*Now what manner of man
is this, ye say?*

*'Tis our lovable Irish Tom,
it is!...*

When one of the big network stars complains about how tough it is to turn out a weekly television show, we can't help but smile a little and think about Tom Duggan.

For 3 years now, Duggan has talked and kidded and charmed his way through 105 minutes *every weekday night*, and 75 more on Saturday. All live. Sundays we let him off.

He can't sing, can't dance, isn't much of a comic; but he's the kind of guy that's easy to take late at night, and his show is fun to watch. Once in awhile he even blows off a little steam when he thinks somebody's getting stepped on.

Maybe it's the way he handles guests. Maybe it's his handsome puss, or that Kilarney gift of gab. Or maybe it's the crazy commercials. All we know is that this warm, screwball Irishman attracts more people and more sponsors and sells more products than anyone ever imagined.

BROADCASTING, April 27, 1959

Vigilance at Greenbrier • While crisis developed in Television Code Review Board's decision to discipline stations carrying hemorrhoid remedy commercials (story page 31), subcommittee of board was screening score of other personal-product commercials that had been questioned. It could not be learned whether any was found offensive, but at least some were enthusiastically approved for their good taste. Subcommittee consisted of E. K. Hartenbower, KCMO-TV Kansas City, subcommittee chairman; Gaines Kelley, WFMY-TV Greensboro, N.C., and Donald H. McGannon, Westinghouse Broadcasting Co., code board chairman. They met at Greenbrier last Friday during American Assn. of Advertising Agencies convention.

New type song-plugging • Here's newest gimmick advertisers and agencies are using to get more mileage out of radio commercials at no extra media cost: After singing commercial is composed, instrumental version is recorded, with top-flight arrangement and production. Trick is to get stations which are carrying singing jingle to play instrumental version free as regular musical number on record shows.

Wrigley gum and Schlitz started trend by adapting instrumentals from singing commercials. New twist is being used by Corn-Chex and unidentified appliance. Both are asking stations to play instrumental versions of commercials before commercials themselves go on air. Purpose is to sneak commercials over on listeners who have been conditioned to think of the music as just another popular tune.

Option time • All-out network opposition, buttressed strongly by many affiliates, to FCC proposal to reduce option time to 2½ hours per segment and eliminate "straddle" programs (story page 65) already is in making. But one network—ABC-TV—would not object to elimination of option time altogether if FCC provided minimum of four reasonably comparable stations in first 100 markets.

Resistance forces • Assn. of Maximum Service Telecasters lost no time in marshaling forces in opposition to breakdown of existing mileage separations in tv allocations as proposed in FCC's report to Senate Committee last week (story page 68). MST's board of directors, at call of President Jack Harris, KPRC-TV Houston, met in Wash-

ington last weekend (Saturday and Sunday). Even before FCC report had been released, however, MST's executive director, Lester W. Lindow, was at work contacting membership in anticipation of short separation proposal.

Networks also were on qui vive on long-expected report. Shorter separation could affect not only coverage of their affiliated stations but also their owned and operated outlets. While FCC to date hasn't mentioned markets it regards as critical and in need of additional vhf stations, this random list was mentioned as among foremost: Birmingham, Providence, Rochester, Syracuse, Jacksonville, Charlotte, Raleigh-Durham, Shreveport, Louisville, Grand Rapids-Kalamazoo. These were mentioned aside from such areas as Greensboro-Winston-Salem; Tampa-St. Petersburg; New Orleans and Quad Cities, in which contests for additional v's are underway.

Uhf in Britain • Approaching its tv allocations problems precisely in reverse of U.S., Great Britain is exploring prospects of eventual move of its tv operations to uhf, according to advices given authorities here. With geographically compact area and only comparative handful of stations to be accommodated, British engineers tentatively have concluded that uhf would provide higher quality service than its present allocations in vhf which fall below our ch. 2 allocations. British problem is simple, however, since government controls all technical services (both BBC and ITA) and simply leases programming to contractors for ITA operations.

Tv spot strong • Heavy advance sales of tv networks' fall season seems to be blessing for national spot business. Uncertainty of year ago in making network commitments held up spot plans as well because advertisers plan overall media budgets coincidentally. Station representatives already report brisk selling with spot advertiser decision-making on advanced spot orders.

Local radio strong • Word has filtered back to Radio Advertising Bureau from its executives on road in first-week swing of sales clinics that strong local radio business is making up for any softness in national activity. RAB officials already have been in Dallas, Memphis, Tulsa, New Orleans, Des Moines, Minneapolis and Kansas City.

Losses cut • Report of financial progress of ABC Radio has been submitted

to board of parent AB-PT. Where network year ago was losing money at rate of \$4.5 million per year, board members were told, it's now losing at rate of less than \$2 million—most if not all of which can be charged up to "allocated costs" (radio network's share of cost of operating news, engineering and other service departments of ABC). Rate of improvement said to be greater than that of any other AB-PT division.

Space show • AVCO Mfg. Corp., New York, is understood to have budgeted about \$250,000 for sponsorship of one-time, one-hour special on NBC-TV May 24. Telecast, which will be produced live by Robert Saudek Assoc., New York, will originate from Wilmington, Mass., and will spotlight dedication ceremonies there of AVCO's new \$50 million space research center. Program said to be dramatic in nature and dealing with space research theme. Saudek Assoc. has produced several space research programs for *Omnibus*.

Border incident • U. S. broadcasters along Mexican border have unusual complaint against Conelrad test April 17, which blacked out half-hour of prime daytime. In one market—San Diego, which is opposite Tijuana, Mexico—broadcasters say they were forced to turn over their market to half-dozen Mexican border stations which ignored Conelrad tests. But even more serious, they contend, is that if real McCoy had happened, those important border cities would have been sitting ducks for homing enemy.

San Diego stations have been in running battle with Mexican broadcasters for several years. Indications last week were that one or more of them might formally complain to FCC and possibly OCDM on Conelrad incident.

Question of authority • Notwithstanding FCC's decision that it does not have jurisdiction over community antenna systems (BROADCASTING, April 20), it has legal opinion from its General Counsel John L. FitzGerald that existing law is sufficient to permit Commission to exercise authority. Mr. FitzGerald submitted these views before Commission made up mind it didn't want this power. In light of cable systems' attitude that they desire to be placed under FCC (see page 76), feeling is Commission can accede without new legislation.

WEEK IN BRIEF

MR. STODEL

Get everybody into the act • Just buying spots will not solve all your marketing and distribution problems, Edward C. Stodel, president of Stodel Adv., Los Angeles, points out in this week's MONDAY MEMO. You must give the campaign all-out support by getting everyone involved—station personnel, distributor salesmen and merchants. Page 25.

Crisis for the tv code • Nearly 70 stations defy code board and continue carrying commercials for Preparation H, hemorrhoid remedy. Will code board ask NAB tv board this week to lift their seals of good practice? Page 31.

Defend ad role • American Assn. of Advertising Agencies' annual convention hears repeated calls to bolster public understanding of advertising and protect the industry from creeping encroachments of government restriction. Page 34.

Where it's coming from • TvB reports on network tv advertisers and the brands that spent the most for time in January. Page 40.

Network tv gross • Billing gains 9.5% in February, more than \$48.8 million in time charges that month. Page 40.

Paid advertising for government agencies? • Yes, says McCann-Erickson's Marion Harper in Chicago talk. He also scored politicians who shout "Hucksters" and use advertising as a "whipping boy"—until they need it at election time. Page 50.

A distaff look at 1959 radio-tv • Some 900 members of American Women in Radio and Television will analyze the industry at their convention in New York this week. Page 52.

Newspaper's "Total Selling" versus television • The Bureau of Advertising of the American Newspaper Assn. explains its "total selling" program to increase newspaper advertising during ANPA convention and makes clear it will challenge television's advertising effectiveness. Page 54.

Option Time Revisions Out • FCC issues proposed changes in option time rules including—30-minute cut, 13-week notice, straddle program interpretation and right of station to reject program after series has begun or substitute local program for network show. Comments due June 22. Page 65.

No third round for Katzentine? • Government says it probably won't ask him to testify in Mack-Whiteside trial. Mack counsel pleads indigence, asks for government-paid assistance. Page 66.

Tv Allocations Moves Set Out • FCC is going to wait for possible all vhf tv system, couple of months anyway. Meanwhile will start moving to squeeze in more vhf channels where they're hurtin'—in those markets having less than three vhf assignments and where uhf conversions are meager. Page 68.

Regulation requested • Community antenna operators seek FCC control; legislation is being drafted to amend Communications Act to accomplish Commission jurisdiction. Page 76.

Conelrad's better than ever • FCC, OCDM, others acclaim success, despite scattered defects and criticism, in backward look at April 17 test alert. Page 78.

Sen. Monroney critical about 'Firestone' lapse

Sen. Mike Monroney (D-Okla.), Congress' number one critic of network programming and rating services, Friday (April 24) struck out at ABC-TV for canceling *Voice of Firestone* on Monday nights (BROADCASTING, April 20).

"The Voice of Firestone has again become the victim of the mumbo-jumbo of tv ratings," senator charged. "This is another prime example of the lack of public service displayed by the network czars." He said ABC was anxious to get *Voice* from NBC-TV several years ago. "Since then, ABC apparently has become prosperous with the help of *Maverick*, two-gun westerns and whodunits," Sen. Monroney said. "It now seems to have gone trigger happy, along with NBC and CBS, for the highly-rated blood and thunder programs that fattens the batting average in the daily tv rating service."

Sen. Monroney said he plans to introduce into *Congressional Record* several statements and articles on Firestone situation.

Metropolitan gross up

Metropolitan Broadcasting Corp.'s gross revenue last year increased to \$14,427,752 from near \$10.3 million of year before, John W. Kluge, board chairman and president, reported Friday. Net income was \$932,348, or 60 cents per share in 1958 compared to \$243,460 or 16 cents per share in 1957 (last year's income was subject to specific writeoffs during year of more than \$600,000 coming to 40 cents per share and no federal income taxes were payable because of carry-forward of loss). Stations: WNEW-AM-TV New York, WTTG (TV) Washington and WHK Cleveland (figures include only seven months of WHK operation).

Ganger affirms need

"Vital need" for "greater understanding between advertising and its publics" was stressed by Robert M. Ganger of D'Arcy Adv., new chairman of American Assn. of Advertising Agencies, in speech prepared for closing session of AAAA convention Saturday (see earlier stories page 34). He identified advertising's "publics" as government administrators, legislators and "the constituents behind the legislators."

Mr. Ganger said AAAA committees

Million dollar TvB

TvB's budget has hit million-dollar level, President Norman E. Cash is announcing today (Monday), following report to semi-annual board meeting at Greenbrier, White Sulphur Springs, W. Va., during AAAA convention (see page 34). TvB Board Chairman Roger W. Clipp, Triangle Stations, called it "more than just a coincidence that both television and the bureau which represents it are enjoying the greatest year in their histories." He said that "with the bureau continuing to increase in both scope and effectiveness, we are laying a firm foundation for the continuance of this success."

TvB's annual meeting will be held in Chicago in November.

are studying to see how necessary, feasible and potentially effective are proposals which have been made "for lobbying, for a Washington headquarters for advertising, for a self-imposed levy on advertising revenue to finance a public education campaign and for many other kinds of action."

AAAA's new board meanwhile named following as its operations committee to meet monthly when board is not in session: Chairman Ganger; President Frederic R. Gamble; Harry Harding, Young & Rubicam; Andrew B. Meldrum, Meldrum & Fewsmith; Edwin Cox, Kenyon & Eckhardt; Otto Kleppner, Kleppner Co.; Raymond F. Sullivan, Stauffer, Colwell & Bayles.

Arizona Network new to ABC Radio fold

ABC Radio moves into this week with additional affiliates and programming feeds. As of yesterday (April 26) ABC Radio was to take over eight hours of programming weekly from Don Lee Broadcasting System and add them to existing ABC Pacific Coast regional network schedule. Effective today (April 27), ABC Radio adds 12 stations of Arizona Network, second such regional group to become associated with ABC Radio in past six weeks (Intermountain Network associated with ABC Radio March 15). Arizona Network, formerly with Don Lee, reportedly will continue to receive some

Mutual programming. Arizona pact announced by John L. Hogg, president-general manager, KOY Phoenix, and manager of network, and Edward J. DeGray, ABC vice president in charge of radio network.

ABC Radio claims total 346 affiliations in U. S. with additional lineup in Arizona. KOY has been existing ABC Radio affiliate. Arizona Network formed in 1940 also includes KTUC Tucson, KSUN Bisbee, KNOT Prescott, KAAA Kingman, KGLU Safford, KVOY Yuma, KVNA Flagstaff, KVNC Winslow, KNOG Nogales, KWJB Globe and KHFH Sierra Vista. ABC-Don Lee agreement was signed March 26 (BROADCASTING, March 30).

Regional color set

What is believed to be first regional color television baseball network has been arranged to carry 13 home games of Cincinnati Reds. These are part of 53-game schedule fed to same stations throughout season under regular sponsorship of Sohio Oil Co. (through McCann-Erickson, Cleveland) and Hudephol beer (through Stockton, West & Burkhardt, Cincinnati). Thirteen colorcasts will originate at WLWT (TV) Cincinnati and will be carried by WLWD (TV) Dayton, WLWC Columbus, Ohio, and WSAZ-TV Huntington, W. Va. Extra costs of adding color to 13 of 53 games—and extensively promoting it—will be shared by RCA and by Crosley Broadcasting Corp. (Crosley owns WLWT, WLWD and WLWC).

Trendex adds five

Trendex Inc., New York, announced Friday it plans to add five new cities to present list of 20 used in publication of monthly tv program popularity report. New total also to be used to form sampling universe for bi-monthly Television Advertisers Reports. New cities are Pittsburgh, Little Rock, Richmond, Tulsa and Peoria, Ill.

Motorola sales jump

Motorola factory sales volume of consumer products was 101% ahead of first quarter 1958 during period ending March 31, with tv as largest single factor (up 97%), company announced Friday. It marked largest first quarter since 1953 and brought firm within

CONTINUES on page 10

AT DEADLINE

CONTINUED from page 9

5% of total sales volume for entire first half of last year, according to Edward R. Taylor, executive vice president. Phonograph record player sales were triple any previous best first quarter; while portable radio volume doubled 1958 first quarter and car units also showed marked increase.

WBC clinic Sept. 21-23

Westinghouse Broadcasting Co. will hold its third industry-wide public service programming conference in San Francisco Sept. 21-23, WBC is announcing today (April 27). Conference takes place at Stanford U. (Palo Alto).

KXLY to H-R Reps

KXLY Spokane will be represented by H-R Representatives Inc. and KXLY-TV by H-R Television effective June 1, it was announced Friday. Owned by Northern Pacific Tv Corp. and managed by James R. Agostino, both outlets are CBS affiliates. KXLY is on 920 kc; KXLY-TV is on ch. 4.

• Business Briefly

• R. J. Reynolds Tobacco Co. through William Esty Co., N.Y., and Miles Labs. through Geoffrey Wade, Chicago, to sponsor *Man from Black Hawk* on ABC-TV Fri. 8:30-9 p.m. starting Oct. 2. Program is being filmed by Screen Gems with Herb Meadow producer.

• Bristol-Myers moves its network tv-heavy Ban deodorant account (\$2 million plus) from BBDO, N. Y., to Ogilvy, Benson & Mather there effective July 20. Ban is currently represented on B-M shows *Alfred Hitchcock Presents* (CBS-TV Sun.) and *Wanted—Dead or Alive* (CBS-TV Sat.), and order is in for *Jack Paar* (NBC-TV) late evening participations beginning first of May. BBDO, which handles other B-M products, has been Ban agency since deodorant's inception five years ago. B-M official said switch is desire for "another strong agency in our lineup."

• Renault of France has signed for half-hour, alternate week of *Playhouse 90* on CBS-TV (Thurs., 9:30-11 p.m.). Agency: Needham, Louis & Brorby, Chicago.

WEEK'S HEADLINERS

MR. SMITH

GAIL SMITH, formerly associate manager of advertising production of Procter & Gamble, Cincinnati, joins General Motors, Detroit, in newly-created post of director of television advertising, effective May 15. Mr. Smith will join staff of William F. Hufstader, GM vp in charge of distribution. He will work with GM in "consulting and coordinating capacity in tv advertising field." In addition, it was announced, he will "assist GM and division personnel responsible for tv ad schedules and programs in contacts with tv networks and advertising agencies." Mr. Smith joined Procter & Gamble in 1943 and was appointed director of radio in charge of daytime programs in 1949.

ALFRED J. SEAMAN, who resigned last week as executive vp and creative director, Compton Adv., N.Y., (WEEK'S HEADLINERS, April 20) elected vice chairman of board and chairman of executive committee, Sullivan, Stauffer, Colwell & Bayles, N.Y. At Compton all tv and radio programming as well as other creative activity reported to Mr. Seaman and at SSC&B Mr. Seaman becomes member of management working with board chairman and president of agency. Mr. Seaman was with Compton 13 years, past five as executive vp and remainder as vp and creative director. Other agency associations: partner in Knight & Gilbert, Boston, and associate account executive of Fuller & Smith & Ross, N.Y.

T. HART ANDERSON JR. has resigned as board chairman of Anderson & Cairns, N.Y., and JOHN A. CAIRNS, president of A&C, adds Mr. Anderson's position. Mr. Anderson will devote full time to marketing counsel activities which he started two years ago on part-time basis. His office will be in his Pennington, N.J., home. Anderson & Cairns was created in 1951 when Anderson, Davis & Platt merged with John A. Cairns Co. Mr. Anderson, one of AD&P's founders in 1929, previously had been in Rome with U.S. diplomatic service.

