

Subject Index to Volume 97

Active transport

Non-equilibrium thermodynamics; Bioenergetics; Coupling; Thermodynamic regulations (Demirel, Y. (97) 87)

Bifurcation and metabolic control analysis

Glycolysis; Ethanolic fermentation; Pentose phosphate pathway; Microtubular protein; Mathematical modeling (Aon, M.A. (97) 213)

Bioelectrochemical cells

Heme and phosphate role; Platinum electrode; Electron transfer; Kinetics of iron release; Pig spleen ferritin (Huang, H.Q. (97) 17)

Bioenergetics

Coupling; Thermodynamic regulations; Active transport; Non-equilibrium thermodynamics (Demirel, Y. (97) 87)

Bovine leukemia virus

Nucleocapsid; Zinc finger; Fluorescence (Morcock, D.R. (97) 203)

Calcium spikes

Mitogen-activated protein kinase (MAPK) cascade; Mesodermal induction; Inositol 1,4,5-trisphosphate (IP₃) receptor; Mathematical model; Non-linear dynamics; Synchronization of cells; Fibroblast growth factor (FGF) (Díaz, J. (97) 55)

Calorimetry

Thermal analysis; Organic crystals; Chemical synthesis (Abd-Elrahman, M.I. (97) 113)

Cartilage

Pulsed field gradient nuclear magnetic resonance; Polyethylenglycol; Dextran; Self-diffusion; Restricted diffusion (Trampel, R. (97) 251)

Cationic lipid vesicle

Conformation; Spectroscopy; SVDLS (Zhang, Z. (97) 7)

Centromere

Kluyveromyces lactis; Sequence-dependent DNA elasticity; Nucleosome thermodynamic stability; Nucleosome multiple positioning (Mattei, S. (97) 173)

Chemical synthesis

Calorimetry; Thermal analysis; Organic crystals (Abd-Elrahman, M.I. (97) 113)

Circular dichroism spectroelectrochemistry

Long optical path thin-layer cell; Hemoglobin; Structural change; Electroreduction (Zhu, Y. (97) 129)

Conformation

Spectroscopy; SVDLS; Cationic lipid vesicle (Zhang, Z. (97) 7)

Coupling

Thermodynamic regulations; Active transport; Non-equilibrium thermodynamics; Bioenergetics (Demirel, Y. (97) 87)

Crystal growth

Growth rate; Mass transfer; Diffusion; Interferometer; Protein crystal (Duan, L. (97) 189)

d-Chain monomer

Glossoscolex paulistus; Sequencing; Modeling; Tryptophan fluorescence; Extracellular hemoglobin (Bosch Cabral, C. (97) 139)

Dextran

Self-diffusion; Restricted diffusion; Cartilage; Pulsed field gradient nuclear magnetic resonance; Polyethylenglycol (Trampel, R. (97) 251)

Diffusion

Interferometer; Protein crystal; Crystal growth; Growth rate; Mass transfer (Duan, L. (97) 189)

Disulfide cross-links

Protein folding; Protein stability; Heat capacity of folding; Solvent-accessible surface area (Deep, S. (97) 73)

Electron transfer

Kinetics of iron release; Pig spleen ferritin; Bioelectrochemical cells; Heme and phosphate role; Platinum electrode (Huang, H.Q. (97) 17)

Electroreduction

Circular dichroism spectroelectrochemistry; Long optical path thin-layer cell; Hemoglobin; Structural change (Zhu, Y. (97) 129)

Erythrocyte

Membrane; Surfactants; Hemolysis; Solubilization (Preté, P.S.C. (97) 45)

Erythrocyte

Triton X-100; Membrane; Surfactants; Hemolysis; Solubilization (Preté, P.S.C. (97) 1)

Ethanol fermentation

Pentose phosphate pathway; Microtubular protein; Mathematical modeling; Bifurcation and metabolic control analysis; Glycolysis (Aon, M.A. (97) 213)

Extracellular hemoglobin

d-Chain monomer; *Glossoscolex paulistus*; Sequencing; Modeling; Tryptophan fluorescence (Bosch Cabral, C. (97) 139)

Fibroblast growth factor (FGF)

