

Subject Index to Volume 94

β -Subunit

Calculation of dipole moment; K-channel protein (Takashima, S. (94) 209)

Acrylodan

Human serum albumin; Phase-fluorometry; Time-emission matrix; Dielectric relaxation (Buzády, A. (94) 75)

Adhesion

Symmetry and regularity; Cell behaviour; Nanotopography (Curtis, A.S.G. (94) 275)

Agonist and antagonist

Protein clusters; Dose–response curves; Large Hill coefficients; Enzymatic activity; Substrate and inhibitor (Testorf, M.F. (94) 1)

Asymmetric potential

Transport number; Periderm membrane; Cuticular membrane; Biomembrane (Ersoz, M. (94) 237)

Atomic force microscopy

Environmental scanning electron microscopy; Intermolecular forces; Supramolecular chemistry; Lignin model compounds; Photochemistry (Mícic, M. (94) 257)

ATP hydrolysis

Myosin; Fluorescence; Tryptophan; *N*-(iodoacetyl)-*N'*-(5-sulfo-1-naphthyl)ethylenediamine (AEDANS); Energy transfer (Reshetnyak, Y.K. (94) 41)

Azurin

Molecular dynamics simulation; Disulfide bridge; Flexibility (Rizzuti, B. (94) 107)

Base stacking

Dinucleotide step rigidity; Fluorescence polarization anisotropy (Pedone, F. (94) 175)

Bead–shell model

Three-dimensional structure; Rigid macromolecules; Hydrodynamic properties (Garcia de la Torre, J. (94) 265)

Biomembrane

Asymmetric potential; Transport number; Periderm membrane; Cuticular membrane (Ersoz, M. (94) 237)

Bleomycin

Calf thymus DNA; Raman spectroscopy (Rajani, C. (94) 219)

Brewing yeast

Flocculation; Capture coefficient; Shear flow (Hsu, J.W.C. (94) 47)

Ca²⁺ binding proteins

Coupling; Off rate; Synchronization (Zhang, J. (94) 201)

Calcium oscillations

Mitochondria; Frequency encoding (Grubelnik, V. (94) 59)

Calculation of dipole moment

K-channel protein; β -Subunit (Takashima, S. (94) 209)

Calf thymus DNA

Raman spectroscopy; Bleomycin (Rajani, C. (94) 219)

Calf thymus DNA

Layer-by-layer; Spectroscopy; Methyl green (Luo, L. (94) 11)

Capture coefficient

Shear flow; Brewing yeast; Flocculation (Hsu, J.W.C. (94) 47)

Cell behaviour

Nanotopography; Adhesion; Symmetry and regularity (Curtis, A.S.G. (94) 275)

Chlorpromazine

Nanostructures; Micellization; Thermodynamics; Fluorescence; DSC (Tehrani, S. (94) 87)

Cluster distribution function

Moments; Maximum-entropy method; Self-association (Poland, D. (94) 185)

Computer simulation

DNA triple helix; Thermodynamic stability; Differential scanning calorimetry (Giancola, C. (94) 23)

Coupling

Off rate; Synchronization; Ca^{2+} binding proteins (Zhang, J. (94) 201)

Cuticular membrane

Biomembrane; Asymmetric potential; Transport number; Periderm membrane (Ersoz, M. (94) 237)

Derivative spectrophotometry

Hydrophobic/electrostatic interactions; Partition coefficient; Unilamellar liposomes; Dimyristoyl-L- α -phosphatidylglycerol (DMPG) (Rodrigues, C. (94) 97)

Didodecyldimethylammonium bromide

Electrochemistry; Spectroscopy; Microperoxidase-11 (Huang, W. (94) 165)

Dielectric relaxation

Acrylodan; Human serum albumin; Phase-fluorometry; Time-emission matrix (Buzády, A. (94) 75)

Differential scanning calorimetry

Computer simulation; DNA triple helix; Thermodynamic stability (Giancola, C. (94) 23)

Dimethyl sulfoxide (DMSO)

Subtransition; Solvation effects; Planar gel phase; Fluorescence spectroscopy; Dimyristoylphosphatidylcholine (Chang, H.H. (94) 33)

Dimyristoyl-L- α -phosphatidylglycerol (DMPG)

Derivative spectrophotometry; Hydrophobic/electrostatic interactions; Partition coefficient; Unilamellar liposomes (Rodrigues, C. (94) 97)

Dimyristoylphosphatidylcholine

Dimethyl sulfoxide (DMSO); Subtransition; Solvation effects; Planar gel phase; Fluorescence spectroscopy (Chang, H.H. (94) 33)

Dinucleotide step rigidity

Fluorescence polarization anisotropy; Base stacking (Pedone, F. (94) 175)

Direct method of optimization

Reaction networks; Stationary state; Model of glycolysis; Glycolytic oscillations (Hynne, F. (94) 121)

Disulfide bridge

Flexibility; Azurin; Molecular dynamics simulation (Rizzuti, B. (94) 107)

DNA triple helix

Thermodynamic stability; Differential scanning calorimetry; Computer simulation (Giancola, C. (94) 23)

