

Subject Index to Volume 110

Accessibility of DNA

Compaction of DNA; Adsorption to DNA; Binding constant of Abf2p (Stigter, D. (110) 171)

Actin

Cofilin; Thermal unfolding; Differential scanning calorimetry (Dedova, I.V. (110) 119)

Adenylate kinase

Protein stability; Differential scanning calorimetry; Circular dichroism; Intrinsic fluorescence; *Desulfovibrio gigas* (Gavel, O.Yu. (110) 83)

Adsorption to DNA

Compaction of DNA; Accessibility of DNA; Binding constant of Abf2p (Stigter, D. (110) 171)

Aggregation

HPMA; Fluorescence anisotropy; Photon correlation spectroscopy; Camptothecin; Drug delivery (Chirico, G. (110) 281)

Alkaline conformational changes of ferricytochrome *c*

CD spectra; SWNTs modified electrode; Electrode surface microstructure (Jiang, X. (110) 203)

Antifreeze glycoprotein (AFGP)

Supercooled water; Protein; Self-diffusion (Krishnan, V.V. (110) 223)

Ba²⁺/crown ether complexation

Isothermal titration calorimetry (ITC); Data analysis; Non-linear least squares; van't Hoff reaction enthalpy; Calorimetric vs. van't Hoff ΔH (Mizoue, L.S. (110) 15)

Benzene–water H-bonds

Hydration; Van der Waals interactions; H-bond reorganization (Graziano, G. (110) 249)

Binding constant of Abf2p

Compaction of DNA; Adsorption to DNA; Accessibility of DNA (Stigter, D. (110) 171)

Biochemical modeling

DNA sequencing; Enzyme kinetics; Michaelis–Menten; Pyrosequencing technology (Svantesson, A. (110) 129)

Blood coagulation

Proteolysis; Thrombin; Prothrombin; Meizothrombin; Prethrombin 1; Temperature dependence; Conformation changes (Shi, F. (110) 1)

Calcium oscillations

IP₃ receptor; Fraction of active glycogen phosphorylase (Wu, D. (110) 179)

Calorimetric vs. van't Hoff ΔH

Isothermal titration calorimetry (ITC); Data analysis; Non-linear least squares; Ba²⁺/crown ether complexation; van't Hoff reaction enthalpy (Mizoue, L.S. (110) 15)

Camptothecin

HPMA; Fluorescence anisotropy; Photon correlation spectroscopy; Aggregation; Drug delivery (Chirico, G. (110) 281)

CD spectra

SWNTs modified electrode; Electrode surface microstructure; Alkaline conformational changes of ferricytochrome *c* (Jiang, X. (110) 203)

Chemical pattern

Control; Clock-and-wavefront (Kærn, M. (110) 231)

Cholesterol

Phospholipid; Interdigitation; DSC; Fluorescence (Tran, R. (110) 39)

Circular dichroism

DNA triple helix; Cytosine protonation; Thermodynamic stability; Differential scanning calorimetry (Petraccone, L. (110) 73)

Protein stability; Differential scanning calorimetry; Intrinsic fluorescence; Adenylate kinase; *Desulfovibrio gigas* (Gavel, O.Yu. (110) 83)

Clock-and-wavefront

Control; Chemical pattern (Kærn, M. (110) 231)

Cofilin

Actin; Thermal unfolding; Differential scanning calorimetry (Dedova, I.V. (110) 119)

Compaction of DNA

Adsorption to DNA; Accessibility of DNA; Binding constant of Abf2p (Stigter, D. (110) 171)

Computer model

Glycolysis; Glycogenolysis; Skeletal muscle; Cytosolic pH; Regulation of metabolism (Korzeniewski, B. (110) 147)

Conformation changes

Blood coagulation; Proteolysis; Thrombin; Prothrombin; Meizothrombin; Prethrombin 1; Temperature dependence (Shi, F. (110) 1)

Conformational transition

Poly(ethacrylic acid); Small angle X-ray scattering; Wormlike chain; Dendrimer; Poly(methacrylic acid) (Muroga, Y. (110) 49)

Control

Chemical pattern; Clock-and-wavefront (Kærn, M. (110) 231)

Cytosine protonation

DNA triple helix; Thermodynamic stability; Differential scanning calorimetry; Circular dichroism (Petraccone, L. (110) 73)

Cytosolic pH

Glycolysis; Glycogenolysis; Skeletal muscle; Computer model; Regulation of metabolism (Korzeniewski, B. (110) 147)

Data analysis

Isothermal titration calorimetry (ITC); Non-linear least squares; Ba^{2+} /crown ether complexation; van't Hoff reaction enthalpy; Calorimetric vs. van't Hoff ΔH (Mizoue, L.S. (110) 15)

