

Subject Index to Volume 79

Allosteric regulation

Enzymic reactions; Diffusion; Synchronization; Microvolumes (Stange, P. (79) 231)

Amino acids

Solvation; General anesthetic; Protein; Lipid (Johansson, J.S. (79) 107)

Amphipathic probe

BD simulation; Dynamics; Model membrane (Fernandes, M.X. (79) 41)

Amphiphilic alpha-helix

Fusion peptide; Glycine termination; Influenza virus; Membrane destabilization; Side chain bulkiness (Matsumoto, T. (79) 153)

BD simulation

Dynamics; Model membrane; Amphipathic probe (Fernandes, M.X. (79) 41)

Biochemical switch

Bistability; Saddle-node bifurcation; Cyclin-dependent kinase inhibitor (Thron, C.D. (79) 95)

Biological self-organisation

Reaction–diffusion structures; Dissipative structures; Microtubules; *Drosophila* embryogenesis (Papaseit, C. (79) 33)

Bistability

Biochemical switch; Saddle-node bifurcation; Cyclin-dependent kinase inhibitor (Thron, C.D. (79) 95)

Calcium

EDTA; Thermodynamic parameters; Interactions (Griko, Y.V. (79) 117)

Chemical denaturation

Lectin CD; Thermal denaturation; Lectin fluorescence;

Lectins from *Artocarpus integrifolia*; Denaturing of lectins (Silva-Lucca, R.A. (79) 81)

Chloride

Ion channel; Molecular dynamics simulation; Ionic diffusion coefficient; Potassium; Conductance prediction (Smith, G.R. (79) 129)

Coevolution

DNA; Pattern formation; Reaction–diffusion; Self-replicating spots; Molecular evolution; Cooperation (Kirner, T. (79) 163)

Conductance prediction

Ion channel; Molecular dynamics simulation; Ionic diffusion coefficient; Potassium; Chloride (Smith, G.R. (79) 129)

Cooperation

DNA; Pattern formation; Reaction–diffusion; Self-replicating spots; Molecular evolution; Coevolution (Kirner, T. (79) 163)

Creatine kinase

Irreversible thermal denaturation; Differential scanning calorimetry (Lyubarev, A.E. (79) 199)

Cyclin-dependent kinase inhibitor

Biochemical switch; Bistability; Saddle-node bifurcation (Thron, C.D. (79) 95)

Cytochrome *c* chemistry

NMR; Molecular dynamics; H33F mutant (Taler, G. (79) 193)

Cytochrome *c*

Disulfide bond; Electrochemistry; XPS; ESCA (Zhou, Y. (79) 55)

DNA

Pattern formation; Reaction–diffusion; Self-replicating spots; Molecular evolution; Coevolution; Cooperation (Kirner, T. (79) 163)

Myoglobin; Ferrylmyoglobin; Electrochemical generation; Protein films (Kong, J. (79) 219)

DNA structures

Raman spectroscopy; Nuclease digestion; Telomere; Electrophoresis (Poon, K. (79) 11)

Denaturing of lectins

Lectin CD; Thermal denaturation; Chemical denaturation; Lectin fluorescence; Lectins from *Artocarpus integrifolia* (Silva-Lucca, R.A. (79) 81)

Differential scanning calorimetry

Creatine kinase; Irreversible thermal denaturation (Lyubarev, A.E. (79) 199)

Differential scanning calorimetry

Phosphatidylglycerol; Subgel phase; Van der Waals interaction energy; Electron microscopy (Kodama, M. (79) 205)

Diffusion

Enzymic reactions; Allosteric regulation; Synchronization; Microvolumes (Stange, P. (79) 231)

Dissipative structures

Biological self-organisation; Reaction-diffusion structures; Microtubules; *Drosophila* embryogenesis (Papaseit, C. (79) 33)

Disulfide bond

Cytochrome *c*; Electrochemistry; XPS; ESCA (Zhou, Y. (79) 55)

***Drosophila* embryogenesis**

Biological self-organisation; Reaction-diffusion structures; Dissipative structures; Microtubules; *Drosophila* embryogenesis (Papaseit, C. (79) 33)

Dynamics

BD simulation; Model membrane; Amphipathic probe (Fernandes, M.X. (79) 41)

EDTA

Calcium; Thermodynamic parameters; Interactions (Griko, Y.V. (79) 117)

ESCA

Disulfide bond; Cytochrome *c*; Electrochemistry; XPS (Zhou, Y. (79) 55)

Electrochemical generation

Myoglobin; DNA; Ferrylmyoglobin; Protein films (Kong, K. (79) 219)

Electrochemistry

Disulfide bond; Cytochrome *c*; XPS; ESCA (Zhou, Y. (79) 55)

Electron microscopy

Phosphatidylglycerol; Subgel phase; Van der Waals interaction energy; Differential scanning calorimetry (Kodama, M. (79) 205)