L. C. REDMON, station manager of WLAP Lexington, Ky., has been named vice president and general manager of

WLAP Radio Inc., it was announced by John B. Poor, owner and president. In other WLAP promotion, WILLIAM R. LACKER, program director, was appointed national sales manager and assistant station manager, and NICK CLOONEY, on WLAP's staff since last year, promoted to program director. Mr. Redmon joined station in 1950 as account executive and left in 1953 to become merchandise manager of major appliances at Purcell Co., Lexington department store. He returned to WLAP in 1956 as commercial manager.

MORT GREEN, writer on *Perry Como Show* for over four years, to Revlon Inc., N.Y., as director of television and radio, effective June 1. Appointment is based on belief that "maximum results from tv and radio programming can best be achieved by turning responsibility over to top creative mind to work directly with individuals responsible for program creating," according to Revlon President Charles Revson. Both current and future programming will come under purview of Mr. Green, who is to work directly with Mr. Revson and F. Kenneth Beirn, vp in charge of advertising at Revlon. Some of Mr. Green's earlier writing assignments: *Mr. Ace and Jane* and Tallulah Bankhead's *Big Show*, both radio; *Milton Berle Buick Show*, *Colgate Comedy Hour*, Arthur Murray and Johnny Carson on tv.

MR. WILLIAMS

PHIL WILLIAMS, vp in charge of syndicated sales, ABC Films, joins United Artists Television on May 1 as eastern division manager. Appointment generally considered first major step by UA-TV—other than production which is underway—toward national sales organization for syndication. As outlined by Bruce Eells, executive vp of UA-TV, "first product to be put into national spot, major regional and local selling will be announced by June 1." Mr. Williams' past associations include: Ziv Television Programs, where he was eastern spot sales manager preceded by spot sales manager, central division; Time Inc. (for 15 years) in sales and public relations; *March of Time* as theatrical sales manager and advertising director for motion pictures and tv.

The Ziv man in your market can show you how to profit from using one of America's GREAT selling forces ...a Ziv Show!

RATINGS SHOWN ARE ARB, FEB. or MAR. '59

PTA WORK AND BEING A CUB SCOUT DEN MOTHER help to keep Mrs. William R. Hugill of Livonia, Michigan, busy. In addition, Mrs. Hugill, like many wives of Standard Oil dealers, helps her husband with the office work necessary for an efficient operation.

THE OTHER DAY someone remarked that the oil business was only a man's business. It isn't true—and thank heaven for that! Thousands of women have played a vital role in making Standard Oil what it is today—stockholders, employees, wives of employees, businesswomen and dealers' wives.

Here are just a few of our fair ladies. There isn't enough room on this page to print all of their pictures.

Women have an unerring instinct for quality and service and value—things on which our business is built. This is why so many women are busy *on* the scene at Standard Oil. But we are equally grateful to wives and mothers *behind* the scene. They know how to ladle out generous portions of praise and encouragement—just when they're needed the most. Progress depends on perseverance. And we count on thousands of the best buckers-uppers in the world!

A "man's business," indeed!

MISS MARY GARVEY IS A SCIENTIST in our research center at Whiting, Indiana. A graduate of Purdue University, her branch in science is chemistry. She is conducting one of hundreds of experiments that go on here continually to improve petroleum products.

MISS AGNES TOKHEIM is president of The Tokheim Company, Cedar Rapids, Iowa. Her company manufactures and sells gauges to Standard Oil. More than 30,000 independent businesses supply Standard with the services and materials needed to give you top-notch service.

BEFORE HER RECENT RETIREMENT, Miss Flora Adler was executive secretary to a Standard Oil official. An employee of Standard for more than 22 years, she is now on a world tour. Back in 1903, when retirement benefits were virtually unheard of in industry, Standard Oil started its retirement plan.

MISS MARGARET JOHNSON, an assistant principal in a Chicago high school, is shown going over a problem with George Mitchell (left) and Tom Madden. Miss Johnson is one of more than 53,000 women who own stock in Standard Oil. Standard has paid dividends in 66 consecutive years.

A CALENDAR OF MEETINGS AND EVENTS IN BROADCASTING AND RELATED FIELDS

(*Indicates first or revised listing)

April 26-29—National Assn. of Transportation Advertising convention, The Greenbrier, White Sulphur Springs, W. Va.

April 26-29—U.S. Chamber of Commerce annual meeting, chamber hdqrs., Washington.

April 27-28—Potts-Woodbury Adv. Agency Radio-Tv Farm Clinic, Bellerive Hotel, Kansas City. Invited radio and tv farm directors and farm products manufacturers will be guests.

April 27-May 2—Journalism & Broadcasters Week, School of Journalism & Communications, U. of Florida, Gainesville. (April 27 is Broadcasters Day. Key speakers include FCC Comr. Robert E. Lee; Matthew J. Culligan, NBC-Radio vice president; John F. Day, CBS tv news director, and Harold Krelstein, president of Plough stations).

April 29—Comments due on FCC proposal to prohibit networks from representing tv stations other than their own in spot representation field. Docket No. 12,746.

April 29-30—International Advertising Assn. convention, Hotel Roosevelt, New York.

April 29-May 2—American Women in Radio & Television, annual convention, Waldorf-Astoria, New York. April 29: Welcome party, 10:30 p.m. April 30: Tours and reception; banquet at 7 p.m., Sen. John F. Kennedy (D-Mass.) speaker; general session, 10 p.m., "Brainstorming for a Better AWRT". May 1: Fannie Hurst, commentator-author, keynote speaker at 9:45 a.m. opening session; NAB's Harold Fellows to moderate 10:30 a.m. panel on communications; Jayne M. Shannon, J. Walter Thompson Co. broadcast media supervisor, to moderate 2:30 p.m. panel on "Selling Techniques in a Changing Society." May 2: John Day, CBS-TV director of news, to moderate 10:30 a.m. panel on "Technical Progress—How to Make the Most of It"; also at 10:30 a.m., panel on "Program Sources—Keeping a Step Ahead," moderated by Duncan McDonald, The Yankee Network; Pauline Fredericks, NBC analyst and UN correspondent, to moderate 2:30 p.m. panel on "Entertainment and Enlightenment." Election of officers and the McCall's Award Dinner also scheduled for May 2. May 3: Business meeting at 10:30 a.m. In addition, other social and business activities to be held throughout the five days.

April 30-May 2—Alabama Broadcasters Assn. annual meeting, Buena Vista Hotel, Biloxi, Miss. Speakers include FCC Comr. Robert T. Bartley; Dallas Townsend, CBS News; Charles H. Tower, NAB personnel-economics manager, and John M. Outler Jr., WSB Atlanta.

April 30-May 3—4th district, Advertising Federation of America, Tides Hotel & Bath Club, St. Petersburg, Fla.

MAY

May 1—National Radio Month opens.

May 1—Journalism Institutes, Center Bldg., U. of Wisconsin, Madison.

May 1-3—Texas Assn. of Sigma Delta Chi, Hotel Galvez, Galveston. Annual meeting.

May 2—Inland Empire AP Broadcasters Assn. meeting for broadcasters from Eastern Washington and North Idaho, Davenport Hotel, Spokane.

May 2—Virginia AP Broadcasters, spring meeting, National Press Club, Washington.

May 2-3—Spring caucus sponsored by Los Angeles Advertising Women, Ambassador Hotel, Los Angeles. Includes business meetings, social features and awards luncheon.

May 3—Oklahoma AP Broadcasters Assn., Lake Texoma Lodge, Durant.

May 3-9—Canadian Radio Week, sponsored by Canadian radio manufacturers and radio stations, both CBC and private. Promotion material is being prepared.

May 4—Commencement of FCC inquiry into television network program practices. Chief Hearing Examiner James D. Cunningham presiding. Docket 12,782.

May 4-6—Assn. of Canadian Advertisers, annual conference, Royal York Hotel, Toronto, Ont.

May 4-8—Society of Motion Picture & Tv Engineers, semi-annual convention, Fontainebleau Hotel, Miami Beach, Fla. Theme will be "Films and Television for International Communications."

May 4-9—Advertising Research Foundation seminar in operations research, Cleveland. Eleven daytime and two evening lectures of three hours each in 6½ days. Further information from ARF.

May 5—American Council for Better Broadcasts, annual convention, Deshler-Hilton Hotel, Columbus, Ohio.

May 6—National Aeronautical Electronics Conference, Biltmore and Pick-Miami Hotels, Dayton, Ohio. A panel on worldwide communications systems is scheduled.

May 6—National Academy of Television Arts & Sciences, 11th annual Emmy awards presentation on NBC-TV, 10-11:30 p.m. (EST).

*May 6-8—National Community Antenna Television Assn. of Canada, third annual convention, Queen Elizabeth Hotel, Montreal, Que.

May 6-9—Ohio State U. Institute for Education by Radio-Tv, Deshler-Hilton Hotel, Columbus. Keynote address by Dr. Frank C. Stanton, CBS president. Other speakers: FCC Comr. Frederick W. Ford; Paul Chamberlain, equipment sales manager, GE, and producer David Susskind. Panel discussion on the advertiser as sponsor of educational tv programs under chairmanship of John P. Cunningham, president-chairman of Cunningham & Walsh. Interview by remote facilities with Sen. Warren G. Magnuson (D-Wash.).

May 7-8—Kentucky Broadcasters Assn., Sheraton-Seelbach Hotel, Louisville.

May 7-9—5th district, Advertising Federation of America, convention, Hotel Frederick, Huntington, W.Va.

May 8—Deadline for comments to FCC on daytime radio stations' request to operate from 6 a.m.-6 p.m. or sunrise-sunset, whichever is longer. (Extended from April 8 deadline, previously announced). Docket 12,729.

May 8—Connecticut Broadcasters Assn., Waverly Inn, Cheshire. Agenda includes agency panel discussion by Catherine Noble, Marschalk & Pratt; Dick Jackson, J. M. Mathes Inc.; Jerry Sprague, Cunningham & Walsh; Leo Kaufman, Kaufman Agency; Edward Lush, E. J. Lush Inc., and Shirley Walker, Graceman Advertising Inc. Dinner speaker: Comdr. Edward Whitehead, president of Schweppes (USA) Ltd.

May 8—Ninth annual Radio-Television Industry Conference, San Francisco State College, San

Awards...

When the Wheeling Advertising Club recently presented WWVA Radio with *seven awards* for outstanding programming, advertising, and promotion (a record number) . . . we were frankly pretty proud.

Because this cherished honor reflects tremendous recognition in the community, it indicates one reason why WWVA is first in every time period from 6 A.M. to midnight, 7 days a week, in 46 surrounding counties, and dominates the vital half of the \$6,000,000,000 Pittsburgh Tri-State Market that other media don't effectively cover. It shows, too, that Storer stations consider it important to be *local stations*, as well as being known throughout the nation.

OPEN MIKE

No razzle-dazzle wanted

EDITOR:

Congratulations to Muriel Bullis of Erwin Wasey, Ruthrauff & Ryan for her Monday Memo "The Station Merchandising Plan" (page 29, March 23). We have always felt that a station's prime responsibility to its advertisers is to deliver the largest possible audience at the lowest possible cost. It's good to learn that some agency people aren't impressed by razzle-dazzle and false promises.

Charles A. Sprague
General Manager
WMAX Grand Rapids, Mich.

WQXQ thanks WGMS

EDITOR:

This is a "thank you" letter . . . to Charles O. Wood of Washington's good music station, WGMS. BROADCASTING's Jan. 12 (page 93) story of WGMS' successful "tell the advertiser" promotion brought copycat success to our good music station . . . WQXQ began a campaign asking listeners . . . to let our good music sponsors know the advertising was heard on WQXQ.

The resulting outpour of listener "thank you's" so pleased sponsors and brought so many new success stories, renewals and new sales, that WQXQ has just concluded the second consecutive record sales month . . .

Don Ritter
General Manager
WQXQ Daytona Beach, Fla.

Levy levity?

EDITOR:

Have noticed on-the-air expressions for editorials on radio. One station calls these expressions "air-opinions." What would be wrong with calling them "air-ditorials."

Milton L. Levy
Manager
California Farm Network
Berkeley, Calif.

MONDAY MEMO

from EDWARD C. STODEL, president, Stodel Adv., Los Angeles

Get everybody into the act

It's amazing how many advertisers with good products chunk down a sizeable budget on spot radio, carefully buy the top rated stations, write the prettiest, downright clever, strongest copy . . . then stand there and virtually dare it to crack a new market, force distribution or skyrocket sales by the sheer magic of simply broadcasting the message to the mostest people.

Today, with the terrific competition of copy and promotion and production ideas and gimmicks for the listeners' interest, the usual battle for product acceptance plus the fight for distributor-dealer cooperation, you have to get *everybody* and *everything* into the act to really cash in fully on spot radio.

We have an interesting case in point with one of our accounts, Baker Boy Bakeries Inc. of Los Angeles and Amarillo, Tex., which produces and markets fudge brownies, a cinnamon-nut confection roll, low sodium diet cake and other items to grocers nationally. Like many manufacturers, they are somewhat at the mercy of their various distributors when it comes to local promotions, keeping markets stocked and the product displayed.

'Run Some Spots' • Last fall, the account was faced with a definite sales slowup in the important Dallas - Ft. Worth and Houston areas. "We need to jack them up—run some radio spots," the client instructed.

Now, that's one thing we don't believe in—just running some spots, especially without an on-the-spot appraisal of the marketing situation they're supposed to solve.

So, armed with a modest budget and bold plans, we arrived in Dallas set for an 8 a.m. pep-up meeting to excite the cooperation of the distributor, one of the nation's largest. By 8:30 we had problems. They were appreciative of the value of our radio campaign but, frankly, they had head office orders to push their own fruit cake for the holidays . . . so don't count on much activity from their salesmen. To make matters worse, we found their warehouse supplies of Baker Boy products were low and a quick check of grocers and supermarkets revealed less than desirable shelf space displays and dealer enthusiasm.

Setting the Stage • We chose a combination package of WRR Dallas and KXOL Ft. Worth, backed up by a secondary buy of KBOX Dallas to cover the twin market. In Houston, KNUZ.

Two weeks before the start of the campaign, meetings were held with the staffs of each station. Not only the star disc jockey personalities who were to do the selling, but everyone from the secretaries and engineers were brought into the act. Special coffee breaks were held to treat them all to Baker Boy fudge brownies and coffee cake. Supplies were sent out to the disc jockeys' homes for their families to enjoy first hand. We wanted everyone to be sold on the products—and it worked. We prepared copy and fact sheets so the disc jockeys could inject their personal ad lib endorsements. Of course, they were always eating Baker Boy in the studio and on the air, with their coffee. The copy catch line, "Oh Boy, Oh Boy, It's Baker Boy," quickly became a popular salutation around the studios.

Next, the big job was to pass that enthusiasm down to the distributor, his salesmen, and on to the dealers. In Houston, for example, KNUZ' Dave Morris went to the distributor branch office with us to help convince the area manager that fruit cakes or not, he just couldn't afford not to take advantage

Ed Stodel at 17 was bylining features from Hollywood for Hearst newspapers and soon was writing-producing early radio daytime serials originating there. After a year as KFI Los Angeles continuity editor, he formed Stodel Adv. (1935), specializing in radio for retailers and brand accounts as well as for major movie studios. Latest effort is a new tv film series based on adventures of U.S. Marines. Screen Gems made the pilot. Mr. Stodel lives in Sherman Oaks, Calif., with his wife Charlotte, daughter Jackie 14 and son Jeffrey 11.

of the business KNUZ was going to produce for him. It didn't take long for this distributor to place a sizeable order with Baker Boy's Amarillo bakery to stock up again on brownies and confection rolls.

With the help of promotion staffs at KXOL, WRR and KBOX, a similar pre-broadcast buildup impressed the distributor headquarters for Dallas - Ft. Worth enough to restock their depleted supply of Baker Boy.

The Follow Through • Then to make sure the all-important distributor salesmen—the men who must sell the market which sells the consumer, are in the act—a personal letter signed by all the star disc jockeys was sent to each by each station. Not only was this designed to make him feel these famed radio personalities were on his team to help increase his "take home" . . . but also how to use the campaign to excite maximum cooperation from his dealers. Included was a copy of the impressive radio listening schedule so he could personally catch the spots.

The final clincher was a special letter, sent by each station on its letterhead, to every grocer and supermarket in its listening area. The letter, personally signed by the radio disc jockeys, did a powerful job of selling the dealer on getting on the bandwagon, stocking up and planning displays so he, too, could cash in on the Baker Boy broadcasts. Of course, dealers were assured mentions for their markets on the spots.

Sells Big in Texas • As you can see, we managed to get everyone in the act. And the formula worked. The disc jockeys did a delightfully informal, highly effective sell. Getting them, their wives and kids and the gang at each station pre-sold on the product itself really paid off. In less than a month, radio was moving the products off the shelves faster than ever before experienced in Texas.

So, naturally, the reluctant but now convinced distributor had to split time between pushing its own fruit cake and rushing re-orders of Baker Boy to meet the demand. Admittedly, they had never before seen such fast results, such impact on a product from spot radio in this market. The three-month campaign paid off for Baker Boy and is still paying off in far better distributor-dealer cooperation and continued healthy sales.

So, just don't stand there, do something. Get everybody in the act!

How television serves its public

IF YOU'RE STILL AMAZED by the American people's insatiable appetite for television, you might find the answer in the record of how it serves most of its public most of the time.

The 19,000 broadcasts presented by the television networks in a single year are 19,000 responses to the demands and needs of television's many different "publics."

ONE MEASURE of how well television serves their needs is supplied by the audience itself. Every night, for example, during the average minute, 61 million people are watching their television screens, and this number grows larger every year. Week after week they transform television into the nation's biggest theatre, concert hall, lecture platform, house of worship and source of news.

Another index of its performance can be found in the annual George Foster Peabody Awards—"the Pulitzer prizes of broadcasting." Earlier this month all of the networks were honored for their contributions to the medium in this gratifying competition in which the public reaps the richest rewards.

