

Subject Index to Volume 93

Aggregation in water

Solubility; Thermodynamics of molecular interactions; Heat capacity of hydrophobic interactions; Van't Hoff enthalpy; Calorimetric enthalpy (Matulis, D. (93) 67)

Alkylammonium pK_a shift

Thermodynamics of molecular interactions; Van't Hoff enthalpy; Calorimetric enthalpy; Isothermal titration calorimetry; Dodecylammonium chloride (Matulis, D. (93) 37)

Analytical ultracentrifugation

Scattering densities; Hydration shell; Sphere modelling; X-Ray scattering; Neutron scattering (Perkins, S.J. (93) 129)

Biomolecules

Boundary element (BE); Transport phenomena (Allison, S.A. (93) 197)

Biopolymer hydration

Catalase; Computer simulation; Hydrodynamic modeling; Parameter prediction; X-Ray data (Durchschlag, H. (93) 141)

Boundary element (BE)

Transport phenomena; Biomolecules (Allison, S.A. (93) 197)

Calorimetric enthalpy

Isothermal titration calorimetry; Dodecylammonium chloride; Alkylammonium pK_a shift; Thermodynamics of molecular interactions; Van't Hoff enthalpy (Matulis, D. (93) 37)

Calorimetric enthalpy

Aggregation in water; Solubility; Thermodynamics of molecular interactions; Heat capacity of hydrophobic interactions; Van't Hoff enthalpy (Matulis, D. (93) 67)

Calorimetric enthalpy

Hydrophobicity; Isothermal titration calorimetry; Dodecylammonium chloride; Thermodynamics of molecular interactions; van't Hoff enthalpy (Matulis, D. (93) 53)

Carbon longitudinal relaxation times

Maltose; Sucrose; Trehalose; Hydration; Residence time; Molecular dynamics; NMR, Pulsed-field gradient spin-echo experiments; Translational diffusion measurements (Engelsen, S.B. (93) 103)

Catalase

Computer simulation; Hydrodynamic modeling; Parameter prediction; X-Ray data; Biopolymer hydration (Durchschlag, H. (93) 141)

Computer simulation

Hydrodynamic modeling; Parameter prediction; X-Ray data; Biopolymer hydration; Catalase (Durchschlag, H. (93) 141)

Correlation length of F-actin

Elasticity of F-actin; Fluctuation; Speckled F-actin; Fluctuation correlation (Shimo, R. (93) 23)

Crystallohydrodynamics

Proteins; Hydration; Human IgG (Carrasco, B. (93) 181)

Diffusion constant

Intrinsic viscosity; Rotational correlation time; Hydration; Hydration sites; Residence time (Zhou, H.-X. (93) 171)

Dilute systems

Hydration problem; Solution biophysics (Harding, S.E. (93) 87)

DLVO theory

Stability of dispersion; Protein solutions (Rowe, A.J. (93) 93)

Dodecylammonium chloride

Alkylammonium pK_a shift; Thermodynamics of molecular interactions; Van't Hoff enthalpy; Calorimetric enthalpy; Isothermal titration calorimetry (Matulis, D. (93) 37)

Dodecylammonium chloride

Thermodynamics of molecular interactions; van't Hoff enthalpy; Calorimetric enthalpy; Hydrophobicity; Isothermal titration calorimetry (Matulis, D. (93) 53)

Elasticity of F-actin

Fluctuation; Speckled F-actin; Fluctuation correlation; Correlation length of F-actin (Shimo, R. (93) 23)

Electron spin resonance

Spectrophotometry; Liposomes; Sterically stabilised liposomes; Polymer-lipids; Spin label (Belsito, S. (93) 11)

Equilibrium composition

Semigrand partition function; Transformed Gibbs energy; Legendre transform; Glycolysis (Alberty, R.A. (93) 1)

Fluctuation

Speckled F-actin; Fluctuation correlation; Correlation length of F-actin; Elasticity of F-actin (Shimo, R. (93) 23)

Fluctuation correlation

Correlation length of F-actin; Elasticity of F-actin; Fluctuation; Speckled F-actin (Shimo, R. (93) 23)

Glycolysis

Equilibrium composition; Semigrand partition function; Transformed Gibbs energy; Legendre transform (Alberty, R.A. (93) 1)

Heat capacity of hydrophobic interactions

Van't Hoff enthalpy; Calorimetric enthalpy; Aggregation in water; Solubility; Thermodynamics of molecular interactions (Matulis, D. (93) 67)

Heat changes

Thermodynamics; Microcalorimetry (Cooper, A. (93) 215)

Human IgG

Crystallohydrodynamics; Proteins; Hydration (Carrasco, B. (93) 181)

