, Wyman and Changeux; Oxygenation curves (Senozan, N.M. (75) 141)

Medium- and long-range interactions

Molecular chaperones; Amino acid composition; Hydrophobic and charged patches (Kumarevel, T.S. (75) 105)

Melting

Microcalorimetry; Ribosomes; RNA (Bonincontro, A. (75) 97)

Membrane dynamics

Cross-correlation; Confocal scanning laser microscopy; ICCS; Photobleaching; Transferrin receptors (Srivastava, M. (75) 201)

Microcalorimetry

Melting; Ribosomes; RNA (Bonincontro, A. (75) 97)

Mitomycin C–DNA interaction

Cyclic voltammetry; Anti-cancer drug; Hanging mercury drop electrode; Acid-activated mitomycin C; DNA-modified electrode (Marín, D. (75) 87)

Molecular association

Protein–protein interaction; Continuum model; Binding free energy; Electrostatics; Hydrophobic effect (Olson, M.A. (75) 115)

Molecular chaperones

Amino acid composition; Hydrophobic and charged patches; Medium- and long-range interactions (Kumarevel, T.S. (75) 105)

Molecular dynamics simulation

Xenopus laevis Cu,Zn superoxide dismutase; Site-directed mutagenesis; Structure–function relationship (Faldoni, A. (75) 235)

Monod, Wyman and Changeux

Hemoglobin; Carboxyhemoglobin; MWC; Oxygenation curves (Senozan, N.M. (75) 141)

Monte Carlo

Supercoiled DNA; Denaturation (Kundu, S. (75) 177)

Multistranded DNA

Frayed wires; Gel electrophoresis; Electrophoretic mobility; Reptation plot (Protozanova, E. (75) 249)

Myosin

Actin filament; Force generation; Sliding movement (Hatori, K. (75) 81)

Nucleotide binding of actin

Fluorescence microscopy; Visualization of F-actin; 1,*N*⁶-etheno-adenosine nucleotide (Nakayama, H. (75) 1)

Oligomerization

Liquid–liquid phase separation; γ -Crystallins; Crosslinking (Asherie, N. (75) 213)

Open complex

ppGpp; Ribosomal protein promoters; Stringent response (Raghavan, A. (75) 7)

Oriented bilayers

Bilayer thickness; Deuterium-labeled sterols; Plant lipids; Side chain dynamics (Marsan, M.P. (75) 45)

Oxidative phosphorylation

Signal transduction; Regulation; Computer model; Energy demand; Isolated mitochondria (Korzeniewski, B. (75) 73)

Oxygenation curves

Hemoglobin; Carboxyhemoglobin; MWC; Monod, Wyman and Changeux (Senoan, N.M. (75) 141)

Peptides

Hydration; Ionization of terminal groups; Side chains; Volume; Compressibility (Chalikian, T.V. (75) 57)

Phospholipase A₂ (PLA₂)

Electronic structure; a.c. Conductivity; Biological activity; Frontier orbital (Wang, Q. (75) 129)

Phospholipids

Alkanethiols; Bilayers; Kinetic study; Surface plasmon resonance (Hubbard, J.B. (75) 163)

Photobleaching

Cross-correlation; Confocal scanning laser microscopy; ICCS; Membrane dynamics; Transferrin receptors (Srivastava, M. (75) 201)

Plant lipids

Bilayer thickness; Deuterium-labeled sterols; Oriented bilayers; Side chain dynamics (Marsan, M.P. (75) 45)

Poisson–Boltzmann model

Stretching of duplex DNA; Charged cylinders; Salt effects; Force-extension data; Cooperative unwinding (Stigter, D. (75) 229)

Polymer-lipids

Liposomes; Spin label; Electron spin resonance; Spectrophotometry (Belsito, S. (75) 33)

ppGpp

Ribosomal protein promoters; Stringent response; Open complex (Raghavan, A. (75) 7)

ppGpp

Stringent promoters; Sigma-release; Rotational correlation time (Raghavan, A. (75) 21)

Protein–protein interaction

Continuum model; Binding free energy; Electrostatics; Hydrophobic effect; Molecular association (Olson, M.A. (75) 115)