FOR THE THIRD CONSECUTIVE YEAR, the Peabody Committee presented what it termed its "most important" award—the one for "Public Service"—to the CBS Television Network. The award was made for a series of special CBS News programs, most of which were scheduled at night to reach the largest possible audiences.

The committee also honored the Network for Television Musical Entertainment (*Lincoln Presents Leonard Bernstein and the New York Philharmonic . . .* "has inspired a resurgence of interest in symphonic music . . .") and for Television Dramatic Entertainment (*Playhouse 90 . . .* "stands alone among dramatic programs in television in aiming at the best . . .")

IT WOULD SEEM ONLY TOO CLEAR that people give more of their attention to television than to any other medium of communication simply because television gives them so much more of what they want. And because they find so much of what they want, in such even balance, at a single point on the dial, they turn their attention most often to the CBS Television Network.

REVOLT AGAINST THE TV CODE?

Showdown nears as many stations stick with forbidden commercials

The Television Code this week faces the toughest test of its seven-year life.

Nearly 70 tv station subscribers to the code have defied an ultimatum by the Television Code Review Board to quit carrying commercials for Preparation H, a hemorrhoid remedy.

The code board has threatened to certify violators to the NAB Television Board for disciplinary action. Only the NAB tv board has the authority to revoke a station's code membership, the stiffest penalty for code infraction. That board meets this week (Thursday, April 30) in New York.

A fortnight ago a code board spokesman reported that 15-20 subscribers had been formally certified to the NAB Television Board for action (BROADCASTING, April 20). These, he said, constituted the lot of subscribing stations which had refused to drop the Preparation H schedule.

Last week, from other sources, BROADCASTING obtained a list of 149 stations now carrying the Preparation H commercials. Seventy-five of the stations were discovered to be subscribers to the television code. Of those, seven have notified Ted Bates, the agency for Preparation H, that they are canceling the schedule. The other 68 have given no indication of cancellation.

A code board spokesman was asked last week about these 68 stations. After overnight deliberation he issued this statement: "Of the stations who are [code] subscribers and who are said to be carrying the advertising copy, 40% have cancelled the advertising and another 35% are in the process of making a decision." He refused to give specific figures.

How It Started • The Preparation H issue has been building toward a showdown for more than three years.

The product was first tested in television three and a half years ago after it had been advertised for some time on the Gabriel Heatter show on the MBS radio network. The test developed into a tv schedule.

In February 1957 the Television Code Review Board notified subscribers it regarded the commercials as objectionable.

A year later, in March 1958, the

TED BATES' RODGERS

250 stations okay his commercials

code board repeated its advice.

The third—and stiffest—warning was issued early this year. Three weeks ago the code board advised the 15-20 stations which the spokesman said were still carrying the commercials that they would be certified to the tv board.

In the same three-year period, the

list of stations carrying the Preparation H schedule has steadily grown. According to Dan Rodgers, senior vice president of Ted Bates and account group head on Whitehall Laboratories Division of American Home Products Corp., 57 tv stations have carried Preparation H schedules more than two years and 125 more than one year.

"Today 142 stations carry the Preparation H advertising schedules," Mr. Rodgers said last week. "An additional 108 stations have cleared the copy but have not been ordered, either because of unsatisfactory availabilities or special local market situations."

It could not be learned how many of the 108 that had cleared the copy were subscribers to the tv code.

Million Dollar Problem • Mr. Rodgers said last week that the Preparation H television spot budget was now running more than \$1 million a year.

Advertising for the product has also appeared in more than 1,200 newspapers and some 300 magazines including the *Saturday Evening Post*, *Parents*, *McCalls*, *Cosmopolitan* and *Coronet*. Mr. Rodgers said that *Life* had approved copy for a Preparation H schedule which will soon start.

A year ago Mr. Rodgers made a personal appearance before the Television Code Review Board to plead for a reversal of its ruling on Preparation H. At that time, and since, he has asserted that the product is of high quality, that its advertising has been accepted by reputable publications, that no station carrying the commercials has ever received a complaint from a viewer, and that its acceptance among consumers has widened steadily.

Preparation H is now the third biggest selling item in the Whitehall line. Its sales are exceeded only by Anacin and Dristan, Mr. Rodgers reported.

The Disputed Spot • The basic Preparation H television commercial is a minute film. It opens with a man seated at a desk. He reaches for a book from a bookshelf behind the desk and says: "These are doctors' reports on hemorrhoids revealing a new medication that relieves pain promptly, heals injured tissue."

The camera closes in on an open book

Shrinks Hemorrhoids New Way Without Surgery

Science Finds Healing Substance That Relieves Pain—Shrinks Hemorrhoids

For the first time science has found a new healing substance with the astonishing ability to shrink hemorrhoids and to stop bleeding—without surgery.

In case after case, pain was relieved promptly. And, while gently relieving pain, actual reduction (shrinkage) took place.

Most amazing of all—results were so thorough that sufferers made astonishing statements like "Piles have ceased to be a problem!"

The secret is a new healing substance (Bio-Dyne®)—discovery of a world-famous research institute.

Now this new healing substance is offered in ointment form under the name of Preparation H.* Ask for it at all drug stores—money back guarantee.

32 (CODE REVOLT)

and a chapter title: "Shrinks Hemorrhoids without Surgery." The picture shows a package of Preparation H emerging from the book as an announcer, voice over, says: "And actually shrinks hemorrhoids without surgery. It's the new medical discovery, Preparation H. . . ."

As the video cuts back to the man at the desk, he points to the book and says: "Yes, hospital tests and clinical tests now show prompt relief of pain, healing and shrinking of swollen, injured tissue." The man takes a laboratory tube from a rack and tips it, saying: "The secret? Only Preparation H contains Bio-Dyne."

The camera closes on a glistening drop of liquid clinging to the mouth of the tube with the title "Bio-Dyne" superimposed on the bottom of the screen. The announcer says: "The remarkable substance that draws the body's own healing oxygen to the painful area."

The video shows the page in the book which has various copy points in headlines, and the announcer continues: "The medical reports prove: Preparation H with Bio-Dyne relieves pain promptly . . . all without narcotics, without astringents, without surgery."

The camera returns to the man behind the desk who says: "Now hemorrhoid suffering can cease to be a problem. Remember, doctors' reports reveal this new medication shrinks hemorrhoids without surgery."

The camera shows two Preparation H Packages, one of ointment and the other suppositories. The announcer says: "Clinically tested Preparation H, suppositories or ointment."

The Official Word • Here is the full text of the only comment which a spokesman for the Television Code Review Board made last week after he and members of the board had been asked for comment by BROADCASTING:

"The decision concerning the non-acceptability of advertising on hemorrhoidal treatments by the new code review board, confirming the unanimous decision of three prior code boards, was recently made known to all stations. Over 80% of those who have replied have indicated that they have never accepted or will cease accepting such advertising. Of the stations who are subscribers and who are said to be carrying the advertising copy, 40% have cancelled the advertising and another 35% are in the process of making a decision.

"In accordance with television code procedures the cases of the remainder will be referred to the NAB Television Board of Directors for action concerning the use of the code seal by these stations. Some of these will be heard by the television board at its next meeting in New York on April 30."

AD ROLE MUST BE STRENGTHENED

Need for greater public and governmental understanding of advertising's contributions to U.S. economy is cited at 4-A convention

Importance of improving public and especially governmental understanding of the role of advertising was put under a microscope last week at the American Assn. of Advertising Agencies convention, held Thursday through Saturday (April 23-25) at the Greenbrier in White Sulphur Springs, W.Va.

It was examined in detail by an agencyman-turned-congressman; it was probed by the principal banquet speaker; it was dealt with by a banker guest; and it figured in private sessions of the annual meeting, which before the week was out had attracted a record AAAA convention registration of some 700 members and guests.

Rep. Bob Wilson (R-Calif.), speaking Friday, again urged agencies to immediately form a Washington-based trade association "to speak out for advertising." Rep. Wilson, a partner in the San Diego agency of Champ, Wilson & Slocum, espoused such an association before the Advertising Federation of America last February (BROADCASTING, Feb. 16).

Government 'Octopus' • He warned that inroads are being made at all levels of government on the right of the businessman to advertise. "As men and women entrusted by clients to invest their dollars in advertising, you should be concerned about these trends," Rep. Wilson said. "They are not new, they are not partisan, but they are alive . . . and growing."

"I think it is obvious that advertising needs effective trade representation in Washington. . . . This can only be accomplished through a contributory plan whereby agencies, the media, the suppliers and the advertisers alike take on the responsibility of financing and directing."

He said advertising is losing the legislative battle because it does not inform and educate the lawmakers. "Legislators are prone to hold up a wet finger to see which way the wind is blowing," Rep. Wilson continued. "Efforts to help create favorable impressions for advertising in consumers' minds are bound to create favorable impressions for advertising in the minds of politically-acute legislators."

The adman-congressman said that

such a trade association would not be classified as a lobby. Also, he said, the House Ways & Means Committee and the Treasury Dept. have stated that the association's expenses would be deductible.

Television Inquiry • Rep. Wilson saw this further disturbing sign for advertising: "A new congressional subcommittee [headed by Rep. Charles Brown (D-Mo.)] has been set up this year to inquire into television advertising ostensibly to see if small businessmen are suffering because of our network time sales practice."

The need for advertising people to get into politics and to get the true picture of their business across to both public and politicians was stressed by Arthur H. Motley, president and publisher of *Parade* magazine, in a speech prepared for the banquet Friday night. He said:

"Isn't it one of the most important things that you or I or anybody else in advertising can do in 1959 to see that the public gets a clear idea of the profession we represent—its importance, its contribution, its vital function in making our economy work? That's where more public participation comes in."

"Let's show in political life, as well as in business life, that advertising men have the courage and the brains and the vigor to stand up and show the country that there's nothing wrong with

Madison Avenue, nothing wrong with Michigan Avenue, nothing wrong with the advertising agencies of Los Angeles, San Francisco, Dallas, Pittsburgh, Detroit. Let's show that the 'image' they've hung on us in a lot of half-baked novels is strictly a phoney—a phoney that covers up the real contributions of advertising."

Urging political activity, he asked: "Why aren't all of us as advertising people in there pitching to be sure that *our* ideas and *our* kind of approach are reflected in government?" He recommended that agencies take advantage of U.S. Chamber of Commerce material which he said "you can use in your own shop to show how to get started in politics."

The Financial Story • The importance of getting advertising's story across to financial leaders was stressed by William S. Renchard, executive vice president, Chemical Corn Exchange Bank of New York, in a speech prepared for the Saturday morning session. Calling advertising "the hidden asset" which too many companies fail to mention in their financial reports, he said agencies should "bring your story" to all areas of clients' operations, "including particularly the financial officers who present the company's case to their bankers."

The nation's commercial banks themselves are spending more and more on advertising, he said, pointing out that their 1959 expenditures are expected to total \$143 million, up 12% from 1958 and seven times their annual advertising outlay immediately after World War II.

For new AAAA officers, see page 87.

TV COMMERCIALS: EGOISTIC Failure to sell 'outsiders' attacked at AAAA

The trouble with television commercials—one trouble, anyway—is that too many of them are made to please the people who produce or pay for them, rather than to sell "outsiders."

This criticism was aimed by John A. Sidebotham, director of Young & Rubicam's tv art department, in a speech prepared for delivery Saturday morning at the creative session of the American Assn. of Advertising Agencies convention (see above).

"We should be concerned," he said, "with commercials aimed at customers,

not copy chiefs, plan boards or even—God bless you, sirs—clients. . . . Why pay money to talk to yourself?"

Mr. Sidebotham told his agency, media and advertiser audience that "we're probably the only group in the country that fixes our snacks during the show and rushes back into the living room to catch the commercial." It's this "uncommon interest in commercials," he said, "that causes us to produce uninteresting, unbelievable commercials." Allowing them to be influenced by "too much self interest" of those who con-

ceive, approve, execute and pay for them results in watering down their "marvelous potential."

Commercials, he said, should "be interesting," should "attract" and "entice"; should be "specific" in "simple, agreeable terms," should be "honest" and should "be something."

Two Is a Crowd • Some of the problems of creativity were examined by Anthony C. Chevins, vice president and director of Cunningham & Walsh's creative department, also in a speech for the Saturday session.

The "only important rule" for being creative, Mr. Chevins said, is to do it alone; the greater the number of people involved, the less the productivity.

He singled out other impediments: "Too often we get so impressed by all the statistics, get so carried away by all the directions and restrictions, that we forget to add the creative touch. This can lead to a dismal display of canned cliches that follow beautifully the party line of research but fail to make a single sale."

In another Saturday address, David Ogilvy, president of Ogilvy, Benson & Mather, was scheduled to evaluate the "brains, guts and discipline" of creativity.

Earlier, in the Friday session, the agency executives and their guests heard and saw a morning-long presentation on "the revolution in rising expectations" by a panel of correspondents, editors and publishers from the

Time Inc. group of publications.

A group of award-winning tv commercials, selected for the annual exhibition of art and design staged by the Art Directors Club of New York (BROADCASTING, April 6), was shown twice during the convention.

Comic Alan King was to be featured entertainer at the Friday night banquet, courtesy of CBS. AAAA members were to be guests of Television Bureau of Advertising at a cocktail party scheduled for Saturday evening.

Spadework that pays by NBC Tv Spot Sales

In less than a year, NBC Tv Spot Sales' campaign to sell the virtues of spot advertising directly to prospective clients has resulted in sales estimated at \$1.9 million—on stations *not* represented by NBC Spot Sales.

For NBC Spot Sales stations, the campaign has produced approximately \$2.2 million in sales to advertisers who had not previously been using spot television. NBC Spot Sales client stations have gained approximately \$250,000 in renewals and extensions of these new orders.

On top of this, close to \$18 million in potential new business is represented in campaigns already proposed or being prepared for submission at the request of specific advertisers.

Missionary Work • These figures were reported by NBC Spot Sales officials last week to show that their drive

to sell the broad concept of spot advertising, while not unique among rep organizations, nor conducted with immediate sales as a primary objective, is paying off.

Ed Jameson, director of NBC Tv Spot Sales, and Mort Gaffin, director of new business and promotion, make up the special team doing the missionary work in the NBC organization's campaign. They estimate they have traveled more than 20,000 miles and made presentations in 13 cities since the project was launched just last summer.

With the assistance of NBC Spot Sales researchers, presentations have been tailor-made for the automotive, transportation, drug, food, insurance and other trades. Upcoming shortly are presentations in San Francisco and Los Angeles to executives in the cannery, food packing, fruit growing, oil, metals, chemicals and wine industries. After that: soft goods.

Spot as a Medium • Objective of the campaign is to sell spot advertising generally, rather than NBC Spot Sales specifically, to advertisers that use this medium little or not at all. The Jameson-Gaffin team pitches directly to top executives of advertiser companies, rather than to their agencies (although the agencies are kept posted). If the advertisers then ask NBC Spot Sales to recommend a campaign, that organization is happy to comply.

The overall missionary program is coordinated with the regular activity of the NBC Spot Sales organization, under the supervision of Director Dick Close.

Thus far, officials said, they have brought approximately a dozen new advertisers into the spot television fold, and a number of others are considering specific recommendations. Among those that have become clients: Charles Pfizer & Co., Hertz Corp., Northam Warren Corp., Campbell Soup Co. and Florists' Telegraph Delivery Assn. Officials said Pfizer created a budget (for Candettes) and then had to select an agency to administer it (Paul Klemtner & Co., Newark).

Here is the dollar breakdown of results of the project, as compiled by NBC Spot Sales:

\$2,200,000 in new orders on stations represented by NBC Spot Sales; \$250,000 in renewals and extensions of these orders; \$1,900,000 (estimated) in new business that went into other markets or to other stations in NBC Spot Sales markets; \$7,400,000 is represented in tv spot schedules proposed by NBC Spot Sales and under consideration by prospective clients; \$10,500,000 is involved in proposals in preparation at the request of specific prospects.

Selling the idea of spot • Edwin T. Jameson (l), director of NBC Tv Spot Sales, and Mort Gaffin, director of new business and promotion, make a presentation in their tv "institutional" campaign. With them (l to r) at offices of Northam Warren Corp. (toilet requisites), Stamford, Conn., are James E. Turck, salesman, NBC Tv Spot Sales; Richard E. Marsh, advertising manager, Northam Warren; Harold I. Seltzer, merchandising account executive, Doyle Dane Bernbach agency.

Maurice Corken, assistant general manager of WHBF and WHBF-TV says:

WHBF adheres to its published rates . . . assures advertisers of equal, fair treatment

WITHOUT ASSUMING a holier-than-thou attitude WHBF desires simply to state this fact about its business policy. Fair rates are maintained for excellent coverage of the market. WHBF clients can be sure that they receive all WHBF broadcasting services at the card rate—with equal treatment to everyone.

We believe that this policy fosters sound, productive business relationships. This factor together with the usual standard criteria for measuring a station's strength is why WHBF is selected repeatedly by agencies and advertisers to promote the sales of their products to the Quad-City

market. Mutual respect and integrity contribute an extra measure of satisfaction to these frequent transactions with many, many clients.

TV MAKES WHIRLEY-WHIRLER GO

Novice toymen with broadcast savvy sell 3½ million in a hurry

A soup plate on a stick became an international toy fad and not a flop because of television.

That's the reasoning of broadcasting-wise John Hyatt and Louis Westheimer, president and vice president respectively of the Whirley Corp., St. Louis, makers of the Whirley-Whirler, a plastic soup plate spun on the pointed end of a 30-inch stick.

Hitting the market in November 1958, more than 3½ millions of the Whirley-Whirler have been sold, with orders from Hawaii, South America and Europe. And tv's visual impact put the toy before the public as no other medium could.

