

Subject Index to Volume 91

α -Chymotrypsin

Sedimentation equilibrium; Protein self-association; Thermodynamic non-ideality (Wills, P.R. (91) 253)

7-DHC

Oxysterols; Hepatocellular carcinomas; Amphotericin B; Cholesterol (Charbonneau, C. (91) 125)

Adsorption

Partition coefficient; Phosphatidylserine; Chlorpromazine; Molecular species; Monolayer (Varnier Agasøster, A. (91) 37)

Adsorption mechanism

Surface states; Human serum albumin; TiO₂ nanocrystalline (Oliva, F.Y. (91) 141)

Air oxidation

Cyclic peptide; Disulfide bond formation (Berezhkovskiy, L.M. (91) 319)

Aminopyridines

K⁺ channel blocking; Theoretical modelling (Niño, A. (91) 49)

Amphotericin B

Cholesterol; 7-DHC; Oxysterols; Hepatocellular carcinomas (Charbonneau, C. (91) 125)

Amyloid

Phase transition; Static light scattering; Dynamic light scattering; Bovine serum albumin (Bulone, D. (91) 61)

Bacterial adhesion

Parallel plate flow chamber; Metal surfaces; Charge transfer; Conductivity; DLVO-theory (Poortinga, A.T. (91) 273)

Bovine serum albumin

Amyloid; Phase transition; Static light scattering; Dynamic light scattering (Bulone, D. (91) 61)

Brownian motion

Kinesin; Dynein; Free-energy transduction; Microtubule (Chen, Y.-d. (91) 79)

Calcium oscillations

Calcium signaling; Stochastic resonance; Non-linear dynamical systems; Pulsatile hormone secretion (Läer, L. (91) 157)

Calcium signaling

Stochastic resonance; Non-linear dynamical systems; Pulsatile hormone secretion; Calcium oscillations (Läer, L. (91) 157)

Catalytic efficiency

Computer simulation; Nitrogenase kinetics; Product distribution (Wilson, P.E. (91) 281)

Charge transfer

Conductivity; DLVO-theory; Bacterial adhesion; Parallel plate flow chamber; Metal surfaces (Poortinga, A.T. (91) 273)

Chemiosmosis

Poisson–Boltzmann equation; Gouy–Chapman theory; Mesoscopic systems; Membrane; Transmembrane potential; Mitochondria (Platt, D.E. (91) 245)

Chemotherapy

Resistance; Malaria; Homology modeling; *Plasmodium falciparum*; Dihydrofolate reductase (Santos-Filho, O. Andrade. (91) 305)

Chlorpromazine

Molecular species; Monolayer; Adsorption; Partition coefficient; Phosphatidylserine (Varnier Agasøster, A. (91) 37)

Cholesterol

7-DHC; Oxysterols; Hepatocellular carcinomas; Amphotericin B (Charbonneau, C. (91) 125)

Cloud-point temperature

Lysozyme; Phase transition; Specific ion effect (Grigsby, J.J. (91) 231)

Computer simulation

Nitrogenase kinetics; Product distribution; Catalytic efficiency (Wilson, P.E. (91) 281)

Computer simulations

Microscopic models; Protein-protein interactions; Protein crystallization (Kierzek, A.M. (91) 1)

Conductivity

DLVO-theory; Bacterial adhesion; Parallel plate flow chamber; Metal surfaces; Charge transfer (Poortinga, A.T. (91) 273)

Cyclic peptide

Disulfide bond formation; Air oxidation (Berezhkovskiy, L.M. (91) 319)

Denervation

Protein-lipid interaction; Na^+, K^+ -ATPase; Electron spin resonance; Spin label; *Electrophorus electricus* (Barriviera, M.L. (91) 93)

Dihydrofolate reductase

Chemotherapy; Resistance; Malaria; Homology modeling; *Plasmodium falciparum* (Santos-Filho, O. Andrade. (91) 305)

