

*(contents continued from outside back cover)*

|  |     |
|--|-----|
| Two opposite effects of cofilin on the thermal unfolding of F-actin: a differential scanning calorimetric study<br>I.V. Dedova, O.P. Nikolaeva, V.V. Mikhailova, C.G. dos Remedios and D.I. Levitsky (Australia, Russia)         | 119 |
| A mathematical model of the Pyrosequencing reaction system<br>A. Svantesson, P.O. Westermark, J.H. Kotaleski, B. Gharizadeh, A. Lansner and P. Nyrén (Sweden)  | 129 |
| Theoretical studies on the regulation of anaerobic glycolysis and its influence on oxidative phosphorylation in skeletal muscle<br>B. Korzeniewski and P. Liguzinski (Poland)  | 147 |
| Packaging of single DNA molecules by the yeast mitochondrial protein Abf2p: reinterpretation of recent single molecule experiments<br>D. Stigter (USA)   | 171 |
| Effects of inositol 1,4,5-trisphosphate receptor-mediated intracellular stochastic calcium oscillations on activation of glycogen phosphorylase<br>D. Wu, Y. Jia and A. Rozi (China)   | 179 |
| The role of Zn in the interplay among Langmuir–Blodgett multilayer and myelin basic protein: a quantitative analysis of XANES spectra<br>M. Benfatto, S. Della Longa, Y. Qin, Q. Li, G. Pan, Z. Wu and S. Morante (Italy, China) | 191 |
