

This is IOWA

and so is THIS

...and you get BOTH on WMT

Field hands . . . and shop hands . . . are not slowing down in Iowa. Stable industries and expanded farming create a steady, continuing income and a happy balance of diversification that assures a growing, dependable market throughout these post-war years. Stick a bright pin on Iowa on your marketing map, and then, like all good time buyers, you'll let WMT carry your sales story to the largest daytime primary area in the state (inside its 2.5 mv. line) . . . at Iowa's best frequency—600 KC with 5000 watts! Wire or write now for availabilities and market data. Thanks.

EXPECT FCC to move speedily in transmitting to Congress recommendations on transfer procedure pursuant to its Crosley-Avco decision (see page 15). Possibly action within fortnight.

BY OCT. 1 Col. Ed Kirby, chief of the Radio Branch, BPR, is expected to leave the Army. He will return to private business, probably as a public relations and advertising consultant. Former NAB public relations director, Col. Kirby has headed Army radio five years. Successor is almost certain to be Maj. Al Wharfield, formerly of C. E. Hooper Inc, who has been acting chief while Col. Kirby served as escorting officer for the U. S. Broadcast Mission in Europe.

MORE THAN a possibility, in view of the FCC denial last week of KOMA Oklahoma City application to shift from 1520 kc to 690 kc (see story page 17), that station will file for 50 kw on its present frequency.

INTERDEPARTMENT Radio Advisory Committee held first meeting since V-J Day last Thursday, discussed conversion of military and Government frequencies to civilian use. On agenda: aviation frequencies, conflicts in military intelligence bands and amateur channels. Weeks of work face IRAC before differences can be resolved.

DIXIE B. McKEY, who put on the air WKY's 915-foot antenna in Oklahoma City, and Robert C. Shaw, high-frequency expert, will open an engineer consulting firm in Washington about mid-September.

IF PRESENT plans of the Radio Executives Club of New York materialize, first meeting of the new season on Oct. 4 will feature the complete party of the American Broadcast Mission to Europe as guest speakers, with the reception committee comprising Paul W. Kesten, CBS executive vice-president; Edgar Kobak, Mutual president; Chester J. La Roche, vice-chairman, American, and Niles Trammell, NBC president.

DON'T expect quick entry of full-blown television on nationwide basis. Wild talk about sudden setting up of video industry is discounted by many who will take leading roles in its development. Five or more years may be needed, they say, pointing to need of networking facilities, stations, programs and receiving sets before television can be said to have arrived. Industry may be developing nicely, though, within two years, though service likely will be only a few hours daily in larger cities.

## REXALL ON COAST

SONTAG DIVISION of United Rexall Drug Co., Los Angeles (chain), has appointed Glasser-Gailey & Co., Los Angeles, to handle advertising and will use radio along with other media in an extensive campaign. Grace Glasser is account executive.

## Upcoming

Sept. 10-11: Mutual Board meeting, Hotel Ambassador, New York.

Sept. 14: BMB Board meeting, Waldorf-Astoria, New York.

Sept. 17: NAB Radio News Committee, Palmer House, Chicago.

Oct. 1-2: NAB Board Meeting, Washington, and inauguration of President Justin Miller.

Oct. 23: Clear channel hearings before FCC, Washington.

## Bulletins

COL. WILLIAM S. PALEY, ICD, deputy director and chief of operations, on leave as CBS president, arrived by plane in New York Thursday night. It is understood he will be released from the Army shortly and return to CBS. Edward R. Murrow arrived in New York Friday afternoon. He is to return to London in two or three weeks.

STATE DEPT. received word Friday afternoon that Third Inter-American Radio Conference has begun sessions in Rio de Janeiro, with following representing the U.S.: Adolph A. Berle Jr., American Ambassador to Brazil (delegate); Loring B. Andrews, Office of Inter-American Affairs; Col. Theodore L. Bartlett, Army Air Forces; Robert R. Burton, Dept. of State; Dr. J. H. Dellinger, Bureau of Standards; Ralph L. Higgs, U. S. Weather Bureau; Rosel L. Hyde, FCC; Commissioner Ray C. Wakefield, FCC; Marion Woodward, FCC; Arthur L. Lebel, Dept. of State; Comdr. Paul D. Miles, Navy Dept.; Harvey B. Otterman, Dept. of State; Col. A. G. Simson, CAA; Commodore E. M. Webster, U. S. Coast Guard; Hubert M. Curry, American Embassy, Cuba (secretary).

NEGOTIATIONS between NABET, NBC and American over terms of a new contract were underway late Friday with wage and hour demands under discussion. Court decree requires nets to recognize technicians as bargaining agents for platter-turners regardless of Petrillo threats.

## GRID FEATURE SPONSORS

CRITERION RADIO FEATURES, Chicago, has sold its quarter-hour *Jimmy Evans Football Forecast* effective Sept. 21 for 11 weeks to following sponsors: Black Eagle Oil; Milwaukee, on WEMP WIBU KFIZ WHBY WOSH WTAQ; Dixie distributors, Spartanburg, S. C.; Schlitz & Champaign Velvet on WORD; Clark Tire & Rubber Co., Monroe, La., on KNOE; Dumas Gidden Co., North Carolina Pure Oil distributors on WGBR; Fisk Tire & Rubber Co., Buffalo, on WEBR.

## Business Briefly

BAYUK SPORTS ● Bayuk Cigars Inc. Philadelphia, starts sportscasts Sept. 10 Mutual, Mon., Wed., Fri., 7:45-8 p.m. Agency, Ivey & Ellington, Philadelphia.

CIBA TO DURSTINE ● CIBA Pharmaceutical Products, Summit, N. J., manufacturer of ethical products for the medical profession, has appointed Roy S. Durstine Inc., N. Y., as agency, effective Jan. 1, 1946.

NEW SHADOW TIME ● Sponsored by Delaware, Lackawanna & Western Coal Co., New York, Grove Labs., St. Louis, and Carey Salt Co., Hutchinson, Kan., *The Shadow* returned to Mutual Sept. 9 as a 5-5:30 p.m. Sunday program and not 5:30-6 p.m. as originally scheduled.

SERUTAN DELAY ● First broadcast of new Mutual series of food commentaries by Victor H. Lindlahr, originally scheduled to start Sept. 10, has been postponed to Oct. 1, 11:45-12 noon, Monday-Friday. Sponsor is Serutan Co., Jersey City; Agency, Raymond Spector Co., N. Y.

SPONSORS "ACES" ● Stop and Shop Supermarkets, Boston, starting Sept. 17 will sponsor Monday through Friday, 10:30 p.m. on WNAC Easy Aces. Agency, Hirshon-Garfield.

MURINE ON 35 ● Murine Co., Chicago, is planning a test campaign for October and November using night chain breaks on about 35 station. Agency, BBDO, Chicago.

GOODRICH DRAMA ● B. F. Goodrich Co., Akron (tires) starting Oct. 4 will sponsor *Detect and Collect* on full American network, Thursdays 9:30-9:55 p.m. Agency, BBDO, New York.

IPANA RENEWS ● Bristol-Myers Co., New York (Ipana toothpaste), on Sept. 7 renewed for 52 weeks the *Alan Young Show* on 195 American stations, Tues. 8:30-9 p.m. Agency, Doherty, Clifford & Shenfield, New York.

CAMPBELL CONTINUES ● Campbell Soup Co., Camden (soups) on Sept. 9 renewed for 52 weeks *Request Performance* on full CBS network, Sun. 9-9:30 p.m. Agency, Ward Wheelock Co., New York.

## MOVE OF WATR TO SPRINGFIELD, MASS., ASKED

NEW station applications filed late Friday at the FCC include: New station asked by Harold Thomas, Waterbury, Conn., 1240 kc 250 w unlimited, to be considered with his application to move WATR Waterbury to Springfield, Mass., increase from 1 to 5 kw, install new transmitter and directional antenna; new station asked by News Publishing Co., Charlotte, N. C., 1400 kc 250 w unlimited; new station asked by Rupert W. Bradford and Harry F. Pihl, Bemidji, Minn., 1450 kc 250 w unlimited.

FM developmental station asked by Frank C. Carman, David G. Smith, Jack L. Powers and Grant R. Wrathall, d/b Utah Broadcasting & Television Co., Salt Lake City, 92.1-103.9 mc band 100 w special emission for FM. KGH I Little Rock asks CP to change from 1230 to 1240 and move transmitter and studio locally. KGLU Safford, Ariz., asks CP change from 1450 kc 250 w to 1480 kc 1 kw.

## Monday Named WWJ Day City of Detroit

EXECUTIVE OFFICE

August 13, 1945

As Mayor of Detroit, I am happy to designate Monday, August 20, as WWJ Day. On that date, Radio Station WWJ will complete 25 years of service, the first station in America to attain the quarter century mark.

Throughout its history, the operation of WWJ has been characterized by a devotion to the public good and by ideals so high as to have given every Detroitier a feeling of pride and satisfaction in the record and achievements of the world's oldest commercial broadcasting station.

Radio exemplifies one of our most cherished liberties, the freedom of speech, and I am certain that all of our people, including the other splendid radio stations in Detroit, will join with me in paying this fitting tribute to Detroit's First Station.

*Edward J. Jeffries*  
Mayor

"Heartiest congratulations to WWJ on its 25th birthday. The United Press is proud to have been associated with you."

MIMS THOMASON  
of the United Press

"25 years ago today, on August 20, 1920, Radio Station WWJ (then 8MK) of Detroit, broadcast its first program, and has been operating on a daily schedule since that time."

Hour of Charm Program  
over NBC Aug. 19, 1945

"Yesterday WWJ was given a nation's homage. My home station, from where I made my first broadcast in 1922, was celebrating its 25th Anniversary. Gosh how time does fly."

FRED WARING  
Director Waring's Pennsylvanians

"May I be among your well wishers on the occasion of the 25th anniversary of Radio Station WWJ."

EASTON WOOLLEY  
Director of Station Relations, NBC

# WWJ'S PRIMACY

Left—  
CAPT. EDDIE  
RICKENBACKER

Right—  
ROBERT ST. JOHN  
War Correspondent

"I feel I am part of WWJ for the past 25 years, having been on its original broadcast."

CAPT. EDDIE RICKENBACKER

"25 years of successful broadcasting and outstanding accomplishments serving the public interest . . . an achievement of great value and a credit to the entire radio industry."

E. W. EVANS  
President The Billboard

"WWJ is celebrating its 25th birthday today and I want to join with radio people all over the world in sending my congratulations. It would take me a half an hour to tell you all the firsts that that station has to its credit. WWJ pioneered the way back in the days when radio receivers were little cardboard boxes which brought in sound by virtue of a little tiny piece of crystal. Today it is one of the greatest stations in all the world. I wish I were in Detroit celebrating with them."

Broadcast by Robert St. John  
over NBC, Monday, Aug. 20, 1945

## Feature of the Week

ONE OF the great and unexpected revelations of a single radio station's achievement to come out of this war is the story of how the Saipan station, KSAI—built by the OWI using a Western Electric 50 kw transmitter—saved 20 of the B-29 superfortresses crippled over Japan, the lives of more than 200 fliers, and property worth more than \$15,000,000.

In September, 1944 it was decided to put up a station on the newly won Saipan, powerful enough to reach the Japanese people by medium wave.

James O. Weldon, chief of the OWI Bureau of Communications Facilities, and five members of his staff went to Saipan in November, 1944 to construct the station. They started installation on November 20, and 31 days later after working day and night, assisted by Army engineers, and Signal Corps men, the station was ready.

It operated on 1010 kc and consisted of four directional antennas which gave a 250 kw effective signal toward Japan, but there was still a question as to whether such a signal could reach the great Japanese population centers effectively. However, two occurrences almost immediately answered the question. Twenty minutes after the Saipan radio went on the air, the Japs tried to jam it. The next evening Tokyo radio advised listeners to turn off their radios, go to bed early and conserve their strength.

Then OWI engineers received a request from the B-29 Bomber Command stationed on Saipan that the transmitter be left on 24 hours a day for four days so that the bombers could check the signal.

Two days later an urgent order was received: "Keep that transmitter on twenty-four hours a day permanently from now on!" The story came out. A crippled, lost plane, its navigating equipment smashed, had picked up the Saipan signal so clearly that by using its radio compass it was able to ride in on the beam to its base. Some weeks later, four B-29's were saved in one week by following this beam.

Within four months the station was credited with saving more than 20 superforts.

The station had been rebroadcasting OWI psychological warfare material relayed from KRHO Honolulu, operating from 6 to midnight Japanese time skywave coverage. To keep on the air during the day for aerial navigation in accordance with the Bomber Command's orders, it rebroadcast at all other times troop shows and musical programs of the AFRS.

From checks both by the bombers and by warships in the Japanese area, it is now known that KSAI easily rivaled the Tokyo radio. Thus, psychological warfare men could be sure the Japanese man in the street was being reached with such important information as the Potsdam unconditional surrender ultimatum which went out from Saipan, the warnings to specified Japanese cities of their impending destruction, and the recent historic development of the atomic bomb.

On the authority of Capt. Paul Bosse, AFG Saipan, requests for "position" from homing B-29's were reduced from an average of 140 a day down to an average of 20 per day as soon as KSAI went on the air 24 hours a day.

## Sellers of Sales

**A** FOUR-POINT program is considered by Leonard Gessner, radio director of Fitzgerald Adv. Agency, New Orleans, in buying time for a successful radio campaign.

He reasons that a successful campaign requires a lot more than just clever copy or a jingle or even a program. "You've got to broadcast when there are enough people listening to your station to make it worthwhile," he declares, "and you've got to broadcast often enough to really drive home your message."

On the basis of this he considers: 1, geographic coverage; 2, audience availability; 3, listening habits; 4, frequency of impact.

Leonard was born in New Orleans, March 1901. He went to Tulane U., graduating in 1921 with a BBA. He has been in advertising since 1925 and with Fitzgerald since 1929.

LEONARD

Married in June 1926 to Natalie Guthrie, Leonard has two children, Natalie, 16 and Len, 14. He is a member of the American Marketing Assn. and the Stratford Club of New Orleans.

Principal accounts which he handles are: Blue Plate Foods Inc., Dixie Brewing Co., Godchaux Sugar Inc., Louisiana Power & Light Co., New Orleans Item, Pan American Petroleum Corp., Valvoline Oil Co., WWL New Orleans, Wembly Inc., Wesson Oil & Snowdrift Sales Co.

To WSAI  
on its first  
birthday

So you think a one-year-old is a little young to smoke a big black seegar? Not WSAI! For, even though today is our first birthday, we're almost as old as radio itself.

Just one year ago today, we gained the right to place after our call letters four all-important words . . . four words that stand for significant community service . . . four words that give added meaning to that phrase in our license, "in the public interest".

Those four words are "A MARSHALL FIELD STATION".

So here's thanks to all those advertisers and agencies who have helped to make this, the first year under the Marshall Field banner, one of the most successful periods in our 23-year history!

**WSAI**

# A BROADCASTER COMMENTS ON NEWS COVERAGE...

"As you know, WIND broadcasts the news 51 times daily — probably the heaviest newscast schedule in America. In order to produce this 24-hour news output, our news room receives all three news services.

"On the basis of our experience, we want you to know that we regard AP as a 'must' service. The name Associated Press means much to our listeners, and to us. We have found during the past three years that we can rely on AP to supply what we need when we need it. It makes no difference whether it is a story of world-shaking proportions or only news of local interest.

"They all are important to us, and to our listeners, and we get them all fast and straight on the AP news wire. The program material you send is a big help in the preparation of other special WIND shows. Service has been good."

**Ralph L. Atlass**  
*President*  
*Radio Station WIND, Chicago, Ill.*

## The Key To Three Cities!

● Albany, Troy, Schenectady are one vital market which can be yours—delivered by WTRY.

These three cities, while separate entities, actually form one major market. They are geographically close, alike in their thinking and in their buying habits. Most important, they are covered by one radio

station doing the job of three—doing it thoroughly and economically.

WTRY's strong signal, plus its influence and prestige, assure you a wide listenership in all three cities. No other medium can deliver so much—and at so little cost. Yes, three cities—and the key to all three is WTRY.

Basic Blue Network • 980—Middle of the Dial—980 • Representative: Paul H. Raymer Company

**WTRY, Albany-Troy-Schenectady** • Associated with WSYR, WKNE, WELL

**“We’ve got to screen-out the women.  
Sit there and give me your reactions!”**

● One of the wonderful things about spot broadcasting is that you can select your audience, and save the cost of dead-head listeners! Men, women, children, young people or old, rural or urban—whatever group *buys* your product, that’s the group you can get!

Not only that, but there’s the added possibility of directing your sales appeal exactly to the geographical sections where it’s most needed for better business.

How about giving spot broadcasting *your* consideration? We’d like to talk with you about it.

## FCC Urges Bids on Station Transfers

### Price Also Factor, Declares Avco Decision

By JACK LEVY

MAINTAINING that its present transfer procedure is deficient, the FCC last week, in making public its 4-3 decision approving the sale of the Crosley radio properties to Avco, proposed a 7-point plan whereby the Commission would have "some real voice" in future changes of station ownership.

A public hearing will be held at an early date, the Commission announced, to consider procedures within the framework of the plan which, if adopted, would apply to all transfer applications filed after Sept. 6. A "completely satisfactory procedure", which would include ceilings under which stations could be sold and determine the extent to which large financial interests should be permitted to control stations, will be recommended to Congress.

The Commission also served notice that it will consider no further applications, such as the Crosley-Avco transfer, in which broadcasting facilities are lumped with other assets unless separate price is agreed upon for stations involved.

The plan offered by the Commission, included in the majority opinion concurred in by Chairman Porter and Commissioners Jett, Denny and Wills, would provide all interested parties an opportunity to apply for licenses of stations offered for sale. It would enable the Commission to grant the transfer to

A 60-day period would be given following the receipt of an application for other interested persons to compete and if no other bids were filed the original application would be considered on its merits. If otherwise received, all would be considered on their merits.

The plan would not apply to

the person he selected under the terms and conditions specified in his contract, or he sells to another person on the same terms.

"However, if he is unwilling to sell on the same terms and under the same conditions to another person, whom the Commission believes is better qualified, then the transferor need not sell at all. The only change which this procedure will cause is giving the Commission some real voice in the selection of a proper successor."

#### Basic Infirmity

While approving the transfer of the Crosley properties, the majority opinion noted that "grave questions of public policy" were involved. "To deny this application," it declared, "would reverse 17 years of precedent and establish new policies." The majority was therefore "persuaded to grant the application and then consider the promulgation of a uniform rule for future transfer cases, buttressed by Congressional clarification of certain questions where our power is not specific."

The present case, the opinion asserted, highlights "a basic infirmity" of the Communications Act in that it permits a man retiring from the radio business to select his successor. Under such power, it declared, the seller may be influ-

(Continued on page 81)

#### IN ITS 45-PAGE CROSLY-AVCO DECISION, THE FCC:

- (1) Seeks Congressional action empowering it to exercise jurisdiction over prices in transfer of stations.
- (2) Proposes new procedure in transfers which would open offerings to all comers—with the transferee to be selected by the Commission on the basis of his ability to perform.
- (3) Decides to await Congressional action on (1) and hold open hearing on (2).

the applicant best qualified to operate the station in the public interest.

It provides that the Commission and the applicant publish the terms and conditions of the proposed sale of a station, the name of the prospective purchaser, and the conditions of the sale. Other persons would be invited to apply for the station on the same terms and the Commission would consider all applications on their merits, with selection of transferee determined on the basis of public interest.

transfer of less than a controlling interest in a station nor in cases where transfer involves no real change in control.

#### Carries Out Intent

Such a procedure, the opinion declared, "will more adequately enable the Commission to carry out the Congressional intent that the best qualified person be licensed for each available frequency. No harm will result to the transferor since he either sells his station to

## FM Applicants Must File Data by Oct. 7

(Text of FCC Announcement page 40)

THE FCC will begin the processing of approximately 500 applications for new FM stations in four weeks.

Announcing its policy for assignment of frequencies to existing FM licensees, to holders of outstanding construction permits, and to pending applicants, the Commission last Tuesday asked prospective owners of new stations to file all necessary data before Oct. 7.

Receipt of this information, it stated, will enable it to make as many grants after that date "as would be consistent with the availability of frequencies and other public interested factors".

The Commission further stated it recognizes the difficulty which may be encountered in submitting

complete engineering data by Oct. 7 and that it therefore "contemplates the granting of a substantial number of FM applications conditionally", subject to later submittal of the desired information.

#### Soon Assign Frequencies

With regard to the 46 existing FM licensees, the Commission disclosed it would soon assign new frequencies to bring these stations into the 92-108 mc band and will require that regular programs on the new assignments begin no later than Jan. 1, 1946. Licensees will be given until Sept. 20 to file objections to the new assignments.

The Commission was making every effort to have the new assignments ready for present licensees by the end of last week, so that ample time would be afforded

for filing objections. These assignments were to include seven holders of outstanding construction permits, making a total of 53.

Modified construction permits will be issued shortly to these seven holders together with the assigned frequency but, as in the case of existing licensees, the Commission will permit operation with less than the power specified in the assignment until materials and equipment are available. Feb. 1 was set as the deadline for commencement of regular broadcasting operations by this group of seven and Jan. 1 for initiation of equipment tests.

Simultaneously with its policy announcement, the Commission sent letters to applicants, licensees and CP holders requesting desired information. In these letters, the Commission recognized difficulties

attendant upon the problem of obtaining equipment. It told existing FM stations they could continue to operate on their present assignments "until such time as it appears that receivers for the new band are generally available to the public and owners of existing receivers have had the opportunity to adapt or convert them to the new band."

#### Terminate Dual Operation

It pointed out, however, that when receivers and converters are available for the new frequencies, "dual operation will be terminated".

Referring to its notice of Aug. 7 [BROADCASTING, Aug. 13] setting forth a 60-day period for filing and processing of new applications, the

(Continued on page 76)

# FCC Dismisses Charge Against WDSU With Stern Reminder

WITH A STERN reminder that a radio station "is not an instrumentality to be used for his [the licensee's] personal political advancement", the FCC last week dismissed proceedings instituted against WDSU New Orleans as a result of a complaint filed by Sen. John H. Overton (D-La.). The Commission served notice, however, that the record in the case is "subject to further review" when renewal time arrives.

Mr. Overton had charged the station with refusal to grant him "equal opportunities" for political broadcasts during his campaign

IN ITS first proceeding for alleged violation of Section 315 of the Communications Act, the FCC dismissed a complaint against WDSU New Orleans but issued a strong admonition that stations are not instrumentalities for giving advantage to one political candidate.

for renomination at the primary in Louisiana a year ago that given one of his opponents, E. A. Stephens, majority owner of Stephens Broadcasting Co., licensee of WDSU. A hearing on the complaint was held last March before Norman S. Case, former commissioner [BROADCASTING, April 2].

## Some-Overton Claims Upheld

In an Opinion and Order on the complaint (Docket No. 6740; B-212), the Commission upheld claims of Sen. Overton that he had not been offered the choice time granted to Mr. Stephens who had made his broadcasts at 7:45 p.m. on weekdays. The Senator had been offered time after 10:35 p.m. on these days, Saturday evenings and Sunday afternoons.

The Commission refused to accept the defense of WDSU that it had met the obligations imposed by Section 315 of the Communications Act of 1934 by offering the same amount of time to each candidate. Pointing out that this provision requires stations to afford "equal opportunities" to opposing candidates for public office, the Commission declared that "the meaning of this term is not to be arrived at by the application of narrow, legalistic notions.

"The obligation imposed upon a licensee by this provision," it held, "is not discharged merely by offering the same amount of time to each candidate. Quantity alone is not the sole determining factor, for it is a matter of common knowledge that the size of a station's potential audience, an important consideration in political broadcasts, is much larger during the early evening hours than in other portions of the broadcast day."

The advantage of the early evening hours, the Commission con-

tinued, is borne out by WDSU rate schedules which, along with other stations, prescribe their highest rates for periods between 6 p.m. and 10 or 10:30 p.m. "Consequently . . . it cannot be said, and respondents do not seriously so contend, that their offer to make available to Sen. Overton time after 10:35 p.m. represents a satisfactory ful-

"Still more applications for FM Stations!"

# Porter Reaffirms Belief in U.S. Broadcasting and Lists Abuses

CONTINUING what seems to be a concerted drive to clean up the "plug-uglies" and other objectionable matter in radio fare, Paul A. Porter, FCC chairman, in an article in the October issue of *American* magazine reaffirms his belief in the oft-abused "American system of broadcasting" and its inherent qualities while urging the industry to revise its standards.

Opening his article with instances of bad reaction to commercials on the part of acquaintances and writers, Mr. Porter points out that listeners either develop a dead ear to objectionable commercials or worse, not having this faculty, become insensed. He insists on equality of press and radio but refutes "professional radio apologists" in their "misguided analogy" between the two. A reader can reject an advertisement, he declares, in a split second glance whereas the listener cannot so easily turn off his set.

Constructively, Mr. Porter poses two questions. "First: What kind of limitations, if any, should be placed, and by whom, on radio commercials which seem to a large section of the listening public to be too long and repetitious, or of-

## Porter Speaker

PAUL A. PORTER, chairman of FCC, will be principal speaker on the Associated Broadcasting Company's network inaugural ceremonies, Sept. 17. The two hour program, scheduled for 2 to 4 p.m., will originate from the studios of WWDC Washington under the supervision of Ira Walsch, program director.

# Associated Group In First Meeting

## Program Structure, Sales and Promotion Are Discussed

ASSOCIATED BROADCASTING Corp. held its first station affiliate meeting at the network's Grand Rapids, Mich., headquarters Sept. 7-9, with discussion centered on program structure as well as sales and promotional plans.

Officials of Associated affiliates expected to attend include: R. E. Embry, WLEE Richmond, Va., and WITH Baltimore; Howard Johnson, KNAK Salt Lake City; L. W. McDowell, KFOX Long Beach; Helen Mobberly and Ira Walsh, WWDC Washington; Edward Hoffman, WMIN Minneapolis; Roy Albertson, WBNY Buffalo; A. G. Meyer and F. W. Meyer, KMYR Denver; James Hopkins, WJBK Detroit; Myles Johns and Michael Henry, WTMV E. St. Louis; Ken Church, WCKY Cincinnati; W. S. Pote, Fred Randy, Larry Flynn, WMEX Boston; and Jerry Akers, KSAN San Francisco.

Key personnel of Associated has been announced by Leonard A. Versluis, president.

Assisting Mr. Versluis, who owns WLAV Grand Rapids, and was instrumental in forming the Wolverine network, will be Roy C. Kelley as executive vice-president. Mr. Kelley is also president of the Wolverine network and will co-ordinate sales activities of the new network's N. Y., Chicago and Hollywood offices.

Working as personal assistant to Mr. Versluis is Richard F. Connor, vice-president, who formerly was station relations director of Mutual. Mr. Connor will concentrate on network programming, with emphasis on public service features, news, sports and music.

Clayton W. Kunning, vice-president and general manager, is new to radio but has had an extensive banking career in New York and the midwest. Vice-president in charge of station relations is William G. Henderson.

Eastern Division headquarters, located at 1721 Chanin building, New York, is headed by John Whitmore, former news director of Mutual, who will have charge of the network's eastern activities. Sales manager for the New York branch is Ed Pancoast, formerly of WINS New York sales staff.