Disulfide bond formation

Air oxidation; Cyclic peptide (Berezhkovskiy, L.M. (91) 319)

DLVO-theory

Bacterial adhesion; Parallel plate flow chamber; Metal surfaces; Charge transfer; Conductivity (Poortinga, A.T. (91) 273)

DNA

Laser flash photolysis; Furanochromones; Photoionization; Radical cation; Electron transfer (Pan, J.-X. (91) 105)

Drug-membrane interaction

Lipid headgroup conformation; Surface potential; Fluorescence microscopy; FTIR; Phospholipid monolayer (Caetano, W. (91) 21)

Dynamic light scattering

Bovine serum albumin; Amyloid; Phase transition; Static light scattering (Bulone, D. (91) 61)

Dynein

Free-energy transduction; Microtubule; Brownian motion; Kinesin (Chen, Y.-d. (91) 79)

Electron spin resonance

Spin label; *Electrophorus electricus*; Denervation; Protein-lipid interaction; Na^+, K^+ -ATPase (Barriviera, M.L. (91) 93)

Electron transfer

DNA; Laser flash photolysis; Furanochromones; Photoionization; Radical cation (Pan, J.-X. (91) 105)

Electrophorus electricus

Denervation; Protein-lipid interaction; Na^+, K^+ -ATPase; Electron spin resonance; Spin label (Barriviera, M.L. (91) 93)

Fluorescence

Fluorescent probes; T7 RNA polymerase; RNA conformation; G-quartets; Transcription; Nucleotide analogue (Sastry, S. (91) 191)

Fluorescence

Urea; Yeast hexokinase; Unfolding; Protein stability (Morales, F.C. (91) 183)

Fluorescence microscopy

FTIR; Phospholipid monolayer; Drug-membrane interaction; Lipid headgroup conformation; Surface potential (Caetano, W. (91) 21)

Fluorescent probes

T7 RNA polymerase; RNA conformation; G-quartets; Transcription; Nucleotide analogue; Fluorescence (Sastry, S. (91) 191)

Free-energy transduction

Microtubule; Brownian motion; Kinesin; Dynein (Chen, Y.-d. (91) 79)

FTIR

Phospholipid monolayer; Drug-membrane interaction; Lipid headgroup conformation; Surface potential; Fluorescence microscopy (Caetano, W. (91) 21)

Furanochromones

Photoionization; Radical cation; Electron transfer; DNA; Laser flash photolysis (Pan, J.-X. (91) 105)

G-quartets

Transcription; Nucleotide analogue; Fluorescence; Fluorescent probes; T7 RNA polymerase; RNA conformation (Sastry, S. (91) 191)

Glycine

Tyrosine; Peptides; Montmorillonite; Hectorite (Porter, T.L. (91) 115)

Gouy-Chapman theory

Mesoscopic systems; Membrane; Transmembrane potential; Mitochondria; Chemiosmosis; Poisson-Boltzmann equation (Platt, D.E. (91) 245)

Hectorite

Glycine; Tyrosine; Peptides; Montmorillonite (Porter, T.L. (91) 115)

Hepatocellular carcinomas

Amphotericin B; Cholesterol; 7-DHC; Oxysterols (Charbonneau, C. (91) 125)

Homology modeling

Plasmodium falciparum; Dihydrofolate reductase; Chemotherapy; Resistance; Malaria (Santos-Filho, O.Andrade. (91) 305)

Human serum albumin

TiO₂ nanocrystalline; Adsorption mechanism; Surface states (Oliva, F.Y. (91) 141)

Hydration

Ricin A-chain; Thermodynamic integration; Molecular dynamics (Olson, M.A. (91) 219)

Hydrogen bond

Thermal stability; Residue contacts; Long-range interactions (Gromiha, M.M. (91) 71)

K⁺ channel blocking

Theoretical modelling; Aminopyridines (Niño, A. (91) 49)