Dendrimer

Poly(ethacrylic acid); Conformational transition; Small angle X-ray scattering; Wormlike chain; Poly(methacrylic acid) (Muroga, Y. (110) 49)

Density Function Theory (DFT)

One-carbon unit transfer; Water-assisted mechanism (Qiao, Q.A. (110) 259)

Desulfovibrio gigas

Protein stability; Differential scanning calorimetry; Circular dichroism; Intrinsic fluorescence; Adenylate kinase (Gavel, O.Yu. (110) 83)

Differential scanning calorimetry

DNA triple helix; Cytosine protonation; Thermodynamic stability; Circular dichroism (Petraccone, L. (110) 73)

Protein stability; Circular dichroism; Intrinsic fluorescence; Adenylate kinase; *Desulfovibrio gigas* (Gavel, O.Yu. (110) 83)

Cofilin; Actin; Thermal unfolding (Dedova, I.V. (110) 119)

Direct electrochemistry

Hemoglobin; Polystyrene latex bead; Film modified electrode; Electrocatalysis (Sun, H. (110) 297)

DNA

Persistence exponent; *Thermoplasma volcanium*; Fractal dimension; Power law (Poland, D. (110) 59)

DNA melting simulation

Exon–intron; Sequence shuffling; Nearest neighbor frequencies; Melting temperature (Long, D.D. (110) 25)

DNA sequencing

Biochemical modeling; Enzyme kinetics; Michaelis–Menten; Pyrosequencing technology (Svantesson, A. (110) 129)

DNA triple helix

Cytosine protonation; Thermodynamic stability; Differential scanning calorimetry; Circular dichroism (Petraccone, L. (110) 73)

Drug delivery

HPMA; Fluorescence anisotropy; Photon correlation spectroscopy; Aggregation; Camptothecin (Chirico, G. (110) 281)

DSC

Phospholipid; Cholesterol; Interdigitation; Fluorescence (Tran, R. (110) 39)

Electrocatalysis

Hemoglobin; Polystyrene latex bead; Film modified electrode; Direct electrochemistry (Sun, H. (110) 297)

Electrode surface microstructure

CD spectra; SWNTs modified electrode; Alkaline conformational changes of ferricytochrome *c* (Jiang, X. (110) 203)

Electron affinity

Radiosensitizers; HF and DFT calculations (Ramalho, T.C. (110) 267)

Enzyme kinetics

Biochemical modeling; DNA sequencing; Michaelis–Menten; Pyrosequencing technology (Svantesson, A. (110) 129)

Erythrocytes

Local anesthetics; Hemolysis; Ionization; Partition; Membrane (Malheiros, S.V.P. (110) 213)

Exon–intron

DNA melting simulation; Sequence shuffling; Nearest neighbor frequencies; Melting temperature (Long, D.D. (110) 25)

Exosite

Thrombin; Fibrinogen; Fibrin (Mosesson, M.W. (110) 93)

Fibrin

Thrombin; Fibrinogen; Exosite (Mosesson, M.W. (110) 93)

Fibrinogen

Thrombin; Fibrin; Exosite (Mosesson, M.W. (110) 93)

Film modified electrode

Hemoglobin; Polystyrene latex bead; Direct electrochemistry; Electrocatalysis (Sun, H. (110) 297)

Fluorescence

Phospholipid; Cholesterol; Interdigitation; DSC (Tran, R. (110) 39)

Fluorescence anisotropy

HPMA; Photon correlation spectroscopy; Aggregation; Camptothecin; Drug delivery (Chirico, G. (110) 281)

Fractal dimension

Persistence exponent; *Thermoplasma volcanium*; DNA; Power law (Poland, D. (110) 59)

Fraction of active glycogen phosphorylase

IP₃ receptor; Calcium oscillations (Wu, D. (110) 179)

Glycogenolysis

Glycolysis; Skeletal muscle; Computer model; Cytosolic pH; Regulation of metabolism (Korzeniewski, B. (110) 147)

Glycolysis

Glycogenolysis; Skeletal muscle; Computer model; Cytosolic pH; Regulation of metabolism (Korzeniewski, B. (110) 147)

H-bond reorganization

Hydration; Benzene– water H-bonds; Van der Waals interactions (Graziano, G. (110) 249)

Hemoglobin

Polystyrene latex bead; Film modified electrode; Direct electrochemistry; Electrocatalysis (Sun, H. (110) 297)

Hemolysis

Local anesthetics; Erythrocytes; Ionization; Partition; Membrane (Malheiros, S.V.P. (110) 213)

HF and DFT calculations

Radiosensitizers; Electron affinity (Ramalho, T.C. (110) 267)

