

Subject Index to Volume 89

α 1-Antitrypsin

Albumin; Polyethyleneglycol; Two-phase aqueous system (Di Nucci, H. (89) 219)

β -Sheet conformation

Time-resolved FTIR spectroscopy; Protein conformation transition; *Bombyx mori* silk fibroin (Chen, X. (89) 25)

γ S-crystallin

Oxidation; Cataract; Lens crystallin (Skouri-Panet, F. (89) 65)

7-Dehydrocholesterol

Smith Lemli Opitz syndrome; X-Ray diffraction; Lipid phase; Microdomains (Wolf, C. (89) 163)

Acrylamide quenching

Protein dynamics; Protein stability; Phosphorescence; Trimethylamine *N*-oxide; Osmolytes (Gonnelli, M. (89) 77)

Activation energy

Glycerol; Phospholipid; Phase transition kinetics; Crystallization; Avrami equation (Chen, L. (89) 229)

Actomyosin

Attached-detached cross-bridges; Free energy; Myosin (Grazi, E. (89) 181)

Acute phase response

Signaling dynamics; Dose response mechanisms; Microphysiometer; Desensitization (Roth, C.M. (89) 1)

Adsorption isotherm

Polyaminoacids; Free energies; Water–polyamino acid interaction; Isopiestic technique (Ghosh, N. (89) 201)

Albumin

Polyethyleneglycol; Two-phase aqueous system; α 1-Antitrypsin (Di Nucci, H. (89) 219)

Amyloid β (1-40) peptide

Secondary structure; Stability; Fourier transform infrared/differential scanning calorimetry; Transition temperature (Chu, H.-L. (89) 173)

Attached-detached cross-bridges

Free energy; Myosin; Actomyosin (Grazi, E. (89) 181)

Avrami equation

Activation energy; Glycerol; Phospholipid; Phase transition kinetics; Crystallization (Chen, L. (89) 229)

Barrier recovery

Ceramide; Lamellar structure; Stratum corneum; X-Ray diffraction (Hatta, I. (89) 237)

Biomaterials

Tissue-engineering; Cell adhesion; Molecular dynamics; Oligopeptides; Laminin (Makohliso, S.A. (89) 129)

***Bombyx mori* silk fibroin**

β -Sheet conformation; Time-resolved FTIR spectroscopy; Protein conformation transition (Chen, X. (89) 25)

Cataract

Lens crystallin; γ S-crystallin; Oxidation (Skouri-Panet, F. (89) 65)

Cell adhesion

Molecular dynamics; Oligopeptides; Laminin; Biomaterials; Tissue-engineering (Makohliso, S.A. (89) 129)

Ceramide

Lamellar structure; Stratum corneum; X-Ray diffraction; Barrier recovery (Hatta, I. (89) 237)

Cluster analysis

Essential dynamics analysis; Molecular dynamics; Denaturation; Hydrophobic effects; Hydrogen bonds (Zhang, Z. (89) 145)

Constitutively active receptors

Structure intracellular loop 3; Parathyroid hormone; PTH receptor; G protein-coupled receptors; Coupling of G proteins to PTH receptor (Rölz, C. (89) 119)

Coupling of G proteins to PTH receptor

Constitutively active receptors; Structure intracellular loop 3; Parathyroid hormone; PTH receptor; G protein-coupled receptors (Rölz, C. (89) 119)

Crystallization

Avrami equation; Activation energy; Glycerol; Phospholipid; Phase transition kinetics (Chen, L. (89) 229)

CT DNA

Thermally denatured; In-situ FTIR spectroelectrochemistry (Wang, Z. (89) 87)

Cytoskeletal filament

Fluctuation analysis; Protein motor; Sliding motion (Sekimoto, K. (89) 95)

Denaturation

Hydrophobic effects; Hydrogen bonds; Cluster analysis; Essential dynamics analysis; Molecular dynamics (Zhang, Z. (89) 145)

Desensitization

Acute phase response; Signaling dynamics; Dose response mechanisms; Microphysiometer (Roth, C.M. (89) 1)

Diffusion

mag-indo-1; Mammalian skeletal muscle; Intracellular free magnesium (Claude Bernengo, J. (89) 35)