Proteolysis

Thrombin modulation; Fragment 1; Fragment 2; Thrombin inhibition; Blood coagulation (Shi. F. (75) 187)

RNA

Microcalorimetry; Melting; Ribosomes (Bonincontro, A. (75) 97)

Reaction mechanism

β -Galactosidase; Association kinetics; Fluorescence correlation spectroscopy; CEDIATM (Meyer-Almes, F.-J. (75) 151)

Regulation

Signal transduction; Oxidative phosphorylation; Computer model; Energy demand; Isolated mitochondria (Korzeniewski, B. (75) 73)

Reptation plot

Multistranded DNA; Frayed wires; Gel electrophoresis; Electrophoretic mobility (Protozanova, E. (75) 249)

Ribosomal protein promoters

ppGpp; Stringent response; Open complex (Raghavan, A. (75) 7)

Ribosomes

Microcalorimetry; Melting; RNA (Bonincontro, A. (75) 97)

Rotational correlation time

Stringent promoters; ppGpp; Sigma-release (Raghavan, A. (75) 21)

Salt effects

Stretching of duplex DNA; Charged cylinders; Poisson–Boltzmann model; Force-extension data; Cooperative unwinding (Stigter, D. (75) 229)

Side chain dynamics

Bilayer thickness; Deuterium-labeled sterols; Oriented bilayers; Plant lipids (Marsan, M.P. (75) 45)

Side chains

Peptides; Hydration; Ionization of terminal groups; Volume; Compressibility (Chalikian, T.V. (75) 57)

Sigma-release

Stringent promoters; ppGpp; Rotational correlation time (Raghavan, A. (75) 21)

Signal transduction

Oxidative phosphorylation; Regulation; Computer model; Energy demand; Isolated mitochondria (Korzeniewski, B. (75) 73)

Site-directed mutagenesis

Molecular dynamics simulation; *Xenopus laevis* Cu,Zn super-

oxide dismutase; Structure–function relationship (Falconi, M. (75) 235)

Sliding movement

Actin filament; Force generation; Myosin (Hatori, K. (75) 81)

Spectrophotometry

Liposomes; Polymer-lipids; Spin label; Electron spin resonance (Belsito, S. (75) 33)

Spin label

Liposomes; Polymer-lipids; Electron spin resonance; Spectrophotometry (Belsito, S. (75) 33)

Stretching of duplex DNA

Charged cylinders; Poisson–Boltzmann model; Salt effects; Force-extension data; Cooperative unwinding (Stigter, D. (75) 229)

Stringent promoters

ppGpp; Sigma-release; Rotational correlation time (Raghavan, A. (75) 21)

Stringent response

ppGpp; Ribosomal protein promoters; Open complex (Raghavan, A. (75) 7)

Structure–function relationship

Molecular dynamics simulation; *Xenopus laevis* Cu,Zn superoxide dismutase; Site-directed mutagenesis (Falcini, M. (75) 235)

Supercoiled DNA

Denaturation; Monte Carlo (Kundu, S. (75) 177)

Surface plasmon resonance

Alkanethiols; Phospholipids; Bilayers; Kinetic study (Hubbard, J.B. (75) 163)

Thrombin inhibition

Thrombin modulation; Fragment 1; Fragment 2; Blood coagulation; Proteolysis (Shi, F. (75) 187)

Thrombin modulation

Fragment 1; Fragment 2; Thrombin inhibition; Blood coagulation; Proteolysis (Shi, F. (75) 187)

Transferrin receptors

Cross-correlation; Confocal scanning laser microscopy; ICCS; Membrane dynamics; Photobleaching (Srivastava, M. (75) 201)

Visualization of F-actin

Fluorescence microscopy; 1,*N*⁶-etheno-adenosine nucleotide; Nucleotide binding of actin (Nakayama, H. (75) 1)

Volume

Peptides; Hydration; Ionization of terminal groups; Side chains; Compressibility (Chalikian, T.V. (75) 57)

***Xenopus laevis* Cu,Zn superoxide dismutase**

Molecular dynamics simulation; Site-directed mutagenesis; Structure–function relationship (Falconi, M. (75) 235)