Midwest division office, at 360 N. Michigan, is headed by John Hopkinson, as sales manager.

West coast operations will be supervised by Van C. Newkirk, vice-president and western division manager, with offices at 3055 Wilshire boulevard, Los Angeles. Mr. Newkirk was formerly program director for Don Lee-Mutual. Western sales manager is Gene W. Lee, former co-owner and manager of KFXM San Bernardino, Calif.

Mary Ellen Ryan, formerly of Don Lee Broadcasting System, is traffic manager and will also handle publicity for the West Coast.

# Military Delays Surrender Broadcast

## Technical, Censorship Problems Cause Cancellation

OFFICIAL surrender of Japan was brought to the world the night of Sept. 1 when a delayed pool broadcast carried the story of the proceedings aboard the USS *Missouri* in Tokyo Bay.

Original plan for the broadcast called for live pickup from the *Missouri*, which has a 3 kw transmitter used many times for direct broadcast to San Francisco. Because of technical and censorship problems decision was made by the military to delay the broadcast an hour-and-a-half, with President Truman picked up live from Washington between signing of the peace document and speeches by Gen. MacArthur and Adm. Nimitz.

### Pool Narrators

As the ceremonies took place Merrill Mueller of NBC and Webley Edwards of CBS served as pool narrators. Mueller was chosen from correspondents attached to Gen. MacArthur's staff, Edwards from Adm. Nimitz' staff. Public relations officers made the selections, instead of using the lot-drawing procedure.

Execution of the broadcast setup was under direction of Gen. Diller and Lt. Col. Jack Harris, of MacArthur's staff, and Capt. Fitzhugh Lee and Lt. Monroe of Nimitz' staff. Proceedings took place on the veranda deck of the *Missouri*, with Mueller and Edwards speaking from an anti-aircraft gun mounting, behind and above the Allied signatories and facing the Japanese.

According to Mueller, Comdr. Don Thompson, radio officer for Adm. Nimitz, and Lt. Bruce Dennis, both at Guam, drew plans for transmission facilities. Lt. Munroe, stationed on the communications ship USS *Ancon*, executed the plan. Aiding also were Lt. George Zachary and Lt. Chick Morris, radio officers; Radioman Hank Cavell and Radioman Russell Anderson, of the Navy; Fred Haake, recorder, of Chicago; Radioman Walter Hench and Maj. Untermeyer of the Army.

Two sets of recordings were made, on acetate disc and Armour No. 50 magnetic wire recorders. The discs were sent by a destroyer to Lt. Col. Harris, who had taken over Radio Tokyo's transmitter. The wire recorders were sent via small boat to the *Ancon*, where the wire was rewound on the original recorders.

In all, 17 frequencies were set aside. Signal selected by RCA San

(Continued on page 79)

RADIO TRIO ready to land at Yokosuka Naval Base just off Tokyo are (l to r): George Folster, NBC; Webley Edwards, CBS (who took part in surrender pool broadcast); Larry Tighe, American. They are aboard a troop transport.

## BMB Meeting to Consider Net Plan, Coverage Terms Changes

TWO major proposals will come before the board of directors of Broadcast Measurement Bureau when it holds its regular fall meeting in New York on Friday. One is for the elimination of reporting primary, secondary and tertiary coverage of stations in the BMB reports and confining them to station circulation and percentage of circulation figures. The other is for a network participation plan which would permit networks to become BMB subscribers in order to receive data on network circulation. It is considered likely that both will be adopted by the board.

Suggestion that the primary, secondary and tertiary coverage terms be abandoned was first made last April by a group of Chicago Broadcasters. The arbitrary setting of 50% coverage or better as primary, 25% to 50% as secondary and 10% to 25% as tertiary has evoked much criticism which was ably set forth by D. H. Denenholz of the Katz Agency in an article in the Sept. 3 issue of BROADCASTING.

### Copies Sent Members

D. E. Robinson, vice-president in charge of research of Sherman K. Ellis & Co. and chairman of the BMB board committee on research, last week sent to all BMB board members copies of the letter of the Chicago broadcasters and of Mr. Denenholz's article, together with copies of the resolution unanimously adopted by the BMB technical research committee at its

meeting Aug. 29. Resolution points out the committee's conclusion that "the figures of radio families, percentage circulation and station circulation are of transcendent importance" and recommends that the BMB reports be confined to those data "without further stipulation of circulation levels" and that "BMB adopt an official position discouraging the practice of presenting BMB figures in circulation levels."

Technical research committee also endorsed the development of network coverage data by BMB which would enable advertisers and agencies to have the same sort of single-basis information available for network circulations that BMB is already set up to provide for individual stations. Details of the network circulation plan have not been divulged but it presumably entails methods for elimination of duplicate coverage arising from individual family votes for two or more stations affiliated with the same network and for providing the networks with data on affiliates which are not individual subscribers to BMB.

J. Harold Ryan, NAB president and chairman of the BMB board, will preside at the session on Friday, first meeting of the board since May 3. Board will also hear the reports of Mr. Ryan on the actions of the executive committee, of which he is also chairman; Hugh Feltis, BMB president, on organi-

(Continued on page 80)

ALL IN A DAY  
Interference Problem Just  
Routine Stuff for FCC

ONE OF THOSE problems which either gives you gray hair or makes life very fascinating—depending on how you look at things—faced the FCC last week. It was, to put it mildly, somewhat "complicated". Try and follow us:

KOMA Oklahoma City (1520 on the dial) wanted to move down to 690. The reason: 1520 kc belongs to TGW Guatemala City under international agreement and it was raising hell with the State Dept. because of KOMA interference in its primary coverage area. Besides, KOMA's signal interferes with WKBW Buffalo which operates as a Class I-B station on 1520 kc with 50 kw power and a directional antenna to protect KOMA.

### KGGF Has 690

Now, it so happens that KGGF Coffeyville, Kan., operates on 690 kc and has no desire to change its location. Moreover, it wants to increase its nighttime power to cover a larger area. BUT, the present daytime operation of KGGF interferes with KFEQ St. Joseph, Mo., which has the adjacent frequency of 680 kc, and the present nighttime activities of KGGF interferes with CBF Montreal in violation of international agreement.

SO, here's what the Commission did: It directed that KOMA be issued a 6-months temporary authorization on its present frequency with only 500 w night, thus eliminating interference to the Guatemala station and reducing interference substantially to WKBW. But it left a way open for KOMA by making its denial of change in frequency "without prejudice", so that KOMA may file another application anytime within 12 months "looking toward the permanent solution of the interference problem". It incidentally suggested that "the proper use of the frequency 1520 requires the use of a directional antenna which will protect station TWG Guatemala and station WKBW".

### Solution Helps KFEQ

As for KGGF, the Commission permitted it to stay on 690 kc and will authorize it to move its transmitter to a new site, to install a directional antenna and to operate with 1 kw both day and night (it now uses only 500 w at night). This will substantially reduce interference to KFEQ, adding 50,000 population to its coverage area, and eliminate objectionable interference to CBF Montreal. It will also mean a gain of 125,000 potential listeners for KGGF in the daytime and approximately 33,000 listeners at night.

Ho Hum. Solomon wasn't so terribly smart.

# U. S. Mission Received by Pope Pius

## Pontiff Sees Radio Role In Reuniting World For Peace

(Special From Vatican City)

IN AN extraordinary half-hour audience granted the U. S. Broadcast Mission in Europe last Wednesday Pope Pius XII expressed gratitude to America and American radio for spreading the gospel of good and placed upon radio great responsibility for reuniting the world into a community of peaceful nations. His Holiness, speaking in English, personally greeted each member of the mission, then read a prepared statement taking cognizance of radio's influence in molding world opinion and contributing toward restoration of peace. He observed that radio is a force for evil as well as good and expressed hope it never would be used again as an implement of warfare.

"Like every human invention," the Pope said, "the radio can be used as an instrument of evil as well as good. It has been used, it is used, to disseminate calumnies, to mislead simple, uninformed folk, to disrupt peace within nations and between nations.

"This is an abuse of a gift of God, and it is for the responsible directors, as far as possible, to check and eliminate it.

"Let the good accomplished by the radio always outrun the evil, until the evil becomes weary and falls by the wayside. Is that too much to hope for? Certainly it is a noble goal, worthy of men's best efforts, and it is our fervent prayer."

Afterward with the group seated around his desk, the Pontiff talked informally about America and radio. He recalled that in 1936 he visited the United States, traveling coast-to-coast by plane. He asked about the ETO trip and the degree of damage to German cities, recall-

## Lance Will Arrange U. S. Program Exchange

(Special From Paris)

ROBERT LANCE, director of North American program services, Radio Diffusion Francaise, will visit the United States in November for a month or six weeks to establish program exchange arrangements, perhaps install studios in New York and hire American commentators for French overseas service from Paris headquarters. Relays are planned by shortwave and transcription, with possible adoption of American program methods. NAB President-designate Miller promised cooperation at an informal conference in Paris Thursday.

ing his long service in Munich and other German areas.

The Pope stressed the importance of Vatican station operations.

Previously the Rev. Father Filippo Soccozzi, director of the Vatican radio, had taken the group around the 12,000 w transmitter and shortwave station, used on an average of about six hours daily.

## Mission Returns

These are dispatches filed by BROADCASTING's publisher, Sol Taishoff, on the eve of the Broadcasting Mission's departure from Europe. The group was to depart from Paris, scheduled to arrive in the U. S. Saturday.

He said the Vatican needs bigger facilities. Present transmitter was contributed by Marconi 15 years ago.

Following the audience the Pon-

tiff presented each member with two rosaries and blessed them as well as their families, friends and co-workers. He also blessed rosaries and medals brought by individuals. Finally, he thanked America again as the premier nation. He agreed to pose for a picture at his desk with the group, a rare event.

Justice Justin Miller, Mission spokesman, thanked the Pontiff for the audience. Afterward he expressed the gratitude of the group and all the United States for the Pontiff's spiritual guidance. Franklin C. Gowen, secretary to Myron Taylor, ambassador to the Holy See, served as escort. He observed afterward that it was the first audience he had ever witnessed and the Pontiff thanked him for arranging the interesting session with radio friends from America. Audiences seldom last more than a few minutes. Mr. Gowen took the mission through the Vatican, St. Peters and other points.

# Italy Wants to Boost Commercial Radio

## Costs \$10 a Minute To Run Station In Italy

(Special From Rome)

Italy continues to operate a commercial broadcasting system but the nation's economic plight, with nothing to sell, has resulted in a lame structure with only two hours weekly sold on national networks. American Expeditionary Forces stations boast large Italian audiences.

Inspection by the U. S. Mission of Radio Roma and interviews with heads of networks revealed anxiety to boost commercial operation and improve programming. With Italy's industry virtually at a standstill few companies can afford advertising. Radio and press are relatively free in Italy in contrast to other European nations.

### Deficit of 600 Lira Minute

It costs 1,000 lira per minute (\$10) to operate Italian radio. The system realizes only 400 lira resulting in a deficit of 600 lira per minute. This includes set license fees as well as sale of time. In 1943 there were 1,860,000 receivers in Italy, half in Rome. Now it is estimated 40% are nonoperative due to scarcity of parts.

Italy has two networks, one keyed from Rome to a dozen southern stations, the other from Milan to northern stations. Whereas before the war there was a single network, now two structures are operated with different names. Schism exists and probably won't be healed until new elections.

Moreover Italy lost out on allocations but will make a strong bid for clear-channel facilities when European nations meet in London at the end of September to evolve new allocations. Mystery surrounds the conference called by the BBC. Radio Roma now operates 1,000 w but is installing a 100,000 w transmitter. It hasn't obtained steel for a new antenna, however. Station operates on 695 kc with a shortwave adjunct. Long-wave station is suffering serious interference from an adjacent channel on which Radio Andorra

U. S. Mission has found Radio Roma in the strange predicament of desiring to boost commercial operations—with nothing to sell. As Italian industry is at a standstill, only two hours weekly are now sold on the national networks. Broadcasters also understand that 75% of the civilian audience tunes in to American and British troop stations, in preference to their own.

and a Polish station operate.

Under Italian law stations can sell 10% of their time but not sponsor news. That practice developed under Mussolini and the notorious Virginio Gayda, the Duce's propaganda minister. Time then was sold only by Fascists. The law holds time open to all qualified companies. Present sponsors include companies which buy four quarter-hour programs and two half-hour programs on the southern network as well as local 30-second spots. Sponsors are mainly food companies and expensive restaurants. No information is avail-

**VIPS NOTES**  
Mission Flew 10,000 Miles  
In Month's Tour

(Special from Rome)  
ALTHOUGH official statistics are lacking, it is estimated the U. S. Broadcast Mission flew 10,000 miles in 75 hours during the month ETO tour. Clair McCullough, of Mason-Dixon Network, is official recorder. He is preparing final compilations.

Another Mission record was stairclimbing. Elevators are rare in Europe. Missioners climbed up and down staircases everywhere. It was hard on the legs but good on the waistline, with the result that few picked up weight despite voracious appetites and excellent food and wines.

In addition to 10,000 miles of air travel, the Mission went 1,500 by auto in special trips and travel to and from airports. In all the group made 20 plane landings. Ten countries and 33 cities or towns were covered by plane and auto.

Informal proposal by Col. Kirby to the escorting officer that the Vat-  
(Continued on page 78)

able in Rome on commercial operations of the northern network.

Radio Roma has a staff of 750, most of whom are said to be holdovers from the old regime with top personages under Mussolini removed. In the North sweeping changes are said to have been made. Chairman of Italy's radio board, Armando Rossini, attorney, has been in the post three months. Director of programs is Maestro Razzi, who preceded Rossini as chairman. Before the war the Italian system was known as EIAR but separated operations are now known as RAI which means Radio Audizioni Italiane for the South and RI or Radio d'Italia for the North.

### Industry at Standstill

Italian industry is at a standstill because Nazis stripped the country of almost all machinery. Stations and networks also were practically dismantled but Italians smuggled new tubes and other parts to restore minimum service, with Allied help.

Although time is sold, actual operating companies are government controlled through a holding company. Board of 12 is responsible to corporation stockholders but control is held by the government. No competition exists since the government has one station per city. However American and British maintain stations for soldiers in all important cities. It is claimed in Rome that the U. S. Army station has 75% of the civilian audience because the public likes our light music. It is admitted some Italian programs are

(Continued on page 78)

# Feed line

It takes just one 50 calibre machine gun on a P-51 Mustang Fighter to eat up all those bullets during one flight. The plane has six guns, so figure out for yourself how many slugs are tossed at an enemy plane. It would take 36 Air Force Armorers to carry all the ammunition.

Firepower. That's the stuff that wins wars. And it takes the same kind of power to sell goods.

If you've got something to sell in Baltimore, Maryland . . . W-I-T-H, the radio station, can and does deliver the "power" of more listeners for the lowest cost of any station in town.

Most time buyers know this . . . so this is just a reminder that W-I-T-H, the successful independent, is your safe bet in Baltimore.

And remember . . . Baltimore is the sixth largest city in the U. S. A.

# How Many Stations Will Markets Support?

## Retail Sales Are Proposed as Criterion

By DR. VICTOR J. ANDREW  
Andrew Co., Chicago

THE NUMBER of broadcast stations operating now in any one city is fundamentally limited by two factors. In the larger cities, the available frequencies limit the number. In small cities, the possible financial support usually determines whether there shall be a station. With the additional frequencies made available by FM, we may expect to see the economic factor becoming increasingly important. (A list of the possible number of metropolitan FM stations for cities in Area 1 where AM stations now are located may be found in the FCC preliminary report on rules and regulations governing FM [BROADCASTING, Aug. 27].—Ed. note.)

Statistics in the accompanying table have been prepared for all major cities of the United States in an attempt to find from broad underlying principles how many stations each city may be expected to support. Important local variations between cities and variations in cost of operating different broadcast stations have been disregarded in order to have sufficiently simple data to permit broad comparisons between various cities. Anyone concerned with a problem in an individual city ordinarily has available much more local information regarding the city than basic comparative information such as is presented here.

The first requirement is to find a yardstick to measure the ability of a city to support broadcast stations. The measure chosen is the retail sales of the city. The retail sales estimate for 1944, as published in the May 15, 1945 issue of *Sales Management* has been used.

The next step is to determine the amount of retail sales in dollars which is necessary to support one station. This has been done by analysis of the number of stations now existing. Thus the data presented has no absolute significance. It serves simply as a comparison between different cities.

The method of making the calculations is as follows. All cities containing one station were listed. This list of 464 cities is found to contain an equal number of cities with more and with less than 15 million dollars of retail sales per year. It is therefore assumed that the normal city supporting one station is a city with 15 million dollars of retail sales. Similarly, a normal of 65 million is found for supporting two stations, etc.

It is noticed that the retail sales increase much more rapidly than the number of stations. This may

be ascribed in part to (1) greater difficulty in finding frequencies in larger cities. (2) more money is required to support an average large city station than an average small city station. (3) the small

THE NUMBER of stations of all types it is economically feasible to establish is determined by Dr. Andrew on the basis of the retail sales volume of each city. The ratio of sales to station support is estimated by an analysis of the number of outlets now existing. No absolute significance is attributed to the results which are intended simply as a comparison between cities.

city station does have a poorer economic position than the large city station.

Examination of the accompanying data to determine which cities may support additional stations reveals that many of those which appear attractive are suburbs ad-

acent to large cities. If a frequency can be found which is available for the suburb, it usually can also be used in the large city. The greater economic attraction of the large city dictates that the frequency should be used there. The statistics here given may not indicate that the large city can support the station as well as the suburb. This is due to the fact that our standard for "support" varies with the size of the cities. The data here presented can be used only to compare cities of similar size. No statistics are needed to make comparisons between large and small cities. The economic advantage is always with the large city.

A closer examination of the statistics reveals that if a city has one less than the normal number of stations, those stations are in the top 20% of all stations in similar cities. If a city has one more than the normal number of stations, these are in the bottom 20%.

BORN in 1902, Dr. Andrew was graduated from Wooster College, Ohio, with a BS degree in 1926, won his MS in 1928 and Ph.D. in 1932. He worked

Dr. Andrew

with Prof. Arthur H. Compton at the U of Chicago on the cosmic ray and x-ray, accompanying him on an expedition to Pikes Peak in 1932. That same year he joined Westinghouse as engineer on radio

transmitters. There he invented a type of filament construction in use now in high voltage rectifier tubes. In 1935 he joined Doolittle & Falknor Co., Chicago, as chief engineer, founding his own company, specializing in antenna engineering and manufacturing, the following year.

# ALL NEWS IS GOOD NEWS ON WCOP

**WCOP**, as the Boston Cowles Station, puts special emphasis on good news. That means complete news and frequent news, smartly edited for radio alone.

**WCOP** news is complete in content. It's the only station in Boston with all three wire services — INS, UP and AP. WCOP gets all scoops, with a triple check on all questions, and a minimum of repetition.

**WCOP** news is complete in treatment. Five crack radio newsmen, headed by Ron Cochran, operate for WCOP one of the best equipped radio newsrooms in New England. Scripts are thoroughly edited *radio-wise*.

**WCOP** news is frequent. 12 newscasts every weekday and 5 on Sunday are making WCOP a news tradition in Boston.

**WCOP** local news is backed by top American news commentators and a tie-up with the world-famous CHRISTIAN SCIENCE MONITOR.

**WCOP** has a few choice news availabilities for sponsorship. Carefully presented news gets careful listenership — and so do adjoining commercials.

**SPECIAL AVAILABILITY NOW:** Daily 10-minute program direct from offices of CHRISTIAN SCIENCE MONITOR. Ten minutes of news and commentary by noted Monitor Staff member, followed by a WCOP local five-minute news period. May be sponsored complete, or each section is available separately.

**FOR RATES AND FULL INFORMATION** on this period and all other newscasts, see any Katz Office, or get in touch with Norbert O'Brien, Commercial Manager, Station WCOP, Boston.

## KMBC SEEKS STORY OF RADIO'S SERVICE

PERMANENT historical record of broadcasting's early days is planned by KMBC Kansas City, according to E. P. J. Shurick, promotion, press relations and merchandising director. Material will be obtained from reports submitted by broadcasters. All stations have now been asked to contribute outstanding examples of public service.

Information already received from 125 broadcasters has been mimeographed by KMBC, with broadcasters invited to comment. From additional material KMBC hopes to compile a reference manual which tells the complete story "of the most compelling force in our way of life during the past quarter-century—American Broadcasting."

## European Nations Girding for Struggle Of Superpower Broadcasting Stations

(Special From Luxembourg, Delayed)

A BATTLE of radio goliaths already is taking shape in Europe, with superpower stations in the standard broadcast band either on the air or in the blueprint stage.

Only lack of equipment has delayed the start of what may become an angry conflict among European nations to dominate the political and social thought of Europe. Britain and Russia at present have the loudest radio voices, but all nations, large and small, aspire to be heard and have or are prepared to order transmitters of 100,000 to 800,000 w (the U. S. maximum is 50,000 w).

When the war began six years ago broadcast allocations agreed to at the Lucerne Conference in 1933

were jettisoned. England, Germany and Russia preempted the frequencies of smaller sovereign nations and loaded them with power and beamed signals.

Radio Luxembourg, turned over to SHAEF by the Grand Duchy and since VE Day operated by the Army's Information Control Division, successor to Psychological Warfare Division, shifted frequency to 232 kc, a longwave clear channel otherwise assigned. It uses power of 135,000 to 150,000 w.

But while Radio Lux is a powerful station and is America's official voice, it is a midget in contrast to the outputs of British and Russian stations. Best information is that the BBC station at Drotwich uses 800,000 w, while at Moscow a 750,000 w station is reported operating

### Credit Line

LUXEMBOURG — "When surrendering, please mention the station to which you are listening." That was the credit line the staff of Radio Luxembourg proposed to Lt. Col. Samuel R. Rosenbaum, former head of WFIL Philadelphia, commanding officer of the SHAEF station prior to V-E Day. While never used on the air, many of the surrendering krauts said they followed the station's advice.

on 620 kc. That frequency is allocated to Radio Brussels, which is operating a 15,000-watter on it, but proposes to install a 100,000 w station on that channel and a second 100,000-watter for 932 kc as soon as it can get the equipment.

Stockholm is said to be about ready to begin operation of a 750,000 w station in the longwave band, while Radio France is known to be planning at least one 400,000-watter.

BBC, which more and more dominates the continental radio scene, already has urged prompt holding of a conference of European nations to settle allocations. While FM and television are being considered, the longwaves which can use superpower are the most coveted.

Whether the United States will remain in the European radio picture indefinitely is uncertain. OWI for weeks had been trying to enter an agreement with the Grand Duchy for continued operation of Radio Luxembourg, but under civil rather than military auspices. This was prior to transfer of OWI functions to the State Dept. The station, formerly operated by a commercial syndicate with signals beamed to Great Britain, much to BBC's chagrin, soon will be relinquished by the Army's ICD. Plans already are under way to move the operations close to the American headquarters at Frankfurt.

#### Nazi Portable Outfit

A 100,000 w Nazi transmitter installed in a series of railroad cars, complete with studios, has been captured and now is near Frankfurt. As soon as adequate housing facilities are provided, the station will begin operation as the successor to Radio Luxembourg, as far as the Army is concerned. Lt. Col. Samuel R. Rosenbaum, now commanding Radio Luxembourg, has already finished blueprinting the new operation.

Even if the United States does not take over Radio Luxembourg on a leasehold basis, there is the possibility that arrangements will be made with some other smaller sovereignty or republic for broadcasting rights. Longwaves to supplement the shortwave transmissions are regarded as highly desirable at this stage.

# THE VICTORY LOAN

October 29-December 8

For radio's last great drive effort, the Victory Loan, the Treasury is now preparing a group of transcribed programs which will be the finest ever offered the broadcast industry: *New Treasury Salutes* • *Hedda Hopper's Diary* • *New Music for Millions* • *Sing for Victory* • *Sports Personalities*. ALSO: 9 Packets of live announcements. NEW SONGS • NEW STORIES • NEW MATERIAL FOR EVERYTHING FROM STATION BREAKS TO FULL PROGRAMS. And ALL available for local sponsorship!

Full details soon by mail from Radio Section, War Finance Division

This space donated to the U. S. Treasury by station **WBIG**, Greensboro, North Carolina.

# Well Placed

A well placed pass, straight to the receiver, is like a well placed advertisement. Both bring results.

Advertising is Well Placed on WSPD—the 5,000 watt, NBC station which covers the rich Northwestern Ohio-Southern Michigan area—the home of one and one-half million prosperous prospects.

# Daily Serials—Listened to and Liked

## Columbus Women Tell WBNS When and Why They Tune In

By HELEN R. BITTERMAN

WBNS Columbus Sales Representative IS THE American woman who listens to "soap opera" neurotic? No—if we may judge from a thousand women in Columbus, O.

Between October 1944, and May 1945, I talked to 1,023 women in groups of from 17 to 150. More important, they talked back. They were all women whose husbands earned more than \$2,000. All had been at least to high school and many had been to college. Except for seventeen, they were all housewives. And over four-fifths of them listened to "soap operas"—and liked them.

The first group I talked to, a neighborhood group in the university district, started out by denying stoutly that they ever listened. But little by little, by asking questions about the plots of the 22 serials WBNS was carrying at the time, answers began to come. As soon as the women saw that their neighbors—perfectly respectable women—would stoop to listen to a "soap opera", they all broke down and "confessed".

I asked six questions of each group. And here are the results along with the questions:

"Do you listen to daytime serials?"

Out of 1,023 women, 939 did listen. The remaining 84 did not. Of the 84, 17 were professional women who were not at home during the day. The remaining 67 did not lis-

ten to serials at all. I asked these 67 what they did listen to during the day. Three didn't listen to the radio until their husbands came home in the evening. Sixty-four liked music. Thirty-four of the music lovers had small children in the home.

### Asked Why

"Why do you listen to daytime serials?"

They listen to the radio for company. By 9 o'clock in the morning, the house is empty. Mother has had time for a second cup of coffee and a glance at the morning newspaper. And then it is time for *Valiant Lady*, or its equivalent on another network.

Many women said they had portable radios which they carried about with them as they went.

ACCORDING to this sampling of Columbus women of the upper income and intellectual bracket, the "soap opera" listener is not a neurotic indulging in emotional escape from frustration but is just employing a substitute for normal human companionship not available at that time of day.

Others admitted frankly that they turned the radio up as loud as it would go so as to reach them as they worked. Only 29 of the women said that they would come down to the radio to listen every day to a particular serial, and then turn the radio off and go about their jobs. Nine hundred and ten of them listen to the serials, one after another, in the morning hours.

The afternoon serials were a different story.

### Stay Home to Listen?

"Do you stay at home to listen to the radio instead of going about your social activities during the day?"

Only two women of the 1,023 said that they'd stay home, say, from the movies, or a shopping trip, to listen to an afternoon serial.

In other words, listening to radio is part of a regular pattern of daytime activity. The housework is over, say, by 1:30 p.m. And until 5 p.m., the Columbus housewife in the upper brackets is out marketing, or shopping, or calling, or going to the movies. At 5 p.m. she returns to get dinner—and on goes the radio again.

