

Subject Index to Volume 113

Ab initio calculations

Polyproline; Ac-Pro-NMe₂; Conformational analysis; Prolyl cis–trans isomerization; Solvent effects (Kee Kang, Y. (113) 93)

Acetylcholinesterase

Mobile phone radiation; Radiofrequency radiation (Barteri, M. (113) 245)

Ac-Pro-NMe₂

Polyproline; Ab initio calculations; Conformational analysis; Prolyl cis–trans isomerization; Solvent effects (Kee Kang, Y. (113) 93)

Air–water interface

mSP-B_{1–25}; Epifluorescence microscopy; Lung surfactants; Surfactant protein (SP)-B; Synthetic peptides (Biswas, N. (113) 223)

Alexa-488

Nucleotides; FAM (Noble, J.E. (113) 255)

Analyte receptor kinetics

Pathogen detection; Biosensors (Morris, B.A. (113) 67)

Anesthetic–protein interaction

Desflurane; Fluoroxene; Isothermal titration calorimetry; Four- α -helix bundle (Zhang, T. (113) 169)

ANS emission

Beta-lactoglobulin; Protein aggregation; Conformational changes; Fluorescence; Rayleigh scattering; Circular dichroism (Vetri, V. (113) 83)

Benzocaine

Sodium channel; Local anesthetic receptor; Computer model (Godwin, S.A. (113) 1)

Beta-lactoglobulin

Protein aggregation; Conformational changes; Fluorescence; ANS emission; Rayleigh scattering; Circular dichroism (Vetri, V. (113) 83)

Bilayer disks

Drug partitioning; Liposome; Model membrane; PEG lipid; Phospholipid; Immobilized liposome chromatography (Johansson, E. (113) 183)

Binding constants

Fluoroquinolones; Membrane protein; Spectroscopic techniques (Neves, P. (113) 123)

Biological excitable medium

cAMP waves; Electric field effects; Control of intercellular communication; *Dictyostelium discoideum*; Pacemaker emergence (Sebestikova, L. (113) 269)

Biosensors

Pathogen detection; Analyte receptor kinetics (Morris, B.A. (113) 67)

Calcium oscillations

Intermediate-conductance potassium channels; Theoretical model (Fioretti, B. (113) 17)

cAMP waves

Electric field effects; Control of intercellular communication; *Dictyostelium discoideum*; Biological excitable medium; Pacemaker emergence (Sebestikova, L. (113) 269)

cAMP-dependent protein kinase

Time-resolved fluorescence anisotropy; MgATP; Conformational change (Yang, S. (113) 193)

κ -Carrageenan

Na⁺ and K⁺ ion effects; Self-assembly; Gelation; Fractal dimension (Mangione, M.R. (113) 129)

Carrageenan

Unperturbed dimensions; SEC-MALS (Marcelo, G. (113) 201)

Cell electrophoresis

Electrophoretic mobility; Cell surface charge; Lipid rafts; Mathematical model (Camp, J.P. (113) 115)

Cell surface charge

Electrophoretic mobility; Cell electrophoresis; Lipid rafts; Mathematical model (Camp, J.P. (113) 115)

Chloroperoxidase

Suicide substrate; Kinetic parameters; Enzyme inactivation; Cytochrome P450; Time course (Toti, P. (113) 105)

Circular dichroism

Beta-lactoglobulin; Protein aggregation; Conformational changes; Fluorescence; ANS emission; Rayleigh scattering (Vetri, V. (113) 83)

Circular dichroism fluorescence

p24 HIV-1 peptide; SDS micelles; CTAB micelles; ESR (Campana, P.T. (113) 175)

Computer model

Sodium channel; Local anesthetic receptor; Benzocaine (Godwin, S.A. (113) 1)

Conformational analysis

Polypyrroline; Ac-Pro-NMe₂; Ab initio calculations; Prolyl cis-trans isomerization; Solvent effects (Kee Kang, Y. (113) 93)

Conformational change

Time-resolved fluorescence anisotropy; cAMP-dependent protein kinase; MgATP (Yang, S. (113) 193)

Conformational changes

Beta-lactoglobulin; Protein aggregation; Fluorescence; ANS emission; Rayleigh scattering; Circular dichroism (Vetri, V. (113) 83)

Control of intercellular communication

cAMP waves; Electric field effects; *Dictyostelium discoideum*; Biological excitable medium; Pacemaker emergence (Sebestikova, L. (113) 269)

Cosolvent

Protein volume; Protein denaturation; Protein aggregation; Preferential interactions (Smith, P.E. (113) 299)