HPMA

Fluorescence anisotropy; Photon correlation spectroscopy; Aggregation; Camptothecin; Drug delivery (Chirico, G. (110) 281)

Hydration

Benzene– water H-bonds; Van der Waals interactions; H-bond reorganization (Graziano, G. (110) 249)

Hydrophobic packing

Protein structure; Side chain conformation (Chen, J. (110) 239)

Interdigitation

Phospholipid; Cholesterol; DSC; Fluorescence (Tran, R. (110) 39)

Intrinsic fluorescence

Protein stability; Differential scanning calorimetry; Circular dichroism; Adenylate kinase; *Desulfovibrio gigas* (Gavel, O.Yu. (110) 83)

Ionization

Local anesthetics; Erythrocytes; Hemolysis; Partition; Membrane (Malheiros, S.V.P. (110) 213)

IP₃ receptor

Calcium oscillations; Fraction of active glycogen phosphorylase (Wu, D. (110) 179)

Isothermal titration calorimetry (ITC)

Data analysis; Non-linear least squares; Ba²⁺/crown ether complexation; van't Hoff reaction enthalpy; Calorimetric vs. van't Hoff ΔH (Mizoue, L.S. (110) 15)

Langmuir–Blodgett multilayers

Myelin basic protein; Zinc; X-ray absorption spectroscopy; Near-edge structure (Benfatto, M. (110) 191)

Local anesthetics

Erythrocytes; Hemolysis; Ionization; Partition; Membrane (Malheiros, S.V.P. (110) 213)

Meizothrombin

Blood coagulation; Proteolysis; Thrombin; Prothrombin; Prethrombin 1; Temperature dependence; Conformation changes (Shi, F. (110) 1)

Melting temperature

DNA melting simulation; Exon– intron; Sequence shuffling; Nearest neighbor frequencies (Long, D.D. (110) 25)

Membrane

Local anesthetics; Erythrocytes; Hemolysis; Ionization; Partition (Malheiros, S.V.P. (110) 213)

Michaelis– Menten

Biochemical modeling; DNA sequencing; Enzyme kinetics; Pyrosequencing technology (Svantesson, A. (110) 129)

Monolayers

Tetracyclines; Phospholipids; Surface tension; Surface pressure; Surface potential (Gambinossi, F. (110) 101)

Myelin basic protein

Langmuir– Blodgett multilayers; Zinc; X-ray absorption spectroscopy; Near-edge structure (Benfatto, M. (110) 191)

Near-edge structure

Langmuir– Blodgett multilayers; Myelin basic protein; Zinc; X-ray absorption spectroscopy (Benfatto, M. (110) 191)

Nearest neighbor frequencies

DNA melting simulation; Exon– intron; Sequence shuffling; Melting temperature (Long, D.D. (110) 25)

Non-linear least squares

Isothermal titration calorimetry (ITC); Data analysis; Ba^{2+} /crown ether complexation; van't Hoff reaction enthalpy; Calorimetric vs. van't Hoff ΔH (Mizoue, L.S. (110) 15)

One-carbon unit transfer

Water-assisted mechanism; Density Function Theory (DFT) (Qiao, Q.A. (110) 259)

Partition

Local anesthetics; Erythrocytes; Hemolysis; Ionization; Membrane (Malheiros, S.V.P. (110) 213)

Persistence exponent

Thermoplasma volcanium; DNA; Fractal dimension; Power law (Poland, D. (110) 59)

Phospholipid

Cholesterol; Interdigitation; DSC; Fluorescence (Tran, R. (110) 39)

Phospholipids

Tetracyclines; Monolayers; Surface tension; Surface pressure; Surface potential (Gambinossi, F. (110) 101)

Photon correlation spectroscopy

HPMA; Fluorescence anisotropy; Aggregation; Camptothecin; Drug delivery (Chirico, G. (110) 281)

Poly(ethacrylic acid)

Conformational transition; Small angle X-ray scattering; Wormlike chain; Dendrimer; Poly(methacrylic acid) (Muroga, Y. (110) 49)

Poly(methacrylic acid)

Poly(ethacrylic acid); Conformational transition; Small angle X-ray scattering; Wormlike chain; Dendrimer (Muroga, Y. (110) 49)

Polystyrene latex bead

Hemoglobin; Film modified electrode; Direct electrochemistry; Electrocatalysis (Sun, H. (110) 297)

Power law

Persistence exponent; *Thermoplasma volcanium*; DNA; Fractal dimension (Poland, D. (110) 59)

Prethrombin 1

Blood coagulation; Proteolysis; Thrombin; Prothrombin; Meizothrombin; Temperature dependence; Conformation changes (Shi, F. (110) 1)