This pattern of listening is not confined to the 1,023 housewives I talked to. The WBNS Hooper ratings confirm it. There is a level of listening audience sustained from 9 a.m. to 11 a.m. At that time and until 1:30 p.m.—in other words, during the lunch period—the peak of daytime is reached. The level of listening then sinks gradually. At 5 p.m. it again climbs upward to the evening listening levels. The pattern of radio listening depends a great deal on the general pattern of household activity.

### Substitute for Company

This is a very different thing from using radio as an emotional escape from frustration. It is simply a substitution of one kind of human companionship for another.

"Would you prefer music to a daytime serial while doing your housework?"

Only 64 out of the 1,023 women (6%) said they would. Of these, 34 had small children.

"Why do you prefer a daytime serial to music?"

It was hard to get the women to explain this preference. If there is any one reason, it is that they like to listen to stories, which carry interest over from day to day, rather than to music.

"What kind of a daytime pro-

## CHUM, IN TORONTO, ON AIR IN OCTOBER

CHUM Toronto is expected to be on the air sometime in October, according to managing director Al Leary, formerly manager of CKCL Toronto. The station is one of the first in Canada to obtain its 1 kw equipment since lifting of the equipment freeze in the Dominion on Aug. 24. Northern Electric equipment is being used throughout. Transmitter is located on a 40-acre farm northeast of Toronto, and studios in the penthouse of the Hermant Bldg., Toronto.

Chief engineer is Aurel Boisvert, formerly of CKAC Montreal. A number of returned servicemen are on the staff including Sgt. Dick MacDougall, formerly of CKCL and CFRB Toronto, and Dunc Chisholm, RCAF, formerly heard on the Canadian Marconi Sunday network show *L for Lanky*. The station will have a large local news department.

## Touch of Home

STEALING a leaf from WIP Philadelphia in an attempt to induce nostalgia in our servicemen, Tokyo Rose, some returning GI's inform, used to play the musical number "Bluebird of Happiness" at the same time it is customarily heard on the WIP *Dawn Patrol*. The station, incidentally, some time ago thought the song had outlived its usefulness and tried to take it off the air. The clamor was so great it had to be returned and still is played three times each morning.

Because of Al Leary's popularity it is understood that member stations of the Western Assn. of Broadcasters are recording a feature program for use on the opening ceremonies of CHUM.

## Praise for KTUC

EFFORTS of a 250 w station to promote traffic safety have been singled out for praise by CBS in its "Listen" advertisement appearing in the *Atlantic Monthly*. The station, KTUC Tucson, Ariz., conducted a safety campaign for Pima County's bike-riders, found only four bikes out of 143 in acceptable condition, and awarded War Stamps to proud owners. Earlier, KTUC set up a brake-testing station outside its studio, inspected 23,958 cars. Of these 1,888 had faulty brakes, with 1,400 getting immediate attention. Pima County police and highway patrol officials cited the station's civic enterprise. CBS called it further proof that small stations have greater power than wattage in their listening area.

RAY INMAN, art director of Prairie Farmer and WLS Chicago, has resigned to become head of the art department for Burton Browne Adv., Chicago.

## WIRE RECORDERS

Postwar Models May Find

Wide Range of Uses

WITHIN a year present and future licensees of the Wire Recorder Development Corp. will be producing radio recorders for use in the home and industry, according to an article by Paul D. Hermann in the *Illinois Tech Engineer and Alumnus*. He predicts that the wire recorder will become an attractive and relatively inexpensive fixture and that professional recordings on wire, including vocal and instrumental music, lectures, extension courses and books, will be made available.

Simplicity of operation will make it easy even for a child to use the device, Mr. Hermann believes, for recording and replaying favorite radio programs. Equipped with a timing mechanism, the recorder could be set to start automatically at a given time and to shut off at the conclusion of a program without an operator being present, he points out.

### Value to Broadcaster

For the broadcaster, Mr. Hermann sees great potentialities for the recorder for on-the-spot descriptions of news events, shortened and edited on wire to fit any allotted program period. Such recordings "would enliven radio news broadcasts and rebroadcast of special events could be carried out more simply and economically", he asserts.

In the field of education, he visualizes the use of the wire recorder for complete courses in history or languages for either home study or tutoring. The device could also be used to record any number of educational features, either for direct broadcast or for distribution to schools and colleges.

Among the various designs considered for use of the Armour Magnetic Wire Sound Recorder, according to Mr. Hermann, is a pocket model upon which experimental work is now in progress. This unit is only 1 1/2" x 4" and weighs about three pounds. It can record for 66 minutes at a wire speed of 1 1/4 ft. per second but at present requires transfer of the spool to a larger model for reproduction.

In this model, Mr. Hermann believes, "both professionals and amateurs alike may find a device which will open up an entirely new field of candid reporting, comparable to the candid camera fad which raged a few years back. Capable of recording any conversation, either with or without the speaker's knowledge, such a model might revolutionize the entire field of reporting."

## Pa. Stations Lauded

STATIONS in Pennsylvania have been praised by G. Ruhland Rebmann Jr., State chairman of the State War Finance Committee, for their role in helping the State achieve second rank in Bond and Stamp purchases.

BEAUMONT HAS MONEY TO SPEND... NOW! -- LATER!

RICE

In money, RICE means over 2 1/2 million dollars annual intake in KFDM's area. This is another important segment in KFDM's 585 million dollar effective buying income market. And by using KFDM, you can really get results from this rich market.

## Monte Carlo Building Station; U. S. Officials Show Interest

### New 120,000 w Outlet May Be Used to Give U. S. Viewpoint to Countries on the Continent

(Special from Monte Carlo,  
Monaco)

THIS tiny principality on the Riviera just three miles square may become the new seat of European commercial radio, with the United States as possible lessee of time or of the station itself. New 120,000 w standard station is now under construction, to be ready in 18 months. It will be known as Radio Monte Carlo.

Construction is by a private company in which Monaco owns 6%. Controlling owners are French businessmen interested in commercial radio along the prewar lines of Radio Luxembourg and Normandie. To operate on 1086 kc, station will cover France, Italy, British Isles, Germany and North Africa, according to the owners. An antenna atop Agel Mountain, with sheer cliff rising 3,000 feet above the Mediterranean salt water, should provide phenomenal coverage.

#### Negotiate for Luxembourg

United States is now negotiating with the Duchy of Luxembourg for lease of Radio Luxembourg to continue as the American radio voice

#### Letter to the Editor

EDITOR, BROADCASTING:

I rather hesitate to give undue publicity to the "cancel-test" which, according to BROADCASTING of August 17 (page 85), is being adopted by one of the major networks to ascertain the popularity of certain of its shows; but I think this practice should be frowned upon by radio management before it develops to the stage where it will be frowned upon by the radio listener.

I agree that this is a positive test which involves a minimum expenditure of time and money, but certainly it is a negative procedure carried out at the expense of the listener!

Every station rightfully prides itself on its listener-loyalty which it has gained through hard work over a long period of time. Why should we not show the listeners the same loyalty that we expect of them?

Let's cancel the "cancel-test". The show MUST go on!

ARTHUR L. MARTIN,  
Program Director,  
WIZE Springfield

#### CBS Preview

CBS WILL BROADCAST "Panoramic Previews" of its fall and winter programs, 3-4:30 p.m., on Sept. 16 and 23, featuring the stars and personalities of the networks' outstanding shows. Norman Corwin will produce the first 90-minute program from New York; William Robson the second from Hollywood.

in Europe. Top American authorities interviewed by the U. S. Broadcast Mission in Europe have agreed this country must have medium-wave facilities lest the American viewpoint be smothered by propaganda of other nations.

Monaco officials are understood to have pledged cooperation and their station presumably is available for long-term block time sale contract.

Tentative plans have been worked out with OWI officials, known in Europe as U. S. Information Service. With OWI abolition, it is presumed the State Dept. will take over as official U. S. radio contact with Monte Carlo.

Present Monte Carlo station operates with only 300 w. Station formerly was 30,000 w but Germans stole the equipment in 1942. New studios being constructed include modern acoustics. Additional standard station and two short-wave stations of 25 kw each are being installed. New transmitters will be built under contract with Society French Radio Diffusion.

A former German company held the station in trust for the Prince of Monaco. New corporation is anonymous but stock is held by French or Monacans only. Station has no connection with ownership of the Monte Carlo Casino. Raymond Gaudry, local manager, said station has access to the best European talent bands at Riviera resorts and nearby Cannes and Nice.

General Manager Robert Schick, of Paris, is experienced in programming and sales. Present station operates six hours daily but the 120,000-watter will operate around the clock.

#### Life Membership

GOVERNOR Phil M. Donnelly of Missouri was presented with a Gold Membership Card, signifying life membership in the St. Louis Adv. Club, at a luncheon of about 350 leading men and women in the advertising field. KWK recorded the ceremonies and the governor's speech on wire and broadcast it.

#### New Gates Plant

GATES RADIO Co., Quincy, Ill., has acquired a new factory building to permit expanded production of broadcasting, communication, recording and industrial electronic apparatus. Gates has named Specialty Distributing Co., with offices in Atlanta, Chattanooga, Savannah and Macon to represent sales and engineering of Gates products in the Southeast. Houston Radio Supply Co., Houston, Tex., has been named distributor in Texas, Louisiana and Mississippi.

THESE

# American Radio for the GI's in Europe

## Continent System Hurdled Many Barriers

By SOL TAISHOFF  
(Special from Paris)

HOW 3,500,000 GI's in the European theatre have been fed radio fare a la American Plan was demonstrated here in Paris to the U. S. Broadcasting Mission by executives of American Forces Network — practically all ex-broadcasters.

Col. Hayes

Operating strictly along American lines, AFN has as its sponsors the various services of the Army, as well as other Government agencies. A "commercial department" handles the copy. Top domestic programs transcribed or produced by Armed Forces Radio Service are "decommercialized", with Army sponsors substituted.

### Improvised at First

The story was recounted to the mission of 15 plus a number of added starters by Lt. Col. John S. Hayes (ex-WOR production head), AFN chief and his top aides. It is a radio romance demonstrating

the ingenuity of American radio men in putting together a nearly continent-wide system of radio under almost insurmountable difficulties. At the start practically all of the equipment was improvised. It was put together with "hairpins, chewing gum and sweat", said one of the technical men with AFN.

Col. Hayes told the mission his staff of 30 officers and 300 men had "eaten, lived and slept" American radio since AFN's formation July 4, 1943. The 3,500,000 men in arms are about to be turned back to American broadcasters, still conditioned for radio the American way.

### AFN Will Continue

AFN will continue its operations in ETO as long as there's a GI left to listen, Col. Hayes said. The network once totaled 55 stations, including two 100,000-watt stations (Munich and Stuttgart). It broadcasts a 20-hour per day schedule. Of this 140-hour per week operation, 52 AFN hours are either shortwaved or transcribed by AFNS.

As demobilization goes forward, AFN operations will be curtailed. When redeployment activities are completed, a basic network of seven stations to serve American occupation troops in Germany will be maintained, including the two 100,000 w stations. Headquarters will be shifted from Paris to

Frankfort — Gen. Eisenhower's base.

Five of the seven stations in Germany will be tied together by landline—Frankfort, Munich, Stuttgart, Kassel and Bayreuth. Stations at Bremen and Berlin will pick up by shortwave for rebroadcast. In addition three stations are planned in Austria at Linz, Salzburg and Vienna. Of the original 51 stations, 28 are left.

How did AFN get longwave frequencies? It "borrowed" two channels without permission from Bulgaria, and took "a few" from Sweden, with "some" permission, said Col. Hayes.

Col. Hayes said BBC had been "terribly helpful" in clearing up frequencies for the initial operations in England and in expediting copyright clearance and other complications which arose in setting up this unique operation.

### Extra Audience of 5,000,000

He said surveys showed that at the peak AFN had 5,000,000 people listening to its programs, aside from the armed forces. It was this development which presumably forced BBC to introduce a "light" home program.

Operations of AFN were outlined by Lt. Hendrik Booraem Jr., U. S. Naval Reserve, chief of operations and former radio production executive of Young & Rubi-

cam. He explained AFN is a joint Army-Navy venture, but that the Navy was "late". Bremen operations are conducted by the Navy because of the preponderance of Navy personnel there.

Maj. Robert S. Light, program supervisor of AFN (former radio and screen freelance writer and producer), told how AFN surveyed its audience on program wants. The result was the current schedule of two hours of news a day in 24 broadcasts, plenty of music and a minimum of "talk". During actual combat, wire recorded reports were broadcast. Two men were killed in combat on such assignments. News is given straight, he said. Murders, strikes and rapes are kept off.

In the "sponsorship" end, Capt. Frank Danzig, chief of troop information section (formerly CBS promotion), related how the commercial department functions. For the Education & Information Branch of the Army, courses at the five specialist schools in ETO are "sold".

Sample spot announcements were performed. They were in the best commercial radio tradition. Other commodities sold are V-Mail, War Bonds, USO, Stars & Stripes, GI bill of rights, and—the most spectacular—the anti-venereal disease campaign. That is the now famed

## ELECTRONIC TELEVISION IS AN RCA DEVELOPMENT

This is the eighth in a series of advertisements showing that RCA engineers developed the basic essentials of the electronic television system — including tubes and circuits.

RCA built the first all-electronic television transmitters and receivers — the first commercial television station — established the first television relay system — presented the first electronic theatre television — was the first to televise a baseball game and a Broadway play; and was first to televise from an airplane.

RCA is, and will continue to be, the leader in practical, successful commercial television. You may expect the best of all kinds of television transmitting and receiving equipment from RCA.

BUY MORE WAR BONDS

## 8. THE RELAY TRANSMITTER

TELEVISION video signals (because of the wide band width they require) cannot be easily transmitted over ordinary telephone lines. They can, of course, be transmitted over coaxial lines or over short lengths of ordinary cable that have been specially equalized. Such lines are not usually available at remote pickup points, and therefore it is necessary to relay the signal back to the

main transmitter by means of a radio link circuit. Such a system was first used by RCA engineers. The first transmitter ever used for television relaying was built by RCA engineers. The one shown here was developed and manufactured before the war. Greatly improved designs will be available when the emergency is over and manufacturing resumes.

PLAQUES were awarded managers of Oklahoma City's four stations by Chamber of Commerce, Junior Division, for civic service. Receiving plaques were (1 to r) Ken Brown, KOMA; Matthew Bonebrake, KOCY; Gayle V. Grubb, WKY; Bob Enoch, KOTK.

## WOW Plea Denied

RIGHT to recover payments made to ASCAP after the passage in May 1937 of a Nebraska statute outlawing such organizations and forbidding them to do business in Nebraska, was denied the Woodmen of the World Life Insurance Society, licensee of WOW Omaha, by a State Supreme Court decision last month. The court held the station voluntarily made the payments with full knowledge of the facts and the litigation concerning the statute.

## Music Contracts

ASSOCIATED Music Publishers, New York, has made music licensing agreements with stations WLBC Muncie, KLO Ogden, KALL Salt Lake City, and WNAX Yankton. Music licenses have been extended with the following stations: KFAC KGY KOY KSLM KVOD WBAX WBML WBNS WBRK WCAR WCOL WCOU WCSH WENY WFEA WHAI WHBQ WHEC WHYN WJAG WLBZ WLLH WLNH WMPS WNLC WOOD WPAY WRDO WRNL WSAR WSPR WSYB WTAG WTHT.

## Pressing Problem

A STORY of an electric iron, a pair of pants, and a remote band broadcast on AFN Frankfurt came from the ETO this week. T/5 Lee Jaffe of Brooklyn, formerly an engineer with New York's municipal stations WNYC and WNYE, was preparing for a remote broadcast of a GI dance band when he discovered just before going on the air that the current in camp was 220 volts, when it should have been 110. Spying a soldier pressing his pants nearby with an electric iron, Jaffe grabbed the iron with a hurried explanation and used it to limit the voltage to the amplifier, cutting the power to 110 volts. While the GI stood around without his pants and generating an unrecorded voltage himself, Jaffe put on the broadcast. A number was especially dedicated to the soldier and his date that night and it is believed that relations are again harmonious.

## Election Campaign

THE CITY-WIDE Independent Citizens Committee for the election of William O'Dwyer as mayor, Lazarus Joseph as controller, and Vincent Impellitteri as president of City Council, has appointed Blaine Thompson Co., New York, to direct all its campaign advertising. Starting Sept. 15 through Nov. 6 radio spot and quarter-hour talks for the candidates will be sponsored by the committee.

## WOWO Thanked

APPRECIATION of the public service efforts of WOWO Fort Wayne was expressed recently in a letter from John V. Carton, manager of the Fort Wayne office of the War Manpower Commission, which read in part: "On many occasions, spot announcements by Station WOWO have aided us greatly in quickly obtaining key workers for vitally important war posts. It might interest you to know that some of the announcements carried by your station assisted in the recruitment of workers who were assigned to the making of the atomic bomb; and, therefore, you and your staff had a very definite part in forging the tremendous weapon which helped in bringing war to a sudden and dramatic end."

## Memorabilia

RELEASES sent from the San Francisco Conference by Dorothy Lewis, NAB director of listener activities, to women broadcasters at 425 stations have been placed in the Roosevelt Library at Hyde Park, as part of memorabilia of the United Nations Conference.

# How much mail can your station pull?

## FIND OUT

in this sensational Tom Mix Contest for Mutual Affiliated Stations.

## WIN

a \$500 War Bond or one of seven other War Bonds totaling \$1000.

## GET

national recognition for the selling power of your station!

An Equal Chance for every station!

Simple! Easy! No Elaborate Presentations

**HERE IS THE  
CONTEST**

The winner will be that TOM MIX Mutual Station which, from the period of October 1, 1945 to April 1, 1946, pulls the largest number of premium returns in proportion to the population of its primary listening area.

### CONTEST RULES

1. PREMIUM RETURNS shall be defined as bona fide requests from listeners by mail for premiums to be offered on the TOM MIX RALSTON STRAIGHT SHOOTERS PROGRAM only, during the period from October 1, 1945 to April 1, 1946.
2. POPULATION OF THE PRIMARY LISTENING AREA will be determined by and supplied to the research organization tabulating the results, by the individual Mutual stations. In the event of any failure to supply this population figure, the estimate of the Mutual Broadcasting System for that individual station will be used.
3. ALL PREMIUM RETURNS WILL BEAR INDIVIDUAL STATION CALL LETTERS, although addressed to a central mailing point. Therefore, mail will be credited to individual stations according to the call letters designated by the listening audience, rather than by postmarks on envelopes or by arbitrary geographic boundaries.
4. TABULATING will be done by a qualified research organization and your final station standing will be made available to you and the Mutual Network only in a confidential report.
5. IN CASE OF TIES duplicate prizes will be awarded.

**IMPORTANT!** In order to qualify for one of the eight prizes, promotion managers of the individual Mutual stations must show evidence of continuous promotional activities designed to build or increase the listening audience for the TOM MIX RALSTON STRAIGHT SHOOTERS program during the six months' period from October 1, 1945 to April 1, 1946. Any promotion manager, publicity director, or other individual employed by a Mutual network affiliated station, who has been entrusted by that station with the work of general program or merchandising promotion, is eligible to enter.

### WORD ENLARGES STUDIO QUARTERS

QUARTERS of WORD Spartanburg, S. C., are being enlarged and modernized with the entire staff and equipment, except the transmitter, being moved within the month to 290 E. Main St., Frank R. Knutti, station manager, announced.

The new space has been leased and renovations are already under way. Improvements will include soundproofing, painting, decorating and landscaping. About \$2,500 will be expended on the repairs.

"A homelike atmosphere" will be maintained in the studios and throughout the building, Mr. Knutti said, "in keeping with the current trend in urban radio stations".

### WGAR School

EIGHTH station to give practical radio newsroom experience to journalism teachers is WGAR Cleveland, in cooperation with the Council on Radio Journalism, and sponsored jointly by the NAB and the American Assn. of Schools and departments of journalism. "Professor of Internship is Ralph Worden, WGAR news director. Intern is Associate Professor Willis C. Tucker, U. of Ky.

### Durr Speaks Sept. 26

CLIFFORD J. DURR, FCC, will speak Sept. 26 on "Radio's Problem and Promise" at a two-day forum featuring "Tomorrow's Challenge," to be held at Christ Church, New York, Sept. 26 and 27.

### BOVINE STATIC

Noise Mars Demonstration  
—Of FM Fidelity—

WHAT happened to Walter Damm, FMBI president, and general manager of WMFM, Milwaukee's pioneer FM station, shouldn't happen to a calf.

During the recent FMBI board meeting at Milwaukee, Mr. Damm rose to show his colleagues a working example of fine FM broadcasting as exemplified by WMFM.

But the program was of a quality seldom heard on AM much less FM and Walter's face turned purple. Phoning the control room, he was told everything was fine.

The telephone company put a squad of eight trouble shooters on the job. They worked into the night and at 4 a.m. located the trouble—a soft spot where WMFM's cable goes underground. Digging, they found, resting snugly against the cable, the carcass of a very dead calf. A farmer, in burying the animal, had broken the cable covering with his shovel.

### Gaskill on WNBT

MAJ. ARTHUR L. GASKILL, first eyewitness of the surrender ceremonies aboard the U.S.S. *Missouri* to arrive in the United States, appeared on NBC's television station, WNBT New York, Sept. 6. Maj. Gaskill discussed the surrender proceedings and showed pictures of the first airborne landings in Japan and of the arrival of Gen. MacArthur in Yokohama.

**HELP YOURSELF TO A PIECE OF BIRTHDAY CAKE . . .** because it was you who made the first year of KSO under the new management such an outstanding success.

Just one year ago Kingsley H. Murphy became owner and George J. Higgins manager of KSO.

Since that time many interesting and outstanding changes have taken place at KSO—the biggest of which appeared on June 15th when KSO became the CBS outlet in Des Moines and brought to its listeners "The Biggest Show in Town".

Yes, we have completed a banner year with your co-operation. Many, many thanks from all of us here at KSO for your help in making our first year such an outstanding one.

## Compton Samples Serial Listeners

TO DETERMINE what listeners think of the serial dramas sponsored by its clients, Compton Adv. Inc., New York, is sending program evaluation reports to sample groups of listeners to each of its programs, starting with the Procter & Gamble serial, *Young Dr. Malone*, on CBS.

Divided into two sections: General opinion and detailed criticism, report under the first heading asks respondent to check on program's entertainment value, on program as compared with last year's program, on its moral and social values, on the listeners state of mind after listening and whether the advertising message is too long, sincere and in good taste.

Questions, which listener is asked to check yes or no, are: "Is story far-fetched and unbelievable?", "does the story remind you of happenings in your own life or in the lives of your friends?", "do characters solve their problems in such a way as to be helpful to the listener who may have similar problems?", do the characters appeal to you as real people?", "do you talk the program over with your family and friends?", "has your husband or any other male member of your family ever heard this program?", "do you think the radio story compares favorably with magazine fiction and current popular novels?", "do you feel that listening to this program is beneficial to you in your relations with your friends and family?", "in what way?", "what other daytime radio programs do you listen to regularly.", "have you any suggestions for improvement?"

\* \* \*

35,500,000 Hear Truman

President Truman's broadcast of Sept. 1, proclaiming Sept. 2 as V-J Day, was heard by more than 35,500,000 adult listeners, according to a survey made for CBS by C. E. Hooper Inc., which rated the talk at 46.8. The President's talk on the V-J Day broadcast to the Armed Forces rated 31.3, with an adult audience of 23,000,000. Neither approached the audience of the President's V-E Day broadcast on May 8, when he set a new daytime audience rating record of 64.1.

### 'Big Sister' Tops Canada

August daytime program popularity was led by the Canadian program *Soldier's Wife* with a rating of 14.4, according to Sept. 1 Elliott-Haynes ratings. *Big Sister* with a rating of 12.1 was second, followed by *Ma Perkins*, *Road of Life*, *Lucy Linton* (Canadian origination), *Pepper Young's Family* and *Woman of America*. Most popular French daytime program was *Jeunesse Doree* with a rating of 18.3, followed by *Vie de Famille*, *Quelles Nouvelles*, *La Rue Principale* and *Grande Soeur*.

RETAILING for \$100, this television set made by Viewtone Co., New York, has 5 x 7-inch image. Tuner is Rose Clare Leonard at Hearn's department store, New York. Screen can be viewed in normally lighted room.

## BOND TO BE KIRO FARM DIRECTOR

CHARLES A. BOND, acting chief of the Radio Service, Dept. of Agriculture, resigned last week to become farm director of KIRO Seattle. He will assume his new position shortly after Sept. 15, succeeding Kenneth Yeend who was recently promoted to program director.

Mr. Bond was at one time with KPQ Wenatchee, Wash., and was extension editor of Washington State College from 1935 to 1940. He has since been with the Dept. of Agriculture, the last two years with the Radio Service. He is the second official of the Department Service to enter the commercial radio field in the last four months, Wallace Kadderly, formerly chief of the Service, having resigned in May [BROADCASTING, May 28] to become farm director of KGW Portland, Ore.

## Sees TV Grocery Ads

FOLLOWING an investigation of television at DuMont television station WABD New York, Paul Sayres, New York food broker, predicted that television will play a substantial part in the merchandising of grocery products. Mr. Sayres stressed the flexibility of television with its combination of sound, sight, and movement, and pointed out that it gives the advertiser a chance to demonstrate his product in use by an advertising means that will reach hundreds of thousands within a few years. Consumer recognition is automatically created over a three sense range, he said.

## Beauty Contest

AMERICAN network filmed the Atlantic City Miss America contest of 1945 last week for televising, with broadcasts scheduled for Sept. 11, Sept. 14, Sept. 17, each of a half-hour's duration and emanating from WABD New York, WRGB Schenectady, and WPTZ Philadelphia, respectively.

# The Sky Was The Limit for **WGAN**

## HIGHLIGHTS !!!

Dick Bates, WGAN program director, broadcasts air view of "Surrender Night" in Portland, Maine.

Rode WGAN's fast Grumman amphibian, Harold Hersey, pilot, used station's portable shortwave equipment which was picked up and rebroadcast to thousands of listeners.

Program 8:50 to 9 P.M., evening of August 14th, caught nearly 100,000 people celebrating in Portland streets or in automobiles converging from all eastern Maine.

Plane circled South Portland over shipyards where glow from welders' torches showed workmen "still at it" . . . thence over fleet in harbor to northeast, back inland over roads bright with crawling car headlights.

Roared above Congress (main) Street, watching thousands of milling people, cars swinging around bonfires, Monument Square jammed with "ants".

Plane took off from and landed at Portland's big busy airport, 10 minutes from downtown city.

Program pleased and informed thousands upon thousands of stay-at-homers in 14 counties in Maine and one in New Hampshire as well as in thousands of traveling automobiles.

Another in a long line of characteristic WGAN public service broadcasts . . . planned in advance.

## ON "SURRENDER NIGHT" IN PORTLAND, MAINE

"Dick" Bates, WGAN program director and Harold Hersey, air pilot, plan route to be covered for WGAN "Surrender Night" broadcast from the air.

Dick Bates describing all he sees for his thousands of listeners.

Dick Bates really goes to town, broadcasting with head and shoulders in the plane's prop wash.

The WGAN Grumman amphibian interior looking toward pilot Hersey and commentator Bates over the shoulder of Warren Hamilton, WGAN technician.