Dose-response curves

Large Hill coefficients; Enzymatic activity; Substrate and inhibitor; Agonist and antagonist; Protein clusters (Testorf, M.F. (94) 1)

DSC

Chlorpromazine; Nanostructures; Micellization; Thermodynamics; Fluorescence (Tehrani, S. (94) 87)

Electrochemistry

Spectroscopy; Microperoxidase-11; Didodecyldimethylammonium bromide (Huang, W. (94) 165)

Energy transfer

ATP hydrolysis; Myosin; Fluorescence; Tryptophan; *N*-(iodoacetyl)-*N'*-(5-sulfo-1-naphthyl)ethylenediamine (AEDANS)(Reshetnyak, Y.K. (94) 41)

Environmental scanning electron microscopy

Intermolecular forces; Supramolecular chemistry; Lignin model compounds; Photochemistry; Atomic force microscopy (Micic, M. (94) 257)

Enzymatic activity

Substrate and inhibitor; Agonist and antagonist; Protein clusters; Dose-response curves; Large Hill coefficients (Testorf, M.F. (94) 1)

Flexibility

Azurin; Molecular dynamics simulation; Disulfide bridge (Rizzuti, B. (94) 107)

Flocculation

Capture coefficient; Shear flow; Brewing yeast (Hsu, J.W.C. (94) 47)

Fluorescence

Tryptophan; *N*-(iodoacetyl)-*N'*-(5-sulfo-1-naphthyl)ethylenediamine (AEDANS); Energy transfer; ATP hydrolysis; Myosin (Reshetnyak, Y.K. (94) 41)

Fluorescence

DSC; Chlorpromazine; Nanostructures; Micellization; Thermodynamics (Tehrani, S. (94) 87)

Fluorescence polarization anisotropy

Base stacking; Dinucleotide step rigidity (Pedone, F. (94) 175)

Fluorescence spectroscopy

Dimyristoylphosphatidylcholine; Dimethyl sulfoxide (DMSO); Subtransition; Solvation effects; Planar gel phase (Chang, H.H. (94) 33)

Frequency encoding

Calcium oscillations; Mitochondria (Grubelnik, V. (94) 59)

Glycolytic oscillations

Direct method of optimization; Reaction networks; Stationary state; Model of glycolysis (Hynne, F. (94) 121)

Human Carbonic Anhydrase II

T_2 ; Spin label EPR; Relaxation (Huber, M. (94) 245)

Human serum albumin

Phase-fluorometry; Time-emission matrix; Dielectric relaxation; Acrylodan (Buzády, A. (94) 75)

Hydrodynamic properties

Bead-shell model; Three-dimensional structure; Rigid macromolecules (García de la Torre, J. (94) 265)

Hydrophobic/electrostatic interactions

Partition coefficient; Unilamellar liposomes; Dimyristoyl-L- α -phosphatidylglycerol (DMPG); Derivative spectrophotometry (Rodrigues, C. (94) 97)

Intermolecular forces

Supramolecular chemistry; Lignin model compounds; Photochemistry; Atomic force microscopy; Environmental scanning electron microscopy (Micic, M. (94) 257)

K-channel protein

β -Subunit; Calculation of dipole moment (Takashima, S. (94) 209)

Large Hill coefficients

Enzymatic activity; Substrate and inhibitor; Agonist and antagonist; Protein clusters; Dose-response curves (Testorf, M.F. (94) 1)

Layer-by-layer

Spectroscopy; Methyl green; Calf thymus DNA (Luo, L. (94) 11)

Lignin model compounds

Photochemistry; Atomic force microscopy; Environmental scanning electron microscopy; Intermolecular forces; Supramolecular chemistry (Micic, M. (94) 257)

Maximum-entropy method

Self-association; Cluster distribution function; Moments (Poland, D. (94) 185)

Methyl green

Calf thymus DNA; Layer-by-layer; Spectroscopy (Luo, L. (94) 11)

Micellization

Thermodynamics; Fluorescence; DSC; Chlorpromazine; Nanostructures (Tehrani, S. (94) 87)

Microperoxidase-11

Didodecyldimethylammonium bromide; Electrochemistry; Spectroscopy (Huang, W. (94) 165)

Mitochondria

Frequency encoding; Calcium oscillations (Grubelnik, V. (94) 59)

Model of glycolysis

Glycolytic oscillations; Direct method of optimization; Reaction networks; Stationary state (Hynne, F. (94) 121)

Molecular dynamics simulation

Disulfide bridge; Flexibility; Azurin (Rizzuti, B. (94) 107)

Moments

Maximum-entropy method; Self-association; Cluster distribution function (Poland, D. (94) 185)

Myosin

Fluorescence; Tryptophan; *N*-(iodoacetyl)-*N'*-(5-sulfo-1-naphthyl)ethylenediamine (AEDANS); Energy transfer; ATP hydrolysis (Reshetnyak, Y.K. (94) 41)

***N*-(iodoacetyl)-*N'*-(5-sulfo-1-naphthyl)ethylenediamine (AEDANS)**

Energy transfer; ATP hydrolysis; Myosin; Fluorescence; Tryptophan (Reshetnyak, Y.K. (94) 41)