Electrophoresis

Raman spectroscopy; DNA structures; Nuclease digestion; Telomere (Poon, K. (79) 11)

Electrospray ionization mass spectrometry

Protein/metal interactions; Protein/ligand interactions; Protein/protein interactions; Protein/DNA interactions; Gas-phase protein conformation (Veenstra, T.D. (79) 63)

Enzymic reactions

Allosteric regulation; Diffusion; Synchronization; Microvolumes (Stange, P. (79) 231)

Expression in *E. coli*

Pharaonis phoborhodopsin (*ppR*); *Pharaonis* sensory rhodopsin (*psR-II*); Photocycle; M-decay of mutants (Iwamoto, M. (79) 187)

Ferrylmyoglobin

Myoglobin; DNA; Electrochemical generation; Protein films (Kong, J. (79) 219)

Fluorescent probe

Paramagnetic fluorescence quenching; Spin label; Liposomes; Time-resolved fluorescence (Johnson, D.A. (79) 1)

Fusion peptide

Amphiphilic alpha-helix; Glycine termination; Influenza virus; Membrane destabilization; Side chain bulkiness (Matsumoto, T. (79) 153)

Gas-phase protein conformation

Electrospray ionization mass spectrometry; Protein/metal interactions; Protein/ligand interactions; Protein/protein interactions; Protein/DNA interactions (Veenstra, T.D. (79) 63)

General anesthetic

Solvation; Amino acids; Protein; Lipid (Johansson, J.S. (79) 107)

Glycine termination

Amphiphilic alpha-helix; Fusion peptide; Influenza virus; Membrane destabilization; Side chain bulkiness (Matsumoto, T. (79) 153)

H33F mutant

Cytochrome *c* chemistry; NMR; Molecular dynamics (Taler, G. (79) 193)

Influenza virus

Amphiphilic alpha-helix; Fusion peptide; Glycine termination; Membrane destabilization; Side chain bulkiness (Matsumoto, T. (79) 153)

Interactions

EDTA; Calcium; Thermodynamic parameters (Griko, Y.V. (79) 117)

Ion channel

Molecular dynamics simulation; Ionic diffusion coefficient; Potassium; Chloride; Conductance prediction (Smith, G.R. (79) 129)

Ionic diffusion coefficient

Ion channel; Molecular dynamics simulation; Potassium; Chloride; Conductance prediction (Smith, G.R. (79) 129)

Irreversible thermal denaturation

Creatine kinase; Differential scanning calorimetry (Lyubarev, A.E. (79) 199)

Lectin CD

Thermal denaturation; Chemical denaturation; Lectin fluorescence; Lectins from *Artocarpus integrifolia*; Denaturing of lectins (Silva-Lucca, R.A. (79) 81)

Lectin fluorescence

Lectin CD; Thermal denaturation; Chemical denaturation; Lectins from *Artocarpus integrifolia*; Denaturing of lectins (Silva-Lucca, R.A. (79) 81)

Lectins from *Artocarpus integrifolia*

Lectin CD; Thermal denaturation; Chemical denaturation; Lectin fluorescence; Denaturing of lectins (Silva-Lucca, R.A. (79) 81)

Lipid

Solvation; General anesthetic; Amino acids; Protein (Johansson, J.S. (79) 107)

Liposomes

Paramagnetic fluorescence quenching; Fluorescent probe; Spin label; Time-resolved fluorescence (Johnson, D.A. (79) 1)

M-decay of mutants

Pharaonis phoborhodopsin (ppR); *Pharaonis* sensory rhodopsin (psR-II); Photocycle; Expression in *E. coli* (Iwamoto, M. (79) 187)

Membrane destabilization

Amphiphilic alpha-helix; Fusion peptide; Glycine termination; Influenza virus; Side chain bulkiness (Matsumoto, T. (79) 153)

Microtubules

Biological self-organisation; Reaction-diffusion structures; Dissipative structures; *Drosophila* embryogenesis (Papaseit, C. (79) 33)

Microvolumes

Enzymic reactions; Allosteric regulation; Diffusion; Synchronization (Stange, P. (79) 231)

Model membrane

BD simulation; Dynamics; Amphipathic probe (Fernandes, M.X. (79) 41)

Molecular dynamics simulation

Ion channel; Ionic diffusion coefficient; Potassium; Chloride; Conductance prediction (Smith, G.R. (79) 129)

Molecular dynamics

Cytochrome *c* chemistry; NMR; H33F mutant (Taler, G. (79) 193)

Molecular evolution

DNA; Pattern formation; Reaction-diffusion; Self-replicating spots; Coevolution; Cooperation (Kirner, T. (79) 163)

Myoglobin

DNA; Ferrylmyoglobin; Electrochemical generation; Protein films (Kong, J. (79) 219)

NMR

Cytochrome *c* chemistry; Molecular dynamics; H33F mutant (Taler, G. (79) 193)