## Text of FM Policy Announcement

### POLICY FOR PROCESSING FM APPLICATIONS:

Moving toward an expeditious processing of the large number of applications on file for new FM broadcast stations throughout the United States, and to effect procedures for shifting of existing FM stations to the new band of frequencies (92-108 mc) assigned to this service, the FCC today announced that it was sending letters to present holders of licenses and of construction permits and to pending applicants for new FM stations. The Commission announced that procedures relating to television, and developmental and non-commercial educational FM stations would be announced at an early date.

Three types of letters are being

sent to FM licensees, permittees and applicants as follows:

1. Existing licensees, 46 in number, are being placed on notice that the Commission proposes to shortly issue to each an authorization for a specific operating assignment in the new band, and that equipment tests shall commence no later than Dec. 1, 1945, and regular program service by Jan. 1, 1946. The Commission recognizes that equipment may not be presently available for operation with the radiated power specified. Accordingly, licensees will be permitted to operate with less power until such time as materials and equipment are obtainable.

Moreover, until such time as it appears that receivers for the new band are generally available to the

public and owners of existing receivers have had the opportunity to adapt or convert them to the new band, licensees will also be permitted to continue operation on their existing assignment in the old band. However, when receivers and converters are available for the upper frequencies, dual operation will be terminated.

2. Present holders of outstanding construction permits, seven in number, are being asked to file current financial and ownership data. After the receipt of such information, the Commission will issue to each permittee a modification of his construction permit for a specific operating assignment in the new band which will require that equipment tests commence no later than Jan. 1, 1946, and regular program service by Feb. 1, 1946.

The Commission recognizes that equipment may not be presently available for operation with the radiated power specified in these

modified construction permits. Accordingly, operation will be permitted with less power until such time as materials and equipment are available.

3. Other applicants. — Pending applicants for new FM stations—approximately 500 in number—and persons who intend to file applications are asked to file their applications or bring them up-to-date, as soon as possible before Oct. 7, 1945. This will enable the Commission, after Oct. 7, 1945, to make as many grants as would be consistent with the availability of frequencies and other public interest factors. Recognizing the difficulty that applicants may have in submitting complete engineering information by such date, the Commission's procedure contemplates the granting of a substantial number of FM applications conditionally subject to the filing of such data at a later time.

### Letter to New Applicants

Letter to pending applicants for new FM broadcast stations follows:

"In order to expedite the consideration of your pending application for a new FM broadcast station, it is requested that you submit, under oath, the following:

"1. A current balance sheet of the applicant.

"2. A statement with respect to any changes affecting the ownership (officers, directors and stockholders) of the applicant since the filing of your application.

"3. A statement as to the proposed transmitter site, specification of transmitter equipment, effective radiated power and antenna height. (See FCC Form 319, questions 18(i), 22, and 24.)

"4. A statement as to program plans. (Questions 33, 34, 35, and 36, FCC Form 319.)

"5. A statement as to the number of hours of operation proposed.

"6. A statement as to whether the application is for a community, metropolitan or rural station.

"If you have filed since Jan. 1, 1945, a financial statement, or if the other information requested is now on file, such data need not be furnished. However, reference should be made to the application or other document with which such data were filed.

"Upon receipt of this information, the Commission will consider your application as soon as practicable after Oct. 7, 1945, as stated in its Public Notice of Aug. 7, 1945. If, upon examination of your application as thus supplemented, the Commission is satisfied that a grant thereof would serve the public interest, convenience and necessity, the Commission may make a conditional grant of your application subject to the condition that complete engineering information will be filed within 90 days after date of conditional grant. In such cases the construction permit itself will be issued only after the Commission is satisfied, upon examination of the complete engineering data, that you are technically quali-

fied and at that time you will be assigned a frequency.

"However, if it appears upon examination of your application that it contains the complete engineering data applicable under the Commission's report of Aug. 24, 1945, a copy of which is enclosed for your information, the Commission may issue a construction permit including the assignment of a frequency rather than a conditional grant."

### Letter to FM Licensees

Letter to existing FM broadcast licensees follows:

"Pursuant to the Commission's recently announced allocation of frequencies for FM broadcasting in the band between 92 and 108 mc. and its report governing rules and standards for FM broadcasting, the Commission proposes to issue shortly to your FM station an authorization to operate on the frequency of \_\_\_\_\_ mc with the equivalent of \_\_\_\_\_ kw radiated power and an antenna height of \_\_\_\_\_ ft. above the average terrain. Such authorization will provide that equipment tests on your new frequency shall commence no later than Dec. 1, 1945, and that regular programs shall commence no later than Jan. 1, 1946.

"In making this assignment, the Commission recognizes that equipment may not be presently available for operation with the radiated power specified. Accordingly, you will be permitted to operate with less power until such time as materials and equipment are obtainable.

"Until such time as it appears that receivers for the new band are generally available to the public and owners of existing receivers have had the opportunity to adapt or convert them to the new band, you will also be permitted to continue operation on your existing assignment. However, when receivers and converters are available for the upper frequencies, dual operation will be terminated.

"A copy of the Commission's report setting forth the substance of certain rules governing FM allocation and operation is enclosed for your information.

"In the event you have any objection to your proposed new operating assignment, such objection should be submitted to the Commission on or before Sept. 20, 1945."

### Letter to CP Holders

Letter to holders of outstanding construction permits for FM broadcast stations follows:

"Pursuant to the Commission's recently announced allocation of frequencies for FM broadcasting in the band between 92 and 108 mc. and its report governing rules and standards for FM broadcasting, the Commission proposes to issue shortly to you a modified construction

## Honesty Pays Off

DIOGENES, here's your man. He's "Honest Einar" Swenson, member of the KDYL Salt Lake City orchestra, and formerly of the U. S. Army Air Forces. On his way to the studio, he picked up a billfold lying in the street. It contained \$570 in cash, a \$12,000 cashier's check, and 39 C gasoline coupons. Only identification was the name Herbert G. Young on the back of a photo of a Marine captain, his wife and child. After prolonged checking with civic and military police and shore patrol, owner was identified and his father-in-law located. Mr. Swenson was given a \$50 reward.

permit for the frequency of \_\_\_\_\_ mc with the equivalent of \_\_\_\_\_ kw radiated power and an antenna height of \_\_\_\_\_ ft. above the average terrain.

"In order to expedite the issuance of such modified permit, you are requested to file on or before Sept. 20, 1945, the following:

"1. A verified current balance sheet of the applicant.

"2. A verified statement of any changes affecting the ownership (officers, directors, and stockholders) since the granting of your original permit.

"3. A verified statement as to the proposed transmitter site, speculation of transmitting equipment, effective radiated power and antenna height.

"If you have filed a financial statement since Jan. 1, 1945, or if the other information requested is now on file, no additional data need be furnished. Reference should be made to the application or other document with which such data were filed.

### Equipment May be Unavailable

"The Commission recognizes that equipment may not be presently available for operation with the radiated power specified in your proposed modified construction permit. Accordingly, you will be permitted to operate with less power until such time as materials and equipment are available. In your reply please inform the Commission as to the status of present construction, the earliest date at which you can commence further construction, the approximate date upon which you will be ready to commence equipment tests, and the power with which you can commence operation.

"A copy of the Commission's report setting forth the substance of certain rules governing FM allocation and operation is enclosed for your information.

"In the event you have any objection to your proposed new operating assignment, such objection should be submitted to the Commission on or before Sept. 20, 1945."

# Horne Seeks to Determine Australian Programs Needed

TO FIND OUT what kind of programs American Broadcasters would like to get from Australia in order to assist his country in determining the best postwar use of its shortwave facilities, Robert Horne, news editor of the international radio service of the Australian Dept. of Information during the war, is spending several weeks in America on his way to assume his new post as press attache to the Australian minister in Paris.

Interviewed in New York last week, Mr. Horne told BROADCASTING that during the war Australia's three international stations—one 50 kw transmitter built by RCA in the United States and two 100 kw transmitter constructed in Australia—supplied a three-fold service. One phase was the broadcasting of news and news commentary

to friendly and enemy ears in the Far East on a schedule that included four daily broadcasts in English, two in Japanese and one each in French, Dutch, Malay, Chinese and Tai (Siamese), with a daily broadcast in Straits Malay recently added.

Second part of the wartime service was the transmission of news and entertainment to Australian troops abroad, Mr. Horne said. News and news analysis were emphasized with the entertainment broadcasts largely request programs of phonograph records, with an occasional broadcast description of a sporting event.

Third variety of overseas service was information and news broadcast to the United States and England to keep them abreast of Australia's participation in the war

and, for a considerable period, of the news of American and British troops stationed there. From early in 1942 until late in 1943 Mutual received a daily quarter-hour divided about half and half between an Australian news summary and interviews with American soldiers, Mr. Horne said, adding that a number of local stations in America received similar or special programs on a more or less regular basis.

## Include Australia News

American includes five minutes of Australian news in its Saturday morning *United Nations Review*. WNEW New York has included two spots from Australia in its *Pacific Newsreel* programs. WLW Cincinnati has regularly used Australian spots in its world news roundups and is continuing them since the end of hostilities with emphasis shifted to political and economic news. WLW has also expressed interest in a feature on Australian farming for its mid-

## Follow the Beam

western farm listeners, Mr. Horne reported, adding that he has received a similar request from WLS Chicago.

## KROW Used Spot

KROW Oakland during the war has used a daily Australian news spot and also has made regular use of *Pacific Listening Post*, an analysis of Japanese propaganda broadcasts. The service from down under also supplied material to WTAG Worcester for a week of its *Worcester and the World* series and for a special program broadcast by Louisville's four stations in combination. The broadcast to Louisville included a message from a man-in-the-street in Brisbane to his counterpart in Louisville, a second message from the sports editor of a Melbourne paper to the sports editor of the *Courier-Journal*, and a third from the president of an Australian university to the president of the U of Louisville.

Describing his visit as "purely exploratory"; Mr. Horne said he had talked to a number of American broadcasters during his trip across the country and that he would be glad to hear from others, so that his report back to the Dept. of Information can be as full and specific as possible on what kind of service is wanted from his country. He can be reached at the office of the Australian News and Information Bureau, 610 Fifth Ave., New York, for the remainder of this week. Mr. Horne will make a similar exploration of England before proceeding to his Paris post he said.

## Tea Hostess

DOROTHY LEWIS, NAB coordinator of listener activities, will be hostess at a tea for women broadcasters on Sept. 14 at Girl Scout Headquarters in New York to solicit their aid in promoting Share-the-Food day, Sept. 18. That day citizens are asked to eat the kind of meals on which millions of people abroad are subsisting and to contribute the difference in cost between this and their regular diets to the foreign funds of one of the organizations co-sponsoring the campaign.

IRWIN JOHNSON, known as the Early-worm on WBNS Columbus, O., has solicited double the \$750 needed by patients of Franklin County Tuberculosis Hospital to repair their private radio-address system. Appeals for "an old dirty dollar bill" were made for only a week on morning program.

## PUBLIC SERVICE BUILDS LISTENER AUDIENCE FOR WIBC ADVERTISERS!

• The new management of WIBC, under the direction of George C. Biggar, has set out to do an outstanding job of audience building.

Getting out in front with the news of important events is one way to catch and hold listeners. People in the Indianapolis area are learning fast that WIBC is always willing to devote valuable station time to the public interest—that we are usually *first* on the air with happenings of this fast moving world.

Within *seconds* after the use of the A-Bomb, Russia's declaration of war, and the Japanese sur-

render, our announcers were giving the facts to the public. Within *minutes* other WIBC reporters, with portable microphones were broadcasting the reactions of the man on the street. All through that hectic, history making week, the news held precedence over scheduled programs.

Costly to the station, yes—but this policy is rapidly building better investments for WIBC advertisers. Write direct, or ask any Blair man for further facts about the liveliest, most aggressive station in Indianapolis.

# LEADERSHIP

## HARD TO PUT YOUR FINGER ON

It is not always easy to determine just exactly what makes some radio stations fairly beam with leadership. We mean the brand of leadership that cannot be wholly measured by: "Are you listening to your radio?" or other accepted listener yardsticks.

Not always can you put your finger on just what sends some non-network stations out in front or what gives some network stations ratings far above national averages.

EXCEPT —

that alert and skilled management springs from a quality of thinking

that builds great successes. And this by properly assembling every tangible and intangible detail into a purring thing of intelligent motion. There is the "team", too, with its individual initiative and pride of performance that pulls so far away from the commonplace.

Eighteen years of pooled management experience and loyal "team" play, have given Fort Industry Company radio stations such a brand of leadership—and of course, the signs of leadership that you can put your finger on, are there, too!

## The Issue: Face It

THE ISSUE on Government interest in station programming now is clear.

It was clarified Sept. 2 by Chairman Paul A. Porter of the FCC in an address over CBS. There is additional enlightenment in Mr. Porter's bylined article, "Radio Must Grow Up", in the current edition of *American* magazine.

The issue was made clear in the dissenting opinion of Commissioner Clifford J. Durr "Re Amendments to Rules of Practice and Procedures Governing Public Inspection of Records" (Aug. 3).

The issue: Are American radio programs satisfactory to the American public?

Both Chairman Porter and Commissioner Durr conclude that they are not. Both admit, however, that the conclusions of the FCC on the matter should not govern station program department. Chairman Porter does this directly. Commissioner Durr admits it tacitly.

In his Sunday broadcast and in his magazine article, Chairman Porter pleads for accelerated public criticism of programs. The latter article provides such reassuring quotes as these:

"I believe in the American system of broadcasting."

"There is scarcely a whisper of support in America for a Government-owned system (of broadcasting)."

In his dissenting opinion of Aug. 3, Commissioner Durr pleads that all Commission records—including financial statements—should be open to public inspection. "It seems to me that the Commission's action in these proceedings must necessarily turn upon the answer to a question concerning the fundamental nature of radio broadcasting. Is it essentially private business tinged only with such public interest as may flow as an incidental by-product of profit-making operations, or is it essentially public business? If it is the former, the information required pursuant to Secs. 1.301 and 1.302 is private information and it does not seem to me that the Commission itself has any right to demand it. If it is the latter, the Commission is entitled to full information and I can see no reason why information available to the Commission should be shielded from public scrutiny except as required by clear considerations of national security."

Commissioner Durr, whose keen interest in American programming is well known, further states: "Broadcasters are strongly insistent upon a maximum of regulation by the public and a minimum of regulation by the Government. They should not at the same time seek to conceal from the public information essential to intelligent public regulation."

This, then, as noted directly by Chairman Porter and indirectly by Commissioner Durr, is a matter between American broadcasters and their listeners. So let it rest on that basis. Let American listeners bespeak their dissatisfaction, if such they have, with American radio—not to Congressmen and the FCC but, as Chairman Porter advises, to "the stations, networks and sponsors". Let there be an end,

now and forever, to carefully phrased critiques by the Commission; to back-street audience reaction surveys; to secrecy-cloaked internal investigations at the FCC.

If the public wants to examine station records in order to satisfy itself that broadcast programs are satisfying to the ear, let's hear sufficient public clamor to impel such a policy. Will the public also want to examine newspaper balance sheets in order to evaluate its preferences among the various daily journals?

Now that the road is more clearly marked, it becomes the duty of every broadcaster to review his program structure, removing from it any fare that might embitter the listening public. He should redouble his efforts to improve his overall schedule, attaining a wise balance of entertaining and informative productions.

Here is the defense against unfair Government regulation—for the public, not the FCC, is now the acknowledged arbiter.

This is as it should be. It is a pleasure to join with the Commissioners in urging listeners to express their opinions.

## Future in Frequencies

YOUR attention is called to a special article in this issue (page 20) by Dr. Victor J. Andrew.

Dr. Andrews looks at the map and devises a formula, based on retail sales, for determining the station potential in numerous American markets. He admits that there are loopholes in his formula. But the study, nevertheless, makes interesting reading in these times, when all of us are wondering where we go from here.

## Time—the Essence

NO MORE dramatic history was ever made than the proceedings on the veranda deck of the USS *Missouri* on the night of Sept. 1 when Japan formally surrendered to the United States.

Through the medium of broadcasting, the world was given an eyewitness account of the proceedings. The air medium served as the personal representative at the peace table of every man, woman and child within range of a radio set.

The original draft of the broadcast setup for the proceedings provided for a live pickup from the *Missouri*, with a speech by President Truman interpolated between the signing and the talks by Gen. MacArthur and Adm. Nimitz. Because the *Missouri* had only one suitable transmitter, a pooled broadcast was inevitable.

Somewhere along the line—somewhere in the Pacific—the plan went awry. Instead of a live broadcast, a recorded version was fed to the world an hour-and-a-half after the actual proceedings. Technical problems and need of censorship were the reasons assigned officially.

Radio's primary impact as a news medium is based on the fact that it reports instantaneously—tells an eyewitness account of history as it is made. Surrender of Japan ranks among the top events in history.

But other important events will happen. Radio will be at the scene to tell the story. It should tell that story as it happens and not submit to delays.

It would be interesting to know just what caused the change in plans—technical difficulties, security, or perhaps outside pressure.

## Our Respects To -

DONALD MANSON

WHEN the Canadian government attends any international radio conference, one of its delegates is certain to be quiet-spoken, unassuming Donald Manson. He has been attending international conferences as a technical expert for nearly two decades, and knows most of the world's important radio men. Since his appointment in September 1944 as assistant general manager of the Canadian Broadcasting Corp. frequent trips have kept him in close touch with broadcasting officials, both government and private, throughout the Americas. Years ago he learned Spanish so he could converse with Latin-Americans in their own language, a factor which he stresses as important in fostering closer broadcasting relations with the industry in Central and South America. He is now attending the Third Inter-American Radio Conference at Rio de Janeiro.

Born in Wick, Scotland, in 1888, Donald started in radio in 1906 and took part in the first trans-Atlantic transmissions, working with Marconi at Glace Bay, Nova Scotia, after his arrival in Canada in 1907. For the next eight years he was with the Canadian Marconi Co. on trans-Atlantic and ship communication work, and in 1915 the Canadian government asked him to become inspector of radio. From 1916 to the end of the First World War, Manson was radio communications officer with the Royal Canadian Navy, and in 1919 came back to Ottawa to become chief inspector of radio for Canada.

During the next ten years Manson drafted most of the radio regulations for the Dominion and began to attend international conferences as a Canadian technical delegate at London, Madrid, Washington, Mexico City, Santiago de Chile and Havana. In 1929 a Royal Commission was appointed to study broadcasting in Canada. Manson was made secretary of this three-man commission, of which the present general manager of the CBC, Dr. Augustin Frigon, was a member. The Commission held hearings throughout Canada, toured the United States and most of western Europe and Great Britain. The result of its study was a report on the nationalization of broadcasting on somewhat the basis on which broadcasting now operates in Canada.

After his work on the Royal Commission Donald returned to Ottawa to become assistant controller of radio in the Department of Marine. When the CBC was formed in 1936 Manson was offered the post of chief executive assistant to General Manager Gladstone Murray, who was brought to Canada from the British Broadcasting Corp. Dr. Frigon became assistant general manager. As CBC exec-

(Continued on page 50)

# Another "Why" for Dials Staying KOIN-Conscious

## CHESTER R. DUNCAN

is the founder-director of KOIN's Duncan Singers. His background is knee-deep in music. Formerly supervisor of music for Portland public schools, he studied in Europe and took his degrees in music at the University of Washington. Known as an exacting drillmaster, he rehearses his 20 singers for hours at a time. He has developed them into the Northwest's first distinctive chorus particularly adapted to radio performance. He often serves at public functions in a dual role—as toastmaster, or speaker; as director of The Duncan Singers or leader for community singing.

## ...THE DUNCAN SINGERS!

Applause is not enough for THE DUNCAN SINGERS of KOIN. They're used to having crowds jump up and cheer 'em loud and long whenever they make a p.a. It's in the record that this distinctive group has brought enthusiastic audiences to their feet at War Bond rallies, a Chamber of Commerce "KOIN Day", an NAB district banquet and other events. Also to be taken into account is the prestige the singers have won as a broadcast feature. They have "clicked" with listeners ever since their debut with SONG OF THE COLUMBIA... the KOIN series that drew a George Foster Peabody Citation. You may have heard THE DUNCAN SINGERS on their CBS network appearances (two to date). If not, we hope you will real soon... for one of their songs will tell you more than pages of copy.

## ...*"For the Community!"*

## U. S. Chief User Of Radio in S. A.

**Democratic Influence Ousts Fascists, Josephs Writes**  
**LATIN AMERICAN** radio was European in taste 10 years ago, and influenced by Nazi-Fascists, but today, upon its 25th anniversary, radio in Latin America is definitely of the New World, and shows the influence of the democracies. Today the United States is the chief time user and revenue producer, according to Ray Josephs, newspaper correspondent in Latin America who recently returned to this country.

In an article in the September issue of *Inter-American Magazine*, Mr. Josephs says that the Nazi-Fascists' use of radio in Latin America to sell intolerance, prejudice, and hatred to the countries south of the border has been outwitted by the U. S., and today hemisphere cooperation has been established between the U. S. and Latin American countries, largely through radio means.

A wide variety of programs are tuned in by the 4,500,000 radios in Latin America. Radio is a commercial enterprise there as it is in the U. S., with commercials paying the bill. Favorite programs of Latin Americans are news broadcasts, mostly based on U. S. or British reports, soap operas, local music, local humor, and sports, Mr. Josephs reports. Most programs on small stations are musical recordings, with some of the larger stations developing live shows.

Leading stations are in the countries' capitals, and the best stations in Latin America equal our best independent stations, he says. Latin American radio generally is in the stage that the U. S. was in 15 years ago, but with more radio sets expected to be purchased in Latin countries within the next few years, programs are expected to improve.

Government control of radio varies in each country, with strongest control exercised by Argentina and Brazil at the present time, according to Mr. Josephs.

### Mesereau Interview

**MAJ. THOMAS A. MESEREAU**, commander of the 3rd Battalion, 188th Regiment of the 11th Airborne Division, which formed a guard of honor for Gen. MacArthur's arrival in Japan, was interviewed Tuesday evening on *Headline Edition* on American, one of the first returning eyewitnesses of the Japanese surrender broadcast.

**FRANK MCCARTHY**, account executive, has been named sales manager of KSL Salt Lake City, succeeding **ED. J. BROMAN** who resigned to join Universal Broadcasting Co., Hollywood, as v-p and general manager.

**C. E. STEVENS** will continue in his present capacity of assistant sales manager of KSTP Minneapolis-St. Paul, following appointment of **MILLER ROBERTSON**, named general sales manager. In addition, Mr. Stevens will have duties in regional sales.

**LEWIS H. BRAND**, recently released from the armed forces, is now a member of the advertising staff of **WHBQ** Memphis.

**ARCH L. MADSEN**, assistant to **IVOR SHARP**, general manager of KSL Salt Lake City, has been appointed director of commercial operations, a newly created post.

**JOHN HENRY SCHLACHT**, former sales manager of **KFBK** Sacramento, has been appointed sales manager of **KSFO** San Francisco.

**GLADYS FERGUSON**, former traffic manager for American's Chicago office, has transferred to **KGO** San Francisco to become secretary to **KIRK TORNEY** and **FRANK MCHUGH**, American sales representatives.

**ONEIL INMAN**, with discharge from Navy, has been appointed American Western division morning traffic supervisor, replacing **JOE GLIDER** who resigned to freelance as writer-producer.

**ED BARKER**, NBC Western division account executive, has resigned. He and associates are applying to the FCC for frequency assignments and construction permit to erect a new station in San Jose, Cal.

**BURTON HOWARD**, eastern Ontario dance orchestra leader, has joined **CKSF** Cornwall, Ontario, as salesman.

### School Video

**FIRST** experiment in adaptation of television to classroom education will start in New York schools with the reopening of school this fall when school officials and television experts will produce a weekly program over NBC's television station **WNBT** New York. Program is designed to determine types of television programs most suitable for educational purposes, and will be evaluated by pupils and teachers at receiving studios.

### Respects

(Continued from page 48)

utive **Donald** frequently visits broadcasting executives in New York and Washington. He makes it a point to renew acquaintanceships with his friends in official posts there. He journeys to Mexico and the West Indian republics with regularity to discuss mutual broadcasting problems and to promote a greater exchange of programs with those countries. He is host in Canada's name as well as his own when broadcasters and officials come to the Dominion from all parts of the world.

When not busy with broadcasting problems from his office overlooking the Parliament buildings and the Peace Tower on Ottawa's Wellington Street, he is gardening or entertaining servicemen at his home in suburban Ottawa. He is married, has one daughter, and collects books and antique boxes.

## "YES, THEY FLY! ONE'S BEEN 23 YEARS ON THE AIR"

Yes, we're proud to say that the **Swan Store For Women, Fargo**, has broadcast to the **Red River Valley** over **WDAY**, six times a week, every week for twenty-three years!

When a local advertiser who's thoroughly familiar with a station's selling power remains so loyal, what better evidence of result-getting could that station offer? Well, **WDAY** has *eighteen* "locals" who have been with us, *steadily*, from 10 to 23 years!

## Ads Worth Billion

AMERICAN business contributed more than a billion dollars worth of advertising space and time to support the job of telling people what was needed to speed victory, James W. Young, chairman of the War Advertising Council, New York, told business leaders all over the country in a V-J address Sept. 4. Organized information programs for War Bonds, food, the armed services, conservation and salvage helped preserve democratic American procedures at a critical time in the U. S., Mr. Young said, and advertising helped bring about swift, direct action in crisis after crisis.

## Uncensored

TO Arthur Feldman, London correspondent for American, went the honor of sending the first uncensored radiogram in six years, when censorship was lifted Sept. 2. Message, addressed to the American newsroom in New York, read: "The only thing is that there is no hot news here at the moment, but I don't care. No more censors. Hooray!"

KTOH Lihue, Hawaiian Islands, 250 w on 1490 kc, joined CBS Aug. 15 as the third station in its Hawaiian group.

## TOMORROW'S CUSTOMERS ARE LISTENING TODAY

Today their main interests are fun and school. Tomorrow they'll be homemakers—somebody's prized customers in the prosperous Dayton and Miami Valley market.

Make them yours by building goodwill for your company's products or services now . . . with regular reminders over their favorite local station WHIO.

August 17, 1945

Mr. Barry Faris,  
International News Service,  
235 E. 45th St.,  
New York, N. Y.

Dear Sir:

Just a word from WHO congratulating you on a very thorough, accurate and ahead-of-the-field service covering the whole surrender period. The WHO News Bureau has long valued the coverage and service from your Des Moines INS Bureau and your general service. However, in those intense and long hours before the final surrender break came, we wore a path to the INS printers to see what William Hutchinson was carrying, to catch the latest note to editors enabling us to schedule more tightly, or to pick up an illuminating background angle. We valued INS extremely for holding the gun until authenticity justified a break, and also for breaking stuff earliest.

Yours very truly,  
WHO - DES MOINES

M. L. Nelsen

## VIGIL REWARDED WCSC Scriptwriter Signals Returning Operator Husband

FROM her office window overlooking Charleston harbor, Sandy Gookins, WCSC scriptwriter, has scanned incoming ships with binoculars for the past year-and-a-half, hoping to see the white hull of the hospital ship *Seminole* nose into its home port. Sandy's husband, CBS West Coast radio singer Warren Gale, is a radio operator aboard the ship.