Dose response mechanisms

Microphysiometer; Desensitization; Acute phase response; Signaling dynamics (Roth, C.M. (89) 1)

Electron transfer

Pulse radiolysis; Oxidative damage; Purine radical cation (Pan, J. (89) 193)

Essential dynamics analysis

Molecular dynamics; Denaturation; Hydrophobic effects; Hydrogen bonds; Cluster analysis (Zhang, Z. (89) 145)

Fluctuation analysis

Protein motor; Sliding motion; Cytoskeletal filament (Sekimoto, K. (89) 95)

Fourier transform infrared/differential scanning calorimetry

Transition temperature; Amyloid β (1-40) peptide; Secondary structure; Stability (Chu, H.-L. (89) 173)

Free energies

Water-polyamino acid interaction; Isopiestic technique; Adsorption isotherm; Polyaminoacids (Ghosh, N. (89) 201)

Free energy

Myosin; Actomyosin; Attached-detached cross-bridges (Grazi, E. (89) 181)

Free energy of interaction

Lipid membranes; Vapor pressure; Preferential binding; Membrane partitioning (Westh, P. (89) 53)

G protein-coupled receptors

Coupling of G proteins to PTH receptor; Constitutively active receptors; Structure intracellular loop 3; Parathyroid hormone; PTH receptor (Rölz, C. (89) 119)

Gel/liquid-crystalline phase transition

Monolayer formation; Surface tension; Surface pressure; Lung surfactant; Vesicles fusion (Gugliotti, M. (89) 241)

Glycerol

Phospholipid; Phase transition kinetics; Crystallization; Avrami equation; Activation energy (Chen, L. (89) 229)

Group additivity

Unfolded proteins; Heat capacity; Volume; Helgeson-Kirkham-Flowers (HKF) model (Hakin, A.W. (89) 251)

Heat capacity

Volume; Helgeson-Kirkham-Flowers (HKF) model; Group additivity; Unfolded proteins (Hakin, A.W. (89) 251)

Helgeson-Kirkham-Flowers (HKF) model

Group additivity; Unfolded proteins; Heat capacity; Volume (Hakin, A.W. (89) 251)

Hydrogen bond

Proton transfer; RNA hydrolysis; Rnase A (Vishveshwara, S. (89) 105)

Hydrogen bonds

Cluster analysis; Essential dynamics analysis; Molecular dynamics; Denaturation; Hydrophobic effects (Zhang, Z. (89) 145)

Hydrophobic effects

Hydrogen bonds; Cluster analysis; Essential dynamics analysis; Molecular dynamics; Denaturation (Zhang, Z. (89) 145)

In-situ FTIR spectroelectrochemistry

CT DNA; Thermally denatured (Wang, Z. (89) 87)

Intracellular free magnesium

Diffusion; mag-into-1; Mammalian skeletal muscle (Claude Bernengo, J. (89) 35)

Isopiestic technique

Adsorption isotherm; Polyaminoacids; Free energies; Water–polyamino acid interaction (Ghosh, N. (89) 201)

Lamellar structure

Stratum corneum; X-Ray diffraction; Barrier recovery; Ceramide (Hatta, I. (89) 237)

Laminin

Biomaterials; Tissue-engineering; Cell adhesion; Molecular dynamics; Oligopeptides (Makohliso, S.A. (89) 129)

Lens crystallin

γ S-crystallin; Oxidation; Cataract (Skouri-Panet, F. (89) 65)

Lipid membranes

Vapor pressure; Preferential binding; Membrane partitioning; Free energy of interaction (Westh, P. (89) 53)

Lipid phase

Microdomains; 7-Dehydrocholesterol; Smith Lemli Opitz syndrome; X-Ray diffraction (Wolf, C. (89) 163)

Low temperature adaptation

Psychrophile; Membrane; Osmolyte; Ordered water (Mindock, C.A. (89) 13)

Lung surfactant

Vesicles fusion; Gel/liquid-crystalline phase transition; Monolayer formation; Surface tension; Surface pressure (Gugliotti, M. (89) 241)

mag-into-1

Mammalian skeletal muscle; Intracellular free magnesium; Diffusion (Claude Bernengo, J. (89) 35)