Coupling strength

IP₃ level; Intercellular Ca²⁺ oscillations (Wu, D. (113) 145)

CTABr micelles

p24 HIV-1 peptide; SDS micelles; Circular dichroism fluorescence; ESR (Campana, P.T. (113) 175)

Cytochrome c

Single-molecule; SERS (Delfino, I. (113) 41)

Molten-globule state; Isothermal acid-titration calorimetry; Heat capacity change; Enthalpy change; pH transition (Nakamura, S. (113) 161)

Cytochrome P450

Suicide substrate; Kinetic parameters; Enzyme inactivation; Chloroperoxidase; Time course (Toti, P. (113) 105)

2D IR correlation analysis

mSP-B₁₋₂₅; Surfactant protein (SP)-B; Polarization-modulation IR spectroscopy; Lung surfactants; Synthetic peptides (Shanmukh, S. (113) 233)

Desflurane

Anesthetic-protein interaction; Fluroxene; Isothermal titration calorimetry; Four- α -helix bundle (Zhang, T. (113) 169)

Diabetes mellitus

Hemoglobin; Non-enzymatic glycation; Oxidative stress; Free iron (Sen, S. (113) 289)

Dictyostelium discoideum

cAMP waves; Electric field effects; Control of intercellular communication; Biological excitable medium; Pacemaker emergence (Sebestikova, L. (113) 269)

Difference sedimentation velocity

Glycogen phosphorylase *b*; Osmolyte effects; Enzyme isomerization (Chebotareva, N.A. (113) 61)

Divalent cations effects

Persistence length; Worm-like chain; DNA curvature; DNA flexibility; DNA-mica interactions (Anselmi, C. (113) 209)

DNA curvature

Persistence length; Worm-like chain; DNA flexibility; DNA-mica interactions; Divalent cations effects (Anselmi, C. (113) 209)

DNA flexibility

Persistence length; Worm-like chain; DNA curvature; DNA-mica interactions; Divalent cations effects (Anselmi, C. (113) 209)

DNA-interactive compound

Molecular recognition; NMR; Nuclear Overhauser effect; Porphyrin derivative; Self-complementary duplex DNA (Ohyama, T. (113) 53)

DNA-mica interactions

Persistence length; Worm-like chain; DNA curvature; DNA flexibility; Divalent cations effects (Anselmi, C. (113) 209)

Drug partitioning

Bilayer disks; Liposome; Model membrane; PEG lipid; Phospholipid; Immobilized liposome chromatography (Johansson, E. (113) 183)

Electric field effects

cAMP waves; Control of intercellular communication; *Dictyostelium discoideum*; Biological excitable medium; Pacemaker emergence (Sebestikova, L. (113) 269)

Electrophoretic mobility

Cell electrophoresis; Cell surface charge; Lipid rafts; Mathematical model (Camp, J.P. (113) 115)

Endogenous kinase and phosphatase

Smooth muscle; Myosin filament; Regulation of phosphorylation; Telokin (Sobieszek, A. (113) 25)

Enthalpy change

Molten-globule state; Cytochrome *c*; Isothermal acid-titration calorimetry; Heat capacity change; pH transition (Nakamura, S. (113) 161)

Enzyme inactivation

Suicide substrate; Kinetic parameters; Chloroperoxidase; Cytochrome P450; Time course (Toti, P. (113) 105)

Enzyme isomerization

Glycogen phosphorylase *b*; Osmolyte effects; Difference sedimentation velocity (Chebotareva, N.A. (113) 61)

Epifluorescence microscopy

mSP-B₁₋₂₅; Air-water interface; Lung surfactants; Surfactant protein (SP)-B; Synthetic peptides (Biswas, N. (113) 223)

ESR

p24 HIV-1 peptide; SDS micelles; CTABr micelles; Circular dichroism fluorescence (Campana, P.T. (113) 175)

FAM

Nucleotides; Alexa-488 (Noble, J.E. (113) 255)

Fluorescence

Beta-lactoglobulin; Protein aggregation; Conformational changes; ANS emission; Rayleigh scattering; Circular dichroism (Vetri, V. (113) 83)

Fluoroquinolones

Binding constants; Membrane protein; Spectroscopic techniques (Neves, P. (113) 123)

Fluoroxene

Anesthetic-protein interaction; Desflurane; Isothermal titration calorimetry; Four- α -helix bundle (Zhang, T. (113) 169)

Folding rate

n -order contact distance (n OCD); Two- and three-state folders (Zhang, L. (113) 9)

Folding-unfolding mechanism

NMR; Hydrogen exchange rates; Thrombin-binding DNA aptamer (Mao, X.-a. (113) 155)