At 5 a.m. in the latter part of last month, a couple of friends awakened Sandy to inform her the *Seminole* was coming in. The trio raced down to Charleston's Battery in time to see the ship pierce the darkness and head up-river for the Port of Embarkation and Stark General Hospital.

With an ordinary-sized flashlight Sandy signalled from shore: "*Seminole—Seminole.*"

Army Signal Corps Radioman Gookins (professionally Warren Gale) picked up the signal instantly and blinked back: "*Seminole—who is this?*"

"This is Sandy," the return flash read.

In strictly unorthodox Signal Corps code came the reply: "My God . . . this is wonderful. What a surprise . . . Sandy, I'm home."

Sandy still has one more vigil to keep from the WCSC windows. Her husband has one more trip to make on the mercy ship and then they hope he will be home for good.

## North Central Buys Joe Palooka Rights

EXCLUSIVE radio rights to "Joe Palooka", popular Ham Fisher comic strip character, were purchased this week by John Boler, president of North Central Broadcasting System and Mississippi Valley Network, from Graphic Radio Productions, Omaha.

The series will be offered on transcription five times weekly with Cars Swenson as "Joe" and Lee Dixon, star of *Oklahoma*, as "Leemy". The program will not be released until writers can get "Joe" out of uniform and back into civilian life, which should be not later than Oct. 1, according to Bill Ware, NCBS sales manager.

Officials of NCBS and Mississippi network held a two-day conference, Sept. 6-7, in Chicago to decide major policy and sales promotion details preparatory to inauguration of Mississippi Sept. 29. Attending were Mr. Boler; Arthur Simon, national sales manager; Donn Clayton, vice-president in charge of NCBS Minneapolis-St. Paul office, and Mr. Ware. Final arrangements for transcribing *Mississippi Valley Farm Hour*, rural one-hour show produced by NCBS at WLWL Minneapolis were made and the show will open the new network's inaugural broadcast.

# Promotion

### All the Tricks

ALL the tricks of an old-time political campaign—mass-meetings, placards, give-aways, and the rest—are being dragged out for the annual election of officers of the Crosley Square Club, composed of more than 400 employees of WLW Cincinnati. UP-N-Atom ticket is headed by Roger Baker, director of public relations, with Solid Seven ticket headed by Bill Thall, talent staffer.

### Cheap

BRIGHT yellow and black folder of KSN exclaims "59c per 1000 listeners—the lowest cost 1-minute spot announcements in San Francisco". Inside quotes Ross-Federal Research on the subject and further promotes the coverage and cost of using the station.

### Trammell Statement

NBC has reprinted in booklet form the statement of Niles Trammell, NBC president, before the FCC hearing on FM, explaining the network's attitude on the subject, and is distributing it under the title, "Commercial Rules and Regulations for FM Broadcasting".

### Latest on WLAP

NEW FIELD Intensity Coverage map and market data for WLAP Lexington has been issued in a folder put out by the station. Folder shows map and population and radio homes in WLAP primary and secondary coverage, plus WLAP facilities. Back cover contains data on retail sales and effective buying income in WLAP primary counties.

FAN MAIL sent by servicemen and others to WSM Nashville is used to trim this window of Strobel's music shop in Nashville. Recordings and songbooks of Opry headliners are on sale in the shop. Display honors WSM's 20th anniversary.

### 'Last Salvo'

"LAST SALVO", a Victory Night broadcast on WADC Akron, heard at 10:45 p.m. Tuesday, Aug. 14, written and announced by Ted Hanna, has been issued in a booklet by the station. Allen T. Simmons, owner and manager of the station, wrote a foreword. Ted Hanna supplied "recollections" in the back of the book. Script was gotten together at the last minute, according to Hanna, and innumerable requests have prompted the booklet version.

### Keeping Up

WALLACE THORSEN organization, New York, has sent to stations in major markets a sheet advertising the quarter-hour transcribed dramatic serial, "Keeping Up With Wigglesworth". Production is under auspices of New Tools for Learning, New York, who offer it to stations as a public service in entertainment and economic education. Series may be locally sponsored.

### PERSONNEL

STANLEY G. MOUSE, released from the Air Forces after 256 missions in C-53, has been appointed publicity director of WHIO Dayton. He was awarded the Distinguished Flying Cross four times and Air Medal five times.

S. G. Mouse

LEE HOGAN, formerly on temporary basis with NBC Hollywood publicity staff, has become permanent member replacing MARTHA CURRY, who has resigned to become press representative for NBC "Truth or Consequences".

BOB MANN has been named to represent WBYN Brooklyn to trade publications and the New York press.

RICHARD L. ARMFIELD, former chief of bureau for Press Association, Indianapolis, has joined the radio division of Agricultural Advertising & Research, Ithaca, adv. and public relations agency.

### Very Solid Construction

READERS are "sidewalk superintendents" of the big construction job pictured on Mutual's folder, "Program Structure Going Up". Fully illustrated by large, New Yorker type cartoon, front cover invites sidewalk superintendents to step inside. There is shown the structure rising, with steel girders named for outstanding programs on the network. Schedule of operation is on a sign on fence. Workers dump "old and slightly used programs" from a truck. Around center picture is legend telling of snaring an architect (Phillips Carlin), surveying the grounds, assembling materials, and commencing construction. Large sign on back cover—on the fence of construction enclosure—prints reviews of the top programs.

### 'Home Forum' Folder

NEWEST promotion piece on the WOWO Fort Wayne "Modern Home Forum" has been sent out to agencies, advertisers and prospects. Piece folds out to feature Jane Weston, director of the "Home Forum", telling of her activities with the program and its listeners. Large center spread of folder has pictures of participants, quotes from clients, and further news of the show. Back cover shows mail response.

A 48-PAGE booklet "Young Canada Listens" has been issued by the Canadian Broadcasting Corp., outlining the school programs on its networks for the school term 1945-46. The booklet described the weekly series on "Our Canadian Cities", "Canada's Part in World Democracy" and "Development of Democracy at Home", a series on Canadian painters, as well as outline of the CBS program "American School of the Air" which the CBC carries, and various programs carried by arrangement with the provincial departments of education.

### WBMB Booklet

BOOKLET titled "It's Unanimous" has been issued by WBMB Chicago which points out that Nielsen Radio Index, C. E. Hooper and the CBS Listener Diary agrees in rating WBMB first in daytime audience in Chicago.

Station Managers and Program Directors  
LISTEN TO THIS!

**"NEW WORLD A-COMING"**

America's most widely discussed public service program

IS NOW AVAILABLE BY TRANSCRIPTION  
to all stations.

"NEW WORLD A-COMING" has won eight national awards, including the coveted \$1,000 Bernays Prize within the past year.

This program has brought uniformly favorable comment both in the daily and the trade press. It has been acclaimed by an avalanche of listener mail.

"NEW WORLD A-COMING" offers *you* the opportunity to promote understanding and tolerance in your community, to make scores of new friends, to build ever growing audiences. It offers local or independent stations a series which ranks

in technique and production with the best in national radio.

WMCA offers "NEW WORLD A-COMING" as a non-profit venture on a share-the-cost basis. The 1945-46 series of at least 26 half-hour programs starts early in October.

The complete story of this unusual offer will be on your desk shortly. Look for it. Better still, if this ad arouses your curiosity, write, wire or phone Charles Stark, WMCA, 1657 Broadway, New York City, Circle 6-2200.

## GUNNISONS TO TRY NEW TYPE PROGRAM

FIRST ATTEMPT since the end of the war at a departure from the conventional news presentation is *Mr. & Mrs. Reporter* featuring the husband and wife news team of Marjorie and Royal Arch Gunnison, starting Sept. 17 Mondays through Fridays, 1-1:15 p.m. on Mutual. Format will have Mr. and Mrs. Gunnison in a living room broadcasting informal ad-lib discussions of international and national news.

Mr. and Mrs. Gunnison have been reporting major news events for the last ten years for the *Christian Science Monitor*, North American Newspaper Alliance, *Colliers Weekly* and MBS. In 1942 their search for news landed them in the Jap prison camp at Santo Tomas. Royal Arch Gunnison is also the author of the book, *So Sorry No Peace*.

Program was sold to Mutual by Christopher Cross, public relations director of BBC, who created the series.

## ACTIVITY OF RADIO COUNCIL INCREASED

MARKED INCREASE in radio council activity has been noted since the end of the war, according to Dorothy Lewis, NAB coordinator of listener activity and liaison between NAB and the various radio councils. Southern California broadcasters on Aug. 30 approved the formation of a radio council and appointed a committee to work out details with William B. Ryan, general manager, KFI Los Angeles, as chairman.

In Rockford, Ill., the radio council has conducted a weekly series of broadcasts on WROK in which various civic groups have participated. The series has been sponsored by the Rockford Life Insurance Co. Dr. Forest Whan, Wichita University, radio research man and director of the Wichita council, advises that a well-rounded program of activity be lined up for 1945-46 at Wichita. A statewide survey of equipment and of utilization of radio in all Nebraska schools has been undertaken by the Omaha council.

In Cleveland, new president of the council is Mrs. George V. Goodbold, and new president of the Kalamazoo council Dr. Raymond Hightower of Kalamazoo College. Dr. W. F. Dunbar, program manager at WKZO Kalamazoo, has served as organizing chairman in that city.

## Nelson Shifted

LT. JOHN NELSON, former radio director of Raymond R. Morgan Co., Hollywood, and for more than three years in the Navy, has been shifted to American Forces Radio Service, Los Angeles. For past 18 months he has been in the European theater of war, attached to air force of Atlantic Fleet.

# SPONSORS

**THE WANDER Co., Chicago** (ovaltine), returns "Captain Midnight" to the air Sept. 24 on WGN Chicago and on 111 Mutual stations, Monday-Friday, 5:30-5:45 p.m. (EWT). Remainder of network will carry the program on a cooperative basis. Series was on American before summer vacation. Hill Blackett & Co., Chicago, is agency.

**BOURJOIS Co., New York**, sponsors of "Romance, Rhythm & Ripley" Thursday 10:30-11 p.m., CBS, switches format Oct. 11 to a dramatic musical-show featuring Evelyn Knight and Danny O'Neill and titled "Powder Box Theatre". Show includes a five-minute vignette with a guest star each week. Agency is Foote, Cone & Belding, New York.

**PARK & TILFORD, New York** (Tintex), on Sept. 8 started using twice-weekly spot announcement schedule on KNX Hollywood. Contract is for 13 weeks. Placement is through Charles H. Storm Co., N. Y.

**F**IRST detailed weather programs for Worcester, Mass. area, have started on WTAG Monday-Saturday, 8:30-8:55 a.m. "Weather Time" give current and long-range forecasts on temperature, humidity, precipitation, and barometer readings, and includes information for flying, fishing, and other outdoor events. Also aired are announcements on delays, cancellations, or tie-ups caused by the weather.

**I**N COOPERATION with the Colorado State Veterans Advisory Council, KOA Denver has started a weekly, quarter-hour program, "When the Boys Come Home", 9:45-10 p.m. (MT). Broadcasts take form of panel discussion between civic, labor and industrial leaders and returned servicemen.

**T**HREE post-war public service programs have been added to the feature report of United Press Radio. Shows, designed to give information on subjects of growing interest, are "America Converts to Peace", "Your New Home", and "Sizing Up Sports".

**A**S A PRELUDE to the Friday night boxing broadcasts which started Sept. 7 on American, sponsored by Gillette Safety Razor Co. as a regular Friday series, network on Sept. 6 broadcast a preview program whose speakers included Chester J. LaRoche, vice-chairman of American; Joseph P. Spang Jr., president of Gillette; Col. Edward P. Eagan, chairman of the New York State Athletic Commission; Bill Corum and Don Dunphy, announcers of the fights series. Harry Wismer, sports director of the network, served as master of ceremonies.

**E**LMO SIMMONS Jr., released from the AAF after 13 months internment in a German prison camp, has joined WMAZ Macon as news reporter.

**B**RUCE G. THORNTON, of KLO Ogden, Utah, has been named director of special features for KALL Salt Lake City.

**R**EGINALD (Ted) HARDEN, of WWL New Orleans, is now news editor of KALL.

**W**ILLIAM R. McANDREW, director of news and special events of WRC Washington, is father of a girl born Aug. 31.

**A**NECDOTES about CEDRIC ADAMS, newscaster at CBS affiliate WCCO Minneapolis, have been compiled in a booklet "Nastasia Loves Cedric", prepared by the station.

### THANKS GIVEN BBC FOR SERVICE SHOWS

**I**N A SPECIAL two-way broadcast concluding BBC's *American Eagle in Britain* series, Phillips Carlin, Mutual vice-president in charge of programs, and Herbert Pettey, director of WHN New York, last week expressed their appreciation for the program, which since November 1940 has brought the voices of American troops in England back to their families and friends at home.

Approximately 25,000 American servicemen have been heard on the BBC program which originated in the Rainbow Corner Club just off Picadilly in London and was broadcast on Mutual at 5:30-6 p.m. each Saturday and on WHN at 10:30-11 a.m. each Sunday. Thousands of American homes have recordings of their sons' and daughters' voices, and BBC has frequently been asked for a duplicate record because "we've played the one you sent so much that it's worn out."

**F**air Coverage  
**W**WNY Watertown, N. Y., has broadcast its fourth year of pick-ups from county fairs in the area, telling their listeners of all the colorful harness races, bands, spectators and exhibits. Over a period of three weeks, Program Manager Jim Higgins and Sportscaster Jack Case of WWNY, has completed a total of 16 1/2 hours of commercial broadcasting direct from the fairs of northern New York.

**F**or the Boys  
**B**OB JONES, m.c. on early morning "Groans by Jones" show on WBIG Greensboro, has devoted a portion of his program each morning to GI's stationed at the Overseas Replacement Depot at Greensboro. First campaign was "Bake a Cake for a Convalescing GI". He collected enough cakes to supply three or four wards for a week-end. He took promises of cakes over phone during show, then delivered them himself. He has collected playing cards for the boys, aided families, and latest venture is taking "orders" for rooms for families of the GI's, visiting them.

**K**QV Pittsburgh for past three weeks was used as a testing ground on audience reaction to "Ralph Slater, Hypnotist" show by Phillips Carlin, v-p in charge of programs for Mutual. Show is scheduled to start on the network next week. Station may be used hereafter to premier "unusual test shows", according to Mr. Carlin.

**C**IVILIAN'S pilot's training course is the grand prize for answering a question on CJBCT Toronto morning program "It's About Time". M.c. Wib Perry asks a question each morning, and the winner of the correct answer for the week gets the grand prize. There are also four prizes of \$25 war saving certificates for prizes on each half-hour of the two-hour show.

**'Schoolcasts' Shifts**  
**D**WIGHT NEWTON'S "Schoolcasts", sponsored by the San Francisco Examiner, has shifted to KPO-NBC and started its fifth year on the air Sept. 5. Forty-five hundred school teachers were informed of the change and both The Examiner and KPO will follow up with promotional pieces and suggestions for utilizing the program in classes ranging from third year through high school. Program is heard thrice-weekly and in school courses such as geography, history, current events, social sciences.

**Grid Coverage**  
**F**IVE Columbia U. gridiron contests will be covered by NBC's television station WNBT, starting with the Lafayette game on Sept. 29. All games will be at Baker Field, New York. Arrangements are also being made to cover four top Army football games.

**Good Start**  
**P**ICNIC broadcast started off a series, "Youth Center Parade" on WRNL Richmond, Saturday nights. More than 75 midgets, from 3 to 15 took part in the picnic given by the sponsor, Miller & Rhoads department store, Richmond. Series is a half-hour juvenile musical show.

**Teen-Age Party**  
**T**EEN AGE shop of Chandler's Department store of Boston has started "Teen Age House Party" on WNAC Boston, starring Ray Dorey, baritone, and Margaret Ford, "good sport editor" of the Boston Herald, as teen age consultant. Program, designed especially for teen agers, is heard Saturday, 10:30-11 a.m.

**Third Format**  
**T**HE FRANK SINATRA Show will return to CBS Wed. Sept. 12, 9-9:30 p.m., with a flexible production format which will be changed each week as events, material, or talent demand. Mann Hollner, director of the show, has announced. Program will not be limited by any set pattern, and each show will be planned and written as a special production. Show is sponsored by P. Lorillard Co., New York, for Old Gold Cigarettes. Lennen & Mitchell, New York, is agency.

**News Dramatized**  
**O**UTSTANDING news event is dramatized each week on WPTF Raleigh, N. C., produced on the day of each event. They have dramatized the liberation of Paris, Japanese surrender, anniversary of the landing of the Marines on Guadalcanal, 25th anniversary of radio and the Junior Chamber of Commerce, celebrated jointly, among other programs. Paris liberation was presented by Fourth Division, which liberated the city.

**MAYORS of America's 10 largest cities will make a direct report to the nation in a discussion of business and employment trends in their areas, plant reconversion, public works programs, education, and new industries on Mutual's "American Forum," Sept. 11, 9:30-10:30 p.m.**

**POW Messages**  
**C**ANADA'S shortwave programs are now being regularly sent to Latin America in Spanish and Portuguese every Sunday with an hour's program in Portuguese, half-hour in Spanish and an hour in English, programs being mainly of Canadian-Latin American news interest, on CHOL 11.72 mc and CHTA on 12.22 mc. It can now be revealed that the CBC shortwave service to Germany has been using for some time programs from German prisoners of war in Canada. Programs are recorded in the prison camps, sent to Montreal for transmission. They include such topics as "The Responsibility of the German People", "The Guilt of the Nazis", "The Reconstruction of Germany under Allied Occupation". Canadian themes, religious services and musical programs from the prison camps.

**13th Year**  
**O**LDEST commercial studio program on WFAA Fort Worth-Dallas, "Mrs. Tucker's Smile Program", entered its 13th year on the station Aug. 29. Interstate Cotton Refining Co., Dallas, is sponsor.

**Close Harmony**  
**B**ARBERSHOP Quartet Contest, in which male quartets of South Florida appeared for six weeks on Saturday nights on WIOD Miami, has ended with duplicate prizes going to members of two quartets. First prizes of \$50 Victory Bonds were given each man of a serviceman's foursome from the Homestead. Fla. Army Air Base, and to a civilian group from the Miami area. Gay Nines series was produced by WIOD staff.

**Jobs for Vets**  
**N**EW WWDC Washington program, "Jobs for Vets", Saturday 7:30-7:45 p.m., is designed as an employment bureau for both vets and employers. A special organization has been set up in cooperation with the Civil Service Commission.

**AS PROMOTION stunt for "Ahead of the Headlines", on KLX Oakland, Cal. Clint Sherwood (1) and Lee Mikesell do a remote broadcast from front of one of the sponsor's stores.**

# this is a farmer's wife

She is one of the many housewives in the southeastern corner of North Dakota. Families like hers may enjoy *fattigmand* (fried pastry) — *lutefisk* (cod) — *lefse* (unleavened bread) — or *Russian peanuts* (sunflower seeds) depending upon whether they were descended from Scandinavian or Russo-Germanic stock.

But there is one thing of which this farmer's wife and her neighbors are sure — their families *enjoy* food. And rightly so. People who make their living from farming (as do some 333,023 folks in the 29 counties surrounding Jamestown) find that a rousing appetite is the direct outcome of a profitable day's labor.

These same people spent \$16,498,000 last year for food alone. People with that much

money to spend on food, have money to spend on other things. And radio remains one of the most effective ways to sell food and "the other things" — in Jamestown, as everywhere else.

To be specific, the regular-listening area of KSJB Jamestown, is made up of 29 counties. Of the 79,168 families who live within this 29-county coverage, 71,092 have radios.\*

# Production

**HAL ENGEL**, released from the Army and previously a partner in the publicity firm of Howard & Engel, New York, has joined the NBC script department as a writer. Engel received his appointment through NBC's "Welcome Home Auditions", an employment service created by the network to assist veterans to obtain jobs in radio.

**BOB LATING** has been assigned Hollywood m.c. of daily "Walkie-Talkie" on American Pacific stations. He succeeds **DON NORMAN** who has taken a similar Chicago man-on-the-street assignment.

**SGT. CHARLES ROSS**, 31, one-time producer-announcer of KMPC Hollywood, died of infantile paralysis in Walter Reed Hospital, Washington, in late August. Surviving are widow and a daughter.

**DON PRINDLE**, former co-star of American "Hires Ice Box Follies", will resume duties as writer on NBC "Abbott & Costello Show", starting Oct. 4.

**JOHN SHURTLEFF**, former sound effects technician of NBC Hollywood, has shifted to Don Lee Broadcasting System, Hollywood.

**REV. JOSEPH MILLER**, chairman of the Radio Committee of the Brooklyn Jewish Ministers Assn., is serving as chairman of three Jewish holy day programs, broadcast on WLIB New York, Sept. 5, 12 and 19 at 7 p.m.

**HARVEY OLSON**, WDRC Hartford, program manager, has been named head of the radio department at the Randall School of Fine and Applied Arts in Hartford.

**CLARENCE GARNES**, formerly sports editor of KFBI Wichita, Kan., and recently with WDOD Chattanooga, has joined announcing staff of WSAV Savannah. Another new announcer is **JIMMY WOODS**, recently discharged from the army.

**JOHN SCHEUER**, a member of the announcing staff, has been promoted to production manager of WFIL Philadelphia.

**GEORGE SUTHERLAND**, production manager of WIP Philadelphia, and **MARY DOWNEY**, formerly of the Yankee Network, were married in Philadelphia last week.

**VELMA SATHER**, operator with WDAY Fargo, N. D., has replaced **MILDRED GREGGERSON** as trade manager. Miss Gregerson has transferred to publicity.

**R. W. (Gus) YOUNGSTEADT**, former advertising director of Carolina Power & Light Co., is now WPTF Raleigh, N. C., program director. New musical director of WPTF is **MILDRED ALEXANDER**, formerly with World Broadcasting System.

**BEN HYAMS**, annotator for the Wednesday evening "Invitation to Music" on CBS and script writer for the network's serious music programs, Sept. 9 began a series of four talks on musical matters Sundays, 2:55-3 p.m., substituting for Olin Downes, on vacation.

**PERMANENT** origination in Hollywood of "Truth or Consequences", sponsored by Procter & Gamble Co., Cincinnati, for Duze, on NBC Sat. 8:30-9 p.m., has produced changes on producer Ralph Edwards' staff. New members include: **ALFRED PASCALL**, production manager; **PHIL DAVIS**, **GEORGE JESKE**, idea men; **CARL FREDERICK**, assistant stage manager; **MARTHA CURRY**, press liaison; **BILL BURCH**, producer-writer. David O. Alber Associates, New York, is agency.

**RUSSELL CASE**, director of popular music for Victor Records, on Sept. 12 became conductor of the "Fresh-Up Show", sponsored by Seven-Up Co., St. Louis, on Mutual.

**NED SERRELL**, formerly of KDYL Salt Lake City, has joined KNX Hollywood as special events announcer.

**FRED LEVINGS**, WGN Chicago producer, adds "Country Sheriff" to his production schedule with **JACK BRICKHOUSE** announcing the weekly mystery series which switched to WGN September 7th.

**LILLIAN KAPLAN**, of the KGO San Francisco producers staff, has resigned to become a member of a theatrical unit to entertain army of occupation. She was selected in a nationwide contest.

**BILL SHAPARD**, of WHN New York, will join the announcing staff of WFAA-KGKO Fort Worth-Dallas Sept. 15. **HARRY HARBER**, formerly of KNOW Austin, Tex., is now announcing with WFAA-KGKO.

**ELIZABETH GODDARD** has joined the copy-writing staff of KDB Santa Barbara.

**CHARLES RASHALL**, formerly of WMCA New York, has joined KFRC San Francisco as announcer.

**CAPT. RICHARD VODRA** has been made commanding officer of AAF, First Radio Production Unit, succeeding Lt.-Col. Eddie Dunstedter, now on inactive status.

**FRANK ECKERSLEY**, formerly of CFAC Calgary, has joined the announcing staff of CKWX Vancouver.

**HERMAN ARON**, announcer and actor with KCSG Charleston, S. C., is the father of a boy.

**BOB HARVIE**, formerly announcer of CJEL Kirkland Lake, and **CHEX** Peterborough, and for the past three years with the RCAF, has announced his coming marriage with Cpl. Florence Callin, RCAF Women's Division, as soon as they are discharged from the service.

**WARD HAMILTON** has joined the announcing staff of WNY Watertown, N. Y.

**HILDA BROWN**, continuity editor, has returned to the station after attending for two months the summer session on radio production at the U. of Washington, Seattle.

# Technical

**JAMES W. DOWNS**, transmitter engineer of KGO San Francisco, has joined KTKN Ketchikan, Alaska, as announcer and engineer.

**LT. COL. HAROLD H. LLOYD**, released from AAF as executive officer in charge of electronic training equipment and technical schools, has joined Emerson Radio & Phonograph Corp. as assistant director of the special products division. He will assist in plans for marketing the company's new hearing aid, commercial television sets, mobile telephone systems and electronics equipment.

**LT. WALTER S. GILBERT**, discharged from the Navy, has returned to his former post in the engineering department of KYW Philadelphia.

**JULIUS HETLAND**, chief engineer of WDAY Fargo, N. D., who has been on leave of absence for two years doing government research, has returned to his post at WDAY. **MEREDITH WILLIAMS**, former WDAY musician, released from the Navy, has returned as an operator in the engineering department.

**LLOYD MOORE**, war correspondent engineer of the CBC, is back in Canada after 26 months overseas, and has resumed his job with the CBC Montreal headquarters engineering staff.

**GEORGE GEBHARD**, recently of the U. S. Merchant Marine, and **CHARLES WALKER** are now transmitter engineers of WNY Watertown, N. Y.

**HARRY JACOBS**, studio field engineer on leave of absence, has returned to KGO San Francisco. He had been at Columbia U. on government assignment.

**HAROLD SLOAN** of Omenee, Ont., has joined **CHEX** Peterborough as control operator.

**RADIO DOING BIG JOB IN JAPAN—BELL**

DON BELL, Mutual correspondent in Japan, said in a broadcast to the U. S. Sept. 4 that radio is doing a big job at the present time in Japan. Starting Sept. 5, regular radio programs planned entirely for the 35,000 Allied prisoners of war are being broadcast from Radio Tokyo, now under American control.

"Americans who have not been able to hear real American voices for three years will now hear Army announcers, and prisoners will be brought up on the news of the world and given instructions to remain where they are until plans are completed for their transfer. American boogie-woogie and jive, as well as classical programs, are being brought to the prisoners through radio," Bell said.

At the Yokohama branch of the studios of Radio Tokyo, Bell met chief announcer of the Japanese controlled radio, Gumheratara, who said he wasn't so sure how much good Japanese radio was going to do unless certain changes were made. Gumheratara, Bell reported, believes that if freedom of fact is to come to the Japanese people, then freedom of speech and freedom to listen must be assured. During the war years, shortwave listening was a serious crime in Japan. The Japanese people could listen only to radio stations controlled by the government, and since the government was in the hands of the military, the people never knew two sides of a question.

**Decca Dividend**

DIRECTORS of Decca records have declared a regular quarterly dividend of 30 cents per share on Decca's capital stock payable Sept. 29 to stockholders of record Sept. 15.

**Ed King in UK**

CPL. ED KING, former producer for NBC in New York and Chicago, has been appointed chief producer for the armed forces network in the United Kingdom.