The Whirley-Whirler was born in an airplane. Mr. Hyatt, who resigned as general sales manager of KTVI (TV) St. Louis last summer, was returning home after a job-hunting trip to New York. He read an article about the phenomenal success of the hula hoop and told himself, "This toy isn't a freak. Its success could happen again through television."

Tv Inspiration • "I got to thinking," he recalls, "about the hula hoop and what made it popular. It was circular. It had action. It requires some skill and coordination. Suddenly I remembered the jugglers and their spinning plates that I had seen a thousand times in vaudeville and on *The Ed Sullivan Show*."

After conferring with a plastics designer about a possible design, Mr. Hyatt went to his friend, Mr. Westheimer, a founder of Westheimer & Co., the fourth largest advertising agency in St. Louis.

They decided that the Whirley-Whirler was a toy that needed 100% exposure to sell. Both men knew that they could not afford the necessary store personnel to display their toy but with tv, they could "put a demonstrator of the Whirley in every living room."

As Mr. Hyatt explains, "Both Lou and I had been taking other peoples' products for 20 years and putting them over the top with radio and tv. Now we had a challenge to prove that we could do the same thing with our Whirley-Whirler."

New Trail • Toy makers have never been big users of the media and usually concentrate their advertising in the immediate period before Christmas. "However," remarks Mr. Westheimer, "we wouldn't buy the concept that tv and radio were too expensive, regardless of the season we chose for introduction of the Whirley."

The W-W campaign began in November 1958 and continued at a peak level through February 1959. In those four months, the Whirley Corp. bought \$100,000 worth of spots, in conjunction with such children shows as *The Three Stooges*, *The Mickey Mouse Club* and *Popeye*. This amount is more than 25% of the total budget with the rest going for direct mail to toy job-

bers, shops and department stores, and for print ads.

In addition the Whirley-Whirler was seen on such network shows as *Beat the Clock*, *Do-Re-Mi*, *Today*, the *Jack Paar Show*, *Johnny Carson* and most recently, on April 19, on ABC-TV's *You Asked For It*.

Although no radio time was bought, disc jockeys used the toy in many promotions and spread its name among teenage audiences.

Ad Bonanza • "Developed from tv and radio," says Mr. Westheimer, "unlimited product publicity resulted in national wire stories, magazine articles, features in almost every daily and coverage in neighborhood and weekly papers so extensive we didn't have time to put together a clipping book."

The Whirley Corp. estimates that in November and December it was spending \$1,000 a week on tv in St. Louis alone. During the peak four-month period, Whirley spots appeared on 211 tv stations while the toy was mentioned on 244 radio stations and 14 tv network programs.

Sales hit 250,000 per week at Christmas but now have declined to "several thousand a week." The drop started in February when the first of 26 imitations hit the counters.

"They sold without tv advertising," states Mr. Hyatt, "and they died. They wanted a free ride and in the end they killed themselves and almost us because they didn't use broadcast advertising."

On the Board • What are the future

TV STUDIO PARTY
Kids give 'em a whirl

TOYMAKERS HYATT AND WESTHEIMER
Tv's visual impact puts sales in a spiral

plans of Whirley Corp.? Two new toys are on the drawing board, slated for fall introduction. "In the old days," reveals Mr. Hyatt, "you needed six months of promotion to put over a toy. Now, with tv and radio, you can reach everyone in America almost over night."

Complete secrecy will be maintained about the new toys until they are released. Tv commercials, supervised by Mr. Hyatt, will be shot under wraps and saved for the fall.

"We've proved that the hula hoop 'miracle' could happen again with the help of broadcasting. There's no reason," added Mr. Hyatt, "why, with the right product and the right media advertising, that it couldn't happen again and again and again."

ON JANUARY BOOKS P&G takes early lead in network television

Each of the top six investors in network tv in January spent more than \$1.5 million (gross time charges). Procter & Gamble weighed in for the first month of the year with over \$4.3 million, while three other advertisers, American Home Products, Lever Bros. and Colgate-Palmolive were over the \$2 million mark.

General Foods, No. 5 on the list, was only a hair under the \$2 million level. General Motors with nearly \$1.9 million in gross time expenditure came in as No. 6 on the list.

The compilations on network gross time charges in January—that month hit a high of some \$52 million—showing estimated expenditures of the top 15 network advertisers by company and by brand as well as a breakdown by product classification were reported last week by the Television Bureau of Advertising. Figures were supplied by Leading National Advertisers and Broadcast Advertisers Reports.

In the product classification, the food category remained the largest, showing a near \$11 million invested in network tv, or an increase of about 17% over January of a year ago.

Top brand advertiser was Whitehall's Anacin (Whitehall is a division of American Home Products) with close to \$1 million in gross time charges in January. Bayuk's Phillies, Procter & Gamble's Tide detergent were second and third, both in the \$600,000 level. Whitehall had two brands (Anacin and Dristan) in the top 15, as did Liggett & Myers (Chesterfield and L&M cigarettes). The other brand entries in the top 15 were "singles" for the advertisers.

Estimated Expenditures of Network Tv Advertisers By Product Classification

	January 1959	January 1958
Agriculture & Farming	\$ 154,340	\$ 13,066

15. Old Golds (Lorillard)	448,350

Jan.-Feb. network gross up over 1958

Network tv gross time charges totaled over \$48.8 million in February and more than \$100.9 million for January-February of this year, representing respective increases over the same periods last year of 9.5% and 7.1%.

Compilations of the network gross time costs were made by Leading National Advertisers and Broadcast

Advertisers Reports, and released last week by Television Bureau of Advertising.

Each of the three networks showed gains: ABC-TV up 18.7% for February and 17.4% for the two months; CBS-TV increased 7.2% and 3.4% for the respective periods, and NBC-TV advanced 7.5% and 6.3%.

	FEBRUARY			JANUARY-FEBRUARY

Serving all Chicagoland!

WGN-Radio's 'copter service gets flood of favorable comments!

WGN-Radio scored a Chicago "first" several months ago with evening rush hour traffic and news bulletins beamed from a helicopter by Chicago police officer Leonard Baldy.

Recently when this service was expanded to the morning hours, the flood of approving comments by phone, wire and letter proved that the program had built a sizeable audience of loyal WGN-Radio listeners.

- "Thank you for your kindly tip on traffic the other night. I saved a half an hour on the outer drive thanks to your advice."

Mr. D. J. Freeze, 7621 Wilsham Ave., Chicago 31, Ill.

- "... and Officer L. Baldy, is cutting down on accidents—believe me! And it's the best guide for all on the road. Thanks for the swell service."

Harry J. Axal, 6243 S. Ashland Ave., Chicago, Ill.

- "... I'd like to express my appreciation for the late afternoon and early evening broadcasts covering the traffic movements in and around the Chicago area from a helicopter. Keep up with the good work."

Mr. Floyd N. Gatrell, 406 Morgan Blvd., Valparaiso, Ind.

- "... tell Officer Baldy I am most grateful for the fine service being rendered by the Chicago Police Department."

Genevieve Austin, C. S., 16918 S. Wood St., Hazel Crest, Ill.

- "... the traffic reports are terrific and more cities should adopt this same technique."

Mrs. W. F. Gruning, Jr., 3718 N. 92nd St., Milwaukee, Wis.

In providing this valuable service to the people of Chicagoland, WGN-Radio and the Chicago Police Department have the full cooperation of the Traffic Communications Center of Chicago's Department of Streets and Sanitation; the Citizens Traffic Safety Board; the National Safety Council and The Chicago Motor Club.

This type of programming is just one reason why WGN-Radio delivers loyal audiences for advertisers who want to *sell* all Chicagoland.

10% SPOT RADIO SLIP—YOUNG

Rep projects for year on current sales

Based upon the current rate of business, national spot radio billing in the United States in 1959 can reach an estimated \$143 million, down about 10% from the 1958 level, Adam Young, president of Adam Young Inc., New York reported last week.

Mr. Young also released the company's estimates of national spot radio billing in 1959 in multi-station markets. He stressed that these figures are not predictions but are estimates "of what the volume will be if the rate of business during the first quarter of the year continues."

In preparing the estimates, Mr. Young said, the company has noted "a marked trend toward the concentration of spot revenue in the top markets at the expense of the medium and smaller-sized markets." A spokesman for the company later said the projected decrease in spot business can be attributed in part to the concentration of billing in larger markets and to use by some advertisers of "more economical network radio buys."

Estimated 1959 Spot Radio Billing

Ad efficacy evaluated in ANA guidebook No. 7

A four-year, \$200,000 study of advertising fundamentals was completed by the Assn. of National Advertisers last week with publication of a 418-page volume on "Evaluating Advertising Effectiveness," number seven in the ANA Advertising Management Guidebook series.

Separate chapters, buttressed by case examples, evaluate markets, motives, messages, media and overall results. Leading advertiser, agency and advertising research men contributed to the volume.

Paul B. West, ANA president, says that with the seven-volume series completed, ANA must now see to it that the guidebooks are used. He describes them as "a unique working tool for solving the daily problems that arise in advertising." A half-day session at ANA's May 20-22 meeting in Chicago will be devoted to case histories showing the benefits which advertisers can derive from putting the volumes into actual use.

Among the contributors: A. W. Harding, manager of the marketing research department of General Mills (now with C. E. Hooper Inc.), on "How General Mills Tests Its Television Commercials" (see page 47); George Blechta, vice president of A.C. Nielsen Co., on "How to Match Your Television and Radio Coverage to Your Specific Market"; Paul E. J. Gerhold, media and research vice president of Foote, Cone & Belding, on (among other topics) allocating the direct advertising costs of television, radio and other media.

Other contributors, covering a wide range of subjects, include Maxwell Ule, Kenyon & Eckhardt; Dr. Wallace H.

ARBITRON'S DAILY CHOICES

Listed below are the highest-ranking television network shows for each day of the week April 16-22 as rated by the multi-city Arbitron instant ratings of American Research Bureau.

Date	Program and Time	Network	Rating
Thurs., April 16	Real McCoys (8:30 p.m.)	ABC-TV	17.7
Fri., April 17	77 Sunset Strip (9:30 p.m.)	ABC-TV	22.2
Sat., April 18	Gunsmoke (10 p.m.)	CBS-TV	29.8
Sun., April 19	Dinah Shore (9 p.m.)	NBC-TV	23.2
Mon., April 20	Desilu Playhouse (10 p.m.)	CBS-TV	30.1
Tue., April 21	Rifleman (9 p.m.)	ABC-TV	27.3
Wed., April 22	Wagon Train (7:30 p.m.)	NBC-TV	24.9

Color outsells b-w in General Mills' test

A tv commercial in color "out-sold" the black-and-white version of the same message by almost 50% in a test conducted by General Mills. This, although General Mills did not feel that color was used as effectively as it could have been in the commercial.

The instance is reported in a case history of "How General Mills Tests Its Television Commercials," in the Assn. of National Advertisers' new management guidebook on "Evaluating Advertising Effectiveness" (see page 44). It was presented by A. W. Harding, then General Mills manager of marketing research, now with C.E. Hooper Inc., at a closed workshop session conducted by ANA about a year and a half ago.

Participants in the test were interviewed first to find their preferences in cake mixes. Then they were shown the commercials. Of those who saw the black-and-white version, 12.3% switched preference to the mix shown in the commercial. Among those who watched the color commercial, 17% switched to the advertised brand. The color commercial also registered more solidly, producing higher recall of sales ideas (63% as against 41% for the black-and-white).

Another test compared the effectiveness of a commercial used on the *Wyatt Earp* show with one on the same theme but integrated into the *Burns & Allen Show*. The integrated version outsold the non-integrated in switching viewer preferences, 19.5% to 6.7%. But the *Earp* commercial ranked higher in getting across a number of specific sales points, leading General Mills to conclude that "we can make good use of both of these commercial approaches."

The tests were made for General Mills by Schwerin Research Corp.

Revlon planning big

Revlon Inc., New York, reported last week it is in the process of negotiating for a series of 40 hour-long television programs. The main obstacle is lack of a suitable network time.

Revlon is discussing the project with

PREVIEW . . .

Bubbling over • Radio and television, selected to introduce Bubble-Up to southern California in a \$125,000 six-week campaign, did the job so effectively that the available supply for the market was completely sold out in two weeks, according to apologetic signs posted by Coca-Cola Bottling Co. of Los Angeles in supermarkets throughout Los Angeles and Orange Counties, test area for the new soft drink. The radio-tv spots, prepared by Freberg Ltd. and placed by Carson/Roberts Inc., agency for the bottler, stressed the "bigger than king-size" bottle in which Bubble-Up is packaged.

Core of the commercials is a jingle:

"What's that bottled revelation
Bigger than king-size?
It's the new soft drink sensation
Bigger than king-size.
With a kiss of lemon and a kiss of lime,
Bubble-Up anytime."

'KING' FREBERG

On radio, the commercials feature the King who terms himself "official measuring standard for king-size cigarettes . . . king-size tweezers . . . roller skates . . . et cetera." "Nothing is bigger than me," the King ungrammatically boasts. He takes the announcer's statement that Bubble-Up is as a personal affront and when asked to stand up alongside a bottle he readily agrees: "All right. Now you see . . . Hmmm." When the announcer suggests that he drink some Bubble-Up to feel better, the King does, smacks his lips, "Very refreshing," pauses and adds "I'm bigger than my wife, you know." Stan Freberg plays the King in these 20- and 30-second radio spots and the agency chief in the one-minute commercials. On television, the King is a cartoon character.

The six-week introductory campaign in the two southern California counties backed up the broadcast saturation spots with four-color ads in newspapers and for two weeks included a sampling offer of a free carton of Coca-Cola with each purchase of a carton of Bubble-Up. Cost of the six-week drive was estimated at approximately \$125,000.

the William Morris Agency and with ABC-TV and NBC-TV. The series would cover ten programs starring Esther Williams; ten shows starring Marlene Dietrich; ten featuring Dick Shawn and ten written by Goodman Ace, based on his old *Big Show* variety series on radio. Revlon presently co-sponsors *The Garry Moore Show* on CBS-TV (Tues., 10-11 p.m.).

Liquid detergents: \$15 million tv client

With Adell Chemical Co.'s Lestoil far ahead of the pack, a total of five heavy-duty liquid detergents invested \$14.6 million gross for tv time in 1958, a 232% increase over the previous year, according to the Television Bureau of Advertising. Lestoil's spot tv budget accounted for \$12.3 million of that amount.

Second largest spender in 1958 was Lever's Handy Andy with over \$740,000, followed by: Texize detergent, \$645,000; P&G's Mr. Clean, \$421,300; Colgate's Genie, \$319,800, and Barco-

lene, \$114,400 (The Barcolene Co., Boston).

Expanded use of spot and network tv by the three major soap companies—P&G, Colgate and Lever—has been planned for their respective detergents (BROADCASTING, April 6). This indicates that Lestoil, which pioneered the way and had the tv field to itself from 1954 until last year, can expect a greater competitive battle before achieving national distribution.

Increased spot tv on restaurant menus

Increased confidence in spot tv again was expressed last year by the nation's restaurant chains, according to Television Bureau of Advertising. Estimated expenditures for 1958 hit \$359,600, the highest on record since such yearly figures became available in 1956, TvB said. The total represents a 9% increase over the 1957 mark of \$331,150 and is 63% greater than the \$22,000 spent in 1956.

Restaurant chains spending more

than \$50,000 in spot tv in 1958 were: Frisch Big Boy Drive-Ins (\$203,120), Hot Shoppes (\$78,790) and Howard Johnson Restaurants (\$55,270) which also spent \$33,373 in network tv.

In the fourth quarter of each year TvB gathers trend information on restaurants by covering their local tv activity during a sample week in 11 large cities. For the 1958 period, TvB reveals that 57 restaurants used a total of 175 spot commercials and sponsored three programs. The figures tripled comparable 1957 information, the bureau reported.

ON THE ROAD

86% of new cars have radios—RAB

"There are more car radios now than there were radio homes a dozen years ago," and "an estimated 3,650,000 radio-equipped new cars took to the road last year." These illustrative points are included in a new brochure, "The Facts About Auto Radio," published last week by the Radio Advertising Bureau Inc., New York.

RAB's pocket-sized book, which looks like a travel guide and opens like a road map, tells in question-and-answer form the growth of auto radio and its significance to advertisers. RAB cites independent research to report that 86 out of every 100 new cars sold last year were equipped with a radio, making an estimated total today of 37.9 million radio cars. RAB also points out a prediction of a 57% gain in auto ownership during the next eight years.

Comparing auto radio's size with other media, RAB states that the radio-in-auto count comes within 14% of matching the total number of tv homes; within 11% of magazine homes, and within 3% of newspaper homes.

Commenting on the fact book, Kevin B. Sweeney, RAB president, said, "... No matter where people go, in or out of the house, radio catches prospects on the run—even at 60 miles an hour."

Success Stories • In another RAB presentation a new package of case histories is offered to advertisers, detailing how gasoline "private branders" use radio. In many cases, the bureau states, strong radio advertising has helped these firms to out-pump the major oil companies in their areas. The success stories are the latest compilations for RAB's series of "radio-activity" reports which are supplied to advertisers.

Among RAB's examples in this retailing group:

Martin Oil Co., which operates in five midwestern states, has the highest per station average sales in the Chi-

cago market. Its formula—60% of its advertising budget in radio, with as many as 40 announcements plus newscasts on a single station in a week.

Mars Oil Co., St. Louis, for four years has put all its expenditures in radio, placing up to 140 spots, seven days per week, on a single station.

Clark Oil & Refining Corp., Milwaukee, spends 90-95% of its budget in radio sports sponsorship. Clark reports its sales have nearly doubled after four years of airing the Milwaukee Braves on a 40-station regional network.

Private branders' copy preferences include, according to RAB, both straight "hard-sell" and musical jingles, with stress placed on price and merchandising gimmicks.