Kinesin

Dynein; Free-energy transduction; Microtubule; Brownian motion (Chen, Y.-d. (91) 79)

Kinetics

Ligand binding; Sick cell hemoglobin; Polymer; Melting (Aroutiounian, S.Kh. (91) 167)

Langmuir monolayers

Phase transitions; Phosphatidylinositol; Polyphosphoinositides (Foster, W.J. (91) 211)

Laser flash photolysis

Furanochromones; Photoionization; Radical cation; Electron transfer; DNA (Pan, J.-X. (91) 105)

Ligand binding

Sickle cell hemoglobin; Polymer; Melting; Kinetics (Aroutiounian, S.Kh. (91) 167)

Lipid headgroup conformation

Surface potential; Fluorescence microscopy; FTIR; Phospholipid monolayer; Drug-membrane interaction (Caetano, W. (91) 21)

Long-range interactions

Hydrogen bond; Thermal stability; Residue contacts (Gromiha, M.M. (91) 71)

Lysozyme

Phase transition; Specific ion effect; Cloud-point temperature (Grigsby, J.J. (91) 231)

Malaria

Homology modeling; *Plasmodium falciparum*; Dihydrofolate reductase; Chemotherapy; Resistance (Santos-Filho, O.Andrade. (91) 305)

Melting

Kinetics; Ligand binding; Sick cell hemoglobin; Polymer (Aroutiounian, S.Kh. (91) 167)

Membrane

Transmembrane potential; Mitochondria; Chemiosmosis; Poisson-Boltzmann equation; Gouy-Chapman theory; Mesoscopic systems (Platt, D.E. (91) 245)

Mesoscopic systems

Membrane; Transmembrane potential; Mitochondria; Chemiosmosis; Poisson-Boltzmann equation; Gouy-Chapman theory (Platt, D.E. (91) 245)

Metal surfaces

Charge transfer; Conductivity; DLVO-theory; Bacterial adhesion; Parallel plate flow chamber (Poortinga, A.T. (91) 273)

Microscopic models

Protein-protein interactions; Protein crystallization; Computer simulations (Kierzek, A.M. (91) 1)

Microtubule

Brownian motion; Kinesin; Dynein; Free-energy transduction (Chen, Y.-d. (91) 79)

Mitochondria

Chemiosmosis; Poisson-Boltzmann equation; Gouy-Chapman theory; Mesoscopic systems; Membrane; Transmembrane potential (Platt, D.E. (91) 245)

Modified adenosine

Modified oligoribonucleotides; Thermodynamics of RNA duplexes (Kierzek, E. (91) 135)

Modified oligoribonucleotides

Thermodynamics of RNA duplexes; Modified adenosine (Kierzek, E. (91) 135)

Molecular dimensions

Porous membranes; Substance transport; Osmosis; Pore distribution; Solute (Kargol, M. (91) 263)

Molecular dynamics

Hydration; Ricin A-chain; Thermodynamic integration (Olson, M.A. (91) 219)

Molecular species

Monolayer; Adsorption; Partition coefficient; Phosphatidylserine; Chlorpromazine (Varnier Agasøster, A. (91) 37)

Monolayer

Adsorption; Partition coefficient; Phosphatidylserine; Chlorpromazine; Molecular species (Varnier Agasøster, A. (91) 37)

Montmorillonite

Hectorite; Glycine; Tyrosine; Peptides (Porter, T.L. (91) 115)

Na⁺, K⁺-ATPase

Electron spin resonance; Spin label; *Electrophorus electricus*; Denervation; Protein-lipid interaction (Barriviera, M.L. (91) 93)

Nitrogenase kinetics

Product distribution; Catalytic efficiency; Computer simulation (Wilson, P.E. (91) 281)

Non-linear dynamical systems

Pulsatile hormone secretion; Calcium oscillations; Calcium signaling; Stochastic resonance (Läer, L. (91) 157)

