

Contents continued from back cover

Low concentration of dioleoylphosphatidic acid induces an inverted hexagonal (H_{II}) phase transition in dipalmitoleoylphosphatidylethanolamine membranes S.J. Li, M. Yamazaki (PR China, Japan)	149
Bohr-effect and buffering capacity of hemocyanin from the tarantula <i>E. californicum</i> N. Hellmann (Germany)	157
Cloud-point temperatures of lysozyme in electrolyte solutions by thermooptical analysis technique E.J. Park, Y.C. Bae (South Korea)	169
Effects of the local anesthetic benzocaine on the human erythrocyte membrane and molecular models M. Suwalsky, C. Schneider, F. Villena, B. Norris, H. Cárdenas, F. Cuevas, C.P. Sotomayor (Chile)	189