Calcium spikes; Mitogen-activated protein kinase (MAPK) cascade; Mesodermal induction; Inositol 1,4,5-trisphosphate (IP₃) receptor; Mathematical model; Non-linear dynamics; Synchronization of cells (Díaz, J. (97) 55)

Fluorescence

Bovine leukemia virus; Nucleocapsid; Zinc finger (Morcock, D.R. (97) 203)

Fluorescence microscopy

Lateral mobility; Surface diffusion; Phospholipid bilayers; Supported planar membranes (Starr, T.E. (97) 29)

Gene therapy

Retrovirus adsorption; Polybrene; Recombinant retroviruses (Davis, H.E. (97) 159)

Glossoscolex paulistus

Sequencing; Modeling; Tryptophan fluorescence; Extracellular hemoglobin; *d*-Chain monomer (Bosch Cabral, C. (97) 139)

Glycolysis

Ethanol fermentation; Pentose phosphate pathway; Micro-

tubular protein; Mathematical modeling; Bifurcation and metabolic control analysis (Aon, M.A. (97) 213)

Growth rate

Mass transfer; Diffusion; Interferometer; Protein crystal; Crystal growth (Duan, L. (97) 189)

Heat capacity of folding

Solvent-accessible surface area; Disulfide cross-links; Protein folding; Protein stability (Deep, S. (97) 73)

Heme and phosphate role

Platinum electrode; Electron transfer; Kinetics of iron release; Pig spleen ferritin; Bioelectrochemical cells (Huang, H.Q. (97) 17)

Hemoglobin

Structural change; Electroreduction; Circular dichroism spectroelectrochemistry; Long optical path thin-layer cell (Zhu, Y. (97) 129)

Hemolysis

Solubilization; Erythrocyte; Membrane; Surfactants (Preté, P.S.C. (97) 45)

Hemolysis

Solubilization; Erythrocyte; Triton X-100; Membrane; Surfactants (Preté, P.S.C. (97) 1)

Inositol 1,4,5-trisphosphate (IP₃) receptor

Mathematical model; Non-linear dynamics; Synchronization of cells; Fibroblast growth factor (FGF); Calcium spikes; Mitogen-activated protein kinase (MAPK) cascade; Mesodermal induction (Díaz, J. (97) 55)

Interferometer

Protein crystal; Crystal growth; Growth rate; Mass transfer; Diffusion (Duan, L. (97) 189)

Kinetics of iron release

Pig spleen ferritin; Bioelectrochemical cells; Heme and phosphate role; Platinum electrode; Electron transfer (Huang, H.Q. (97) 17)

Kluyveromyces lactis

Sequence-dependent DNA elasticity; Nucleosome thermodynamic stability; Nucleosome multiple positioning; Centromere (Mattei, S. (97) 173)

Lateral mobility

Surface diffusion; Phospholipid bilayers; Supported planar membranes; Fluorescence microscopy (Starr, T.E. (97) 29)

Long optical path thin-layer cell

Hemoglobin; Structural change; Electroreduction; Circular dichroism spectroelectrochemistry (Zhu, Y. (97) 129)

Mass transfer

Diffusion; Interferometer; Protein crystal; Crystal growth; Growth rate (Duan, L. (97) 189)

Mathematical model

Non-linear dynamics; Synchronization of cells; Fibroblast growth factor (FGF); Calcium spikes; Mitogen-activated protein kinase (MAPK) cascade; Mesodermal induction; Inositol 1,4,5-trisphosphate (IP₃) receptor (Díaz, J. (97) 55)

Mathematical modeling

Bifurcation and metabolic control analysis; Glycolysis; Ethanol fermentation; Pentose phosphate pathway; Microtubular protein (Aon, M.A. (97) 213)

Membrane

Surfactants; Hemolysis; Solubilization; Erythrocyte (Preté, P.S.C. (97) 45)

Membrane

Surfactants; Hemolysis; Solubilization; Erythrocyte; Triton X-100 (Preté, P.S.C. (97) 1)

Mesodermal induction

Inositol 1,4,5-trisphosphate (IP₃) receptor; Mathematical model; Non-linear dynamics; Synchronization of cells; Fibroblast growth factor (FGF); Calcium spikes; Mitogen-activated protein kinase (MAPK) cascade (Díaz, J. (97) 55)