**Dixon IT&T V-P**

COL. GEORGE P. DIXON, formerly chief of air communications for all the U. S. air forces in ETO, has been elected vice-president of the International Telephone & Telegraph Co., New York. Prior to his Army career, Col. Dixon was associated with the National City Bank of New York as communications engineer and before that with the New York Telephone Co. as district manager of the Manhattan area.

WHAT was probably the first broadcast of the new unbreakable plastic record issued by RCA Victor Division of RCA (BROADCASTING, Sept. 3), was made by WABF New York, Metropolitan Television's FM station, on Aug. 29, day after the new disc had been previewed to the press. A subsequent broadcast on WABF demonstrated the difference between this record and the usual shellac discs.

**Network Accounts**

**New Business**

THE KNOX Co., Los Angeles (Mendaco), Sept. 16 starts Graeme Fletcher—News. Analyst, on Associated Network, Sun., 4:41:15 p.m. (EWT). Agency: Raymond R. Morgan Co., Hollywood.

*Federal's*  
**men know**  
*Microwave*

On a gusty March day in 1931 . . . when man's voice was beamed across the English Channel from an antenna less than an inch long and powered by a mere half-watt . . . Microwave was born.

This was the inauguration of a new technique in the art of communication . . . blazing the trail for modern, high fidelity television, FM transmission, pulse time modulation, plurality of currents on a common carrier, and certain other commercial applications for this technique.

Many of the scientists now at work in Federal laboratories participated in that triumph and helped in its development through the years. Now they are engaged in extending its application, opening vast and striking possibilities for the future of communications.

Pioneer in the field of microwave . . . a contributor to radio progress for more than 35 years . . . Federal stands for leadership in research, development and manufacture of equipment and components for every segment of the communications industry.

*Federal Telephone and Radio Corporation*

## *Great Audiences from Little Habits Grow!*

Daniel Webster had a most unusual habit on the speaker's platform of trying a succession of words or phrases, while searching for one that suited him—"Why is it, Mr. Chairman, that there has gathered, come together here, congregated, this great number of inhabitants, dwellers; that the roads, avenues, routes of travel, converge, meet, come together . . . ?"

Webster's habit doesn't lend itself to easy explanation. But Baltimoreans have

a habit that does. They know that the best in radio is found at "1400 Kc." Consequently, listening to WCBM has become a habit in Baltimore!

*Baltimore's Listening Habit*

Unit 540

*a limited number of Fairchild AMPLIFIER-EQUALIZERS!*

**U**NIT 540 is the latest model Fairchild Amplifier-Equalizer. Its design permits the unusual operational advantage of *unlimited frequency selection* over two critical ranges: 20 to 100 cycles; 4,000 to 10,000 cycles with an available boost of 0 to 20 db.

*Unlimited frequency selection* compensates for brilliance-loss at the slower 33.3 speed and for response-deficiencies of cutterhead, disc material, pickup or speaker by electronically boosting the higher frequencies from 4,000 on up to 10,000 cycles — with a negligible effect on volume and without loss in the bass.

Unit 540 can be used with two recorders to record or play back con-

tinuously by switching from table to table; to make two identical records at the same time; or to 'dub' from one table to the other as in copying a recording played on one table and recorded on the other.

Unit 540 is compactly designed to fit into a light-gauge metal trunk measuring 17" x 18" x 11". It can also be rack mounted. And provision has been made in the inputs and outputs to permit operation under many varying conditions — to meet the exacting professional requirements of the radio and communications fields.

Descriptive and priority data are available. Address *New York Office*: 475 — 10th Avenue, New York 18; *Plant*: 88-06 Van Wyck Blvd., Jamaica 1, New York.

## People Listen to WGY's PUBLIC SERVICE PROGRAMS

"THE FUTURE BEGINS NOW," a Public Service program on WGY, was presented for 26 weeks last fall and winter with author and psychologist, Ernest M. Ligon, PhD., of Union College, Schenectady. Dr. Ligon, on the program, discussed parent-child problems with guest community groups.

On the last four broadcasts a brochure of five scripts on "Discipline" was offered, and 1569 WGY listeners asked for a copy . . . proof of the popularity of WGY's Public Service programs among people in the Hudson Circle.

"The Future Begins Now," with Dr. Ligon, returns to WGY October 1, for 26 weeks.

## NEW MAGNETEPHON HAS HIGH QUALITY

(Special from Monte Carlo, Monaco)

DISCLOSURE has been made here that Germany manufactured a portable Magnetophon [BROADCASTING, Sept. 2] weighing 65 pounds overall. Tape recording and playback unit was demonstrated at Radio Monte Carlo to the U. S. Broadcast Mission. Portable equipment was left by Germans when they absconded in a hurry a year ago. French and Monacan engineers smuggled parts from the station while under German operation sufficient to rebuild two portable recorders now in regular use.

Permanent equipment weighing several hundred pounds had been seen previously at Luxembourg, Hamburg and Berlin but not in England and France. Fine quality of reproduction and playback impressed the mission. Steps have been taken to get U. S. patents. Equipment is manufactured by A. E. G. Magnetophon, Berlin, with plastic-base tape, iron oxide impregnated, made by I. G. Farben's Frederickshafen factory. Signal Corps officers are investigating the equipment and patents.

Portable units were used to record the Army Band when the U. S. group visited Monte Carlo Sept. 2. Playback was perfect. Florenz Fels, program director, said quality of the portable was as good as the heavy machine with perfect reproduction 50 to 8,000 cycles flat, but tapering off sharply thereafter. Portable weighs 55 pounds, amplifier 10 pounds.

## Speaks on Developments

JOHN ESAU, general manager of KTUL Tulsa, during the past month has made speeches before practically every civic organization in Tulsa and neighboring communities, making a stock address illustrating radio's latest developments. Mr. Esau takes with him several pieces of standard equipment for demonstration.

## Scharfeld Leads Probers for AMG

### Innermost Nazi Secrets Bared Under Careful Investigation

INNERMOST secrets of Nazi Germany's long preparation for war and the brutal "nacht und nebel" system are being uncovered by investigators of the Allied Military Government, working under Capt. Arthur W. Scharfeld, member of the law firm of Loucks & Scharfeld.

Capt. Scharfeld

Story of Capt. Scharfeld's discoveries is told in a dispatch to the Washington Star by Thomas R. Henry, Star correspondent. Writing from Munich, the correspondent tells how "nacht und nebel" or "night and fog" records have been found in clear language though they were supposed to have been kept only in undecipherable code.

The records covered the disappearance of persons who expressed anti-Nazi views. These persons were put to work in German factories, but as the war went on they showed a high incidence of fatal heart disease "induced by bullets".

Whereabouts of men alive are revealed by the records Capt. Scharfeld is probing, though few of those on the lists escaped the "heart disease".

Story of a hitherto unknown corporation, similar to the U. S. Defense Plant Corp., is unfolded in records Capt. Scharfeld is studying. They trace formation in 1934 of a Montan Industries, which bought up great tracts of land, mostly forests. Vast industries created for armament purposes were scattered and hidden from visitors and even Germans did not suspect the extent of the giant operations. In 1938 the plants were openly leased to German corporations, though financed by the Nazi regime for the armament program.

Capt. Scharfeld took the original AMGOT training courses at Camp Custer and Stanford U., going to England before the invasion. He went to France after the entry into Normandy and later was given an AMG assignment in Germany.

## Fire Prevention

JAMES D. SHOUSE, vice-president of Crosley Corp., was presented with a plaque on behalf of WLW Cincinnati for "outstanding public service in fire prevention" by Frederick Rauh, president of the Cincinnati Fire Underwriters Assn. The citation commended WLW for "special distinction among America's radio stations" in its cooperation with local and regional fire fighting organizations and for spreading information about fire hazards.

## Radio for GPs

(Continued from page 30)

VDMT teaser spot announcement effort. This followed the Lucky Strike LS MFT theme. "V. D. Means Trouble" was the message ten times daily on the air for a week. Then came the story. GPs were told to look for the green light for safety. "For a moment of play you might have to pay," ran the copy. "Look for the green light."

### No Shouting, Preaching

Capt. Sanford Cummings, operations officer for Germany (formerly radio department Benton & Bowles), told the mission about problems ahead on programming for the GI. He said the shouting, exhorting type of news commentary won't satisfy the boys. They get irritated when people shout at them. They don't want their news dramatized. When mention was made of Winchell, Heatter and Pearson, he said GPs are shouted at 20 hours a day, and they don't like shouted or evangelistic stuff. Col. Hayes concurred, saying they resented being preached at by a commentator.

FIRST of six dramatizations of Tolstol's classic "War and Peace" will open the winter series of "The World's Great Novels," produced by NBC "University of the Air," starting Friday, Sept. 14, at 10:30 p.m., over full NBC network from Chicago.

## Aids Veterans

ONE of a series of discussions on veterans' affairs over WIOD Miami recently proved its worth immediately. A local representative of the Veterans Administration mentioned in an interview that it is illegal for attorneys to accept payment for filing claims under the G. I. Bill of Rights. Within a short while, three veterans phoned the station and reported paying such fees. An investigation was begun immediately to correct the situation.

## Daily Serials

(Continued from page 24)

gram would you prefer to a 'soap opera'?"

Again, it is hard to get clear-cut replies to this question. Nineteen per cent (201) said they greatly preferred a good variety show with a clever master of ceremonies. *Breakfast Club* and *Breakfast in Hollywood* were mentioned specifically as the sort of a program these women preferred.

Eight per cent (82) said they liked *Aunt Jenny*, whose stories were not long drawn out, far better than soap operas. Ninety-two per

cent (948) said they enjoyed such a program much better than a "soap opera" which was not interesting to them. But it was not clear what "not interesting" meant.

The criticism which came up occasionally was that a particular serial was not "true to life". But many other women seized on just that point as the reason they liked to listen. It made them feel that they were able to meet their own problems, when they listened to other women struggling.

### Conclusion

To sum up:

If this sample of Columbus women can be taken as an accurate cross section for women in the upper brackets, with high school educations, who live in small cities, we can list the following conclusions:

1. Listening to daytime serials is not a neurotic symptom of American women. It is simply a substitution for human companionship during the day when the rest of the family is out of the house.

2. Eighty-two per cent of the housewives with children of school age listen to "soap operas".

3. Listening to daytime serials is part of a larger pattern of household activity and revolves around the household tasks.

4. Small children in the home influence a woman's listening habits. Mothers of small children tend to prefer music while they do their housework, whereas mothers of children of school age prefer the continued story.

5. Where another type of program is preferred to the soap opera, it is a program where the interest is held by a distinct personality, as in the case of a master of ceremonies or a story teller who lends continuity to the program.

## Wage Increase

SALARIES of members of the Radio Writers Guild with CBS in Chicago were boosted from \$220 to \$260 per month as a result of automatic 10% annual increases granted in a three year pact signed by WBBM Chicago, and Herb Futran, Guild president. New employes are to start at \$225 per month and apprentices at \$185.

## TOPS IN THE "HEARTLAND"

In the "Heartland" you'll find some of the richest, busiest farms of the midwest, plus important industries including meat packing plants, corn processing, soybean and sugar beet factories. Producing food for a hungry world has naturally increased the "spendable" income at home.

## Porter

(Continued from page 16)

commercialism" prevents "many stations from discharging their public responsibilities".

### Many Factors

"Obviously," he declares, "there are many offsetting factors on the other side of the ledger. Certainly a blanket condemnation of broadcasting stations and networks would be unfair. Leading networks and trade associations have undertaken to lay down standards which, if generally followed, would go far toward mending matters. But competition among stations and networks is so intense that usually the commercial sponsor or his agent has the last word."

In surveying records for license renewals, Mr. Porter says "we have no thought of making the original license application a rigid blueprint for the future. But we do expect to remind the broadcaster of his public responsibilities, and to narrow the gap between promise and performance." The next paragraph states that the FCC has no power to interfere with any specific program, nor is it a power which the Commission's chairman desires. Although not mentioned, the apparent incongruity between the FCC's renewal action and permitted power would seem to be cleared up by the word "specific".

Mr. Porter suggests, "Maybe the

## NYC Uses Show

NEW YORK City Park Department has received permission to use *Happy the Humbug*, syndicated transcribed children's show of NBC's radio recording department, as a marionette show for performance in the city parks. Plans are to take the marionette show this fall to public schools and hospitals.

time has come for Congress to clarify public policy in this field. It is certain if Congress did undertake a revision of the old Radio Act of 1927, it would not confine its considerations to the lengthy commercial announcement. Congress would doubtless take up questions of whether news should be sponsored at all, and consider proposals that certain hours of good listening time be withheld from sale entirely, in order that stations would have no alternative but to broadcast sustaining public-service programs during that period.

"They might consider the question of how radio can best be used to develop local talent in its own communities. And it would appear certain that provisions in the present act which require the Commission to encourage and foster competition would be strengthened and not weakened. These and many more problems would run the gamut of legislative debate if Congress decided to act."

If the radio industry "is to avoid legislative intervention in certain phases of its operation," the Chairman concludes, "it should undertake to discontinue practices which are making the public angry."

"There is a saying about 'putting your own house in order, before the law does it for you with a rough hand.' It is an old, trite saying, but still true," he warns, "as many a proud industry, from the railroads to the stock exchanges, knows to its sorrow."

## Einstein Repeat

FOR the first time since it went on the air, WGN-Mutual's *Human Adventure*, 9-9:30 p.m. CPT., Wed., will originate in Mutual's New York Playhouse, Sept. 12th. Program will also inaugurate a guest star policy with Clifton Fadiman and Colonel Lemuel Q. Stoopnagle starred on a repeat performance of "The Einstein Theory", first presented March 9, 1944. It drew 12,000 requests for a repeat broadcasts. Sherman Dryer, director-producer, in cooperation with the University of Chicago, will show how Einstein's theory was a basic part of research on the atomic bomb.

## NAB INAUGURAL DINNER ON OCT. 2

INVITATIONS will be sent early this week for the NAB inaugural dinner in Washington Oct. 2 at which Justice Justin Miller will formally assume office as trade association president.

All members of Senate and House, the Cabinet and leaders in official and military life in the Capital will be invited guests, the list of invitees to exceed 1,000. As a result, there will be limited space for broadcasters outside the Capital.

NAB board members, who meet Oct. 1-2 in Washington, will attend, along with three representatives to be designated from each district (one each from large, medium and small stations). Networks also will be limited and Washington stations will be allowed three each. Trade press, newspaper and press association invitations will be limited.

Program plans call for an address by Chairman Paul Porter of the FCC; farewell address by Interim President J. Harold Ryan, and inaugural address by the new president. Toastmaster had not been designated. Event will be held in the Presidential Dining Room of the Statler.

## NBC Revisions

REVISIONS of prices of NBC recorded syndicated programs, amounting in some cases to as much as 40 per cent, went into effect Sept. 1, according to individualized folders sent last week to stations throughout the country by NBC radio recording division, which this coming week will send similar notices to advertisers and agencies. Folder and an accompanying letter from Willis B. Parsons, assistant sales manager, point out that the "ever-increasing use" of these programs by stations and advertisers enables NBC to make the reductions, "despite rising production costs and larger budgets for radio shows". New prices should help stations in smaller markets in selling both time and programs, NBC believes.

## FM Applicants

(Continued from page 15)

Commission advised pending applicants it will consider their applications "as soon as practicable after Oct. 7, 1945". If examination of the application and the supplementary information received is satisfactory, it stated, "the Commission may make a conditional grant of your application subject to the condition that complete engineering information will be filed within 90 days after date of conditional grant."

However, the Commission "may issue a construction permit including the assignment of a frequency rather than a conditional grant" if the application contains the engineering data called for in the FCC report of Aug. 24 on FM Rules and Regulations [BROADCASTING, Aug. 27].

The Aug. 24 report was issued to enable manufacturers, licensees and applicants to prepare immediately for FM broadcasting service. The final draft is expected to be issued within the next two weeks.

The Commission policy for processing applications reaffirms its previous statement that FM commercial broadcasting would be assigned the 92-108 mc band, with noncommercial educational stations to be given the 88-92 mc band. The Aug. 24 report stated that the Commission intends to utilize the frequencies in the 106-108 mc band for FM stations only in the north-eastern part of the country and that in the remainder of the country this region of the spectrum can be used for facsimile.

Procedures for processing television and developmental and non-commercial FM stations will be issued shortly.

### V. P. Thorp

VAUGHN P. THORP, 51, an engineer at Bell Telephone Labs, New York, died Sept. 5 of a heart attack on the downtown street of Ridgewood, N. J. He had been an instructor in radar course in Bell Labs. school for war training and was the author of several handbooks for the armed forces on maintenance and operation of war equipment developed by the laboratories. He lived in Ho-ho-kus, N. J. Surviving are his wife, Hazel Z. Thorp, and a brother, Lt. Col. Kermit O. Thorp, stationed with the Army Air Forces in Chicago.

### Deny Noble Motion

MOTION filed July 21 in state supreme court of New York by Edward J. Noble, chairman of the board of American, in which he seeks to examine Donald Flamm, former owner of WMCA New York, in connection with the litigation concerning Mr. Flamm's charges that he was coerced into selling the station in 1941 to Mr. Noble for \$850,000 was denied by the court last Thursday.

BUD THORPE, WOAI Special Events Director, and Texas Ranger Walter Naylor, who aided in evacuation during the Texas Gulf Coast hurricane.

## TEXAS HURRICANE COVERED BY RADIO

FOLLOWING the hurricane on the Texas Gulf Coast, the Texas Highway Patrol teletype carried a message from Col. Homer Garrison, director of the Dept. of Public Safety, giving "Heartiest congratulations to Bud Thorpe and Hoxie Mundine of WOAI (San Antonio), for a job well-done."

The hurricane had been followed along the coast by Special Events Director Thorpe and Engineer Mundine, who spent four days with little sleep or food to accomplish what is considered one of the finest public service undertakings of WOAI.

The WOAI crew carried remote equipment and a wire recorder and

### Heatter Honored

A. A. SCHECHTER, director of news and special events of Mutual, presented Gabriel Heatter, commentator on the network, with a portable typewriter from the network's news division on Sept. 6, beginning of Mr. Heatter's 14th year of broadcasting. Presentation was made at a press luncheon at the Ambassador Hotel, New York, at which Edgar Kobak, Mutual president, and Louis R. Wasey, president, Erwin, Wasey & Co., agency for the commentator's sponsors, R. B. Semler Inc. and Zonite Products Corp., paid tribute to Mr. Heatter's achievements. His broadcasts last month received the top Hooper rating of all network commercial programs, with 11.8.

FOUR of American's "Quiz Kids," Joel Kupperman, Ruthie Duskin, Richard Williams and Harve Fischman are subjects of an article, "The Quiz Kids Are in the Money", in the September issue of Redbook magazine.

were provided use of Ranger Walter Naylor's two-way shortwave radio. By telephone and shortwave the station received reports on the storm's progress and estimated time of arrival at various points along the coast were broadcast. An invaluable service in evacuation was rendered since many telephone lines were down.

At the height of the storm, Thorpe and Mundine originated a broadcast from Corpus Christi, bringing in Naylor by shortwave from Aransas Pass, 30 miles away. Highway patrolmen and Red Cross representatives were interviewed.

KTBC Austin made hurried plans to report the hurricane through Manager Pat Adelman who was vacationing in Galveston at the time. A special line was arranged for and it appeared as though the station manager would spend his vacation reporting the story but the storm died down before reaching Galveston.

## WDSU

(Continued from page 16)

fillment of the statutory requirement to afford him 'equal opportunities'."

The Commission also denied that the offer of WDSU to clear time between 8 p.m. and 10 p.m. on Saturdays for Sen. Overton was "equal" to the time used by Mr. Stephens on Thursday evenings and pointed out that the latter made only one Saturday night broadcast during the campaign, and that on the last Saturday before the election. As to the comparative value of Saturday and weekday time, the Commission observed: "One has merely to compare the number of persons on the streets and in various public places such as theatres, restaurants and night clubs on Saturday nights with the number at similar places on week nights to realize that a station's potential listening audience, especially for serious political speeches as distinguished from dance music and similar programs, is likely to be less at such time than on week nights."

### Contrary to Policy

Referring to testimony before it by Fred Weber, manager and part-owner of WDSU, that the station could not offer time on weeknights to Sen. Overton because of an established policy not to cancel regularly scheduled commercial programs in order to clear time for political broadcasts, the Commission asserted: "This statement of policy reflects such a complete failure on the part of respondents to appreciate their obligations as station licensees (to operate in the public interest) as to require severe censure of such policy."

"Under the Communications Act of 1934 and the Commission's Rules and Regulations, a station licensee has both the right and the duty to cancel such previously scheduled programs as may be necessary in order to clear time for broadcasts of programs in the public interest. And the mandate of Section 315 is both positive and explicit: 'He shall afford equal opportunities to all

other such candidates for that office in the use of such broadcasting station. . . . It is impossible to reconcile respondent's policy with this statutory requirement."

As both majority owner of the station and candidate for public office, Mr. Stephens, the Commission held, "was under a peculiar obligation to make certain that the operations of this station did not afford the opportunity for his opponents to complain that the public facility over which he had control was being used for personal political advantage. A station operator more sensitive to the requirements of the statute and the traditional practices in the broadcasting industry would have been more scrupulous in this respect . . ."

### Record Not Clear

"Had the record been clear that Stephens as a licensee of this Commission wilfully and deliberately used this privileged position to discriminate against his political opponents such an offense would warrant revocation proceedings. It appears, however, that Stephens, who was not the active manager of the facility, was perhaps more guilty of a lack of understanding of his obligations and responsibilities as a licensee than any wilful intent to utilize his broadcasting facilities unlawfully."

Testimony at the hearing on the complaint brought out that management and control of daily operation of WDSU were under Mr. Weber and that neither Mr. Stephens nor H. G. Wall, remaining minority owner, participated actively in station operations.

Reviewing its findings, the Commission saw no justification for drastic action "because of a single episode in which the licensee exercised questionable judgment in the operations of his station." It pointed out that "the only sanction [it] could apply would be after appropriate further proceedings to revoke the station's license and thus destroy a service which the Commission has heretofore found meets the standards of public interest."

Considering the attendant circumstances, the Commission therefore decided that proceedings be closed, with notice that the record is subject to further review in considering the station's overall operations when application is made for renewal of license. Addressing broadcasters it concluded: "This proceeding should serve, however, to remind the licensee that the facility in which he has an interest is not an instrumentality to be used for his personal political advancement. Broadcasters have a particular obligation to avoid discrimination in political contests and broadcasters generally are conscious of this responsibility."

The proceeding was the first of its kind under Section 315 of the Act. Attorneys William Koplovitz and Richard C. O'Hare represented the station and P. W. Seward and Philip Bergson handled for FCC.

## Shaffer Is In Charge Of WSPA Spartanburg

ROGER SHAFER has been named assistant general manager of WSPA Spartanburg, and Guy Vaughan Jr., commercial manager.

Mr. Shaffer has been connected with the Spartanburg Advertising Co. station owners since Nov., 1940. He will have charge of the operation of the station during the absence of Walter Brown, vice-president and general manager, who is now special assistant to the Secretary of State, James F. Byrnes.

Mr. Shaffer succeeds John W. Kirkpatrick, who has resigned [BROADCASTING, Sept. 3].

Mr. Vaughan returns to WSPA after an absence of ten years, during which he has been with the Spartanburg Herald-Journal Co., handling national and local advertising. Prior to going with the newspaper he served as announcer and salesman for WSPA.

## Italy

(Continued from page 18)

rated high but U. S. transcribed programs are top.

Current set tax is 160 lira per year, double that six months ago. It is expected to be doubled again in near future. Italy is starting listener surveys by interviewing people in factories and homes on their program choices. Delayed recall method is used. Ronla operates 12 hours daily on a split schedule, 7-9 a.m., 12-2:50 p.m., 5-midnight. No regular advertising agencies operate in Italy. Station or networks sell whole program including talent. Network programs are based on cost-per-minute, usually about 1,200 lira (\$12). No distinction is made between day and evening time but plenty of the latter is available. Under the new order six major political parties are given 10 minutes a day alternately after the 1 p.m. news. Four minor parties get time Sundays, once per month.

### Has Own Agency

The Italian company has its own talent agency, SIPRA, which sells programs commercially. Advertisers could influence program type but usually buy one with an established audience.

U. S. Broadcasting Mission was briefed on the AEF station in Rome by Capt. James Rawley, the director and a former Hollywood radio actor, who had unvarnished observations on the importance of American-type radio. Overseas from the start, he told how stations using the best recorded network programs plus AFRS had kept the Army informed and entertained and still served the native populace. Entirely divorced from AFN, the Rome station has a staff of a dozen. Because the Italian people like our music the Army radio has helped break down barriers, Capt. Rawley said. Even Germans listened, he said. Italian newswriters held the AEF station had 75% of the Rome audience and fan mail supported the claim. Station receives an average of 4,000 letters weekly. Dina Shore is most popular artist, with Roy Acuff, hillbilly, ahead of Frank Sinatra. Surveys show GI's once liked jive but now want sentimental music. Radio in the Mediterranean Theater is as good as any in the world because it has pick of the best talent via recordings, the original production cost of which would run \$1,500,000 weekly.

Programs are decommercialized but Army commercials are substituted. Reaction proves that commercial radio is still tops because the people take heed of what they hear. Gen. Clark is absolutely radiominded and encouraged development of stations throughout the Italian campaign.

Capt. Rawley cited reports from Army doctors that patients convalesced faster with programs available. This was especially true among amputees and cast cases. Doctors called radio a Godsend. Referring to British radio compe-

## RAY BAKER NAMED KOMO COMM. MGR.

RAY BAKER, network sales representative of NBC in the San Francisco area, has been appointed commercial manager of KOMO, NBC San Francisco outlet, according to an announcement made last week by O. W. Fisher, president of "Fisher's Blend Station", KOMO.

Born in Washington State, Mr. Baker was graduated from Stanford U. He was Oakland manager for Pacific Railroads Advertising Co. in 1936, and with KFRC San Francisco for six years. He has been with NBC since 1942.

Mr. Baker

tion with ours in Rome, Capt. Rawley said the British haven't got a chance because they play British recordings far inferior to ours. British soldiers prefer our stations. Many listeners believe the most important secret weapon for peace is a commercial radio system, Capt. Rawley said, urging a fully commercial competitive system for Italy, which appreciates our ways.

## VIPS

(Continued from page 18)

ican make transcriptions of outstanding ceremonial events for U. S. stations was favorably received by the Rev. Filippo Soccozi, Vatican radio director.

Second portable Magnetophon tape recording playback machine was located at the Vatican station. It was bought from Germany five years ago.

Committee from the Mission held a brief conference with Italian Premier Ferruccio Parri in Rome Wednesday. The Chief of State thanked America for its leadership in world affairs and its aid to Italian recovery. He delayed a Cabinet

meeting for an interview with Morris Norvik, manager of WNYC New York and Mayor LaGuardia's radio advisor. Committee included Col. Kirby and Messrs. Miller, Woods, Reinsch, Hedges, Swezey, Campbell and Taishoff. Riccardo Aragno, commentator of Radio Roma, was interpreter.

Domestic scene 7,000 feet up, flying from Rome to Paris—Mark Woods, American president, sewing a torn coat lining.