Four- α -helix bundle

Anesthetic-protein interaction; Desflurane; Fluoroxene; Isothermal titration calorimetry (Zhang, T. (113) 169)

Fractal dimension

κ -Carrageenan; Na^+ and K^+ ion effects; Self-assembly; Gelation (Mangione, M.R. (113) 129)

Free iron

Hemoglobin; Non-enzymatic glycation; Diabetes mellitus; Oxidative stress (Sen, S. (113) 289)

Gelation

κ -Carrageenan; Na^+ and K^+ ion effects; Self-assembly; Fractal dimension (Mangione, M.R. (113) 129)

Polymer gels; Gelation temperature; Kinetics; Thermodynamics (Marangoni, A.G. (113) 265)

Gelation temperature

Polymer gels; Gelation; Kinetics; Thermodynamics (Marangoni, A.G. (113) 265)

Glycogen phosphorylase b

Osmolyte effects; Difference sedimentation velocity; Enzyme isomerization (Chebotareva, N.A. (113) 61)

Heat capacity change

Molten-globule state; Cytochrome c ; Isothermal acid-titration calorimetry; Enthalpy change; pH transition (Nakamura, S. (113) 161)

Hemoglobin

Non-enzymatic glycation; Diabetes mellitus; Oxidative stress; Free iron (Sen, S. (113) 289)

Hydrogen exchange rates

NMR; Thrombin-binding DNA aptamer; Folding-unfolding mechanism (Mao, X.-a. (113) 155)

Immobilized liposome chromatography

Bilayer disks; Drug partitioning; Liposome; Model membrane; PEG lipid; Phospholipid (Johansson, E. (113) 183)

Intercellular Ca^{2+} oscillations

Coupling strength; IP_3 level (Wu, D. (113) 145)

Intermediate-conductance potassium channels

Calcium oscillations; Theoretical model (Fioretti, B. (113) 17)

 IP_3 level

Coupling strength; Intercellular Ca^{2+} oscillations (Wu, D. (113) 145)

Isothermal acid-titration calorimetry

Molten-globule state; Cytochrome c ; Heat capacity change; Enthalpy change; pH transition (Nakamura, S. (113) 161)

Isothermal titration calorimetry

Anesthetic-protein interaction; Desflurane; Fluoroxene; Four- α -helix bundle (Zhang, T. (113) 169)

Kinetic parameters

Suicide substrate; Enzyme inactivation; Chloroperoxidase; Cytochrome P450; Time course (Toti, P. (113) 105)

Kinetics

Polymer gels; Gelation; Gelation temperature; Thermodynamics (Marangoni, A.G. (113) 265)

Lipid rafts

Electrophoretic mobility; Cell electrophoresis; Cell surface charge; Mathematical model (Camp, J.P. (113) 115)

Liposome

Bilayer disks; Drug partitioning; Model membrane; PEG lipid; Phospholipid; Immobilized liposome chromatography (Johansson, E. (113) 183)

Local anesthetic receptor

Sodium channel; Benzocaine; Computer model (Godwin, S.A. (113) 1)

Lung surfactants

mSP-B₁₋₂₅; Epifluorescence microscopy; Air-water interface; Surfactant protein (SP)-B; Synthetic peptides (Biswas, N. (113) 223)

mSP-B₁₋₂₅; Surfactant protein (SP)-B; Polarization-modulation IR spectroscopy; 2D IR correlation analysis; Synthetic peptides (Shanmukh, S. (113) 233)

Lysozyme

Salt binding; Titration calorimetry; Virial coefficients (Poznański, J. (113) 137)

MAPK signaling

Oncogene detection; Nonlinear analysis (Pant, D. (113) 275)

Mathematical model

Electrophoretic mobility; Cell electrophoresis; Cell surface charge; Lipid rafts (Camp, J.P. (113) 115)

Membrane protein

Binding constants; Fluoroquinolones; Spectroscopic techniques (Neves, P. (113) 123)

MgATP

Time-resolved fluorescence anisotropy; cAMP-dependent protein kinase; Conformational change (Yang, S. (113) 193)

Mobile phone radiation

Radiofrequency radiation; Acetylcholinesterase (Barteri, M. (113) 245)

Model membrane

Bilayer disks; Drug partitioning; Liposome; PEG lipid; Phospholipid; Immobilized liposome chromatography (Johansson, E. (113) 183)

Molecular recognition

DNA-interactive compound; NMR; Nuclear Overhauser effect; Porphyrin derivative; Self-complementary duplex DNA (Ohyama, T. (113) 53)