Protein

Supercooled water; Self-diffusion; Antifreeze glycoprotein (AFGP) (Krishnan, V.V. (110) 223)

Protein stability

Differential scanning calorimetry; Circular dichroism; Intrinsic fluorescence; Adenylate kinase; *Desulfovibrio gigas* (Gavel, O.Yu. (110) 83)

Protein structure

Hydrophobic packing; Side chain conformation (Chen, J. (110) 239)

Proteolysis

Blood coagulation; Thrombin; Prothrombin; Meizothrombin; Prethrombin 1; Temperature dependence; Conformation changes (Shi, F. (110) 1)

Prothrombin

Blood coagulation; Proteolysis; Thrombin; Meizothrombin; Prethrombin 1; Temperature dependence; Conformation changes (Shi, F. (110) 1)

Pyrosequencing technology

Biochemical modeling; DNA sequencing; Enzyme kinetics; Michaelis– Menten (Svantesson, A. (110) 129)

Radiosensitizers

Electron affinity; HF and DFT calculations (Ramalho, T.C. (110) 267)

Regulation of metabolism

Glycolysis; Glycogenolysis; Skeletal muscle; Computer model; Cytosolic pH (Korzeniewski, B. (110) 147)

Self-diffusion

Supercooled water; Protein; Antifreeze glycoprotein (AFGP) (Krishnan, V.V. (110) 223)

Sequence shuffling

DNA melting simulation; Exon–intron; Nearest neighbor frequencies; Melting temperature (Long, D.D. (110) 25)

Side chain conformation

Hydrophobic packing; Protein structure (Chen, J. (110) 239)

Skeletal muscle

Glycolysis; Glycogenolysis; Computer model; Cytosolic pH; Regulation of metabolism (Korzeniewski, B. (110) 147)

Small angle X-ray scattering

Poly(ethacrylic acid); Conformational transition; Wormlike chain; Dendrimer; Poly(methacrylic acid) (Muroga, Y. (110) 49)

Supercooled water

Protein; Self-diffusion; Antifreeze glycoprotein (AFGP) (Krishnan, V.V. (110) 223)

Surface potential

Tetracyclines; Phospholipids; Monolayers; Surface tension; Surface pressure (Gambinossi, F. (110) 101)

Surface pressure

Tetracyclines; Phospholipids; Monolayers; Surface tension; Surface potential (Gambinossi, F. (110) 101)

Surface tension

Tetracyclines; Phospholipids; Monolayers; Surface pressure; Surface potential (Gambinossi, F. (110) 101)

SWNTs modified electrode

CD spectra; Electrode surface microstructure; Alkaline conformational changes of ferricytochrome *c* (Jiang, X. (110) 203)

Temperature dependence

Blood coagulation; Proteolysis; Thrombin; Prothrombin; Meizothrombin; Prethrombin 1; Conformation changes (Shi, F. (110) 1)

Tetracyclines

Phospholipids; Monolayers; Surface tension; Surface pressure; Surface potential (Gambinossi, F. (110) 101)

Thermal unfolding

Cofilin; Actin; Differential scanning calorimetry (Dedova, I.V. (110) 119)

Thermodynamic stability

DNA triple helix; Cytosine protonation; Differential scanning calorimetry; Circular dichroism (Petraccone, L. (110) 73)

Thermoplasma volcanium

Persistence exponent; DNA; Fractal dimension; Power law (Poland, D. (110) 59)

Thrombin

Blood coagulation; Proteolysis; Prothrombin; Meizothrombin; Prethrombin 1; Temperature dependence; Conformation changes (Shi, F. (110) 1)

Fibrinogen; Fibrin; Exosite (Mosesson, M.W. (110) 93)

Van der Waals interactions

Hydration; Benzene–water H-bonds; H-bond reorganization (Graziano, G. (110) 249)

van't Hoff reaction enthalpy

Isothermal titration calorimetry (ITC); Data analysis; Non-linear least squares; Ba²⁺/crown ether complexation; Calorimetric vs. van't Hoff ΔH (Mizoue, L.S. (110) 15)

Water-assisted mechanism

One-carbon unit transfer; Density Function Theory (DFT) (Qiao, Q.A. (110) 259)

Wormlike chain

Poly(ethacrylic acid); Conformational transition; Small angle X-ray scattering; Dendrimer; Poly(methacrylic acid) (Muroga, Y. (110) 49)

X-ray absorption spectroscopy

Langmuir–Blodgett multilayers; Myelin basic protein; Zinc; Near-edge structure (Benfatto, M. (110) 191)

Zinc

Langmuir–Blodgett multilayers; Myelin basic protein; X-ray absorption spectroscopy; Near-edge structure (Benfatto, M. (110) 191)
