

Entropy convergence in hydrophobic hydration: a scaled particle theory analysis G. Graziano, B. Lee (Italy, USA)	241
Scientific and technological aspects of aqueous glasses F. Franks (UK)	251
Effect of redox potential of the heme on the peroxidase activity of cytochrome <i>b562</i> S. Mazumdar, S.L. Springs, G.L. McLendon (USA, India)	263
Analysis of excess Gibbs energy of electrolyte solutions: a new model for aqueous solutions R.C. Dougherty, L.N. Howard (USA)	269
The pH dependence of stability of the activation helix and the catalytic site of GART D. Morikis, A.H. Elcock, P.A. Jennings, J.A. McCammon (USA)	279
Chirality-dependent interactions between molecular propeller structures in solution. Chiral recognition and discrimination processes modulated by temperature and incremental changes in structural chirality J.P. Bolender, F.S. Richardson (USA)	293
Hydration of krypton and consideration of clathrate models of hydrophobic effects from the perspective of quasi-chemical theory H.S. Ashbaugh, D. Asthagiri, L.R. Pratt, S.B. Rempe (USA)	323
Molecular simulation study of cooperativity in hydrophobic association: clusters of four hydrophobic particles C. Czaplewski, S. Rodziewicz-Motowidło, M. Dąbał, A. Liwo, D.R. Ripoll, H.A. Scheraga (USA, Poland)	339
Structural genomics of <i>Mycobacterium tuberculosis</i> : a preliminary report of progress at UCLA C.W. Goulding, L.J. Perry, D. Anderson, M.R. Sawaya, D. Cascio, M.I. Apostol, S. Chan, A. Parseghian, S.-S. Wang, Y. Wu, V. Cassano, H.S. Gill, D. Eisenberg (USA)	361
Solvation thermodynamics of xenon in <i>n</i> -alkanes, <i>n</i> -alcohols and water G. Graziano (Italy)	371
Thermodynamics of denaturation of complexes of barnase and binase with barstar V.A. Mitkevich, A.A. Schulga, Y.S. Ermolyuk, V.M. Lobachov, V.O. Chekhov, G.I. Yakovlev, R.W. Hartley, C.N. Pace, M.P. Kirpichnikov, A.A. Makarov (Russia, USA)	383
Molecular and mesoscale structures in hydrophobically driven aqueous solutions J.L. Finney, D.T. Bowron, R.M. Daniel, P.A. Timmins, M.A. Roberts (UK, New Zealand, France)	391
Kauzmann's paradox and the glass transition R.J. Speedy (New Zealand)	411
Preferential interactions of urea with lysozyme and their linkage to protein denaturation S.N. Timasheff, G. Xie (USA)	421
A simple analytical model of water T.M. Truskett, K.A. Dill (USA)	449
Vibrational and electronic couplings in ultraviolet resonance Raman spectra of cyclic peptides Y. Wang, T.G. Spiro (USA)	461
Conformational complexity of melatonin in water and methanol D.D. Shillady, C.M. Castevens, C. Trindle, J. Sulik, P. Klonowski (USA)	471
Geometrical effects in protein nucleation J.J. Kozak, V. Basios, G. Nicolis (USA, Belgium)	495
The disulfide-rich region of platelet glycoprotein (GP) IIIa contains hydrophilic peptide sequences that bind anti-GPIIIa autoantibodies from patients with immune thrombocytopenic purpura (ITP) D.J.S. Beardsley, C. Tang, B.-G. Chen, C. Lamborn, E. Gomes, V. Srimatkandada (USA)	503
Preferential interactions in aqueous solutions of urea and KCl J. Hong, M.W. Capp, C.F. Anderson, M.T. Record (USA)	517
The surface tension of water calculated from a random network model A.R. Henn (USA)	533
Uses of enthalpy–entropy compensation in protein research R. Lumry (USA)	545
Thermodynamic and extrathermodynamic requirements of enzyme catalysis R. Wolfenden (USA)	559
Recent results on the connection between thermodynamics and dynamics in supercooled water F.W. Starr, C.A. Angell, E. La Nave, S. Sastry, A. Scala, F. Sciortino, H.E. Stanley (USA, Italy, India)	573

Thermodynamic and kinetic analysis of sensitivity amplification in biological signal transduction	
H. Qian (USA)	585
Protein structural alignment for detection of maximally conserved regions	
V. Kotlovyyi, W.L. Nichols, L.F.T. Eyck (USA)	595
Practical limitations on the use of thermodynamic data from isothermal processes	
R. Lumry (USA)	609
Hyperquenching and cold equilibration strategies for the study of liquid–liquid and protein folding transitions	
C.A. Angell, L.-M. Wang (USA)	621
Hemodextrin: a self-assembled cyclodextrin–porphyrin construct that binds dioxygen	
H. Zhou, J.T. Groves (USA)	639
Impact of urea on water structure: a clue to its properties as a denaturant?	
A.K. Soper, E.W. Castner, A. Luzar (UK, USA)	649
The 'glass transition' in protein dynamics: what it is, why it occurs, and how to exploit it	
D. Ringe, G.A. Petsko (USA)	667
Stabilization of nucleic acid triplexes by high concentrations of sodium and ammonium salts follows the Hofmeister series	
L. Lavelle, J.R. Fresco (USA)	681
Enhanced stabilization of the triplexes $d(C^+-T)_6:d(A-G)_6 \bullet d(C-T)_6$, $d(T)_{21}:d(A)_{21} \bullet d(T)_{21}$ and poly $r(U:A \bullet U)$ by water structure-making solutes	
L. Lavelle, J.R. Fresco (USA)	701
Studies of short-wavelength collective molecular motions in lipid bilayers using high resolution inelastic X-ray scattering	
P.-J. Chen, Y. Liu, T.M. Weiss, H.W. Huang, H. Sinn, E.E. Alp, A. Alatas, A. Said, S.-H. Chen (USA)	721
Unusual susceptibility of heme proteins to damage by glucose during non-enzymatic glycation	
B.L. Cussimano, A.A. Booth, P. Todd, B.G. Hudson, R.G. Khalifah (USA)	743
Subject Index	757
Author Index	769