Mission members were guests Tuesday night of U. S. Ambassador Alexander C. Kirk at the famed Palazzo Barberini. Afterward they were guests of Anthony Ravell, director of Voice of America, former OWI enterprise and now presumably under the State Dept. Heads of Italian radio attended.

When transatlantic travel becomes commonplace, the famed Riviera will have plenty of customers among broadcasters. The Mission shacked up at Hotel du Cap between Cannes and Nice Aug. 31, Sept. 1, 2 before leaving for Rome. Like other billets it was an Army recreation area. Brig. Gen. Riley Ennis, ex-desert fighter, commands the center and acted as host.

Ten missionaries went to Monte Carlo in nearby Monaco Sept. 1 but couldn't try their luck because Gen. Eisenhower had ordered the Casino off limits for the missionaries. MPs escorted a Casino tour at which broadcasters picked up souvenir chips but didn't have a chance to play. The Monte Carlo radio station was visited.

## T V Quiz Show

WBKB Chicago, television station, will present *Telequizzicals*, video quiz program, as a weekly feature, each Friday, at 8:00 p.m. as a result of program's favorable listener reaction. Show is sponsored by Commonwealth Edison.

## Ackerman Trip

HARRY ACKERMAN, vice-president in charge of programming of Young & Rubicam, New York, leaves on a business trip to the West Coast Sept. 14.

## Surrender

(Continued from page 17)

Francisco and fed to networks was transmitted on 17225 kc from the *Ancon* and relayed by the Navy's Guam station using 3 kw on 15930 kc. Additional signals were relayed from the *Iowa* direct to San Francisco and from the Navy radio station at Okinawa, in addition to the Radio Tokyo transmission. Other transmitters were available on the *New Jersey* and the *Catoctin*.

Navy's transmitters and the Army's Radio Tokyo setup took a cue from RCA San Francisco, relayed via Guam, and started their recordings at the same moment. The signals on the *Ancon* were fed out of the recorders without dubbing. One spool carried the first 22 minutes of the ceremony and a slight delay occurred in shifting to the second spool, which held the last 4 minutes 10 seconds of the ceremony.

### Reason for Delay

Edward's version of the reason for delayed broadcast follows:

"To quote a Navy officer, 'in order to control the situation with more than 300 war correspondents representing the press and radio of the world from several transmission points in the vicinity, the War and Navy Depts. in Washington had decided with the concurrence of Gen. MacArthur that a delayed release of one hour-and-a-half be made.'"

That was so that many details of the radio programming, the filing of press copy, the handling of sound, closely coordinated with the prearranged tieup with the White House, could be done with the certainty that it would function properly. This Navy officer said that if such a system had not been used it would have been impossible to perfect arrangements in the short time possible.

"So the news association and the radio men all were on an even start from the *Missouri*. Radio, instead of having a direct shortwave circuit from the *Missouri*, recorded the broadcast."

Following the pooled broadcasts of the surrender signing and by

"Funny how WFDF Flint starts me swinging."

President Truman, NBC at 10:05 p.m. Saturday broadcast the victory talks from Gen. MacArthur and Admiral Nimitz which NBC had recorded for the occasion. At 10:17, NBC presented its symphony orchestra, under the baton of Arturo Toscanini, in Victory Act 3, concert symbolizing the end of war in the Pacific as Acts 1 and 2 had celebrated allied victories in Italy and in Germany. From 11:08 to midnight NBC broadcast commentaries and analyses of the surrender by Kenneth Banghart and John W. Vandercook in New York and Clifton Utley in Chicago with Merrill Mueller and Joe Hainline giving color stories on the surrender ceremonies from Japan.

### NBC Special

NBC's only special broadcast on Sunday was the special Armed Forces show, pooled to all nets, 9-9:30 p.m. Blue had nothing special outside the pooled broadcasts.

CBS put on Robert Trout and Quincy Howe from New York, Wexley Edwards and Gene Rider from Japan with color, Tim Leimert from Guam, Tris Coffin from Washington and William Dunn from Tokyo, resuming regular programming at 11 p.m. A midnight roundup brought Bill Downs, recorded, from Yokohama reporting on MacArthur's orders to the Japs, Don Mosely from San Francisco, Harry Flannery and Chet Huntley from Hollywood, and Bern Bennett from New York. Sunday included religious programs, dedicated to V-J Day, Secretary of the Navy Forrestal at 2:55 p.m. and the AFRS show Sunday night, 9-9:30. At 11:15 CBS presented a documentary Pearl Harbor to Tokyo written by Margaret Miller (Mrs. Paul White).

Appropriate feature broadcasts were carried by American and Mutual. Among Mutual's programs was a commentary by Jack Mahon from Japan, and the Sunday pooled description of the Luzon surrender. Mutual had Bob Brumby with first eyewitness account of atomic bomb damage at Hiroshima.

### Beer Buys Local

SCHOENHOFEN EDELWEISS Co., Chicago (Edelweiss beer), will be one of the heaviest buyers of local radio time if present plans are completed to sponsor's satisfaction. Olian Adv., Chicago, sponsor agency, has approached WMAQ Chicago, for 11:15-12 midnight period, Mon. through Fri.; also WENR Chicago for 10-11:00 p.m. Sunday, 25-minute week-day period, and half hour Saturday slot over WBBM Chicago. If times are made available, agency will sign 52-week contracts for this fall.

### Bialic With B&B

ROSE BIALIC, formerly with the press department of CBS, has joined the publicity staff of Benton & Bowles, New York.

## BENTON, RUSSELL JOIN STATE DEPT.

DONALD S. RUSSELL, part owner of WSPA Spartanburg, S. C., and William Benton, of Southport, Conn., former partner with Chester Bowles in the advertising agency of Benton & Bowles, have been nominated assistant secretaries in a reorganization of the Dept. of State. Benjamin V. Cohen, one of the original New Deal "brain trusters", was nominated by President Truman to be State Dept. counsellor. Nominations are made on recommendation of Secretary Byrnes.

Mr. Russell, 39, was a member of the Byrnes law firm in Spartanburg. With Walter Brown, vice-president and general manager of WSPA, he served as assistant to Judge Byrnes when he was Director of War Mobilization. Mr. Brown is now serving as an assistant Secretary of State, advising on public relations. At present he is in London with a State Dept. contingent but it is understood he desires to return to WSPA. Mr. Russell is slated to receive the assignment of Congress liaison.

Mr. Benton, 45, is vice-president of the U. of Chicago. He will be in charge of cultural and public relations, post formerly held by Archibald MacLeish. Mr. Cohen also served on the Office of War Mobilization and has been an assistant to the Secretary.

## BMB

(Continued from page 17)

zation; Roger Clipp, WFIL Philadelphia, secretary-treasurer and chairman of the finance committee; Linnea Nelson, J. Walter Thompson Co., chairman of the advertising industry relations committee; Joseph M. Allen, Bristol-Myers Co., chairman of the committee on by-laws and procedure; D. E. Robinson, Sherman K. Ellis & Co., chairman of the board committee on research; A. N. Halverstadt, Procter & Gamble Co., chairman of the technical research committee.

### Finance Committee Meet

On Monday the finance committee will meet to discuss the pricing of the network subscription plan and to adopt an operating budget for BMB for the fourth quarter of 1945. On Tuesday the by-laws and procedure committee will discuss progress of the code of practice which BMB hopes to issue to subscribers several months in advance of the first survey report.

Wednesday, the advertising industry relations committee will analyze BMB's present subscription list and will lay plans for educational activities, including a new presentation of BMB and a booklet explaining its plan for measuring station circulation. This committee is expected to recommend that the board set a deadline for accepting subscribers for the first survey and to make definite recommendations for working arrangements with Bureau of Broadcast Measurement of Canada.

The executive committee will hold its monthly meeting Thursday.

### Tobacco Net Plans

BOARD of Directors of the Tobacco Network, regional Eastern-North Carolina web, meeting in Goldsboro Sept. 1, voted to extend all affiliation contracts to two years. Formerly plans called for one year. Board also planned for an extensive promotion campaign. Attending were: Louis N. Howard, WHIT New Bern, president of the network; Billy Hodges Jr., WGTC Greenville, v-p; Harry Bright, WGBR Goldsboro, secretary; Allen Wanamaker, WGTM Wilson, treasurer; Fred Fletcher, WRAL Raleigh; Paul Moyle, WFNC Fayetteville.

### WLW Meeting

SEMI-ANNUAL meeting of the WLW Cincinnati merchandising department Sept. 7-9 was to discuss various aspects of postwar merchandising. Approximately 50 members of the staff were to attend. Marshall N. Terry, director of promotional activities, presiding, speakers scheduled included James D. Shouse, Crosley Corp. vice-president in charge of broadcasting; Robert E. Dunville, WLW general manager; Harry Mason Smith, general sales manager; J. M. Zinselmeier, director of drug merchandising; R. M. Fanning, director of grocery merchandising.

## OCCUPIED JAPAN

Stone Describes Entrance of  
News Correspondents

JACK STONE, WRVA Richmond war correspondent who witnessed the signing of the Japanese surrender from a second turret gun aboard the *Missouri*, cabled the following description of the occupation:

"We came down at Atsugi Airfield at 7:45 a.m., Aug. 30. Japanese military liaison at Atsugi were impassive, but helpful with Army trucks when ordered. Japanese sentries at every hamlet and crossroad on the way to Yokohama turned their backs to our convoy of more than 100 correspondents. We were the first in Yokohama with the Eleventh Airborne establishing perimeter. There were no smiles. Children peeped from safe corners. Adults turned their faces. Had lunch at the hotel that is now MacArthur's headquarters. It was a poor meal served by Japanese waitresses.

"I drove the Japanese army truck back to Atsugi with correspondents. We are temporarily quartered at Hotel Yokohama. Drove truck loaded with correspondents to Tokyo outside perimeter around Imperial Hotel. We were the first group of correspondents in Tokyo. Had lunch at the Imperial Hotel—three-course meal—thirty-two cents—not bad! Drove along Imperial Palace Moat, no Japanese gathering, no hari kari incidents noted. Stopped and bought souvenirs; prices so far are reasonable.

"We are first Americans most Tokyoans have seen. Rode past regiment of Japanese soldiers on review. Japanese general and staff stopped to watch us. On the way back to Yokohama we ran out of gas. A Jap firetruck came to our aid, with driver bowing and grinning. Back in Yokohama saw Japs leaving offices and factories for day and passed packed streetcars and busses."

### MacInnes in N. Y.

CHARLES MacINNES, Young & Rubicam's representative in Brazil, is in New York for the next four to six weeks.

## New Improved Sets Forecast in Month

Philco Head Sees 3½ Million Radios Possible This Year

JOHN BALLANTYNE, president of Philco Corp., Philadelphia, said in a broadcast on Mutual's *Reconversion and Jobs* program Thursday night that at least 25,000,000 radio sets are needed to meet the present demand in the United States alone, and the first of these sets, greatly improved in tone, power, selectivity and appearance should be available within the next month or two.

It is possible, Mr. Ballantyne said, that 3,500,000 receiving sets will be manufactured before the end of this year, with many improvements gained from wartime research.

Mr. Ballantyne pointed out that the export market for American radio sets and phonographs has never been more promising, which means that employment opportunities in the radio industry are high.

"A recent survey by the Radio Manufacturers Assn. revealed that 145,000 people would be employed by the radio industry when reconversion was completed. This represents an increase of 68% over the pre-war level. When television reaches a nation-wide scale, employment in the radio industry will be far above even these immediate post-war levels," he said.

Thomas H. Beck, president, Crowell-Collier Publishing Co., who also spoke on the broadcast, predicted at least four years of great prosperity following reconversion, with corresponding increases in advertising for radio, magazines and newspapers.

### Amoco Redskin Hookup

THREE stations will carry sponsored broadcasts of the Washington Redskins football schedule, WMAL Washington, WITH Baltimore and WLEE Richmond. American Oil Co., Baltimore (Amoco) is sponsor, along with Lord Baltimore filling stations, placing through Joseph Katz Co., Baltimore. WLEE joins the hookup Oct. 7, since it will not take the air until Oct. 1.

## AVCO

(Continued from page 15)

enced by many considerations other than the paramount one—whether the purchaser is best qualified to operate the station in the public interest.

"For example," the majority observed, "the retiring broadcaster is very apt to be more influenced by the size of his prospective purchaser's pocketbook than by the type of service which the purchaser plans to offer the public. In this case Mr. Crosley testified that whoever bought his company had to buy it as a single unit. Thus, the field of possible purchasers of WLW was at once narrowed to persons and concerns who were able and willing to buy the \$22,000,000 manufacturing corporation to which the station was licensed.

### Majority Decision

"However, so long as Mr. Crosley has chosen a purchaser who possesses the prescribed qualifications, his selection cannot be set aside—even though there might be many other better qualified persons willing and anxious to take over the operations of WLW—unless past precedents are ignored and the Commission embarks upon new policies which would cast serious doubt upon the qualifications of a substantial number of existing stations."

The majority pointed out that the procedure which has prevailed in transfer cases is "in sharp contrast" to that prescribed by Congress for considering new station applications although the standards prescribed in the Act are identical. There is a competitive situation where issuance of particular broadcast frequencies are concerned and the Commission usually has a choice between applicants. Anyone has the opportunity of going into the broadcast business, where new stations are concerned.

But the procedures relating to transfers, the opinion held, "has resulted in a situation where . . . more than half of existing licenses were not selected by the Commission on the basis of competitive

## Harmon Returns

TOM HARMON, Michigan All-American '39 and '40, recently discharged from the AAF, has signed with WJR Detroit to broadcast the U. of Michigan football games this season. First broadcast is Sept. 15, with Great Lakes-Michigan game. Before joining the service, Capt. Harmon was WJR sports director.

applications but instead were selected by some transferor who in many cases, like Mr. Crosley, was retiring from the broadcast business."

The majority declared that the Commission is unanimous in the view that "immediate steps" be taken to harmonize transfer procedure with the benefits of competition provided new station applicants so that in future cases like the present a choice would be afforded among various purchasers.

On other aspects of the Crosley-Avco sale, the majority agreed:

That unless established policies are to be ignored there is no alternative but to approve the transfer.

That extensive interests in other businesses enjoyed by the transferee are not a basis for denial but pose a problem for Congressional consideration.

### Stock Not Basis

That the fact that the transferee's stock is widely held and listed on the stock exchange is not a basis for denial.

That there is no basis for disapproval on the ground the seller is better qualified than the purchaser.

That the transfer cannot be denied because the radio properties are not segregated from the overall consideration paid.

As to the price paid for the Crosley properties, the majority felt that it cannot properly draw this line on the basis of the present Communications Act and must await establishment of standards

by Congress. Until this phase of the problem is dealt with through legislation, it declared, it must continue to limit its considerations to three questions:

1. Does the price paid indicate trafficking in licenses?

2. Does it adversely affect the licensee's financial qualifications?

3. Would the price paid result in overcommercialization of the station at the expense of rendering a public service?

The majority could find no basis for substantiating any such possibilities.

### Two Dissenting Opinions

Dissenting, Commissioners Walker and Durr pointed to Aviation Corp. as a large holding company of a type that controls important segments of the economy without corresponding responsibility. The applicant failed to give the FCC a valuation on its broadcast properties, they argued, nor has it shown familiarity with duties and responsibilities of a licensee.

Answering the majority argument that denial of license to an applicant whose business interest lies outside broadcasting would throw the industry into chaos, the minority said it would have been more appropriate to await Congressional action on weakness in the legal provisions involving transfers before approving a transfer of domestic and international facilities of the importance involved in the Crosley case.

The Walker-Durr dissent said competition for frequencies should not be in terms of ability to pay the highest price but in terms of public service to be rendered. They contend that the Commission's past mistakes or omissions in the field of station transfers do not vest an interest in any licensee or prospective licensee, and the Commission's statutory responsibility is not diminished by any such failures or omissions.

Failure to disclose price at which Crosley broadcast facilities are transferred is cited in the dissent, along with possible pressure of the holding company on the station management to earn a return and the consequent danger of wiping out the limited amount of sustaining time now available.

The two Commissioners agreed that denial is required on grounds stated in a separate dissent by Commissioner Wakefield.

### Package of Equities

He argued that Avco is less qualified than Crosley and that the successor should have qualifications assuring at least a comparable standard of service. Avco was not originally interested in buying radio stations, Commissioner Wakefield said, considering the radio properties "a package of equities". Adequate time existed to find a fully qualified buyer, he added. He also pointed to the lack of information as to the price paid for radio

properties as well as the future program and financial policies.

The proposed procedure of the majority, he said, should have been instituted in this case. He agreed the case showed deficiencies in the Act and favored specific recommendations for submission to Congress.

### Proposal

Text of proposed procedures to govern future transfer cases follows:

The institution of a completely satisfactory procedure to govern transfer cases must await further congressional action. However, the Commission is of the opinion that under the present Act it has the power to take certain steps which are in the right direction, even though we cannot completely deal with the questions of price or consideration. The Commission will therefore at an early date call a public hearing for the purpose of considering proposed new rules and regulations which, if adopted, would apply to all transfer applications filed after the date of this decision and which would prescribe procedures along the following lines:

1. Upon the filing of an application for a transfer or assignment of license involving a controlling interest in a broadcast station, the Commission will give public notice of the pertinent details of this application and will require that the applicant give similar notice in a local newspaper in the community in which the station is established. This public notice, both by the Commission and the applicant, shall state the terms and conditions of the proposed sale and the name of the transferee. It shall further contain an announcement that any other person desiring to apply for these facilities may do so on the same contract terms and conditions as set forth in the contract.

### Retain for 60 Days

2. The Commission will retain the application for a period of 60 days, during which time no action shall be taken in order to afford interested persons an opportunity to file competing applications.

3. If no other applications are filed during this 60 day period, the Commission will then consider the original application on its merits.

4. If, during the 60 day period, other applications are filed, the Commission will then consider all applications on their merits. If it appears that the transferee selected by the licensee is the best qualified, and that the transfer is otherwise in the public interest, the Commission will grant such application without a hearing. If the Commission cannot make such a determination on the basis of the application, it will be designated for hearing along with all other competing applications.

5. At this hearing one of the issues shall be "to determine which of the applicants is best qualified

## Ford Resumes

FORD SUNDAY symphonic hour, discontinued since 1942, returns to the air over American network, 7-8 p.m. CPT, Sept. 13th. William J. Program date is set to coincide with first major release of Ford automobiles to dealers. Contract for 52 weeks was signed by Kenyon & Eckhardt, Chicago.

to continue the operation of the licensee".

6. If at the conclusion of the hearing the Commission determines that the proposed transferee selected by the licensee is the best qualified and that the transfer is in the public interest, the application will be granted. However, if the Commission concludes that one of the competing applicants is best qualified, an order will be entered denying the transfer application and granting consent to a transfer to a competing applicant, if the parties enter into a contract and file a new joint application accepting the grant within 30 days.

7. The proposed new rules and regulations, if adopted, would not apply where less than a controlling interest in a station is proposed to be transferred. Nor will they be applicable in cases where the transfer or assignment involves no real change in the control of the station. For example, transfers from corporations to partnerships where control is retained by the same persons would not be covered. Nor would the proposed regulations apply to transfers from a licensee to an executor or administrator, etc.

### Carry Out Intent

It is believed that such a procedure will more adequately enable the Commission to carry out the congressional intent that the best qualified person be licensed for each available frequency. No harm will result to the transferor since he either sells his station to the person he selected under the terms and conditions specified in his contract, or he sells to another person on the same terms.\* However, if he is unwilling to sell on the same terms and under the same conditions to another person, whom the Commission believes is better qualified, then the transferor need not sell at all. The only change which this procedure will cause is giving the Commission some real voice in the selection of a proper successor.

One additional problem remains. Even if a procedure such as this had been in general effect when this case arose, it would not have solved one aspect of the problem. The in-

stant transaction concerns not only the sale of the Crosley broadcasting facilities but in addition the transfer of the manufacturing plant which The Crosley Corporation owns. It would obviously not be feasible to expect a competing applicant in a similar situation to purchase the entire Crosley organization in order to obtain the right to operate its broadcasting properties. Accordingly, in order to prevent a recurrence of this situation in all future transfers where broadcasting assets are comingled with substantial amounts of non-broadcast assets, the Commission will not entertain an application for the transfer unless a segregation is made and a separate purchase price agreed upon.

### Part Way Only

This proposed procedure will, however, only go part of the way toward correcting the deficiencies in the transfer procedure. There will still be no ceiling on the prices which can be charged for broadcast stations and this will tend sharply to restrict the field of potential transferees. In most cases a person retiring from the broadcast business will naturally seek the purchaser who will pay the highest price. While there will frequently be other qualified persons who would be willing to meet this price, if the price is artificially high and exceeds the value of the physical properties and good will there will be many more qualified persons who will not be in a position to compete. Accordingly, a completely effective transfer procedure must not only permit the Commission to select the transferee, but must also insure that the field of its choice is not unreasonably restricted by permitting sales of stations at artificially high prices. Corollary problems related to the control of prices are the question of whether radio stations should be required to keep their accounts on a uniform basis so that any price ceiling which Congress may prescribe will be applied to all stations on a uniform basis. Also it is believed that Section 310 (b) of the Act should be further strengthened by giving the Commission specific jurisdiction over the transfer of substantial minority interests in radio stations.

The Commission is of the opinion that these problems should be brought to the attention of Congress with a recommendation that it consider legislation and steps to that end are being taken.

\* In proposing this new procedure we are not unmindful of the argument that will be made against it on the ground that in many cases a contract of sale is based upon the credit standing of the purchaser and that the seller may not be willing to rely upon the integrity of the applicant which the Commission has selected. Such objection is easily overcome. In lieu of credit a competing applicant may be compelled to pay cash. If the contract calls for installment payments and the seller is unwilling to rely upon the fidelity of the purchaser's promise, the total purchase price can be placed in escrow, to be disbursed in such installments as the seller desires. These and other minor difficulties may be easily resolved.

## Not Unusual for Big Business To Hold Broadcast Licenses

JUSTIFYING its approval of the Crosley-Avco transfer, the majority opinion of the FCC pointed out that it is nothing unusual for big business concerns to hold broadcast licenses. "Large companies were among the pioneers of radio broadcasting," the opinion observed, "and contributed much to the development of the art." Some of the early licensees cited were:

Alabama Power Company (a public utility)  
 Ford Motor Company (automobile manufacturer)  
 Gimbel Brothers (department store)  
 Warner Brothers (movie company)  
 Westinghouse Electric and Manufacturing Company (manufacturer of electrical products)  
 General Electric Company (manufacturer of electrical products)  
 Midland Refining Company (oil company)  
 Earl C. Anthony (distributor of automobiles and accessories)  
 Union Trust Company (bank)  
 Woodmen of the World (life insurance)

In addition, the decision declared, there were a large number of newspapers and various industrial and manufacturing firms.

If the Commission were to deny the transfer to Avco on the ground that such a company, because of its other interests, is not qualified to hold a license, said the majority, then such a policy would have to be applied to present holders when they seek license renewals. The result would be, it asserted, that doubt would be cast upon the status of licenses held by such companies as:

Westinghouse Electric and Manufacturing Company (manufacturing)  
 Earl C. Anthony, Inc. (automobile distributors)  
 Southwestern Sales Corporation (oil)  
 General Electric Company (manufacturing)  
 Stromberg Carlson Company (manufacturing)  
 L. B. Wilson, Inc. (theaters)  
 Loews Incorporated (theaters)  
 Durham Life Insurance Company (insurance)  
 L. Bamberger and Company (department store)  
 National Life and Accident Insurance Company (insurance)  
 Travelers Indemnity Company (insurance)  
 Sidles Company (automotive equipment)  
 Farmers and Bankers Life Insurance Company (insurance)  
 Columbia Broadcasting System (recordings and transcriptions)  
 American Broadcasting Company—Edward J. Noble (candy business)  
 Radio Corporation of America (radio manufacturing and common carrier)

Consolidated Amusement Company (theater operators)  
 Fisher Flouring Mills (flour)  
 May Seed and Nursery (seed distribution)  
 Jefferson Standard Life Insurance Company (insurance)  
 Congress Square Hotel Company (hotel)  
 Gimbel Brothers Inc. (dept. store)  
 Surety Life Insurance Company (insurance)  
 General Tire and Rubber Company (tire manufacturer)  
 Maison Blanche (department store)  
 L. D. Baggs (bus operator)  
 Henry Field (nursery and seed)  
 H. D. Peet (packing company)  
 Lit Brothers (department store)  
 Cook Paint and Varnish Company (paint manufacturers)  
 Southwestern Hotel Co. (hotel)  
 J. C. Liner Jr. (laundry business)  
 James A. Noe (gas well operator)  
 California Crematorium (undertaker)  
 Breen and Loomis (creamery)

And further, the opinion held a policy of discrimination against companies having diverse interests would exclude station WLW even if it remained under its previous ownership "since the principal business of the Crosley Corp. is not broadcasting but the manufacturing of household appliances".

## Ralston Tom Mix, Ole Opry Shows Get High Hooper; Station Contest Starts

SEIZING the opportunity offered by the high Hooper rating of the *Tom Mix* show, Ralston Purina Co., St. Louis, is running an ad in trade magazines suggesting the program as a means for finding out the mail pull of the station carrying it. Company has planned a contest, with eight prizes, the first of which is a \$500 War Bond. *Tom Mix* is heard on 215 Mutual stations, 5:45 p.m. (CWT).

According to Hal Chase, advertising manager of Ralston Purina's cereal department, the series has attained since it has been on the air the highest Hooper for a daytime audience children's show, the largest male adult audience, and the largest children's audience for that type show. Charles Claggett, vice-president of the Gardner Advertising Agency, St. Louis, won the 1945 Irma Proetz Award for his commercials on the *Tom Mix* program.

### Double Take

Second Shredded Ralston show for the Ralston Co., is *Grand Ole Opry House Matinee*. The half-hour show, a portion of the *Grand Ole Opry*, is transcribed each Saturday night at WSM Nashville, then fed to the western part of the NBC hook-up the following Saturday noon.

Ratings for stations carrying the

## Quick Action Seen On Daylight Time

SIXTEEN measures for return to standard time were introduced in Congress last week, 15 in the House and one in the Senate, with indication that action may get under way in time to provide for abrogation of war time by Oct. 1.

Most of the bills merely propose to do away with war time, but a measure introduced by Rep. Rizley (R-Okla.) would establish standard time for the continental United States. All House bills were referred to the Interstate & Foreign Commerce Committee, of which Rep. Lea (D-Cal.) is chairman. A bill introduced by Sen. Byrd (D-Va.) was referred to the Senate Interstate Commerce Committee, of which Sen. Wheeler (D-Mont.) is chairman.

Rep. Cannon (D-Mo.), in a speech Thursday, said he has yet to find a member of the House who opposes cancellation of war time. He observed that President Truman's message to Congress the same day had approved repeal of wartime restrictions which Congress might wish to terminate. He added that WPB has withdrawn opposition to cancellation.

Effective in early 1942, nationwide war time eliminated the semi-annual juggling of broadcast schedules to adapt schedules to the daylight saving time operative in some of the large cities.

## ON THE SERVICE FRONT

# Biarritz University Offers ETO Troops Radio Workshop

BIARRITZ American University, part of the Information & Education Division's program of education in Europe, contains a complete broadcasting station available to troops who wish to study radio. AFN Biarritz, 54th outlet of the American Forces Network, is being used, in conjunction with courses in speech and dramatic art at the university.