Nucleotide analogue

Fluorescence; Fluorescent probes; T7 RNA polymerase; RNA conformation; G-quartets; Transcription (Sastry, S. (91) 191)

Osmosis

Pore distribution; Solute; Molecular dimensions; Porous membranes; Substance transport (Kargol, M. (91) 263)

Oxysterols

Hepatocellular carcinomas; Amphotericin B; Cholesterol; 7-DHC (Charbonneau, C. (91) 125)

Parallel plate flow chamber

Metal surfaces; Charge transfer; Conductivity; DLVO-theory; Bacterial adhesion (Poortinga, A.T. (91) 273)

Partition coefficient

Phosphatidylserine; Chlorpromazine; Molecular species; Monolayer; Adsorption (Varnier Agasøster, A. (91) 37)

Peptides

Montmorillonite; Hectorite; Glycine; Tyrosine (Porter, T.L. (91) 115)

Phase transition

Static light scattering; Dynamic light scattering; Bovine serum albumin; Amyloid (Bulone, D. (91) 61)

Phase transition

Specific ion effect; Cloud-point temperature; Lysozyme (Grigsby, J.J. (91) 231)

Phase transitions

Phosphatidylinositol; Polyphosphoinositides; Langmuir monolayers (Foster, W.J. (91) 211)

Phosphatidylinositol

Polyphosphoinositides; Langmuir monolayers; Phase transitions (Foster, W.J. (91) 211)

Phosphatidylserine

Chlorpromazine; Molecular species; Monolayer; Adsorption; Partition coefficient (Varnier Agasøster, A. (91) 37)

Phospholipid monolayer

Drug-membrane interaction; Lipid headgroup conformation; Surface potential; Fluorescence microscopy; FTIR (Caetano, W. (91) 21)

Photoionization

Radical cation; Electron transfer; DNA; Laser flash photolysis; Furanochromones (Pan, J.-X. (91) 105)

Plasmodium falciparum

Dihydrofolate reductase; Chemotherapy; Resistance; Malaria; Homology modeling (Santos-Filho, O. Andrade. (91) 305)

Poisson-Boltzmann equation

Gouy-Chapman theory; Mesoscopic systems; Membrane; Transmembrane potential; Mitochondria; Chemiosmosis (Platt, D.E. (91) 245)

Polymer

Melting; Kinetics; Ligand binding; Sick cell hemoglobin (Aroutiounian, S.Kh. (91) 167)

Polyphosphoinositides

Langmuir monolayers; Phase transitions; Phosphatidylinositol (Foster, W.J. (91) 211)

Pore distribution

Solute; Molecular dimensions; Porous membranes; Substance transport; Osmosis (Kargol, M. (91) 263)

Porous membranes

Substance transport; Osmosis; Pore distribution; Solute; Molecular dimensions (Kargol, M. (91) 263)

Product distribution

Catalytic efficiency; Computer simulation; Nitrogenase kinetics (Wilson, P.E. (91) 281)

Protein crystallization

Computer simulations; Microscopic models; Protein-protein interactions (Kierzek, A.M. (91) 1)

Protein self-association

Thermodynamic non-ideality; α -Chymotrypsin; Sedimentation equilibrium (Wills, P.R. (91) 253)

Protein stability

Fluorescence; Urea; Yeast hexokinase; Unfolding (Morales, F.C. (91) 183)

Protein-lipid interaction

Na^+, K^+ -ATPase; Electron spin resonance; Spin label; *Electrophorus electricus*; Denervation (Barriviera, M.L. (91) 93)

Protein-protein interactions

Protein crystallization; Computer simulations; Microscopic models (Kierzek, A.M. (91) 1)

Pulsatile hormone secretion

Calcium oscillations; Calcium signaling; Stochastic resonance; Non-linear dynamical systems (Läer, L. (91) 157)

Radical cation

Electron transfer; DNA; Laser flash photolysis; Furanochromes; Photoionization (Pan, J.-X. (91) 105)