Nuclease digestion

Raman spectroscopy; DNA structures; Telomere; Electrophoresis (Poon, K. (79) 11)

Paramagnetic fluorescence quenching

Fluorescent probe; Spin label; Liposomes; Time-resolved fluorescence (Johnson, D.A. (79) 1)

Pattern formation

DNA; Reaction-diffusion; Self-replicating spots; Molecular evolution; Coevolution; Cooperation (Kirner, T. (79) 163)

***Pharaonis* phoborhodopsin (ppR)**

Pharaonis sensory rhodopsin (psR-II); Photocycle; M-decay of mutants; Expression in *E. coli* (Iwamoto, M. (79) 187)

***Pharaonis* sensory rhodopsin (psR-II)**

Pharaonis phoborhodopsin (ppR); Photocycle; M-decay of mutants; Expression in *E. coli* (Iwamoto, M. (79) 187)

Phosphatidylglycerol

Subgel phase; Van der Waals interaction energy; Differential scanning calorimetry; Electron microscopy (Kodama, M. (79) 205)

Photocycle

Pharaonis phoborhodopsin (*ppR*); *Pharaonis* sensory rhodopsin (*psR-II*); M-decay of mutants; Expression in *E. coli* (Iwamoto, M. (79) 187)

Potassium

Ion channel; Molecular dynamics simulation; Ionic diffusion coefficient; Chloride; Conductance prediction (Smith, G.R. (79) 129)

Protein

Solvation; General anesthetic; Amino acids; Lipid (J.S. Johansson (79) 107)

Protein/DNA interactions

Electrospray ionization mass spectrometry; Protein/metal interactions; Protein/ligand interactions; Protein/protein interactions; Gas-phase protein conformation (Veenstra, T.D. (79) 63)

Protein/ligand interactions

Electrospray ionization mass spectrometry; Protein/metal interactions; Protein/protein interactions; Protein/DNA interactions; Gas-phase protein conformation (Veenstra, T.D. (79) 63)

Protein/metal interactions

Electrospray ionization mass spectrometry; Protein/ligand interactions; Protein/protein interactions; Protein/DNA interactions; Gas-phase protein conformation (Veenstra, T.D. (79) 63)

Protein/protein interactions

Electrospray ionization mass spectrometry; Protein/metal interactions; Protein/ligand interactions; Protein/DNA interactions; Gas-phase protein conformation (Veenstra, T.D. (79) 63)

Protein films

Myoglobin; DNA; Ferrylmyoglobin; Electrochemical generation (Kong, J. (79) 219)

Raman spectroscopy

DNA structures; Nuclease digestion; Telomere; Electrophoresis (Poon, K. (79) 11)

Reaction-diffusion structures

Biological self-organisation; Dissipative structures; Microtubules; *Drosophila* embryogenesis (Papaseit, C. (79) 33)

Reaction-diffusion

DNA; Pattern formation; Self-replicating spots; Molecular evolution; Coevolution; Cooperation (Kirner, T. (79) 163)

Saddle-node bifurcation

Biochemical switch; Bistability; Cyclin-dependent kinase inhibitor (Thron, C.D. (79) 95)

Self-replicating spots

DNA; Pattern formation; Reaction-diffusion; Molecular evolution; Coevolution; Cooperation (Kirner, T. (79) 163)

Side chain bulkiness

Amphiphilic alpha-helix; Fusion peptide; Glycine termination; Influenza virus; Membrane destabilization (Matsumoto, T. (79) 153)

Solvation

General anesthetic; Amino acids; Protein; Lipid (J.S. Johansson (79) 107)

Spin label

Paramagnetic fluorescence quenching; Fluorescent probe; Liposomes; Time-resolved fluorescence (Johnson, D.A. (79) 1)

Subgel phase

Phosphatidylglycerol; Van der Waals interaction energy; Differential scanning calorimetry; Electron microscopy (Kodama, M. (79) 205)

Synchronization

Enzymic reactions; Allosteric regulation; Diffusion; Microvolumes (Stange, P. (79) 231)

Telomere

Raman spectroscopy; DNA structures; Nuclease digestion; Electrophoresis (Poon, K. (79) 11)

Thermal denaturation

Lectin CD; Chemical denaturation; Lectin fluorescence; Lectins from *Artocarpus integrifolia*; Denaturing of lectins (Silva-Lucca, R.A. (79) 81)

Thermodynamic parameters

EDTA; Calcium; Interactions (Griko, Y.V. (79) 117)

Time-resolved fluorescence

Paramagnetic fluorescence quenching; Fluorescent probe; Spin label; Liposomes (Johnson, D.A. (79) 1)

Van der Waals interaction energy

Phosphatidylglycerol; Subgel phase; Differential scanning calorimetry; Electron microscopy (Kodama, M. (79) 205)

XPS

Disulfide bond; Cytochrome *c*; Electrochemistry; ESCA (Zhou, Y. (79) 55)
