Edward Egelman Named Incoming *Biophysical Journal* Editor-in-Chief

Edward Egelman

Edward Egelman, of the University of Virginia Health Sciences Center (UVHSC), will be the new *Biophysical Journal* Editor-in-Chief beginning July, 2007, when the five-year term of Bob Callender, the *Journal's* current Editor-in-Chief, ends.

Egelman has a long history of involvement with the Society and *Journal*. He was elected a Society Fellow in 2005, was Program Chair for the 2003 Annual Meeting in San Antonio, Texas, served on the Society Council from 1999 to 2003, is active in the Society's Public Affairs

Committee, and is a long-standing member of the *Biophysical Journal* Editorial Board.

A professor at UVHSC, Egelman studies protein-DNA complexes involved in homologous recombination, DNA helicases, actin and muscle, structure of macromolecular complexes, helical polymers, electron microscopy, and image analysis.