Workshop station schedules news, musical, variety, and dramatic programs, sports, and special events and the usual round of programs broadcast to troops. Students can learn fundamentals of radio, electrical engineering and radio broadcasting, then put studies to practical use in the station.

The Polytechnic School, London, will have a three-month course in radio engineering, starting Sept. 18. Other British universities will offer electrical engineering courses scheduled to begin in September.

Warton American Technical School at Wharton, England, teaching technical radio, will include a special section devoted to radio repair. Courses in radio division include radio receiver servicing, special radio receivers, and radio shop operation.

### AFN-Berlin

AMERICAN FORCES Network's newest link, Berlin, got off to an auspicious start when it was formally dedicated for the use of occupational troops in the Reich capital area.

Sgt. Mel Galliard, former announcer and production man with KFVD Fort Dodge, Iowa, and WLS Chicago, emceed the dedicatory program and gave the first announcement "AFN-Berlin is on the air."

First program featured American music, Bing Crosby, Frank Sinatra, Bob Hope, *Calvalcade of America* and *Hour of Charm*, following which AFN-Berlin swung into its regularly scheduled 20-hour daily broadcasting session.

### AAF Radio Changes

COMPLETE reorganization of the AAF Office of Radio Production will result in the continuation of four of the most outstanding of the AAF's ten network programs, according to Lt. Col. Frederick Brisson, chief of the AAFORP, promoted to that rank last week.

After conferences with net officials in New York, Col. Brisson said that *Your AAF* (previously *Fighting AAF*), will continue under that title on American, at 10:30 p.m. Thursday.

*Return to Duty*, true story of a flyer's rehabilitation and reassignment, remains on Mutual, 5:15 p.m. Saturday. *Roosty of the AAF* is on Mutual, Sunday 3 p.m., with *I Sus-*

*tain the Wings* on NBC, Saturday, 6 p.m. All are EWT.

Personnel of the New York and Hollywood AAF Radio Production Units will be screened, with substitutions being made from personnel of the late Maj. Glenn Miller's Band, returned after 14 months overseas, where they made a total of 525 broadcasts. Newly formed group will be augmented by essential men from original units, and will operate from New York, with all productions originating from there. Also, there will be a realignment of the 12 overseas combat teams, some of which will remain overseas to tell the story of the AAF occupation forces.

### Teamwork Praised

Close teamwork which characterized the operation of the AEF program from its inception on D-Day to its recent dissolution gave proof that international cooperation can exist and resulted in a definite step forward in radio, according to Capt. Jack London, operations officer for the AFN in the United Kingdom.

The British made available to the Americans everything they had in the way of technical material, Capt. London said, and the Americans have influenced the British by making the latter conscious of split-second program timing.

### Bronze Star to Graham

CAPT. JOSEPH W. GRAHAM, in charge of the radio division of the Public Relations section at headquarters, ETO, has been awarded the Bronze Star Medal in Paris for meritorious service with Theater Service Forces Headquarters Public Relations. He has produced a number of the *Army Hour* programs which were broadcast from Europe to the U. S. Before entering the Army in 1941, he was with WCKY Cincinnati and WPAY Portsmouth, O.

### Double Surrender

WAR CORRESPONDENTS Bob Brumby of Mutual and Clark Lee of INS ran up a double surrender score in two days last week. On Wednesday the remains of the Jap fleet, about 40 ships including subs, "surrendered" to them at the Kure naval base, and the following day they accepted the surrender of Joseph Alfred Meisinger, Nazi war criminal in charge of the destruction of the Warsaw ghetto, whom they found in a Japanese hotel where they were dining.

## SUPPORT THE VICTORY LOAN!

# Why one husband kissed his wife four times!

*"Here's a kiss* for the money you're saving... while it's coming in faster through the war years. I know in my bones jobs like mine may not last forever. Who can tell what's going to happen day-after-tomorrow? Thank God you've got sense enough to see that today's the time to get a little money tucked away.

*"Here's a kiss* for the war bonds you're making me hold on to! I'd never do it without you, honey, it's too easy to find reasons for cashing 'em in—but when it comes time to put the children through school or pay for an emergency operation, we'll be thankful.

*"Here's a kiss* for the insurance you talked me into buying. I've felt a lot easier ever since I've known our future is protected—you and the kids would be safe if anything happened to me—you and I won't have to spend our old age living on someone's charity. And every cent we put in insurance or War Bonds or other savings helps keep prices down.

*and*

*here's a kiss* for being you—a woman with brains enough in your pretty head to make sure we don't buy a single thing we *don't* need in times like these—because you know a crazy way of spending in wartime would march America straight into inflation. Baby, I sure knew how to pick it the day I married you!

## ONE PERSON CAN START IT!

### You give inflation a boost

- when you buy anything you can do without.
- when you buy above ceiling or without giving up stamps (Black Market!)
- when you ask more money for your services or the goods you sell.

**SAVE YOUR MONEY.** Buy and hold all the War Bonds you can afford —to pay for the war and protect your own future. Keep up your insurance.

# World Radio Society Can Aid Peace

## Formation of Academy Urged, With U. S. Taking Lead

By PFC. CECIL K. CARMICHAEL

BROADCASTING and its connive services will be a dynamic force offering great hope in the new era born amidst the shambles of the old. This fact imposes upon its leaders a heavy duty and the solemn responsibility of using the medium as an instrument of service in creating a reasonable appreciation and a sensible sympathy among the nations for the problems and aspirations of each other.

Happily, present relations between the United Nations are conducive to coordinated effort toward the formation of a world society to function as an agent of recognition and clearance for ideas and methods in the arts and sciences of the industry; as a stimulant to the interchange of programs, and as a promotor of mutual respect among broadcasters in all lands for their difficulties and accomplishments everywhere. Such a society would be completely cultural, independent of political connection and with no authority.

### Need for Self-Appraisal

Preparatory to a world organization, broadcasting in the United States would first have to set up an organized body to evaluate itself and present a united cultural front. The industry in America has always looked to outside judges for its prizes and approval. These judges have been either a publication, a university, or any promotion-minded institution, and their annual surveys have had a salutary effect; they have done much to raise the level of broadcasting and provide it lighted paths to travel in the formative days. But, because of the natural competition between publications, universities and institutions, none of the surveys has commanded the undivided attention and enthusiasm of either the industry or the public.

In other words, broadcasting now that it is of age, might turn its attention more closely to adult self-appraisal and formulate careful internal notions of what it has found is good both for the industry and the common welfare. It is well to compete for, but unwise to concentrate exclusively on the many so-called Pulitzer Prizes of Radio, the terming of which in itself seems rather an indirect rebuke to broadcasting, for it implies that radio is dependent on another medium for a standard high enough to shoot at. Broadcasting does not have to go beyond its own family circle to find a synonym for excellence; any of a dozen or more major stations or the networks would provide one.

In an organization devoted to the cultural and social significance of

broadcasting, the key words would be Management, Arts and Sciences; these three factors are the basic pillars of the American system. Without intelligent and progressive management, the arts would not shine with their full brilliance, nor would the sciences explore and develop to their greatest potential; without the arts, neither management nor science would present its cleanest face to the public, and

**RATIFICATION** by the U. S. of the United Nations Charter underscores the need of a world broadcasting society to serve as a dynamic force for peace and progress in the radio art. "Ceece" Carmichael, former NBC program promotion specialist, believes the time is ripe for American broadcasters to take the lead in forming an Academy of Radio and Television Management, Arts and Sciences devoted to the advancement of broadcasting as a social and cultural influence.

without science, management and the arts would be ineffective.

Anticipating the emergence of television from its war wraps, a natural name for the hypothetical entity would be: the Academy of Radio and Television Management, Arts and Sciences. The sequence of the initial letters forms a coined word, ARTMAS, connotative of the very quality which Management, the Arts and the Sciences create, and each is due its proportionate share of credit for the lustre of this artistic business, or practical art, whichever you prefer.

The Academy would devote itself wholly and single-mindedly to sifting out and holding up for popular examination the conscientious efforts of the industry to provide the American people with the best service capable of being produced by the talent and ingenuity attracted by the stimulating competition of the free enterprise system. It would suggest, encourage and support projects determined by it to be of value in extending the use of the media in the best interests of progressive democracy, and it would invite the efforts of all interests to participate in the evolution of broadcasting and television as a social and cultural force. In short, the Academy would function solely in the spirit of the dictionary definition of the word: "a society of learned men united to advance art or science". It would be diligent in recognizing all facets of the industry, knowing that all sides of a diamond shine equally bright when displayed in the light.

### Awards for Merit

Thus, in the annual dispensation of ARTMAS awards and credits, the accomplishment of a difficult and inspiring engineering feat, and the courageous and enlightened management policy or action would

receive the same attention as the writing, production and performance of a program masterpiece. The kudos would be distributed with primary emphasis on individuals, for it is the life which individuals breathe into ideas that make the results either leap to heights of splendor or plod with the heavy feet of mediocrity; and the awards would be a sign that the recipients had entered a select circle whose members were entitled to honor and respect for their attainments.

### Radio's New Frontiers

United, as envisioned in ARTMAS, and agreed upon the standards it would pursue and reward at home, American broadcasting would be prepared to undertake, through ARTMAS, the aims already suggested for the field of international relationships, and by encouraging a fusion of sympathetic ideals and culture make a significant contribution to the durable Peace everybody talks about and hopes for.

It is up to broadcasting in this country to take the lead, as leadership inevitably devolves upon the strong; and in a matter so vital as the continual building of a complex, workable society private citizens and private business can no more afford to think in narcissistic, chauvinistic channels than can governments, for public pressure is the guiding stimulant of political action and the type of action will be determined by peoples' understanding and opinion of each other. Whether Peace is ephemeral or permanent well may rest outside the framework of government structures and in the hands of men and women of goodwill laboring in their own jobs toward the great goal.

This is, indeed, One World, and broadcasting, having done much to knock down the barriers of the old, can do infinitely more in helping expand the frontiers of the new. It is destined to play this role.

## Reconversion News

TIMELY station promotion deal was WGN's move to send News Director Robert F. Hurleigh on a swing around the Nation's automotive centers for on-the-scenes accounts of the industry's reconversion progress. Hurleigh will do remote broadcasts on both his sponsored news programs, 8 a.m. and 5 p.m., Mon. through Sat., speaking directly from assembly lines of Nash, Hudson and Ford in Detroit, Oldsmobile in Lansing, Mich., and Willys in Toledo, O., where he will describe the production of the new civilian "jeep". Jay Feree, WGN engineer, will accompany him on the tour.

## FARM, HOME HOUR GOES BACK TO NBC

ONE of radio's pioneer programs, the *National Farm and Home Hour*, returns to NBC, Chicago, Sept. 15, with few changes in the original format.

Program will be heard each Saturday, 12-12:30 p.m. CDST over approximately 40 stations, sponsored by Allis-Chalmers (tractors), Milwaukee, with contract signed by Bert S. Gitting Agency, Milwaukee.

Program started on NBC's Blue network in 1928, and stayed with Blue when NBC broke away, remaining until June, 1944, when U. S. Department of Agriculture, which owns title, withdrew broadcast rights over differences in policy. Present set-up calls for Everett Mitchell, who has been featured on *Farm Hour* since 1930 as mc. Homesteader's Orchestra, and Farm and Home Quartette. Guest stars and five-minute cut-ins from Washington will also be highlighted, with Clinton P. Anderson set to welcome show's return to the air.

## NEW BBC DIRECTOR ARRIVES IN STATES

CHARLES BREWER, veteran of almost 20 years service with the British Broadcasting Corp., arrived in New York last week to assume the post of BBC North American director. He succeeds John Salt, recently transferred back to England.

Mr. Brewer

Gaining practical experience in broadcasting at Cardiff and Birmingham, where he first specialized in the production of variety and light entertainment programs, Mr. Brewer went to London as variety producer in 1933 and two years later was named assistant director for variety. Two of the most popular prewar BBC programs, *BBC Scrapbook* and *Flying High* were his.

A veteran of the Royal Flying Corps in World War I, Mr. Brewer joined the RAF as a member of the staff of the bomber command at the outbreak of World War II. In 1941 he transferred to the Fleet Air Arm, first in communications work and later in command of training squadrons. In 1944 he spent some time in Paris as special liaison officer between SHAEF and BBC.

Urging the continuation and expansion of the wartime collaboration between BBC and American stations and networks "to our mutual advantage", Mr. Brewer described this collaboration as "an important factor in the total war effort".

"Now that the war is ended," he went on, "there are equally important benefits to be derived from a continuation of this spirit of cooperation. Unfettered by problems of security and wiser because of our wartime experiences, the free radio organizations of the United States, Great Britain and the rest of the world can now embark on a program to make radio an instrument to help bring about a better understanding between the peoples of the world."

Mr. Brewer, who last visited the United States in 1935, will meet the press at a luncheon to be given in New York on Thursday.

## Biow Changes

RESIGNATIONS of Sam Gill, director of research, and Frank Barton, business manager of the radio department, from Biow Co., N. Y., both effective Oct. 1, seemingly point to a reorganization of the agency, although Mr. Gill stated that his resignation had no connection with that of Mr. Barton. Milton Biow, agency president, was not available for comment. No replacements have been named, nor has either Mr. Gill or Mr. Barton announced future plans.

# Actions of the FCC

AUGUST 31 TO SEPTEMBER 7 INCLUSIVE

## Decisions . . .

### ACTIONS BY COMMISSION SEPTEMBER 4

WSRR Stamford, Conn.—Designated for hearing application consent to voluntary assignment of license from Stephen R. Rintoul to Western Connecticut Broadcasting Co. (Jett and Wills voting for grant).

### SEPTEMBER 5

WDSU New Orleans—Closed proceedings in complaint filed by Senator John H. Overton charging WDSU had refused to make available time for political broadcasts but placed licensee on notice that the facts in record are subject to further review when application is made for renewal.

KOMA Oklahoma City—Proposed findings of fact and conclusions that application for CP to shift from 1520 kc 5 kw N and D to 690 kc 5 kw N 500 w D be denied but without prejudice to filing of new application within 12 months; KOMA to be issued six-month temporary authorization to use 1520 kc 5 kw D 500 w N nondirectional to reduce interference to WKBW Buffalo and eliminate interference to TGW Guatemala.

KGGF Coffeyville, Kan.—Proposed to grant regular license renewal for period ending 11-1-46 since applicant is proceeding with steps to correct interference. Commission policy presently prevents grant CP to change from 690 kc 1 kw LS 500 w N to 1 kw N and D. directional.

### ADMINISTRATIVE BOARD ACTIONS SEPTEMBER 6

WGBR Goldsboro, N. C.—Granted CP new relay station 2 w.

## ACTIONS ON MOTIONS SEPTEMBER 6

KOMO, KJR, Seattle—Granted in part motion to continue hearing now set for 9-17-45 on license renewals and continued same to 10-15-45.

WCHS Charleston, W. Va.—Granted continuance renewal hearing from 9-10-45 to 10-15-45.

## Applications . . .

## A Guide to Recorded BMI Music

# Disc Data for Disc Users

- They call it the "Disc Jockey's Bible" . . . for BMI's DISC DATA is truly one of the most valuable aids to users of phonograph records in radio.
- DISC DATA gives the Disc Jockey everything he needs for his programs . . . all in one compact, loose-leaf folder. The names of outstanding recording artists, alphabetically listed. Biographical highlights, photos, and up-to-date listings of BMI-licensed song titles, giving labels and numbers.
- At the moment, DISC DATA includes material on 57 noted band leaders and vocalists . . . with new names and new record releases constantly being added.
- DISC DATA is but one of the many services to radio provided by BMI . . .

## FM is sweeping the country

We, as pioneer manufacturers of FM broadcast equipment, are prepared . . . and now have openings for sales representatives in the following territories:

*New England  
Ohio  
South  
Southwest*

### Qualifications:

1. Financially able, with present organization or one in planning.
2. Established, regular contacts with broadcasters in your territory and means of contacting prospective broadcasters in FM.
3. Engineering and technical background helpful, but not essential.

Write, stating qualifications, to  
Box 133 Broadcasting

## From an ex-soldier To the Radio Industry:

### "GI would like to get back to work"

Honorable discharged veteran with experience in radio stations ranging from 250 to 50,000 watts. Network announcing; special events; promotion and publicity; news announcing and editing; sales; program and commercial writing; station representative experience; over a year as radio station manager. Don't get me wrong! Not a "Super" radio man—just a fully experienced ex-radio man ready to get back to work.

If you have an opening on your staff—drop me a line—I might bite—and it would turn out to be a good catch for both parties concerned.

**BOX 127, BROADCASTING**

## ATTENTION SERVICEMEN!

To aid servicemen seeking radio jobs, BROADCASTING will accept situation wanted classified ads at no charge. Thirty words maximum. Two insertions. Sign name, rank and give address.

## People

### OPA PRICE RULING ON RECEIVING SETS SOON

ACTION by the OPA on prices for radio receiving sets is expected this week, following decision reached over the previous weekend to remove the bottleneck on tubes and parts that arose from delay in securing OPA price formulas.

Set manufacturers are going ahead with production plans, completing details of production lines and arranging to acquire tubes and components. Already some manufacturers are turning out sets but the quantity is not large. Within a few weeks output will reach a high figure.

Parts manufacturers complain the new prices on tubes and parts do not take care of many hidden increases in production costs. The increase factors for original equipment, radio tubes and parts range from 5% for resistors and miscellaneous items to 11% for coils, and transformers and chokes, based on the prices that prevailed in 1941.

### AMERICAN PROMOTION AWARDS ANNOUNCED

SECOND annual awards for outstanding audience promotion of American Broadcasting Co. programs, based on a survey of agencies, has resulted in issuing of certificates by the network to the following stations: Cities over 500,000, KXOK St. Louis, WFIL Philadelphia, WJW Cleveland, WTCN Minneapolis; cities 100,000 to 500,000, WOWO Ft. Wayne, WAGA Atlanta, KXYZ Houston; cities 50,000 to 100,000, WCBS Springfield, Ill.; WROK Rockford, Ill., WJBO Baton Rouge; cities under 50,000, KADA Ada, Okla., WTJS Jackson, Tenn., KGGF Coffeyville, Kan.

### SKELLY RENEWS DREIER

SKELLY OIL Co., Kansas City, renews Alex Dreier on 24 NBC stations, effective Sept. 10. Program is aired Mondays through Saturdays, 7-7:15 a.m. (CDST). Fifty-two week contract was signed by Henri, Hurst & McDonald, Chicago.

### LONGINES ADDITION

LONGINES-WITTMANER Co., New York, begins sponsorship of an additional half-hour of transcribed *World's Most Honored Music* featuring the Longines Symphonette, over WMAQ Chicago. Program will be heard Saturdays 10:30-11 p.m., in addition to regular Sunday broadcast. Contract placed by Arthur Rosenberg Inc., New York.

### JOINS AVERY FIRM

RAY NEIHENGEN, American spot salesman in Chicago, joins Free & Peters, Chicago, Sept. 10, replacing Bernard (Tim) Timothy, who becomes Chicago manager of Lewis H. Avery's new station representative business [BROADCASTING, Sept. 3].

### SEARS 11 IN LOS ANGELES

SEARS ROEBUCK & Co., Los Angeles, in a 20-day anniversary campaign on Sept. 10 starts using a total of 594 transcribed spot announcements on 11 local area stations. List includes KFI KECA KNX KFVB KFVD KMPC KPAS KGFJ KFAC KIEV KWKW. Agency, The Mayers Co., Los Angeles.

### TRANSCONTINENTAL TELEVISION TWO YEARS OFF, SAYS MINER

TELECASTS of local sporting events and political doings in addition to visual adaptations of radio's variety, comedy, dramatic and other entertainment and educational programs should be available to the television set owner in the near future, Worthington Miner, CBS manager of television, said in address prepared for Broadcasting Sept. 9 as intermission feature of the CBS *Symphony Orchestra Concert*.

Mr. Miner warned listeners "it will be two years, probably more, before television will be ready to span the Continent" and that "television in its formative years will be limited to certain specific hours of the day. Television," he said, "should be considered not as a substitute for but as a supplement to your radio service." Color pictures and other technical developments are on the way, he said, stating that CBS hopes to demonstrate full color in New York before the end of the year. He warned, however, that "it would be false to anticipate television's full flowering tomorrow or the day after tomorrow."

### CBS WORKERS PETITION

CBS white collar workers (secretaries, researchers, writers and directors in television) have authorized United Office of Professional Workers of America to file a petition with the National Labor Relations Board for the right to hold an election to determine: 1, whether the white collar workers want a union and 2, whether the union be the UOPWA, International Alliance of Theatrical & Stage Employees, or International Brotherhood of Electrical Workers. UOPWA is affiliated with CIO. Other two unions are AFL.

### BARSBY ELECTED V-P

WILLIAM H. BARSBY, formerly traffic manager of RCA Communications Inc., was elected vice-president Friday. Col. Sidney Sparks, who has been released from active military duty after two years as officer in charge of the War Dept. Signal Center in Washington, succeeds Mr. Barsby as traffic manager.

### CAPT. JENNINGS TO TREASURY

CAPT. ROBERT G. JENNINGS, former radio director of H. W. Kastor & Sons, Chicago, who has been handling radio production for Army Air Forces, has been loaned to the Treasury to assist in handling special programs for the Victory Loan Drive. He will be stationed in New York as liaison with MBS on special programs.

### CRIME PAYS

LEWIS J. VALENTINE has announced his resignation as police commissioner of New York on Sept. 14 after 42 years on the force, to become chief investigator-commentator of the new *Gang Busters* series starting on American Sept. 15 as a Saturday, 9-9:30 p.m. program. Series is sponsored by L. E. Waterman Co., New York, for Waterman fountain pens. Mr. Valentine will receive \$50,000 a year for his radio ties. His salary as commissioner has been \$12,500 a year.

SALLY CRAMER, formerly administrative assistant on the Jergens-Woodbury account at Lennen & Mitchell, New York, to McCann-Erickson, New York, as creative group head on the Revlon account.

EUGENE S. Thomas, sales manager of WOR New York, named member of advertising and selling course committee of Advertising Club of New York for 22nd year of course.

CARLOS FRANCO, associate director of radio in charge of station relations, Young & Rubicam, New York, is in Mexico on a business trip.

WILLIAM SHIRER, CBS commentator, leaves Sept. 26 for Germany to cover the Nazi war criminal trials at Nuremberg. Les Nichols, who has covered the war for Mutual five years, is now in Europe and will report the trials for that network, assisted by Murray Young, formerly a commentator for WHK Cleveland who has been added to Mutual's overseas staff.

GEORGE FISK, formerly with research department of *World-Telegram*, New York, has joined Sherman K. Ellis, New York, as assistant director of research.

OLIVER PRESBREY, formerly assistant to Arthur Pryor, vice-president in charge of radio, BBDO New York, has become an account executive in charge of the U. S. Steel account. Mr. Presbrey is succeeded by Wick Crider [BROADCASTING, Sept. 3].

ALAN C. THURSTON, Sales development manager of White Rock Corp., subsidiary of National Distillers Products Corp., New York, has been appointed vice-president in charge of advertising and merchandising.

GILBERT SELDES, CBS director of television programs, resigns Sept. 28 to do independent television work. He may continue special work for the network outside of television.

HOWARD J. LONDON, director of radio and motion pictures for the National foundation for Infantile Paralysis, leaves Sept. 10 for a three-week trip to San Francisco and Hollywood to complete radio plans for the 1946 March of Dimes campaign.

ROBERT WASSSELL, EUROPEAN war correspondent for American, has returned to this country. After a short vacation he will be assigned to other duties.

WEST W. WILCOX, assistant general manager of WHOM New York for 10 years, resigns Sept. 15. He will announce new affiliation in a few weeks.

MARGARET C. BOOSS, formerly manager of market and research for McCann-Erickson, New York, appointed associate director of research of Federal Adv. Agency, New York.

MARY MARGARET MCBRIDE, commentator on WEAF New York, was to leave Sept. 8 for Paris and London. She may broadcast an occasional program from abroad. Sheila Karn, Miss McBride's manager, will substitute on her Monday-through-Friday, 1-1:45 p.m. program, broadcast under participating sponsorship.

STEVE ELLIS and Don Dunphy will describe the Monday night boxing bouts from Madison Square Garden and St. Nicholas Arena, New York, on WHN, sponsored by Gillette Safety Razor Co., Boston. Starting Sept. 10.

*Advertising Brought*  
**NATIONAL MARKETS**

to

*Local Stores!*

**I**N 1909—an idea; in 1945—a multi-million dollar business! Such is the history of the Florists' Telegraph Delivery Association, the trade cooperative which widens a local florist's market from his own community to a whole nation. Thirty-six years ago, florists determined to make "Flowers-by-wire" a reality. Their success is attested by current annual volume of more than 5,000,000 orders—more than 7000 members—more than \$36,000,000 worth of business!

**In the DISTRIBUTION DECADE  
Advertising Must Win Still Wider Markets!**

**A**MERICA is on the verge of a new era—the Distribution Decade! Now that Victory has lifted the curtain on this new phase of economic history, new responsibilities and new opportunities will fall to Advertising.

Conversion from war production finds us with abundant manpower, money, materials and manufacturing facilities. Purchasing power will exist as

a potential, but its activation will hinge on the success of Advertising. For Advertising must create demand among consumers.

More than that, Advertising must regulate demands to meet abilities to produce in order to maintain a stable economy. Without a demand for goods, plus a parallel course of supply and

consumption, we face a menace of disastrous unemployment.

Advertising did it before—and will do it again—*better*. Alert agency men will be ready for the Distribution Decade. The Nation's Station will soon be ready, too; ready to go into action—with new, factual data on how to move merchandise in the 4-State market that is WLW-Land.

"... to WLW for outstanding reporting of the news"

THE NATION'S MOST MERCHANDISE-ABLE STATION

Post-war radio "handie-talkies" and "walkie-talkies" will enable you to take your radiophone anywhere you go!

## ***"I'm telling Helen about this—right now!"***

You're a hundred miles from "nowhere" and you just landed the finest trout in the world! You've simply got to tell your wife (and the boys) back home.

So you turn on your "handie-talkie," signal the nearest "receiving station," get put through long distance and r-r-r-ing!—she's on the other end!

Doesn't this seem fantastic? It really isn't at all! For now such instruments can be made—about the size of a camera—weighing as little as three pounds—with a range of many miles.

Similar equipment that served the Allied Armed Forces was made possible by miniature electron

tubes developed in RCA Laboratories. These miniature tubes are the size of peanuts and acorns. Actually, with these tubes there can be radios the size of a cigarette case or a lady's compact—with "big radio" reception!

Similar research goes into all RCA products. And when you buy an RCA Victor radio, television set or Victrola, you get one of the finest instruments of its kind that science has achieved.

Radio Corporation of America, RCA Building, Radio City, New York 20. *Listen to The RCA Show, Sundays, 4:30 P. M., Eastern Time, over NBC.*

RCA miniature tubes—another example of RCA pioneering in radio and electronics. The "handie-talkie" and smaller radios were made possible through the development of these tubes. Moreover, much valuable space can be saved through their use in larger sets.

**RADIO CORPORATION of AMERICA**