Microtubular protein

Mathematical modeling; Bifurcation and metabolic control analysis; Glycolysis; Ethanol fermentation; Pentose phosphate pathway (Aon, M.A. (97) 213)

Mitogen-activated protein kinase (MAPK) cascade

Mesodermal induction; Inositol 1,4,5-trisphosphate (IP₃) receptor; Mathematical model; Non-linear dynamics; Synchronization of cells; Fibroblast growth factor (FGF); Calcium spikes (Díaz, J. (97) 55)

Modeling

Tryptophan fluorescence; Extracellular hemoglobin; *d*-Chain monomer; *Glossoscolex paulistus*; Sequencing (Bosch Cabral, C. (97) 139)

Modified oligoribonucleotides

Thermodynamics of RNA duplexes; Modified uridine (Ziomek, K. (97) 243)

Modified oligoribonucleotides

Thermodynamics of RNA duplexes; Modified uridine (Ziomek, K. (97) 233)

Modified uridine

Modified oligoribonucleotides; Thermodynamics of RNA duplexes (Ziomek, K. (97) 233)

Modified uridine

Modified oligoribonucleotides; Thermodynamics of RNA duplexes (Ziomek, K. (97) 243)

Molten-globule proteins

Protein dynamics; Optical absorption spectroscopy (Militello, V. (97) 121)

Nickel

Protein folding; Peptide-metal complex; NMR (Spiga, O. (97) 79)

NMR

Nickel; Protein folding; Peptide-metal complex (Spiga, O. (97) 79)

Non-equilibrium thermodynamics

Bioenergetics; Coupling; Thermodynamic regulations; Active transport (Demirel, Y. (97) 87)

Non-linear dynamics

Synchronization of cells; Fibroblast growth factor (FGF); Calcium spikes; Mitogen-activated protein kinase (MAPK) cascade; Mesodermal induction; Inositol 1,4,5-trisphosphate (IP₃) receptor; Mathematical model (Díaz, J. (97) 55)

Nucleocapsid

Zinc finger; Fluorescence; Bovine leukemia virus (Morcock, D.R. (97) 203)

Nucleosome multiple positioning

Centromere; *Kluyveromyces lactis*; Sequence-dependent DNA elasticity; Nucleosome thermodynamic stability (Mattei, S. (97) 173)

Nucleosome thermodynamic stability

Nucleosome multiple positioning; Centromere; *Kluyveromyces lactis*; Sequence-dependent DNA elasticity (Mattei, S. (97) 173)

Optical absorption spectroscopy

Molten-globule proteins; Protein dynamics (Militello, V. (97) 121)

Organic crystals

Chemical synthesis; Calorimetry; Thermal analysis (Abd-Elrahman, M.I. (97) 113)

Pentose phosphate pathway

Microtubular protein; Mathematical modeling; Bifurcation and metabolic control analysis; Glycolysis; Ethanol fermentation (Aon, M.A. (97) 213)

Peptide-metal complex

NMR; Nickel; Protein folding (Spiga, O. (97) 79)

Phospholipid bilayers

Supported planar membranes; Fluorescence microscopy; Lateral mobility; Surface diffusion (Starr, T.E. (97) 29)

Pig spleen ferritin

Bioelectrochemical cells; Heme and phosphate role; Platinum electrode; Electron transfer; Kinetics of iron release (Huang, H.Q. (97) 17)

Platinum electrode

Electron transfer; Kinetics of iron release; Pig spleen ferritin; Bioelectrochemical cells; Heme and phosphate role (Huang, H.Q. (97) 17)

Polybrene

Recombinant retroviruses; Gene therapy; Retrovirus adsorption (Davis, H.E. (97) 159)

Polyethyleneglycol

Dextran; Self-diffusion; Restricted diffusion; Cartilage; Pulsed field gradient nuclear magnetic resonance (Trampel, R. (97) 251)

Protein crystal

Crystal growth; Growth rate; Mass transfer; Diffusion; Interferometer (Duan, L. (97) 189)

Protein dynamics

Optical absorption spectroscopy; Molten-globule proteins (Militello, V. (97) 121)