Mammalian skeletal muscle

Intracellular free magnesium; Diffusion; mag-into-1 (Claude Bernengo, J. (89) 35)

Membrane

Osmolyte; Ordered water; Low temperature adaptation; Psychrophile (Mindock, C.A. (89) 13)

Membrane partitioning

Free energy of interaction; Lipid membranes; Vapor pressure; Preferential binding (Westh, P. (89) 53)

Microdomains

7-Dehydrocholesterol; Smith Lemli Opitz syndrome; X-Ray diffraction; Lipid phase (Wolf, C. (89) 163)

Microphysiometer

Desensitization; Acute phase response; Signaling dynamics; Dose response mechanisms (Roth, C.M. (89) 1)

Molecular dynamics

Denaturation; Hydrophobic effects; Hydrogen bonds; Cluster analysis; Essential dynamics analysis (Zhang, Z. (89) 145)

Molecular dynamics

Oligopeptides; Laminin; Biomaterials; Tissue-engineering; Cell adhesion (Makohliso, S.A. (89) 129)

Monolayer formation

Surface tension; Surface pressure; Lung surfactant; Vesicles fusion; Gel/liquid-crystalline phase transition (Gugliotti, M. (89) 241)

Myosin

Actomyosin; Attached-detached cross-bridges; Free energy (Grazi, E. (89) 181)

Oligopeptides

Laminin; Biomaterials; Tissue-engineering; Cell adhesion; Molecular dynamics (Makohliso, S.A. (89) 129)

Ordered water

Low temperature adaptation; Psychrophile; Membrane; Osmolyte (Mindock, C.A. (89) 13)

Osmolyte

Ordered water; Low temperature adaptation; Psychrophile; Membrane (Mindock, C.A. (89) 13)

Osmolytes

Acrylamide quenching; Protein dynamics; Protein stability; Phosphorescence; Trimethylamine *N*-oxide (Gonnelli, M. (89) 77)

Oxidation

Cataract; Lens crystallin; γ S-crystallin (Skouri-Panet, F. (89) 65)

Oxidative damage

Purine radical cation; Electron transfer; Pulse radiolysis (Pan, J. (89) 193)

Parathyroid hormone

PTH receptor; G protein-coupled receptors; Coupling of G proteins to PTH receptor; Constitutively active receptors; Structure intracellular loop 3 (Rölz, C. (89) 119)

Phase transition kinetics

Crystallization; Avrami equation; Activation energy; Glycerol; Phospholipid (Chen, L. (89) 229)

Phospholipid

Phase transition kinetics; Crystallization; Avrami equation; Activation energy; Glycerol (Chen, L. (89) 229)

Phosphorescence

Trimethylamine *N*-oxide; Osmolytes; Acrylamide quenching; Protein dynamics; Protein stability (Gonnelli, M. (89) 77)

Polyaminoacids

Free energies; Water–polyamino acid interaction; Isopiestic technique; Adsorption isotherm (Ghosh, N. (89) 201)

Polyethyleneglycol

Two-phase aqueous system; α 1-Antitrypsin; Albumin (Di Nucci, H. (89) 219)

Preferential binding

Membrane partitioning; Free energy of interaction; Lipid membranes; Vapor pressure (Westh, P. (89) 53)

Protein conformation transition

Bombyx mori silk fibroin; β -Sheet conformation; Time-resolved FTIR spectroscopy (Chen, X. (89) 25)

Protein dynamics

Protein stability; Phosphorescence; Trimethylamine *N*-oxide; Osmolytes; Acrylamide quenching (Gonnelli, M. (89) 77)

Protein motor

Sliding motion; Cytoskeletal filament; Fluctuation analysis (Sekimoto, K. (89) 95)

Protein stability

Phosphorescence; Trimethylamine *N*-oxide; Osmolytes; Acrylamide quenching; Protein dynamics (Gonnelli, M. (89) 77)

Proton transfer

RNA hydrolysis; Rnase A; Hydrogen bond (Vishveshwara, S. (89) 105)

Psychrophile

Membrane; Osmolyte; Ordered water; Low temperature adaptation (Mindock, C.A. (89) 13)