Nanostructures

Micellization; Thermodynamics; Fluorescence; DSC; Chlorpromazine (Tehrani, S. (94) 87)

Nanotopography

Adhesion; Symmetry and regularity; Cell behaviour (Curtis, A.S.G. (94) 275)

Off rate

Synchronization; Ca^{2+} binding proteins; Coupling (Zhang, J. (94) 201)

Partition coefficient

Unilamellar liposomes; Dimyristoyl-L- α -phosphatidylglycerol (DMPG); Derivative spectrophotometry; Hydrophobic/electrostatic interactions (Rodrigues, C. (94) 97)

Periderm membrane

Cuticular membrane; Biomembrane; Asymmetric potential; Transport number (Ersoz, M. (94) 237)

Phase-fluorometry

Time-emission matrix; Dielectric relaxation; Acrylodan; Human serum albumin (Buzády, A. (94) 75)

Photochemistry

Atomic force microscopy; Environmental scanning electron microscopy; Intermolecular forces; Supramolecular chemistry; Lignin model compounds (Micic, M. (94) 257)

Planar gel phase

Fluorescence spectroscopy; Dimyristoylphosphatidylcholine; Dimethyl sulfoxide (DMSO); Subtransition; Solvation effects (Chang, H.H. (94) 33)

Protein clusters

Dose-response curves; Large Hill coefficients; Enzymatic activity; Substrate and inhibitor; Agonist and antagonist (Testorf, M.F. (94) 1)

Raman spectroscopy

Bleomycin; Calf thymus DNA (Rajani, C. (94) 219)

Reaction networks

Stationary state; Model of glycolysis; Glycolytic oscillations; Direct method of optimization (Hynne, F. (94) 121)

Relaxation

Human Carbonic Anhydrase II; T_2 ; Spin label EPR (Huber, M. (94) 245)

Rigid macromolecules

Hydrodynamic properties; Bead-shell model; Three-dimensional structure (Garcia de la Torre, J. (94) 265)

Self-association

Cluster distribution function; Moments; Maximum-entropy method (Poland, D. (94) 185)

Shear flow

Brewing yeast; Flocculation; Capture coefficient (Hsu, J.W.C. (94) 47)

Solvation effects

Planar gel phase; Fluorescence spectroscopy; Dimyristoylphosphatidylcholine; Dimethyl sulfoxide (DMSO); Subtransition (Chang, H.H. (94) 33)

Spectroscopy

Methyl green; Calf thymus DNA; Layer-by-layer (Luo, L. (94) 11)

Spectroscopy

Microperoxidase-11; Didodecyldimethylammonium bromide; Electrochemistry (Huang, W. (94) 165)

Spin label EPR

Relaxation; Human Carbonic Anhydrase II; T_2 (Huber, M. (94) 245)

Stationary state

Model of glycolysis; Glycolytic oscillations; Direct method of optimization; Reaction networks (Hynne, F. (94) 121)

Substrate and inhibitor

Agonist and antagonist; Protein clusters; Dose-response curves; Large Hill coefficients; Enzymatic activity (Testorf, M.F. (94) 1)

Subtransition

Solvation effects; Planar gel phase; Fluorescence spectroscopy; Dimyristoylphosphatidylcholine; Dimethyl sulfoxide (DMSO) (Chang, H.H. (94) 33)

Supramolecular chemistry

Lignin model compounds; Photochemistry; Atomic force microscopy; Environmental scanning electron microscopy; Intermolecular forces (Micic, M. (94) 257)

Symmetry and regularity

Cell behaviour; Nanotopography; Adhesion (Curtis, A.S.G. (94) 275)

Synchronization

Ca^{2+} binding proteins; Coupling; Off rate (Zhang, J. (94) 201)

 T_2

Spin label EPR; Relaxation; Human Carbonic Anhydrase II (Huber, M. (94) 245)

Thermodynamic stability

Differential scanning calorimetry; Computer simulation; DNA triple helix (Giancola, C. (94) 23)

Thermodynamics

Fluorescence; DSC; Chlorpromazine; Nanostructures; Micellization (Tehrani, S. (94) 87)

Three-dimensional structure

Rigid macromolecules; Hydrodynamic properties; Bead-shell model (Garcia de la Torre, J. (94) 265)

Time-emission matrix

Dielectric relaxation; Acrylodan; Human serum albumin; Phase-fluorometry (Buzády, A. (94) 75)

Transport number

Periderm membrane; Cuticular membrane; Biomembrane; Asymmetric potential (Ersoz, M. (94) 237)

Tryptophan

N-(iodoacetyl)-*N*'-(5-sulfo-1-naphtyl)ethylenediamine (AEDANS); Energy transfer; ATP hydrolysis; Myosin; Fluorescence (Reshetnyak, Y.K. (94) 41)

Unilamellar liposomes

Dimyristoyl-L- α -phosphatidylglycerol (DMPG); Derivative spectrophotometry; Hydrophobic/electrostatic interactions; Partition coefficient (Rodrigues, C. (94) 97)