Protein folding

Protein stability; Heat capacity of folding; Solvent-accessible surface area; Disulfide cross-links (Deep, S. (97) 73)

Protein folding

Peptide-metal complex; NMR; Nickel (Spiga, O. (97) 79)

Protein stability

Heat capacity of folding; Solvent-accessible surface area; Disulfide cross-links; Protein folding (Deep, S. (97) 73)

Pulsed field gradient nuclear magnetic resonance

Polyethyleneglycol; Dextran; Self-diffusion; Restricted diffusion; Cartilage (Trampel, R. (97) 251)

Recombinant retroviruses

Gene therapy; Retrovirus adsorption; Polybrene (Davis, H.E. (97) 159)

Restricted diffusion

Cartilage; Pulsed field gradient nuclear magnetic resonance;

Polyethyleneglycol; Dextran; Self-diffusion (Trampel, R. (97) 251)

Retrovirus adsorption

Polybrene; Recombinant retroviruses; Gene therapy (Davis, H.E. (97) 159)

Self-diffusion

Restricted diffusion; Cartilage; Pulsed field gradient nuclear magnetic resonance; Polyethyleneglycol; Dextran (Trampel, R. (97) 251)

Sequence-dependent DNA elasticity

Nucleosome thermodynamic stability; Nucleosome multiple positioning; Centromere; *Kluyveromyces lactis* (Mattei, S. (97) 173)

Sequencing

Modeling; Tryptophan fluorescence; Extracellular hemoglobin; *d*-Chain monomer; *Glossoscolex paulistus* (Bosch Cabral, C. (97) 139)

Solubilization

Erythrocyte; Membrane; Surfactants; Hemolysis (Preté, P.S.C. (97) 45)

Solubilization

Erythrocyte; Triton X-100; Membrane; Surfactants; Hemolysis (Preté, P.S.C. (97) 1)

Solvent-accessible surface area

Disulfide cross-links; Protein folding; Protein stability; Heat capacity of folding (Deep, S. (97) 73)

Spectroscopy

SVDLS; Cationic lipid vesicle; Conformation (Zhang, Z. (97) 7)

Structural change

Electroreduction; Circular dichroism spectroelectrochemistry; Long optical path thin-layer cell; Hemoglobin (Zhu, Y. (97) 129)

Supported planar membranes

Fluorescence microscopy; Lateral mobility; Surface diffusion; Phospholipid bilayers (Starr, T.E. (97) 29)

Surface diffusion

Phospholipid bilayers; Supported planar membranes; Fluorescence microscopy; Lateral mobility (Starr, T.E. (97) 29)

Surfactants

Hemolysis; Solubilization; Erythrocyte; Membrane (Preté, P.S.C. (97) 45)

Surfactants

Hemolysis; Solubilization; Erythrocyte; Triton X-100; Membrane (Preté, P.S.C. (97) 1)

SVDLS

Cationic lipid vesicle; Conformation; Spectroscopy (Zhang, Z. (97) 7)

Synchronization of cells

Fibroblast growth factor (FGF); Calcium spikes; Mitogen-activated protein kinase (MAPK) cascade; Mesodermal induction; Inositol 1,4,5-trisphosphate (IP₃) receptor; Mathematical model; Non-linear dynamics (Díaz, J. (97) 55)

Thermal analysis

Organic crystals; Chemical synthesis; Calorimetry (Abd-Elrahman, M.I. (97) 113)

Thermodynamic regulations

Active transport; Non-equilibrium thermodynamics; Bioenergetics; Coupling (Demirel, Y. (97) 87)

Thermodynamics of RNA duplexes

Modified uridine; Modified oligoribonucleotides (Ziomek, K. (97) 233)

Thermodynamics of RNA duplexes

Modified uridine; Modified oligoribonucleotides (Ziomek, K. (97) 243)

Triton X-100

Membrane; Surfactants; Hemolysis; Solubilization; Erythrocyte (Preté, P.S.C. (97) 1)

Tryptophan fluorescence

Extracellular hemoglobin; *d*-Chain monomer; *Glossoscolex paulistus*; Sequencing; Modeling (Bosch Cabral, C. (97) 139)

Zinc finger

Fluorescence; Bovine leukemia virus; Nucleocapsid (Morcock, D.R. (97) 203)