Tv tape might thaw retail coolness to tv

Tv tape commercials made in local department stores were suggested as a method whereby "those diehards of American business, the local retailers," could be convinced to use more tv, by Jerome Feniger, vice president of Cunningham & Walsh, New York Friday (April 24).

In a speech entitled "Better Programming Means Better Sales," before the Ohio Assn. of Broadcasters in Cincinnati, Mr. Feniger said better programs result in better sales for "both the station and the advertiser unless the station succumbs" to the ancient temptation—greed. He cited cases of stations "triple, quadruple and quin-

tuple spotting," where the advertiser's message "never had a chance to penetrate the consumer's skull."

In another speech, Adam Young of Adam Young Inc., New York station representative, said many stations oversimplify the station's rep's role as that of selling the station's time to national accounts. He said a modern station representative also provides program advice, helps in the proper design of rate cards, and helps the station create a salable reputation.

Mr. Young defined modern radio as "a station with a definite plan to reach a specific group with management capable and firm enough to see that the plan is carried through."

Other speakers at the two-day meeting included Ed Broman, Ziv Productions, "Syndicated Tv Film" and Sol Taishoff, editor and publisher of BROADCASTING, "Editorializing in Radio."

No 'Biography' in Equitable's future

The Equitable Life Assurance Society of the U.S., New York, will sponsor a series on CBS-TV next fall but, contrary to earlier announcements, it will not be entitled *Biography*.

CBS-TV's Hubbell Robinson Jr., executive vice president, network programs, and Jack Simpson, vice president and national director of broadcasting at Foote, Cone & Belding (Equitable's agency), said last week that there had been a "change in plans." The projected series will be "broader in

is for product

It's available now...52 weeks of fresh, timely, sensibly-priced first-run product that has won Coates a roomful of citations from industry, civic and educational organizations. It's a virtually endless supply of top-flight programming that proves what the industry has been hearing about videotape quality and reduced costs. It's the special, patented Coates change of pace—bold and beautiful...poignant and funny—an uncanny insight into adult taste, with no punches pulled!

PAUL COATES

is for commercial

Five fast-moving half-hours a week of powerful, commercial videotape product that's designed to fill your night with rating points.

A narcotic addict. Number 2 Russian, Mikoyan. Archie Moore. The king of the Beatniks. A mother whose baby has been kidnapped. A charter member of the Mafia. A Christmas party for blind children.

Freshup Freddie Offends FBI

J. Walter Thompson's Chicago office got its Seven-Up account bottled up by the government last week—but all came out well.

A Federal Bureau of Investigation agent took exception to one of Seven-Up's "Freshup Freddie" interview type radio commercials and politely asked the agency to drop it. The spot closes with Freshup Freddie's reminder: "Thank you, Kim Schultz, and we'll be watching for your next picture, 'I was a wonderfully terrific teenager for the FBI.'"

The agent heard the spot in Kansas City and felt the satire may have held the FBI up to disdain. He called on Thompson representatives and cited the criminal code prohibiting use of the department's name or initials in any kind of advertising. Agency officials quietly agreed to pull the commercial, which was go-

ing off the air anyway at the end of April.

Ironically, the commercial was part of a packet prepared by Thompson for suggested use by local Seven-Up bottlers in perhaps 25 markets and has appeared in only a few markets as part of a limited national spot radio campaign. The client has been more active in spot tv, utilizing the same Freshup Freddie.

The action came as JWT continued to shop around for a network tv property on behalf of Seven-Up, which has dropped ABC-TV's *Zorro*. Previously, the client had been heavy in spot television.

Thompson has been conducting a promotion contest for station managers among ABC-TV affiliates, based on Freshup Freddie and built around the *Zorro* program. It closed April 10 with over 60 entries and winners are expected to be announced shortly by the agency.

scope" and the series' title changed. Details will be announced soon, they said.

Initially, Equitable was to sponsor a new series of 90-minute programs with the title of *Biography* and apparently with the format of presenting real life stories of prominent people. It was set for the Thursday night period to alternate with *Playhouse 90* next fall but suddenly the network pulled it from that period (BROADCASTING, April 20).

Government must use not abuse advertising

Departments of federal agencies should be provided public information funds for paid advertising and some government politicians ought to stop using advertising as a "whipping boy" when they can utilize its resources for valid purposes.

So said Marion Harper Jr., president and board chairman of McCann-Erickson, New York, in a luncheon talk before the Chicago Federated Adv. Club at the Morrison Hotel April 17. His speech followed the Advertising Council's annual Washington conference a fortnight ago. He devoted much of his talk to the value of ad council projects.

"Government can profitably employ the services of advertising on a scale five to ten times its use today," Mr. Harper is convinced. He argued such policy could result "in better knowledge of the audience—better measurement and appraisal of the electorate and oth-

er audience; more effective information program; in more responsible and ethical communications." Advertising can, in fact, help raise "the ethical standards of political expression" he said, and even aid in developing "a more scrupulous code in politics."

Handy Target • Too often, Mr. Harper said, "people in government with authority" use advertising as a "whipping boy—or at least until they need its help." He scored some attacks on "Madison and Michigan Ave. advertising 'hucksters' as a pretty disappointing display of the caliber of some of our government deliberations. I suppose a crack against advertising somehow establishes a politician's purity—his incorruptibility." Actually, he suggested, "people who live in glass porches should not throw stones."

Mr. Harper cited the Dept. of Commerce as an example that "great resources are being wasted because of a failure to spend a relatively small amount of money for public information." An "erosion sets in once an enterprise becomes sizable," he said, "unless communications makes its services known and appreciated." Accordingly, he suggested, such departments as Agriculture, State and, Interior should tell people what they're doing.

Meanwhile, Mr. Harper recommended, advertising should continue to "furnish its services free" to all community levels and, where other voluntary services fail to fulfill needs, "gov-

ernment should be prepared to pay for the balance." He also urged advertising to make known its values to responsible government people and its people to "take an active interest in the services that advertising can render government, both on a voluntary and a business basis."

Ad evolution began with U.S. Revolution

Advertising has changed since Paul Revere rode through the night to tell the New England farmers that the Redcoats were coming, NAB President Harold E. Fellows said Monday (April 20) in an address before the Hollywood Advertising Club titled, "184 Years Ago Yesterday."

"The years have brought an evolutionary development," Mr. Fellows said. "Now the copywriter, the film maker, the producer, the illustrator, the announcer—all of these and others in related functions in the world of advertising must *know* about the products to which they lend their talents of illustration, demonstration, composition, and so forth."

• Business briefly

• Lanolin Plus (Rybutol), Chicago, is launching a three-month, \$1 million advertising campaign in early May, placing the major portion of its budget in spot radio-tv in 163 markets throughout the country. A total of about 5,000 radio-tv spots will be used each week. Agency is Erwin Wasey, Ruthrauff & Ryan, N.Y. and Chicago. Lanolin Plus also announced the appointment of Gene Schoor Assoc., N.Y., to handle the entire line of company products.

• The Ford Motor Co., Dearborn, Mich., will be spending some \$200,000 on local radio-tv over the next six months to promote its "American Road Shows." These traveling exhibits, to be set up for nine-day stints at approximately 50 shopping centers throughout the nation, show Ford cars, trucks and farm equipment against a background of other newly developed products for suburban and country living. Additional expenditures boosting the "Road Shows" via local media are expected to come from the shopping centers, Ford dealers and other merchants of involved products. Agency is J. Walter Thompson, N.Y.

• The General Tire & Rubber Co., Akron, Ohio, has signed as sponsor of *Top Pro Golf* (ABC-TV Mon., 9:30-10:30 p.m.) effective June 8. Placed through D'Arcy Adv. Co., the order extends to Aug. 24.

YOU'RE INSISTENT...

YOU know quality and integrity are important.

YOU know they're especially important in the handling of newscasts.

YOU know that as well as we do, so we won't belabor the point.

YOU, as a businessman, realize it makes a difference what kind of news programs you're trying to sell.

WHY SETTLE FOR LESS THAN THE BEST?

THE ASSOCIATED PRESS

A DISTAFF LOOK AT 1959 RADIO-TV

900 AWRT members to assay conditions at busy N.Y. convention

Some 900 members of the American Women in Radio & Television this week will examine "Our Changing Industry" when the group assembles at the Waldorf Astoria Hotel in New York for its eighth annual convention. Discussion topics based on this overall theme are scheduled for the Thursday through Saturday meeting (April 30-May 2). Pre-convention and post-convention meetings of the board and officers also will be held.

Many leading executives and personalities in the radio-tv industry, as well as figures in public life, have been invited to speak at AWRT's convention workshops, luncheons and dinners. Sen. John F. Kennedy (D-Mass.) will launch the convention with a talk on "The Challenge Ahead" at the opening banquet Thursday night. Nena Badenoch, AWRT president, will give the convention call to order and will introduce Sen. Kennedy.

Also during the banquet, AWRT's 1959 scholarship award winner will be presented by Dorothy Fuller, WBET Brockton, Mass., chairman of the scholarship committee.

Other headliners on AWRT's speaker roster include: Harold E. Fellows, NAB; David Miller, Young & Rubicam; Robert L. Foreman, BBDO; Howard P. Abrahams, TvB; John Day, CBS News; David Susskind, Talent Assoc.; Pauline Frederick, NBC, and Mildred Freed Alberg, producer.

From 10 to 11 p.m., Thursday, following the banquet, delegates will remain in the ballroom for their first general session. Muriel Fox, vice president for radio and tv, Carl Byoir & Assoc., New York, will moderate a group discussion on "Brainstorming for a Better AWRT."

Among the corporations that will host luncheons and receptions during the convention are: ABC, CBS, NBC, *Better Homes & Gardens Magazine*, *McCall's Magazine*, Celanese Corp. of America, Clairol Inc.; Millinery Institute of America, Campbell Soup Co. and The Toni Co., Arnold Bakers and General Foods Corp.

Noteworthy dates and times:

April 28—(9:30-10 p.m.) Board of directors' meeting and executive session.

April 29—(9:30-10 p.m.) Advisory council meeting; (10:30 p.m.-1 a.m.) open house welcome party.

April 30—(9-10 a.m.) Five area chapter presidents meetings; (9:30 a.m.-4:15 p.m.) tours of the city; (7-10 p.m.) opening of convention and banquet; (10-11 p.m.) general session.

May 1—(9:45-10:15 a.m.) Opening session keynote address by Fannie Hurst, author and commentator, WNTA-TV New York; (10:15 a.m.-12 noon) general session, "Pitfalls—Legal and Public Relations Problems in Communications," featuring Harold E. Fellows, president and board chairman, NAB; David Miller, vice president and general counsel, Young & Rubicam; Carleton G. Eldridge Jr., partner in law firm of Coudert Brothers, New York; Geraldine B. Zorbaugh, vice president and general attorney, CBS Radio, and Stockton Helffrich, director of continuity acceptance, NBC; (2:30-3:30 p.m.) general session, "Selling Techniques in a Changing Society," moderated by Jayne M. Shannon, broadcast supervisor, J. Walter Thompson, New York, and speeches by Virginia Graham, tv and radio commentator; Robert L. Foreman, executive vice president, BBDO; Howard P. Abrahams, vice president, Television

Bureau of Advertising; (3:30-5 p.m.) business meeting, presentation of officer candidates and drawing of door prizes.

May 2—(10:30 a.m.-12 noon) Two simultaneous sessions: (1) "Technical Progress—How to Make the Most Of It," with John Day, director of CBS News, as moderator, and speeches by Fedora Bontempi, WNHC-TV New Haven, Conn.; Howard Maschmeier, general manager, WNHC-TV; Frank Marx, vice president in charge of engineering, ABC, and Alexander E. Cantwell, head of live and closed circuit operation, BBDO, New York; (2) "Program Sources—Keeping a Step Ahead," moderated by Duncan MacDonald, Yankee Network, Boston, and the following as panelists—Richard Pack, vice president in charge of programming, Westinghouse Broadcasting Co.; David Susskind, executive vice president, Talent Assoc., New York; Rege Cordic, KDKA Pittsburgh; Sunnie Jennings, WRGB-TV Schenectady, and R.J. Pressman, WRCA-TV New York; (2:30-4:30 p.m.) general session, "Entertainment and Enlightenment," moderated by NBC News analyst and UN correspondent Pauline Frederick, and the following participants—Mildred Freed Alberg, executive producer, *The Hallmark Hall of Fame*; John P. Cunningham, board chairman, Cunningham & Walsh, New York; Don Jones, producer, Bell science series, N.W. Ayer Inc., New York; Richard D. Heffner, director of programs, Metropolitan Education Tv Assn., New York, and Basil Thornton, executive director, The Broadcasting Foundation of America; (8-10 p.m.) *McCall's* Award Dinner.

May 3—(10:30 a.m.-12 noon) business meeting and installation of officers; (2:30-5:30 p.m.) board meeting.

The Case of the Brand New Half-Billion Dollars!

When WSM-TV started telecasting from the Central South's Tallest Tower (1408 feet above average terrain), over \$1/2 Billion in Effective Buying Income, and better than 1/2 million people, were automatically added to the Nashville Television Market.

HERE ARE THE FACTS AND FIGURES:

The New Nashville Market	Total (New Tower)	Gain (New Tower)
Population	1,728,800	546,700
Effective Buying Income	\$2,074,487,000.00	\$568,875,000.00
Retail Sales	\$1,519,052,000.00	\$413,981,000.00

(Market Data — Sales Management)

ALL THIS AND A 40.5 SHARE TOO (FEB. '59 ARB)

If you want to garner your share of that \$1/2 Billion, use WSM-TV, the station that has expanded the Nashville Market by better than one-fourth.

'TOTAL SELLING'

ANPA sales campaign to take swipes at tv

The Bureau of Advertising of the American Newspaper Publishers Assn. last Wednesday (April 22) presented a full-dress display of its "Total Selling" program designed to bolster newspaper advertising, and made clear that one of the objectives is to challenge television's effectiveness as an advertising medium.

The bureau's "Total Selling" program, which has been developing for nine months, was explained in detail to more than 1,000 management executives in attendance at the annual convention of ANPA in New York. The bureau presentation took the form of oral reports by its staff executives and musical and dancing skits in which professional artists performed.

The skits, on occasions, took pot shots at television. During a songfest on "Total Selling," the singers chanted:

"Accounts may put their dough into a big tv show

But they'll switch, when we give them the pitch

On total selling."

Another skit that drew applause from the crowd involved three performers dressed as babies, who were representing television channels. They moaned that "they looked the same, sounded the same, played the same old films, westerns, shoot-'em-ups . . . and nobody knows who the sponsor is."

Charles T. Lipscomb Jr., of the bureau, was even more direct. He said several presentations had been prepared to point up the superiority of newspaper advertising over tv advertising. One is titled "20 Reasons Why Newspaper Advertising is Better Than Television" and another, a brief presentation, is designed to show that television's audience is "highly fragmented," while the newspapers deliver a "total audience."

As the program unfolded, it was pointed out that "Total Selling" has five major elements: a new and expanded bureau research program; expanded coverage by the bureau of major business conventions; depth selling—selling of individual industries and individual companies by the newspaper's field forces; new sales tools for daily use by bureau member newspapers; a series of promotions, including three industry promotions in the automotive, food and appliance fields, and four season efforts—home improvement, summer sales, back-to-school and Christmas.

It was stressed that "Total Selling" is a "unified" effort by various elements

WRAL-TV office building • NBC-TV's affiliate in Raleigh, N.C., dedicated its \$300,000 administrative building April 15. Robert W. Sarnoff, the network's board chairman, cut a ribbon of video-tape to open the 11,000-sq. ft. structure adjoining WRAL-TV's production building which was completed about a year ago. WRAL-TV serves an area of 2 million people in central and eastern North Carolina.

of the newspaper business—the Newspaper Advertising Executives Assn., the American Assn. of Newspaper Classified Advertising Managers and the National Newspaper Promotion Assn. Bureau material will be channeled to these organizations as well as individual newspapers.

Edward A. Falasca, creative vice president of the bureau, said that since last October, the bureau has produced and issued 349,446 pieces of material to member newspapers, advertisers, agencies and others, plus 250,000 items ordered by members for use by their staff.

Mr. Falasca disclosed the first of the three industry promotions—"Live Better By Far With a Brand New Car" automotive drive from April 6-18—was conducted in 534 markets. He said that "there's not the slightest doubt from advance reports in some areas that there were some dazzling successes."

Mr. Lipscomb noted that food companies spend only about 25% of their advertising budgets in newspapers, while food stores and chains allocate 92% of their expenditures to newspapers. The "total selling" effort, he said, is enlisting the cooperation of the food retail industry in an attempt to persuade food manufacturers and processors to channel a larger portion of their advertising money into newspapers.

ANPA tells Mutual no, Defense ok's coverage

Mutual claimed a victory for broadcasters last week in their continuous battle for "freedom of access to the news" along with newspapers. Mutual's opponent: The Bureau of Advertising

of the American Newspaper Publishers Assn., which initially denied, then approved, the network's request to cover Defense Secretary Neil McElroy's speech during the bureau's annual dinner in New York last Thursday.

Bureau officials had advised Mutual earlier in the week that they could not permit the broadcast because they were acting "in accordance with an agreement between the secretary's office and the bureau dinner committee." Robert F. Hurleigh, MBS vice president for news, asked Asst. Defense Secretary Murray Snyder for clarification regarding this "agreement." Mr. Snyder immediately wired ANPA that "the Department of Defense has no objection whatsoever to coverage by any media of this address." ANPA then reversed its stand and permitted Mutual to broadcast Mr. McElroy's speech.

Genii award to Dinah

Radio & Television Women of Southern California honored Dinah Shore Tuesday (April 21) with the group's Genii Award as outstanding feminine broadcast personality of the year. Jack Benny made the presentation at the Club's fifth annual awards banquet, at the Beverly Hills Hotel.

Among the other honors given was a public service award to Lenore Kingston for organization of radio amateurs to cope with disasters.