Molten-globule state

Cytochrome *c*; Isothermal acid-titration calorimetry; Heat capacity change; Enthalpy change; pH transition (Nakamura, S. (113) 161)

mSP-B₁₋₂₅

Epifluorescence microscopy; Air–water interface; Lung surfactants; Surfactant protein (SP)-B; Synthetic peptides (Biswas, N. (113) 223)

Surfactant protein (SP)-B; Polarization–modulation IR spectroscopy; 2D IR correlation analysis; Lung surfactants; Synthetic peptides (Shanmukh, S. (113) 233)

Myosin filament

Smooth muscle; Regulation of phosphorylation; Endogenous kinase and phosphatase; Telokin (Sobieszek, A. (113) 25)

Na⁺ and K⁺ ion effects

κ-Carrageenan; Self-assembly; Gelation; Fractal dimension (Mangione, M.R. (113) 129)

NMR

DNA-interactive compound; Molecular recognition; Nuclear Overhauser effect; Porphyrin derivative; Self-complementary duplex DNA (Ohyama, T. (113) 53)

Hydrogen exchange rates; Thrombin-binding DNA aptamer; Folding–unfolding mechanism (Mao, X.-a. (113) 155)

Non-enzymatic glycation

Hemoglobin; Diabetes mellitus; Oxidative stress; Free iron (Sen, S. (113) 289)

Nonlinear analysis

Oncogene detection; MAPK signaling (Pant, D. (113) 275)

***n*-order contact distance (*n*OCD)**

Folding rate; Two- and three-state folders (Zhang, L. (113) 9)

Nuclear Overhauser effect

DNA-interactive compound; Molecular recognition; NMR; Porphyrin derivative; Self-complementary duplex DNA (Ohyama, T. (113) 53)

Nucleotides

Alexa-488; FAM (Noble, J.E. (113) 255)

Oncogene detection

MAPK signaling; Nonlinear analysis (Pant, D. (113) 275)

Osmolyte effects

Glycogen phosphorylase *b*; Difference sedimentation velocity; Enzyme isomerization (Chebotareva, N.A. (113) 61)

Oxidative stress

Hemoglobin; Non-enzymatic glycation; Diabetes mellitus; Free iron (Sen, S. (113) 289)

p24 HIV-1 peptide

SDS micelles; CTAB micelles; Circular dichroism fluorescence; ESR (Campana, P.T. (113) 175)

Pacemaker emergence

cAMP waves; Electric field effects; Control of intercellular communication; *Dictyostelium discoideum*; Biological excitable medium (Sebestikova, L. (113) 269)

Pathogen detection

Biosensors; Analyte receptor kinetics (Morris, B.A. (113) 67)

PEG lipid

Bilayer disks; Drug partitioning; Liposome; Model membrane; Phospholipid; Immobilized liposome chromatography (Johansson, E. (113) 183)

Persistence length

Worm-like chain; DNA curvature; DNA flexibility; DNA–mica interactions; Divalent cations effects (Anselmi, C. (113) 209)

pH transition

Molten-globule state; Cytochrome *c*; Isothermal acid-titration calorimetry; Heat capacity change; Enthalpy change (Nakamura, S. (113) 161)

Phospholipid

Bilayer disks; Drug partitioning; Liposome; Model membrane; PEG lipid; Immobilized liposome chromatography (Johansson, E. (113) 183)

Polarization–modulation IR spectroscopy

mSP-B₁₋₂₅; Surfactant protein (SP)-B; 2D IR correlation analysis; Lung surfactants; Synthetic peptides (Shanmukh, S. (113) 233)

Polymer gels

Gelation; Gelation temperature; Kinetics; Thermodynamics (Marangoni, A.G. (113) 265)

Polyproline

Ac–Pro–NMe₂; Ab initio calculations; Conformational analysis; Prolyl cis–trans isomerization; Solvent effects (Kee Kang, Y. (113) 93)

Porphyrin derivative

DNA-interactive compound; Molecular recognition; NMR; Nuclear Overhauser effect; Self-complementary duplex DNA (Ohyama, T. (113) 53)

Preferential interactions

Protein volume; Cosolvent; Protein denaturation; Protein aggregation (Smith, P.E. (113) 299)

Prolyl cis–trans isomerization

Polyproline; Ac–Pro–NMe₂; Ab initio calculations; Conformational analysis; Solvent effects (Kee Kang, Y. (113) 93)

Protein aggregation

Beta-lactoglobulin; Conformational changes; Fluorescence; ANS emission; Rayleigh scattering; Circular dichroism (Vetri, V. (113) 83)

Protein volume; Cosolvent; Protein denaturation; Preferential interactions (Smith, P.E. (113) 299)