Residue contacts

Long-range interactions; Hydrogen bond; Thermal stability (Gromiha, M.M. (91) 71)

Resistance

Malaria; Homology modeling; *Plasmodium falciparum*; Dihydrofolate reductase; Chemotherapy (Santos-Filho, O. Andrade. (91) 305)

Ricin A-chain

Thermodynamic integration; Molecular dynamics; Hydration (Olson, M.A. (91) 219)

RNA conformation

G-quartets; Transcription; Nucleotide analogue; Fluorescence; Fluorescent probes; T7 RNA polymerase (Sastry, S. (91) 191)

Sedimentation equilibrium

Protein self-association; Thermodynamic non-ideality; α -Chymotrypsin (Wills, P.R. (91) 253)

Sickle cell hemoglobin

Polymer; Melting; Kinetics; Ligand binding (Aroutiounian, S.Kh. (91) 167)

Solute

Molecular dimensions; Porous membranes; Substance transport; Osmosis; Pore distribution (Kargol, M. (91) 263)

Specific ion effect

Cloud-point temperature; Lysozyme; Phase transition (Grigsby, J.J. (91) 231)

Spin label

Electrophorus electricus; Denervation; Protein-lipid interaction; Na^+, K^+ -ATPase; Electron spin resonance (Barriviera, M.L. (91) 93)

Static light scattering

Dynamic light scattering; Bovine serum albumin; Amyloid; Phase transition (Bulone, D. (91) 61)

Stochastic resonance

Non-linear dynamical systems; Pulsatile hormone secretion; Calcium oscillations; Calcium signaling (Läer, L. (91) 157)

Substance transport

Osmosis; Pore distribution; Solute; Molecular dimensions; Porous membranes (Kargol, M. (91) 263)

Surface potential

Fluorescence microscopy; FTIR; Phospholipid monolayer; Drug-membrane interaction; Lipid headgroup conformation (Caetano, W. (91) 21)

Surface states

Human serum albumin; TiO_2 nanocrystalline; Adsorption mechanism (Oliva, F.Y. (91) 141)

T7 RNA polymerase

RNA conformation; G-quartets; Transcription; Nucleotide analogue; Fluorescence; Fluorescent probes (Sastry, S. (91) 191)

Theoretical modelling

Aminopyridines; K^+ channel blocking (Niño, A. (91) 49)

Thermal stability

Residue contacts; Long-range interactions; Hydrogen bond (Gromiha, M.M. (91) 71)

Thermodynamic integration

Molecular dynamics; Hydration; Ricin A-chain (Olson, M.A. (91) 219)

Thermodynamic non-ideality

α -Chymotrypsin; Sedimentation equilibrium; Protein self-association (Wills, P.R. (91) 253)

Thermodynamics of RNA duplexes

Modified adenosine; Modified oligoribonucleotides (Kierzek, E. (91) 135)

TiO₂ nanocrystalline

Adsorption mechanism; Surface states; Human serum albumin (Oliva, F.Y. (91) 141)

Transcription

Nucleotide analogue; Fluorescence; Fluorescent probes; T7 RNA polymerase; RNA conformation; G-quartets (Sastry, S. (91) 191)

Transmembrane potential

Mitochondria; Chemiosmosis; Poisson–Boltzmann equation; Gouy–Chapman theory; Mesoscopic systems; Membrane (Platt, D.E. (91) 245)

Tyrosine

Peptides; Montmorillonite; Hectorite; Glycine (Porter, T.L. (91) 115)

Unfolding

Protein stability; Fluorescence; Urea; Yeast hexokinase (Morales, F.C. (91) 183)

Urea

Yeast hexokinase; Unfolding; Protein stability; Fluorescence (Morales, F.C. (91) 183)

Yeast hexokinase

Unfolding; Protein stability; Fluorescence; Urea (Morales, F.C. (91) 183)