PGW makes new pitch

Air assignment: Montana riot

There were more radio-tv newsmen in Deer Lodge, Mont., during the recent prison riot than there were hostages. More than 30 newsmen from 16 radio-tv stations in Montana, Washington and Oregon converged on the scene as rioting prisoners held 21 hostages inside the prison.

Within a half-hour of the riot's beginning, KANA Anaconda, Mont., closest station to Deer Lodge, was on the air with around-the-clock reports, including coverage for the *New York Daily News* and the *London (England) Times*.

On the riot's second day, CBS flew a team including Grant Holcomb and cameraman George Hause from Los Angeles to supplement the coverage it received from KBOW Butte and KGVO Missoula.

Network Feeds • NBC relied on KXLF-AM-TV Butte and KTVT (TV) Salt Lake City, for its coverage.

KXLF-TV film was also supplied to Telenews and Movietone.

Spokane, Wash., stations on the scene included KXLY-AM-TV, KREM-AM-FM-TV and KHQ-AM-TV. During the riot, KREM fed reports to more than 20 stations throughout the U.S. and Canada. KREM's Art McDonald was one of three newsmen who entered the prison to hear grievances of the rebellious convicts on the riot's second day.

KUDI Great Falls, reports a local men's clothing shop chartered a plane and flew staff members to Deer Lodge to provide sponsored coverage.

Other stations covering the riot included KGW-TV Portland, Ore.; KGEZ Kalispell, KBMY Billings, KOOK Billings, KOPR Butte, KOYN Butte, and KBTK Missoula, all Montana.

and sales people, called "Mr. Thinkbigly Goes to Town," the sales pitch brings up to date an earlier version (introduced in 1957) called "A Local Affair."

It approaches spot tv from the viewpoint of the man who "makes the decisions" for a national advertiser, then proceeds to explain the differences between spot and network, stressing audience and coverage factors and attempts to put over the theme that spot tv is a "basic tool" for advertising. It contains filmed commercials for such sponsors as Procter & Gamble's Zest, Piel's beer, Chevron gasoline and Lipton tea products.

Tv tape coverage: 84% by fall—Meighan

About 84% of all U.S. television homes should be covered by tv-tape equipped stations by September, Howard S. Meighan, president of Videotape Productions, New York, predicted Thursday (April 23) before a Radio and Television Executives Society luncheon meeting in New York.

Reporting on the progress of videotape since its introduction in 1956, Mr. Meighan also expressed his views on future developments of the process.

Mr. Meighan said there are three relative benchmarks against which the status of tape should be checked—speed, quality and cost. "The two chief characteristics of the speed of tape," he pointed out, "are the saving of valuable

man hours per net show hour and being able to get a show 'on the road' quickly." Mobile units, with video-tape recorders, will add new dimensions, he said. As to quality, Mr. Meighan forecast greater similarity between live and tape shows with the "almost sure introduction of 4½-inch cameras to replace present 3-inch standard Image Orthicons." The cost of tape is due to come down "about 50%" within the next five years, he said. "In sum," Mr. Meighan added, "better cameras, better recorders, better tape and better knowledge of the problems of use are all a part of the increasing quality of this system which has been tailor-made for television, and will hasten the obsolescence of film for tv."

CBS gathers changes, issues new rate card

CBS-TV has incorporated all of its rate and discount changes, most of which have been reported previously, in a new rate card (No. 14), the first published by the network since March 1957. The new card is effective May 1. Two new changes not reported before:

(1) The discount provided in the Extended Market Plan—if all EMP stations are ordered by the advertiser—is increased from 20 to 25%.

(2) Station-hour discounts were revised, using 30 station hours as the base for minimum discount of 5%, the first such change in the weekly discount

structure since 1952. The net percentage discount ranges from the 5% for less than 30 station hours to 15% for 100 or more station-hours per week.

The new card no longer breaks down the station lineup into classifications of basic required, basic options, supplementary interconnected or supplementary non-interconnected—the so-called "must buy" station lists. It incorporates such previously announced changes as new affiliates and station rate increases, reduction of weekend afternoon time rates, introduction of a Class D rate before 9 a.m. and liberalization of the annual discount policy for clients with both consecutive and alternate-week schedules.

Daylight Savings Time activates tape relays

The three television networks were prepared to meet the contingencies of Daylight Savings Time yesterday (April 26), with repeat feeds on tape permitting the large majority of stations remaining in Standard Time to carry programs in the same local time. A uniform exception to the arrangement are programs which demand live coverage, such as sports and special events telecasts.

At NBC-TV, the main exception is on the West Coast. The plan provides clock-hour release of programs in the evening schedule and a combination of two- and one-hour delay repeat for the daytime schedule. In Washington and Oregon, where stations remain on Standard Time, programs will be carried on the outlets one hour earlier because there are not sufficient facilities available to provide a one-hour delay.

At CBS-TV, the program schedule on the West Coast is this: All shows prior to 1 p.m. will be released one hour earlier, local time, than release in New York. After 1 p.m., programs will be released on a "clock time" basis. In the Pacific Northwest, programs will be carried an hour earlier.

At ABC-TV, all programs will be carried in clock time except in the Mountain and Pacific Northwest states where sufficient facilities are not available. Programs there will be fed at varying times.

Tv city expansion

Television City in Hollywood will be expanded through the addition of extra floors to the existing building, Louis G. Cowan, president of CBS-TV, announced last week. The building now consists of a full first floor and partial second and third floors, he said, and it will be built into a full four-story structure. Construction will begin this sum-

Superlative Equipment

means more viewer attention

Good programming attracts viewers — good “delivery” holds them! And WRAL-TV provides its skilled staff with the finest facilities....

The station is furnished throughout with new General Electric equipment.

There are two mammoth studios, one 60 x 60 feet and another 60 x 40 feet, each with a 20-foot ceiling.

The studios are equipped with seven cameras, a rear-screen projector, and three 70-circuit lighting boards.

A \$100,000 remote unit is equipped with four cameras.

North Carolina's first Ampex Videotape recorder provides money-saving advantages with “live” quality for commercials and programs.

Topnotch equipment, staff and studios help account for the unequalled rating record of WRAL-TV — tops in the Raleigh-Durham area. Here's the brightest screen for sales messages in central and eastern North Carolina.

Changing hands

ANNOUNCED • The following sales of station interests were announced last week, subject to FCC approval:

• KOMO-TV Seattle, Wash.: Sold remaining one-third to two-thirds owner Fisher's Blend Station Inc. by Theodore R. Gamble and C. Howard Lane for \$1.83 million. KOMO-TV is on ch. 4 and is affiliated with NBC-TV.

• WDAU-TV Scranton, Pa.: 75% sold to Mrs. M.E. Megargee and family for \$700,000 by WCAU Inc., former licensee of WCAU-AM-FM-TV Philadelphia before it was bought by CBS last year. Megargee family, which owns WGBI-AM-FM Scranton, now owns 100% of WDAU-TV. Megargees sold 75% interest to WCAU Inc. for \$650,000 in February 1956 and transaction represents repurchase of tv outlet. WDAU-TV is on ch. 22 and is affiliated with CBS-TV.

• WPIC-AM-FM Sharon, Pa.: Sold by John Fahline Jr., A.W. McDowell and associates to Sharon Broadcasting Co. for a total sum including substan-

Real reason

The West Virginia Broadcasters Assn. has scored the *Saturday Evening Post* for its half-year-old policy of accepting alcoholic beverage advertising (BROADCASTING, April 6). The West Virginia broadcasters in a resolution stated their wish that "such changing of standards had been the result of objective decision rather than retreat from financial pressure."

The resolution noted that the *Post* expects \$5 million from liquor ads in 1959 and that the magazine's black-and-white page ad revenue of last year "declined by approximately \$11½ million." The broadcasters went on to express "little concern" over the influence of *Post* advertising in West Virginia, where they said 45,595 homes receive the publication in comparison with 395,000 tv homes and over 500,000 radio homes "which will remain free" from liquor advertising.

tial current assets and real estate of \$510,000. Sharon Broadcasting is owned equally by William H. Rich and Alastair B. Martin, owners of WMGW Meadville, Pa. Mr. Rich is a former ABC account executive. WPIC is on 790 kc, with 1 kw, day.

• KIVA (TV) Yuma, Ariz.: Sold to Electro Investors Inc. by Harry C. Butcher for the payment of \$241,000 in debts. Electro Investors will be owned 25% by Mr. Butcher who will turn over promissory notes to the firm totaling \$150,508. Majority owner (67%) of Electro is well-known financier Floyd B. Odum. KIVA (TV) is on ch. 11 and is affiliated primarily with NBC-TV.

• WHYE Roanoke, Va.: Sold to Joseph Mullen and Jon A. Holiday (program director WIST Charlotte, N.C.) by Jefferson Broadcasting Corp. (Sherwood Tarlow group) for \$125,000. Other Tarlow stations include: WHIL Medford, Mass., WARE Ware, Mass., WWOK Charlotte, N.C., WLOB Portland, Me., and WJBW New Orleans, La. The sale was handled by Paul H. Chapman Co. WHYE is on 910 kc with 1 kw, day.

• WILI Willimantic, Conn.: Sold to Herbert C. Rice (former owner of KVNI Coeur D'Alene, Idaho) by Windham Broadcasting Co. for \$107,000. The sale was handled by Paul H. Chapman Co. WILI is on 1400 kc with 250 w.

• WARN Fort Pierce, Fla.: Sold to South Jersey Broadcasting Co. (WKDN

ONE OF AMERICA'S GREAT AREA STATIONS

Reaching and Holding 2,881,420 People—in 41 Counties of 3 States

questions should be directed to Dr. Patrick Hazard, 201 S. 34th St., Philadelphia 4, Pa.

- WVET Rochester, N.Y., has awarded its first annual WVET \$1,000 scholarship for graduate study at the Eastman School of Music, Rochester. The winner was Mrs. Patricia Selover Hanson, reports the station, who is "wife, mother, artist and student."

- The Illinois Broadcasters Assn., meeting in Peoria April 16-17, adopted a resolution declaring its "unequivocal opposition to government controls of radio and television programming and editorializing. . . ." The association urged NAB and other state broadcaster associations "to join the fight for freedom for broadcasting with active and vigorous support. . . ."

- Capital Cities Television Corp., radio-tv station ownership group has established its national headquarters office at 65 E. 55th St., New York. The company's officers are: Frank M. Smith, president; Michael Joseph, vice president in charge of radio, and Harmon L. Duncan, J. Floyd Fletcher, and Thomas S. Murphy, all vice presidents. Stations owned and operated by Capital Cities are WTEN (TV) and radio companion WROW, both Albany-Troy-Schenectady, WTVD (TV) Raleigh-Durham and WPRO-AM-TV Providence. All are CBS affiliates.

- Joe Wolhandler Assoc., public relations firm, moves its New York office to penthouse at 280 Madison Ave. New phone: Oregon 9-8386.

- Columbia Broadcasting System Foundation has contributed \$100,000 to the Lincoln Center for the Performing Arts, according to Clarence Francis, chairman of the center's \$75 million fund-raising campaign. Construction of the center will begin May 14. The 12-acre project in midtown New York will include facilities for Philharmonic Hall, a new Metropolitan Opera House, a repertory theatre, a theatre for the dance, a chamber music and recital hall.

- The John M. Branham and the John M. Petrie Memorial Scholarship Awards will be offered again this year, Monroe H. Long, board chairman of the Branham Co., announced last week. The college scholarships were established last year in commemoration of the company's 50th anniversary as national advertising representative and named after the company's founders. To be eligible for the two awards, applicants must be either employees or direct descendants of employees of Branham represented newspapers, radio or

tv stations. Winners, chosen by a Columbia U. board, will be announced next September.

- The Metropolitan Educational Television Assn. of New York has reported that the New York State Education Dept. budget for educational tv through March 1960 has been cut to \$550,000. META said the department asked for \$850,000 but the state legislature approved the lower figure, which was said to be \$50,000 lower than a \$600,000 budget for a six-month period ending last March for programming in New York City alone.

- N. E. Paton Jr. Assoc., Kansas City, Mo., has added public relations consulting for radio stations to its services. The company has moved into larger offices in the Wirthman Bldg. where it has been since its founding three years ago.

- ABC Radio reports that its new affiliates are WBBC Flint, Mich., effective last Monday (April 20) and KBND South Bend, Ore., effective yesterday (April 26). WBBC is owned by Booth Broadcasting Co., of which John L. Booth is president and Joseph R. Fife is general manager. KBND is owned by Central Oregon Broadcasting Co., Frank H. Loggan president and general manager.

- Three George Polk Memorial Awards went to broadcast newsmen. They were Chet Huntley, commentator, and Reuven Frank, producer, NBC-TV, for the tv documentary, *Argentine Crisis* (foreign reporting category); Gabe Pressman, WRCA-TV New York, for tv reporting, and Jay McMullen, writer-producer of CBS News for a show on juvenile crime heard on CBS Radio (radio reporting category). The awards, made by the Long Island U. Dept. of Journalism were established in memory of George Polk, a CBS correspondent killed in Greece in 1948.

- Irving Gitlin, director of public affairs department of CBS News, last week was presented a Sidney Hillman Foundation award for his supervision of "Unit One," which produced documentaries for CBS Radio in 1958. Praised at the awards luncheon in New York were the programs *Who Killed Michael Farmer?* and *POW—A Study In Survival*. Mr. Gitlin's prize was a citation and \$500 from the Foundation which was established in 1946 as a memorial to the late president of Amalgamated Clothing Workers of America.

- Storer Broadcasting Co. has reported net earnings after taxes for the

first quarter of 1959 were \$1,024,183, compared with \$751,204 earned in the corresponding period of 1958. Net earnings per share amounted to 41.4 cents in the 1959 period against 30.4 cents in 1958, based on a total of 2,474,750 shares of common and Class B common stock outstanding in both years. This year's earnings include the results of operations of WITI-TV Milwaukee which was acquired last December. Other Storer stations are WGBS-AM-FM-TV Miami; WJBK-AM-FM-TV Detroit, WSPD-AM-FM-TV Toledo, WAGA-TV Atlanta, WJW-AM-TV Cleveland, WWVA-AM-FM Wheeling, W.Va., and WIBG-AM-FM Philadelphia. The Storer purchase of KPOP Los Angeles and sale of WAGA-AM-FM Atlanta are yet to be submitted for FCC approval.

- KNXT (TV) Los Angeles has published rate card No. 10, raising the base evening hour one-time rate from \$3,750 to \$4,250. New rates were effective April 1.

- When WGN-AM-TV Chicago moves to new quarters in the spring of 1960, the *Chicago American* will take over its space in the WGN Building and be published by the parent Chicago Tribune Co. WGN Inc. plans to move its radio-tv properties to a location on the city's northwest side within perhaps a year, with ground expected to be broken in the next few weeks. The present WGN facilities will be expanded from four to eight floors to accommodate all departments of the *Chicago American*. Daily and Sunday editions will be printed on Tribune presses. The *American's* headquarters presently are located in the Hearst Building.

- Keystone Broadcasting System has extended its service to Alaska, completing affiliation agreements with four stations in the 49th state, it was announced last week. The stations are KLAM Cordova, KINY Juneau, KIBH Seward and KIFW Sitka, according to Blanche Stein, station relations director.

- WPOM Pompano Beach, Fla., commenced operation April 4. William A. Knight is general manager. Other staffers: Mike Thomas, program director; C.G. Huey, chief engineer; Hal Heller and Bob Utley, disc jockeys. WPOM's coverage extends from Fort Pierce to North Miami. The new daytimer is on 1470 kc with 5 kw.

FEDERAL AX FALLS ON OPTION TIME

FCC knocks out ½-hour of networks segments, makes other trims

Television networks got the bad news last week.

The FCC issued a formal rulemaking notice proposing to change significant elements of option time (BROADCASTING, April 13).

The Commission proposed to—

- Reduce option time to two and one-half hours in each segment of the broadcast day. Present rules permit the optioning of three hours.

- Count in option time "straddle" programs which begin in option time but run over into station time, or begin in station time and run into option time. Under present rules only that part of the program in option time is counted as option time.

- Require networks to give stations 13 weeks' notice before pre-empting an option time segment—or until the end of the contract with a non-network advertiser, whichever is shorter. But in any event at least a four-week call must be given. Under the present rule, the

network may capture its option time on eight weeks' notice.

- Permit affiliates to reject network programs as unsuitable for local audiences, even after the series has started, or permit affiliates to substitute a more suitable local program for a network program when a station believes it is in the best interest of its audience to do so. Under present rules, affiliates may reject a program only when offered, and also may pre-empt network time only for an "outstanding" local program.

Comments on this rule were requested by June 22, with replies up to 30 days thereafter. Comments on how this would apply to radio were requested, also.

Vote is Split • The proposal had the full backing of four FCC commissioners.

Comr. Frederick W. Ford concurred in the notice, but expressed the view that the proposed rule does not en-

tirely eliminate the legal question, although it minimizes it.

The legal question is whether option time violates the antitrust law. The Dept. of Justice maintains that it does. Last February, Justice Antitrust Chief Victor R. Hansen told the FCC that option time runs "afoul" of the Sherman Antitrust Act (BROADCASTING, March 9).

A dissent *in toto* was expressed by Comr. Rosel H. Hyde. Mr. Hyde stated that he felt the FCC should forbid option time entirely and "rely on the self-regulating force of competition." He said the proposed rule illustrates how regulation "breeds further and more complicated regulation." He said that last week's move indicated a trend toward involving the Commission more and more deeply in regulating terms and conditions under which stations make program choices.