Hydration

Hydration sites; Residence time; Diffusion constant; Intrinsic viscosity; Rotational correlation time (Zhou, H.-X. (93) 171)

Hydration

Residence time; Molecular dynamics; NMR, Pulsed-field gradient spin-echo experiments; Translational diffusion measurements; Carbon longitudinal relaxation times; Maltose; Sucrose; Trehalose (Engelsen, S.B. (93) 103)

Hydration

Human IgG; Crystallohydrodynamics; Proteins (Carrasco, B. (93) 181)

Hydration layer

Protein hydrodynamics; Solution properties (García de la Torre, J. (93) 159)

Hydration problem

Solution biophysics; Dilute systems (Harding, S.E. (93) 87)

Hydration shell

Sphere modelling; X-Ray scattering; Neutron scattering; Analytical ultracentrifugation; Scattering densities (Perkins, S.J. (93) 129)

Hydration sites

Residence time; Diffusion constant; Intrinsic viscosity; Rotational correlation time; Hydration (Zhou, H.-X. (93) 171)

Hydrodynamic modeling

Parameter prediction; X-Ray data; Biopolymer hydration; Catalase; Computer simulation (Durchschlag, H. (93) 141)

Hydrophobicity

Isothermal titration calorimetry; Dodecylammonium chloride; Thermodynamics of molecular interactions; van't Hoff enthalpy; Calorimetric enthalpy (Matulis, D. (93) 53)

Intrinsic viscosity

Rotational correlation time; Hydration; Hydration sites; Residence time; Diffusion constant (Zhou, H.-X. (93) 171)

Isothermal titration calorimetry

Dodecylammonium chloride; Thermodynamics of molecular interactions; van't Hoff enthalpy; Calorimetric enthalpy; Hydrophobicity (Matulis, D. (93) 53)

Isothermal titration calorimetry

Dodecylammonium chloride; Alkylammonium pK_a shift; Thermodynamics of molecular interactions; Van't Hoff enthalpy; Calorimetric enthalpy (Matulis, D. (93) 37)

Legendre transform

Glycolysis; Equilibrium composition; Semigrand partition function; Transformed Gibbs energy (Alberty, R.A. (93) 1)

Liposomes

Sterically stabilised liposomes; Polymer-lipids; Spin label; Electron spin resonance; Spectrophotometry (Belsito, S. (93) 11)

Maltose

Sucrose; Trehalose; Hydration; Residence time; Molecular dynamics; NMR, Pulsed-field gradient spin-echo experiments; Translational diffusion measurements; Carbon longitudinal relaxation times (Engelsen, S.B. (93) 103)

Microcalorimetry

Heat changes; Thermodynamics (Cooper, A. (93) 215)

Molecular dynamics

NMR, Pulsed-field gradient spin-echo experiments; Translational diffusion measurements; Carbon longitudinal relaxation times; Maltose; Sucrose; Trehalose; Hydration; Residence time (Engelsen, S.B. (93) 103)

Neutron scattering

Analytical ultracentrifugation; Scattering densities; Hydration shell; Sphere modelling; X-Ray scattering (Perkins, S.J. (93) 129)

NMR, Pulsed-field gradient spin-echo experiments

Translational diffusion measurements; Carbon longitudinal relaxation times; Maltose; Sucrose; Trehalose; Hydration; Residence time; Molecular dynamics (Engelsen, S.B. (93) 103)

Parameter prediction

X-Ray data; Biopolymer hydration; Catalase; Computer simulation; Hydrodynamic modeling (Durchschlag, H. (93) 141)

Polymer-lipids

Spin label; Electron spin resonance; Spectrophotometry; Liposomes; Sterically stabilised liposomes (Belsito, S. (93) 11)

Protein hydrodynamics

Solution properties; Hydration layer (García de la Torre, J. (93) 159)

Protein solutions

DLVO theory; Stability of dispersion (Rowe, A.J. (93) 93)

Protein solvation

Sedimentation equilibrium; Thermodynamic non-ideality; Virial coefficients (Winzor, D.J. (93) 231)

Proteins

Hydration; Human IgG; Crystallohydrodynamics (Carrasco, B. (93) 181)

Residence time

Diffusion constant; Intrinsic viscosity; Rotational correlation time; Hydration; Hydration sites (Zhou, H.-X. (93) 171)

Residence time

Molecular dynamics; NMR, Pulsed-field gradient spin-echo experiments; Translational diffusion measurements; Carbon longitudinal relaxation times; Maltose; Sucrose; Trehalose; Hydration (Engelsen, S.B. (93) 103)

Rotational correlation time

Hydration; Hydration sites; Residence time; Diffusion constant; Intrinsic viscosity (Zhou, H.-X. (93) 171)

Scattering densities

Hydration shell; Sphere modelling; X-Ray scattering; Neutron scattering; Analytical ultracentrifugation (Perkins, S.J. (93) 129)