PTH receptor

G protein-coupled receptors; Coupling of G proteins to PTH receptor; Constitutively active receptors; Structure intracellular loop 3; Parathyroid hormone (Röhlz, C. (89) 119)

Pulse radiolysis

Oxidative damage; Purine radical cation; Electron transfer (Pan, J. (89) 193)

Purine radical cation

Electron transfer; Pulse radiolysis; Oxidative damage (Pan, J. (89) 193)

RNA hydrolysis

Rnase A; Hydrogen bond; Proton transfer (Vishveshwara, S. (89) 105)

Rnase A

Hydrogen bond; Proton transfer; RNA hydrolysis (Vishveshwara, S. (89) 105)

Secondary structure

Stability; Fourier transform infrared/differential scanning calorimetry; Transition temperature; Amyloid β (1-40) peptide (Chu, H.-L. (89) 173)

Signaling dynamics

Dose response mechanisms; Microphysiometer; Desensitization; Acute phase response (Roth, C.M. (89) 1)

Sliding motion

Cytoskeletal filament; Fluctuation analysis; Protein motor (Sekimoto, K. (89) 95)

Smith Lemli Opitz syndrome

X-Ray diffraction; Lipid phase; Microdomains; 7-Dehydrocholesterol (Wolf, C. (89) 163)

Stability

Fourier transform infrared/differential scanning calorimetry; Transition temperature; Amyloid β (1-40) peptide; Secondary structure (Chu, H.-L. (89) 173)

Stratum corneum

X-Ray diffraction; Barrier recovery; Ceramide; Lamellar structure (Hatta, I. (89) 237)

Structure intracellular loop 3

Parathyroid hormone; PTH receptor; G protein-coupled receptors; Coupling of G proteins to PTH receptor; Constitutively active receptors (Röhlz, C. (89) 119)

Surface pressure

Lung surfactant; Vesicles fusion; Gel/liquid-crystalline phase transition; Monolayer formation; Surface tension (Gugliotti, M. (89) 241)

Surface tension

Surface pressure; Lung surfactant; Vesicles fusion; Gel/liquid-crystalline phase transition; Monolayer formation (Gugliotti, M. (89) 241)

Thermally denatured

In-situ FTIR spectroelectrochemistry; CT DNA (Wang, Z. (89) 87)

Time-resolved FTIR spectroscopy

Protein conformation transition; *Bombyx mori* silk fibroin;
 β -Sheet conformation (Chen, X. (89) 25)

Tissue-engineering

Cell adhesion; Molecular dynamics; Oligopeptides; Laminin;
Biomaterials (Makohliso, S.A. (89) 129)

Transition temperature

Amyloid β (1-40) peptide; Secondary structure; Stability;
Fourier transform infrared/differential scanning calorimetry
(Chu, H.-L. (89) 173)

Trimethylamine N-oxide

Osmolytes; Acrylamide quenching; Protein dynamics; Protein
stability; Phosphorescence (Gonnelli, M. (89) 77)

Two-phase aqueous system

α 1-Antitrypsin; Albumin; Polyethyleneglycol (Di Nucci, H.
(89) 219)

Unfolded proteins

Heat capacity; Volume; Helgeson–Kirkham–Flowers (HKF)
model; Group additivity (Hakin, A.W. (89) 251)

Vapor pressure

Preferential binding; Membrane partitioning; Free energy of
interaction; Lipid membranes (Westh, P. (89) 53)

Vesicles fusion

Gel/liquid-crystalline phase transition; Monolayer formation;
Surface tension; Surface pressure; Lung surfactant (Gugliotti,
M. (89) 241)

Volume

Helgeson–Kirkham–Flowers (HKF) model; Group additivity;
Unfolded proteins; Heat capacity (Hakin, A.W. (89) 251)

Water–polyamino acid interaction

Isopiestic technique; Adsorption isotherm; Polyaminoacids;
Free energies (Ghosh, N. (89) 201)

X-Ray diffraction

Barrier recovery; Ceramide; Lamellar structure; Stratum
corneum (Hatta, I. (89) 237)

X-Ray diffraction

Lipid phase; Microdomains; 7-Dehydrocholesterol; Smith
Lemli Opitz syndrome (Wolf, C. (89) 163)