Comr. T. A. M. Craven dissented

The face that launched a million sales: GLENCANNON

From Beer (Olympia) to Bakery Products (Holsum), the pre-accepted "Oscar"-"Tony"-"Emmy" Award Winning face, name and talent of Mr. Thomas Mitchell is launching sales—big sales for advertisers all over the country. As Glencannon, in the hilarious half-hour series of high comedy on the high seas, this beloved character stands ready to steer sales your way, too. What's more, Thomas Mitchell will sell for you personally, at the all-important point of sale.

only to those proposals which would reduce option time by 30 minutes and construe straddling programs as entirely within option time.

The option time proposals emanate from the recommendations of the Barrow Report that option time be prohibited on the ground that it violated the antitrust laws.

This was one of the recommendations made by the Network Study Staff, headed by U. of Cincinnati Law School Dean Roscoe Barrow. A hearing on all these recommendations was held by the whole FCC in the spring of 1958. Virtually all witnesses testified to the importance of option time and the seriousness to networking if it was prohibited.

Early this year the FCC made findings on the option time question and referred them to the Justice Dept. It was to these findings that Mr. Hansen replied in February. The Commission found that option time was "reasonably necessary" to networking and that networking was in the public interest.

The purpose of deleting 30 minutes from option time, the FCC said last week, was to provide "greater latitude to stations to select among alternative program sources." It also stated that this move would provide non-network groups with an additional period of prime time. Such groups include, the Commission listed, program suppliers, station representatives, and local, regional and national advertisers.

There are four segments to the broadcast day. The first runs from 8 a.m. to 1 p.m.; the second, 1-6 p.m.; the third, 6-11 p.m., and the fourth, 11 p.m.-8 a.m.

In commenting about the proposed new straddle program regulation, the Commission noted that the new interpretation would not make it impossible for a station to carry such a program, but would require the station and the network to remove from option time the amount of run-over time.

Public Affairs Exempted • There would be an exception to this measure. Live network programs of national importance involving educational, cultural or public affairs, special events or sporting events which run over from option time to station time would not fall under the new terms, the Commission said. It emphasized, however, that this exemption would not apply to dramatic programs or entertainment variety—the length and time schedule of which were under network control.

The FCC discussed variations on the proposed 13-week rule, including the question of how to count multiple-sponsored programs. In this case, the Commission said, the suggested rule would provide that a network's option could not be exercised prior to the

latest termination date of the several contracts.

In various sections of the proposed rule making notice, the Commission pointed out that none of the option time rules, or the proposals, prohibit a station from accepting a network program in or out of option time. The purpose of the option time rules, it emphasized, was to prevent a network from enforcing contractual rights without some protection to the station.

Mack trial witness parade is underway

The government said it probably won't call A. Frank Katzentine, one of three losing applicants for ch. 10 in Miami, to testify in criminal charges against former FCC Comr. Richard A. Mack and his Miami lawyer friend Thurman A. Whiteside. They are charged with conspiring in behalf of National Airlines in the FCC's February 1957 grant of ch. 10 to an NA subsidiary, Public Service Tv Inc.

Federal District Judge Burnita S. Matthews said if Mr. Katzentine is called by Justice Dept. prosecutor J. Frank Cunningham, then she will permit a defense subpoena of Sen. Estes Kefauver (D-Tenn.). Defense counsel Nicholas Chase (Mack) and Arthur Hilland (Whiteside) say they feel Sen. Kefauver's testimony would contradict that of Mr. Katzentine.

Judge Matthews denied a defense motion asking for appointment of a government-paid psychiatrist to help in questioning Mr. Katzentine. Mr. Chase, pleading indigence on Mr. Mack's part, asked that the government furnish a psychiatrist as well as pay for the services of Mr. Mack's doctor while he is undergoing trial and \$25 an hour for the services of an accountant. The judge deferred action on the last two requests.

She also denied a motion by Mr. Chase that Sherman Adams, former presidential assistant, and Gerald Morgan, former presidential counsel, be subpoenaed at government expense.

Will Subpoena Two • Judge Matthews agreed to a move to subpoena Washington attorney William Porter and former White House aide Roger Robb, both of whom acted as counsel to Mr. Mack in the House Legislative Oversight subcommittee hearings.

It was agreed last week that FCC Chairman John C. Doerfer, who is under defense subpoena along with five of the other six FCC members (all but Comr. John S. Cross), could make a deposition at his office tomorrow (April 28). Chairman Doerfer is scheduled to be in Tokyo, Japan, by May 4 to discuss the possibility of a cable between the U.S. and Japan.

New appliance décor...and

NATIONAL STEEL

Fresh colors and textures, custom-tailored to fit any designer's imagination, are on tap at National Steel for the appliance industry and many others.

For National, through its new Enamelstrip Division, is opening an age of fresh product appearance and cost savings. How so? Through two lines of beautiful pre-coated metal in coils. One: metals with enamel coatings in almost every color imaginable. The other: metals with laminated vinyl coatings in an almost limitless variety of colors, patterns and textures—every one of them with high resistance to abrasion, fire, scratching and stain.

Think of it for your products—the fresh appeal of new colors or textures—plus eight built-in manufacturing economies such as eliminating painting operations and reducing capital equipment.

Now enamel-coated and vinyl-laminated metals take their place alongside the fine cold rolled sheet steels and zinc-coated steels with which National has long served the appliance industry and others through its six major divisions: Weirton Steel Company, Great Lakes Steel Corporation, Stran-Steel Corporation, The Hanna Furnace Corporation, National Steel Products Company and, of course, Enamelstrip Corporation.

NATIONAL STEEL CORPORATION, GRANT BUILDING, PITTSBURGH, PA.

FCC PROPOSAL: STUFF IN MORE V'S

- Majority report to Senate group reveals interim plan
- Would expand vhf band to 50 channels in military swap
- Alternatives: live with present set up; go whole-hog uhf

The FCC last week announced it is going to try to shoehorn more vhf stations in problem areas—by cutting down on mileage separation.

This is the majority view for the interim measure to meet head-on the five-year-old tv allocations problem.

The decision was made known last week when the Commission's statement to the Senate Commerce Committee was made public. The statement was submitted in lieu of a hearing because the Senate committee is tied up in other matters at present.

The report also held out a 50-channel expanded vhf system as the most desirable and ideal solution to tv's intermixture problem. This would depend, it was pointed out, on persuading the military services to surrender space they now occupy above ch. 13, in exchange for the uhf television portion of the radio spectrum.

Consultations between FCC and military officials are expected to get underway soon. The military already have agreed to sit down with the FCC and consider the problem.

Alternate Solutions • Failing this, the Commission said, only two possibilities are left:

- A continuance of the present 12 vhf-70 uhf system, or
- An all uhf system.

The Commission's views were opposed by Comrs. Robert T. Bartley and Robert E. Lee.

Mr. Bartley concurred in the long range viewpoint, but dissented on the interim measure.

The interim action is premature, Mr. Bartley said, and may prejudice any long range program other than an all vhf system.

If the expanded vhf system is feasible, Comr. Bartley said, the first areas which should be provided for are those without vhf service, then those with a single vhf service, etc.

If the expanded vhf system cannot be accomplished, an interim plan should mesh with a long range plan, Mr. Bartley said, and added:

"... it may well be that a more vigorous program of deintermixture toward uhf markets is the only solution."

Mr. Lee, who as of last weekend had not written his views, takes the position, it was understood, that the ultimate allocation for all of tv is in the uhf band.

He is said to be dubious that the Commission will be able to persuade the government to relinquish vhf frequencies for tv.

Hearings Soon • In making public the FCC's presentation (BROADCASTING, March 30 et seq.), Sen. Warren G. Magnuson (D-Wash.), chairman of the Senate committee, declared that hearings on the entire allocations' problem would be scheduled in the near future as soon as the committee's agenda would permit.

Rep. Oren Harris (D-Ark.), chairman of the House Commerce Committee, said he could not comment on any of the FCC's alternatives because it all "is a matter of determining how many channels we might need." He pointed out that the whole subject of allocations is up for study by his communications subcommittee. This was a reference to the overall spectrum study which the House committee has undertaken with an initial \$150,000 appropriation.

Rep. Harris said he had not rejected anything in the FCC statement. This was in answer to published reports that the Commerce chairman had "rejected" the FCC's recommendation for a 50-channel, vhf television system.

Sen. John A. Pastore (D-R.I.), chairman of the communications subcommittee of the Senate Commerce Committee, said he had had no time to study the document and therefore could not comment.

One of the salient recommendations in the FCC report was for Congressional legislation to require all tv receivers in interstate commerce to be capable of receiving all tv channels. A second suggestion was for Congress to empower the FCC to establish standards for receiving sets.

Manufacturers Will Consider • Electronics Industries Assn. Executive Vice President James D. Secrest said that the FCC's recommendations would be considered by radio-tv manufacturers at EIA's Chicago convention May 20-22. What this position would be, Mr. Secrest said, could not be foretold at this time.

Radio-tv manufacturers historically have resisted any attempt to grant the FCC the right to set standards for receivers. The most recent evidence of this was during the FCC's 1950 color

tv hearings when the FCC tentatively approved the then CBS "mechanical" field sequential system if manufacturers would promise to produce receivers with "bracket standards" permitting reception of both color and black-and-white transmissions. Manufacturers virtually unanimously refused to accept this barrier to their independence.

The FCC's decision to adopt a policy of squeeze-ins of vhf channels in various tv markets through reduction in mileage separations—in order to equalize the competitive factors among the three networks—galvanized the Assn. of Maximum Service Telecasters to call a special board of directors meeting in Washington for Saturday and Sunday (April 25-26).

The special meeting was called for the purpose of discussing the FCC's statement on tv allocations, Lester W. Lindow, AMST executive director, said.

Report Presented • The 42-page FCC statement on tv allocations was submitted to the Senate Interstate and Foreign Commerce Committee Friday, April 17. Copies also were made available to the House Commerce Committee.

On Tuesday, the Senate committee made the statement public, including a statement by its chairman, Sen. Warren G. Magnuson (D-Wash.).

The document, prepared as a statement by FCC Chairman John C. Doerfer, is in three parts: (1) an introduction, (2) a discussion of various alternatives, and (3) a summary.

In his introduction, Mr. Doerfer referred to the fact that the Commission has met frequently on this subject and has had a special staff working on the problem.

This staff included Broadcast Bureau chief Harold G. Cowgill, Standard & Allocations Division chief Hart Cowperthwait, Technical Research assistant chief Arnold Skrivseth, and Broadcast engineers Melvor L. Parker and Louis R. Rein.

In commenting on the report of the Television Allocations Study Organization, Mr. Doerfer said that the data on equipment was based on current design and performance and estimates of future improvements were left for the Commission to determine.

Mr. Doerfer said that "substantial"

agreement had been reached on two general conclusions:

- That no rearrangement of the 12 vhf channels can provide a nationwide, competitive tv system.

- That deintermixture — eliminating the assignment of vhf and uhf channels to the same communities—cannot provide a long-term answer to the allocations “dilemma.”

By “substantial” it was presumed Mr. Doerfer meant that five of the commissioners favored that position.

Comr. Robert T. Bartley objected to that part of the presentation which recommended interim action. He said he was afraid it would prejudice long term action.

Comr. Robert E. Lee has maintained that the proper move was to all uhf. He is preparing a statement setting forth his views.

The Alternatives • Five “alternative” policies were studied, the document stated. These were:

- A 50-channel expanded vhf system, retaining the present 12 vhf channels.
- A 50-channel vhf system, beginning at the present ch. 7.
- A 25-channel vhf system, beginning at the present ch. 7.
- The present 82-channel system continuing to use both the present 12 vhf

channels and the 70 uhf channels.

- A 70-channel all uhf system.

In relating the current exploration with the military on the possible release of additional vhf frequencies for television, Mr. Doerfer declared that he was hopeful that a “definitive” answer would be given “within the next few months.” He referred to the negative answer the Commission got on the same request in 1956.

This was the attempt made by former FCC Chairman George C. McConaughy to also secure extra vhf channels from the government users. This request was turned down because of national defense requirements plus the cost of moving non-government (largely military) out of present assignments (BROADCASTING, April 16, 1956).

The FCC chairman called attention to the fact that if and when additional vhf frequencies are made available for non-government use, the Commission will have to consider the needs of non-broadcast services as well as the television users.

The overall spectrum requirements are now the subject of an FCC study, covering the 25-890 mc area. This includes the tv and fm allocations.

The Commission last week announced that public hearings would commence

on this inquiry May 25. Previously the Commission had asked for and received written comments.

Mr. Doerfer called attention to the failure of the FCC’s “hope for commercial success of uhf television.” Since 1952, he said, almost half of the 369 uhf permits have been surrendered and 90 of the 165 uhf stations built and put into operation have ceased broadcasting. Uhf receivers account for less than 10% of total tv production, he said.

In the spring of 1958 there were only 3.2 million tv homes viewing one or more uhf stations, Mr. Doerfer pointed out. This compares with 3.7 million uhf homes in 1956, he said.

“Any allocation plan designed to meet the nation’s television needs must provide opportunity for expansion. . . . The task is to shape an application plan that will foster an expanding and competitive nationwide television system. Such an allocation plan should provide adequately, within the framework of private operation, for coverage of all the people, for local community outlets, for competition particularly in the larger markets, and for educational needs.”

The Commission has decided, the document pointed out, that the desir-

WILLIAM TELL

WILLIAM TELL PACKS THE BIG SELLING PUNCH! And whatta punch! Socko in Cleveland with audience research comments like this: “well acted,” “wholesome,” “fast-moving,” “suspenseful.” Socko in Pittsburgh, Houston, and all around the country for such advertisers as Meadow Gold Dairy, Fisher Foods, and Lucky 7 Stores. And soon William Tell comes out swinging in 5 new markets via the Triangle stations who’ve just bought into the big excitement. What’s more, William Tell keeps punching for advertisers with unprecedented merchandising, on-the-air, at-point-of-sale, everywhere! And it’s all part of the buy...when the buy is “THE ADVENTURES OF WILLIAM TELL.”

Allocation shoehorn: tv's tight fit

Here is the summary statement by FCC Chairman John C. Doerfer which concluded his official presentation to the Senate Commerce Committee. In it he recapitulated the sense of his colleagues that an expanded, 50-channel vhf television system is the most desirable goal and the reasons why most of the FCC feel that an interim, vhf drop-in policy now is best for immediate and long range solutions. The text follows:

On the other hand, both of these alternatives also have substantial disadvantages. The effectuation of an 82-channel system depends on nationwide conversion, which can be achieved only by a Congressional requirement that all sets shipped in interstate commerce shall be equipped to receive both vhf and uhf channels. Such a statute would not guarantee the success of uhf, but it would remove one of the major obstacles to its success. At the same time it must be recognized that because of the range of frequencies involved between the low vhf and the high uhf, the public probably would be required to pay more for good quality receiving equipment than under an expanded vhf system.

Likewise, a majority of the Commission prefers an expanded vhf system to an all-uhf system because of the greater likelihood under a vhf system of providing adequate nationwide coverage with a smaller number of channels. The Commission cannot move television to the uhf unless and until it has strong evidence that uhf over-all can provide service equal to that in vhf without requiring major increased outlays by the public generally. Such evidence is not yet forthcoming, although as we pointed out there have been some developments which show promise.

We are hopeful that within the next few months we will know whether an expanded vhf system is a feasible eventuality. However, as we have emphasized, the implementation of this allocation solution, or of any other, will require a long transitional period.

As interim cure, some mileage reductions

Meanwhile, some interim action is clearly needed. The Commission is of the view that immediate steps must be taken to remedy the critical shortages of facilities in a number of important population centers. Characteristically, these markets have only one or two vhf stations, and little or no uhf set conversion. The only practicable short-run solution in these cases is to add vhf assignments, even if this requires less than our minimum spacing requirements. Only in this way can we obtain sufficient competitive outlets to serve the public interest.

This interim policy must be carefully circumscribed to be consistent with our long-range allocation policy. It must be focused on alleviating only the most critical shortages.

If the future allocation solution lies in an expanded vhf plan, the Commission will have the opportunity in the future to delete any short spacings which are required immediately. A similar opportunity to remove short spacings would be present if the long-range solution must be sought in a practicable 82-channel vhf-uhf system or in an all-uhf system. If, however, none of these alternatives proves feasible, and we must rely on the 12 vhf channels then the number of short separations will inevitably increase.

A limited short-range program of adding vhf assignments at the necessary spacings can probably be engineered to avoid serious deterioration in the general availability of television service. To this end television stations may have to utilize directional antennas, precision offset, and such other techniques as the Commission may require in the public interest.

Currently, the Commission is exploring the most feasible and expeditious procedures for achieving this interim approach. We expect within a short time to initiate the necessary rule making proceedings.

We are hopeful that our discussions of this matter today will not result in a flood of petitions for rule making on this subject, at least until we can complete our work on the notice of the proposal we intend to publish.

We appreciate the opportunity you have given us to explain in detail the status of our consideration of the allocation problem. We are continuing to give this matter high priority, both at the Commission and at the staff level, and we are hopeful that in the near future we can arrive at an appropriate solution in the public interest.

We have reviewed for you the advantages and disadvantages of the various alternative solutions to this most difficult problem.

A 10-year transition period in reallocation

Common to all of these allocation solutions are certain general considerations. One is the long transitional period required to effectuate an allocation change. Any solution permitting television to use effectively more than the present 12 vhf channels necessarily must involve a transition period of perhaps 10 years or longer. This time is required to enable the over 40 million vhf-only set owners to enjoy full use of their present sets before being required to purchase new receivers. In addition, a reasonable conversion period must be granted to the broadcasters and to the non-broadcast radio spectrum users that may be affected if an allocation revision is made.

A second consideration is the need for all-channel receivers. If a transition from the present television structure is to be successful, it is essential that after a given

able number of assignments in each major television market is five stations—four commercial and one educational (CLOSED CIRCUIT, April 13.)

A major television market, it defines as one having 100,000 or more homes within the area covered by a tv station signal. This includes multiple communities, it is pointed out.