Protein denaturation

Protein volume; Cosolvent; Protein aggregation; Preferential interactions (Smith, P.E. (113) 299)

Protein volume

Cosolvent; Protein denaturation; Protein aggregation; Preferential interactions (Smith, P.E. (113) 299)

Radiofrequency radiation

Mobile phone radiation; Acetylcholinesterase (Barteri, M. (113) 245)

Rayleigh scattering

Beta-lactoglobulin; Protein aggregation; Conformational changes; Fluorescence; ANS emission; Circular dichroism (Vetri, V. (113) 83)

Regulation of phosphorylation

Smooth muscle; Myosin filament; Endogenous kinase and phosphatase; Telokin (Sobieszek, A. (113) 25)

Salt binding

Lysozyme; Titration calorimetry; Virial coefficients (Poznański, J. (113) 137)

SDS micelles

p24 HIV-1 peptide; CTABr micelles; Circular dichroism fluorescence; ESR (Campana, P.T. (113) 175)

SEC-MALS

Unperturbed dimensions; Carrageenan (Marcelo, G. (113) 201)

Self-assembly

κ -Carrageenan; Na^+ and K^+ ion effects; Gelation; Fractal dimension (Mangione, M.R. (113) 129)

Self-complementary duplex DNA

DNA-interactive compound; Molecular recognition; NMR; Nuclear Overhauser effect; Porphyrin derivative (Ohyama, T. (113) 53)

SERS

Single-molecule; Cytochrome *c* (Delfino, I. (113) 41)

Single-molecule

Cytochrome *c*; SERS (Delfino, I. (113) 41)

Smooth muscle

Myosin filament; Regulation of phosphorylation; Endogenous kinase and phosphatase; Telokin (Sobieszek, A. (113) 25)

Sodium channel

Local anesthetic receptor; Benzocaine; Computer model (Godwin, S.A. (113) 1)

Solvent effects

Polyproline; Ac-Pro-NMe₂; Ab initio calculations; Conformational analysis; Prolyl cis-trans isomerization (Kee Kang, Y. (113) 93)

Spectroscopic techniques

Binding constants; Fluoroquinolones; Membrane protein (Neves, P. (113) 123)

Suicide substrate

Kinetic parameters; Enzyme inactivation; Chloroperoxidase; Cytochrome P450; Time course (Toti, P. (113) 105)

Surfactant protein (SP)-B

mSP-B₁₋₂₅; Epifluorescence microscopy; Air-water interface; Lung surfactants; Synthetic peptides (Biswas, N. (113) 223)

mSP-B₁₋₂₅; Polarization-modulation IR spectroscopy; 2D IR correlation analysis; Lung surfactants; Synthetic peptides (Shanmukh, S. (113) 233)

Synthetic peptides

mSP-B₁₋₂₅; Epifluorescence microscopy; Air-water interface; Lung surfactants; Surfactant protein (SP)-B (Biswas, N. (113) 223)

mSP-B₁₋₂₅; Surfactant protein (SP)-B; Polarization-modulation IR spectroscopy; 2D IR correlation analysis; Lung surfactants (Shanmukh, S. (113) 233)

Telokin

Smooth muscle; Myosin filament; Regulation of phosphorylation; Endogenous kinase and phosphatase (Sobieszek, A. (113) 25)

Theoretical model

Calcium oscillations; Intermediate-conductance potassium channels (Fioretti, B. (113) 17)

Thermodynamics

Polymer gels; Gelation; Gelation temperature; Kinetics (Marangoni, A.G. (113) 265)

Thrombin-binding DNA aptamer

NMR; Hydrogen exchange rates; Folding-unfolding mechanism (Mao, X.-a. (113) 155)

Time course

Suicide substrate; Kinetic parameters; Enzyme inactivation; Chloroperoxidase; Cytochrome P450 (Toti, P. (113) 105)

Time-resolved fluorescence anisotropy

cAMP-dependent protein kinase; MgATP; Conformational change (Yang, S. (113) 193)

Titration calorimetry

Lysozyme; Salt binding; Virial coefficients (Poznański, J. (113) 137)

Two- and three-state folders

Folding rate; *n*-order contact distance (*n*OCD) (Zhang, L. (113) 9)

Unperturbed dimensions

SEC-MALS; Carrageenan (Marcelo, G. (113) 201)

Virial coefficients

Lysozyme; Salt binding; Titration calorimetry (Poznański, J. (113) 137)

Worm-like chain

Persistence length; DNA curvature; DNA flexibility; DNA-mica interactions; Divalent cations effects (Anselmi, C. (113) 209)