Sedimentation equilibrium

Thermodynamic non-ideality; Virial coefficients; Protein solvation (Winzor, D.J. (93) 231)

Semigrand partition function

Transformed Gibbs energy; Legendre transform; Glycolysis; Equilibrium composition (Alberty, R.A. (93) 1)

Solubility

Thermodynamics of molecular interactions; Heat capacity of hydrophobic interactions; Van't Hoff enthalpy; Calorimetric enthalpy; Aggregation in water (Matulis, D. (93) 67)

Solution biophysics

Dilute systems; Hydration problem (Harding, S.E. (93) 87)

Solution properties

Hydration layer; Protein hydrodynamics (García de la Torre, J. (93) 159)

Speckled F-actin

Fluctuation correlation; Correlation length of F-actin; Elasticity of F-actin; Fluctuation (Shimo, R. (93) 23)

Spectrophotometry

Liposomes; Sterically stabilised liposomes; Polymer-lipids; Spin label; Electron spin resonance (Belsito, S. (93) 11)

Sphere modelling

X-Ray scattering; Neutron scattering; Analytical ultracentrifugation; Scattering densities; Hydration shell (Perkins, S.J. (93) 129)

Spin label

Electron spin resonance; Spectrophotometry; Liposomes; Sterically stabilised liposomes; Polymer-lipids (Belsito, S. (93) 11)

Stability of dispersion

Protein solutions; DLVO theory (Rowe, A.J. (93) 93)

Sterically stabilised liposomes

Polymer-lipids; Spin label; Electron spin resonance; Spectrophotometry; Liposomes (Belsito, S. (93) 11)

Sucrose

Trehalose; Hydration; Residence time; Molecular dynamics; NMR, Pulsed-field gradient spin-echo experiments; Translational diffusion measurements; Carbon longitudinal relaxation times; Maltose (Engelsen, S.B. (93) 103)

Thermodynamic non-ideality

Virial coefficients; Protein solvation; Sedimentation equilibrium (Winzor, D.J. (93) 231)

Thermodynamics

Microcalorimetry; Heat changes (Cooper, A. (93) 215)

Thermodynamics of molecular interactions

Heat capacity of hydrophobic interactions; Van't Hoff enthalpy; Calorimetric enthalpy; Aggregation in water; Solubility (Matulis, D. (93) 67)

Thermodynamics of molecular interactions

Van't Hoff enthalpy; Calorimetric enthalpy; Isothermal titration calorimetry; Dodecylammonium chloride; Alkylammonium pK_a shift (Matulis, D. (93) 37)

Thermodynamics of molecular interactions

van't Hoff enthalpy; Calorimetric enthalpy; Hydrophobicity; Isothermal titration calorimetry; Dodecylammonium chloride (Matulis, D. (93) 53)

Transformed Gibbs energy

Legendre transform; Glycolysis; Equilibrium composition; Semigrand partition function (Alberty, R.A. (93) 1)

Translational diffusion measurements

Carbon longitudinal relaxation times; Maltose; Sucrose; Trehalose; Hydration; Residence time; Molecular dynamics; NMR, Pulsed-field gradient spin-echo experiments (Engelsen, S.B. (93) 103)

Transport phenomena

Biomolecules; Boundary element (BE) (Allison, S.A. (93) 197)

Trehalose

Hydration; Residence time; Molecular dynamics; NMR, Pulsed-field gradient spin-echo experiments; Translational diffusion measurements; Carbon longitudinal relaxation times; Maltose; Sucrose (Engelsen, S.B. (93) 103)

Van't Hoff enthalpy

Calorimetric enthalpy; Aggregation in water; Solubility; Thermodynamics of molecular interactions; Heat capacity of hydrophobic interactions (Matulis, D. (93) 67)

van't Hoff enthalpy

Calorimetric enthalpy; Hydrophobicity; Isothermal titration calorimetry; Dodecylammonium chloride; Thermodynamics of molecular interactions (Matulis, D. (93) 53)

Van't Hoff enthalpy

Calorimetric enthalpy; Isothermal titration calorimetry; Dodecylammonium chloride; Alkylammonium pK_a shift; Thermodynamics of molecular interactions (Matulis, D. (93) 37)

Virial coefficients

Protein solvation; Sedimentation equilibrium; Thermodynamic non-ideality (Winzor, D.J. (93) 231)

X-Ray data

Biopolymer hydration; Catalase; Computer simulation; Hydrodynamic modeling; Parameter prediction (Durchschlag, H. (93) 141)

X-Ray scattering

Neutron scattering; Analytical ultracentrifugation; Scattering densities; Hydration shell; Sphere modelling (Perkins, S.J. (93) 129)