The discussion then goes into the pros and cons of each of the five alternative plans:

- A 12-vhf-channel only tv system.

The only method of substantially increasing the number of stations is to

reduce spacing requirements. This will remedy current shortages in a number of markets, but cannot provide sufficient outlets to satisfy the long-run, expanding needs of tv.

One method is to cut mileage separations to 100 miles (vs. 170 miles in northeast). This permits a "large increase" in assignments, but usable signal of squeezed-in station extends only "few miles" in direction of service areas of existing stations. If existing stations are also cut, then coverage of both new and existing stations would extend only to 30-35 miles (vs. up to 70 miles

in some instances).

This would result in loss of service to rural and fringe area population. "A plan which requires general reduction in station spacing may delete some or all of the program services for an indefinite period in many homes where such program services are now available," the report stated.

Room for Expansion • Chairman Doerfer said:

In test plans, this move did not contain sufficient outlets to meet criteria, falling short of providing even four sta-

date all receivers sold to the public should be equipped to receive all television channels. This is necessary to enable broadcasters on any channel assigned to television to reach the public effectively. We have learned from experience, however, that a Commission decision on allocations does not ensure necessarily the marketing and sale of all-channel receivers. Cost considerations and other factors may result in the continued production and sale of sets equipped to receive only 12 channels. This is particularly true because during the transitional period operation by present stations on existing channels is likely to continue until an ultimate cut-over point is reached.

A law to force all-channel set making

We, therefore, believe that the Congress should consider a requirement that all sets shipped in interstate commerce shall be equipped to receive all television channels in order to permit an allocations' solution. Otherwise, there is a real danger that irrespective of any Commission decision television will continue to be limited effectively to 12 channels.

Two other general factors are involved in the television allocations' problem. One is the current proceeding in Docket No. 11997, which is designed to ascertain the future requirements of all radio services using spectrum space between 25 and 890 mcs. This proceeding undoubtedly will affect our conclusions as to the appropriate division of this spectrum space between television and other services.

The other general factor which cannot be overlooked is the dynamic and ever changing character of the electronic art. Plans devised today for the proper development of television may be affected by innovations tomorrow.

A 50-channel vhf system is the aim

In discussing the specific allocation solutions, we have indicated that an expanded vhf system comprising 50 channels (including the present tv channels 2-12, or alternatively channels 7-12) would satisfy the public interest criteria insofar as television is concerned. It would permit nationwide coverage, competing stations in the major markets, local community stations in the small communities, and adequate outlets for educational need.

To obtain the additional vhf and contiguous uhf channels requires an exchange of spectrum space with the U.S. government. A cooperative study of the possibilities in this area has been started jointly by the Commission and the government (OCDM). In addition, the President has suggested the establishment of a committee to study the uses of the radio spectrum with a view to an improvement in allocations. Also, a study of spectrum usage is being initiated by the House Committee on Interstate and Foreign Commerce. We are hopeful that these studies will be of great assistance in determining the feasibility of an expanded vhf television system.

Inherent in the problem of exchanging spectrum space between the government and non-government users are the actual operational requirements of the Dept. of Defense under the emergency conditions of today. The armed services have developed radio equipment to support these operational requirements based upon the spectrum allocation decision of 1945 which assigned blocs of spectrum space between 25 and 890 mcs to government and non-government services. The Army, Navy and Air Force have invested many hundreds of millions of dollars in establishing their communications' systems in accord with this 1945 decision. It is therefore necessary to give proper consideration to the factors of cost, obsolescence of equipment, and time in which it would be feasible for the armed services to re-establish their communications' systems in another portion of the radio spectrum between 25 and 890 mcs.

Such reallocation would have very substantial international repercussions, as well. The rearrangement of spectrum space undoubtedly would involve conflicts with existing international agreements to which the United States is a party. Renegotiation of such agreements is an extremely delicate and time consuming process, particularly since it involves international defense communications.

In our current study with the government looking toward a possible exchange of spectrum space, we are seeking additional space for a total allocation of 50 channels for television. The government has indicated a cooperativeness and willingness to reconsider the allocation of the spectrum on a long-term basis. Nevertheless, in the balance which must be struck between national defense needs, other services, and television needs, we must consider realistically the possibility of obtaining less than 50 channels. An ideal or ample allocation of spectrum space to television in this area may prove to be infeasible under present world conditions. The government, for example, may be able to release to television only enough channels to meet a few of the serious deficiencies of the present system. More definitive information on this point will come from the study now in progress.

But if 50 vhfs can't be obtained . . .

Clearly, Congressional assistance will be vital in the reconsideration of the spectrum allocation as between government and non-government uses. If, nevertheless, an expanded vhf television system which is preferred by the Commission proves infeasible, there are two allocation alternatives. They are the present 82-channel vhf-uhf system or a 70 channel uhf-only system.

Both of these alternatives have certain advantages. One significant advantage is the present availability of spectrum space for these alternatives, which obviates the need for a costly and complex conversion of government communication systems.

tions to each of the top 100 markets. It did not permit sufficient vhf assignments to replace all operating or granted uhf stations in the same communities.

This failing was also true of less extreme spacing reductions by an extensive reshuffling of existing vhf assignments.

Use of directional antennas or precision offset would permit reduction of mileage separations to 140 miles, but does not make possible needed flexibility and expansion of assignments.

• Deintermixture.

Experience with this program since it was initiated in 1956 has shown that it is ineffectual as a national allocation policy. Because of various considerations the number of possible communities which could be deintermixed is narrowed as to be almost a worthless move. Procedural delays in those instances where the FCC has ordered removal of a vhf assignment have blocked the immediate benefits expected to result from deintermixture.

Not only would some of these markets be overshadowed by vhf signals

from nearby big city vhf outlets, but it is questionable whether deintermixture would stimulate the market for uhf receivers.

The area deintermixture plan—whereby a large geographical area would be unmixed—has one major drawback. This is that the plan would require the deletion of about 90 vhf stations which could not be transferred elsewhere. This would be too disruptive to be feasible as an interim measure and too inefficient to serve as a long run solution.

• 50 channel vhf continuous system,

retaining present 12 vhf channels. This allocation would run 54-72 mc (chs. 2-4), 76-88 mc (chs. 5 and 6), and 174-444 mc (chs. 7-51).

This the Commission called the "optimum or ideal" solution. "Such a system would meet the public demand for a generally satisfactory and economical service, under varying conditions," permitting the five channels to each community.

There are two critical questions: Can the necessary additional vhf spectrum space be allocated to tv, and what are the costs of such a reallocation?

The Commission referred to the demands for additional space by other services—"so critical that the Commission is currently engaged in a general allocation proceeding with respect to the spectrum space between 25-890 mc."

It also called attention to the military use of space between 216 mc and 450 mc and the equipment standardization between the U.S. and other countries. This would require, if changes are made in the domestic allocations, negotiations with other countries which might extend over a period of years. Also, it pointed out, some of the military systems operating in this band are there because of propagation characteristics. These systems would have to be moved to spectrum areas having similar propagation characteristics. Involved also is the 328.6-335.4 mc band used by aircraft for instrument landing.

Although this solution has been referred to as an all-vhf tv system, it was pointed out that actually this would be a vhf-uhf allocation. There would be 26 channels in the vhf and 24 in the uhf. The vhf portion of the spectrum runs from 30 mc to 300 mc; the uhf from 300 mc to 3,000 mc.

This means, it was pointed out that the upper channels of the 50-channel system would be more subject to shadowing, absorption, and "other undesirable effects."

Move to this kind of a 50-channel system would involve extra costs to the public. Not only would receivers probably cost more than the present 12-vhf receiver, but there is no assurance manufacturers may not continue to produce and market 12-channel vhf sets.

It is here that the FCC recommended that Congress enact legislation to require that all tv receivers shipped in interstate commerce be equipped to receive all channels assigned to television.

A reallocation along these lines would take "at least a full decade," the FCC said. It also would "involve the expenditure of large sums of money by the government for conversion of existing facilities; it would require the cooperation of other nations; it might cost the public some additional, although, now indeterminate, sums for all-

channel sets; and it would require new legislation to ensure production of all-channel receivers only," the FCC declared.

- A 50-channel vhf system, beginning with present ch. 7.

This would increase the amount of space available for allocation to other services. It might also permit some economies in set design and production.

Many of the burdens involved in the 50-channel vhf system retaining chs. 2-6 are the same, and in addition a substantial burden would be placed on stations required to move to new assignments above 216 mc.

Because existing stations would undoubtedly oppose each individual move, the process "could be so time consuming and burdensome" as to defeat the solution which the plan proposed to alleviate.

To cope with this problem, the Commission said, it may recommend that Congress amend the Communications Act to authorize the FCC to change the assignment of any individual station through general rule making when an overall readjustment of station assignments is decided upon.

- A 25-channel vhf system, beginning at ch. 7.

This falls short of the flexibility and opportunities for expansion in the 50-channel plan. Using present spacing requirements, the 25-channel plan would permit five stations in the "bulk" of the top 100 tv markets.

The major shortcoming would be in the inability to meet community needs for local outlets, under the Commission criteria. But if this were reduced to a goal of four stations per community, the 25-channel plan would permit "moderate expansion."

- Maintaining the present system of 82 vhf-uhf channels.

The only way the present dual system can work is by the imposition of a statutory requirement that all sets in interstate commerce must be equipped to receive both vhf and uhf channels. This would permit uhf conversion over a period of 10 years.

By retaining the present 12 vhf channels, wide-area service could continue. The 70 uhf assignments would permit multiple stations in major markets and local stations in over 1,000 communities.

This would, however, involve the public in higher costs. The differential today between vhf-only sets and those containing uhf is about \$25. In addition antenna installations are more critical and this would require probably another \$25.

The requirement that tv receivers be all-channel might permit economies since full production of all-channel sets would permit cutting the price differ-

ential.

But, uhf receivers today are unsatisfactory—in both tuning and component longevity. In order to upgrade both these failings, the Commission said it might require Congressional action permitting the FCC to set standards for receivers—similar to what it now does in type-approving transmitters.

Thus, improved uhf requirements might add to the cost of an all-channel receiver—at least initially.

Even with all-channel receivers, an intermixed vhf-uhf system might not prove competitively feasible in markets with multiple vhf outlets. Uhf stations suffer propagation-wise in comparison with vhf outlets; they have shorter service ranges and greater variability in quality of service (due to uneven terrain, tall buildings, changing atmosphere and foliage conditions).

"In the final analysis, the economic prospects for uhf stations in an intermixed vhf-uhf system may depend on the general availability of inexpensive and popular programming fare as well as on the requirement of all-channel receivers," the FCC said.

- A 70-channel, all uhf system.

Major benefits from this move would be the fact that (a) no service would have to move, (b) other services would benefit from the vhf space vacated by tv, (c) there would be no international problems, (d) there would be adequate opportunity for multiple, competing stations in larger markets and sufficient assignments available to permit local outlets in other communities.

The TASO report failed to discuss equipment research and development programs because of antitrust implications, but the Commission's own staff has ascertained that some improvements in both receiving and transmitting uhf equipment have been made.

These include reducing the noise level of uhf tuners, the use of transistors, parametric amplifiers and other semiconductors. Use of these would increase the present \$25 differential between a vhf-only receiver and one with uhf to \$35-\$40.

There have been no major developments in the uhf receiving antenna field.

The lack of any major breakthroughs in uhf efficiency may be laid to the lack of interest in uhf civilian use. Most of the advances have come from military usage of uhf equipment—and hence are expensive.

A method of enlarging uhf service areas is through boosting uhf power, but the limiting factor here is cost. A 250 kw uhf station costs about \$200,000 (exclusive of tower, buildings, studio and studio equipment and other facilities). If power were upped to 1,000 kw, the cost would be about \$280,000—and

3 easy steps to automatic continuous programming

1.

Insert cartridge into Collins Automatic Tape Control.

2.

A press of a button, you're on the air, right on cue. Instantaneous, no-wow starting.

3.

Finished tape automatically recues itself and stops—ready for storage or rebroadcast.

Three easy steps. That's all it takes for automatic, continuous programming with Collins Automatic Tape Control. Just the touch of your finger and you're a production genius.

Collins Automatic Tape Control features instantaneous, no-wow starting; automatic cueing; automatic stopping; simplified handling and tape storage. Units adaptable to remote control operation.

When your tape-recorded announcements and programs are produced with Collins Automatic Tape Control, they are run quickly, easily, automatically. No mechanical threading and cueing of tapes.

For professional production made easy, your station needs Collins Automatic Tape Control. For complete information call your nearest Collins broadcast representative, or write for literature.

Playback only and playback/record units are available in rack mount or console models. Cartridges available with tape capacities from 40 seconds to 45 minutes.

COLLINS RADIO COMPANY • CEDAR RAPIDS, IOWA • DALLAS, TEXAS • BURBANK, CALIFORNIA
BROADCASTING, April 27, 1959

if this were boosted to 5,000 kw (the present maximum uhf power permitted to uhf stations), the cost rises to \$740,000.

Even operating expenses rise sharply; a 250 kw station would run \$25,000 annually for power and tube expenses; a 5,000 kw outlet would cost \$120,000 annually.

Another method of increasing coverage would be through the use of multiple transmitters, known as a polycasting. This is "promising," but has not been field tested. It also poses certain problems respecting the availability of channels and commercial identification of stations.

There is merit also in the view that if the Commission were to order all tv to uhf, the present shortcomings of uhf equipment would be overcome—similar to the experience of other services moved upward in the spectrum.

The Commission cannot, however, initiate such a move until it has strong evidence that uhf overall can provide service "substantially equal to that in

vhf without requiring major increased outlays by the average family. . ."

It cannot overlook the time lag before improvements occur, the additional cost to the public, the probable loss of national program services to the rural public, and the possibilities that some proportion of tv families now receiving service would be deprived of this service.

The Commission's document concluded with the summary, published in full on pages 70-71.

FCC requests changes in Communications Act

The FCC last week sent to Congress requested amendments to the Communications Act requiring, among other things, community antenna systems to secure a station's permission before rebroadcasting its signal (BROADCASTING, April 20). They are designed to bring catv under essentially the same procedures which regulate tv boosters as "they perform a function basically sim-

ilar," the Commission said.

The FCC amendments also define catv systems to exclude master antennas in apartment buildings and services serving less than 50 subscribers and require a system to offer the signals of a local station. Text of the amendments follow:

Add a new Section 3 (hh) reading as follows: "Community antenna television systems mean any facility performing the service of receiving and amplifying the signals transmitting programs broadcast by one or more television stations and redistributing such programs, by wire, to subscribing members of the public. As used in this Act, the term community antenna television system shall not include: (1) such facilities which serve fewer than 50 subscribers; (2) such facilities whose service is limited to the residents of one or more apartment dwellings under common ownership, control, or management, and to commercial establishments located on the premises; or (3) facilities used for the distribution, by wire, of programs

The cities set for the big 'squeeze'

Which are the cities in which the FCC is going to shoehorn additional vhf channels?

The official response is that the FCC has not made up its mind.

Engineering studies are underway to determine where such drop-ins are technically possible.

Statistical studies are underway to determine where there is uhf "saturation"—for the Commission said it would not add another vhf to areas where uhf stations have managed to secure an audience.

When these are accomplished, the Commission will issue a general rule-making notice.

Thus the Commission's interim policy has engendered a nationwide guessing game among broadcasters.

The document contained a list of 268 tv markets where stations were operating as of April 4. The tv markets are the FCC's own, but, it was learned, are based on the old CBS and NBC must-buy lists.

BROADCASTING filled in existing un-built cps and added vhf assignments now in hearing. From this complete list, the following tv markets are those having less than three commercial vhf assignments where additional "v" channels might be moved in:

Birmingham, Dothan, Montgomery, Selma, Ala.; Yuma, Ariz.; El Dorado, Fort Smith, Hot Springs, Ark.; Chico-Redding, Salinas-Monterey, San Diego,

San Jose, San Luis Obispo, Santa Barbara, Calif.; Grand Junction, Montrose, Sterling, Colo.

Fort Myers, Jacksonville, Panama City, West Palm Beach, Fla.; Albany, Augusta, Macon, Thomasville and Tallahassee (Fla.), Ga.; Boise, Idaho Falls-Pocatello, Lewiston, Nampa, Twin Falls, Idaho; Champaign-Urbana, Quincy and Hannibal (Mo.), Ill.; Terre Haute, Ind.; Sioux City, Iowa; Ensign, Garden City, Goodland, Great Bend, Hays, Topeka, Kan.

Louisville, Paducah, Ky.; Alexandria, Monroe, Shreveport, Houma, La.; Augusta, Bangor, Presque Isle, Maine; Cadillac, Cheboygan, Grand Rapids-Kalamazoo, Ironwood, Marquette, Traverse City, Onondaga, Mich.; Alexandria, International Falls, Mankato, Minn.; Biloxi-Gulfport, Greenwood, Columbus, Hattiesburg, Jackson, Laurel-Pachuta, Meridian, Tupelo, Miss.; Cape Girardeau, Columbus-Jefferson City, Joplin (and Pittsburg, Kan.), Kirksville (and Ottumwa, Iowa), St. Joseph, Sedalia, Springfield, Mo.

Billings, Butte, Great Falls, Glendive, Helena, Kalispell, Missoula, Mont.; Alliance, Hay Springs, Hayes Center, Hastings, Kearney, Lincoln, McCook, North Platte, Scottsbluff, Neb.

Reno, Nev.; Manchester, N.H.; Carlsbad, Clovis, Roswell, Santa Fe, N.M.; Carthage-Watertown, Plattsburgh (and Burlington, Vt.), Rochester, Syracuse, Utica-Rome, N.Y.; Charlotte, Greenville-Washington, New Bern, Ra-

leigh-Durham, Wilmington, N.C.; Bismarck, Dickinson, Fargo, Grand Forks, Minot, Pembina, Valley City, Williston, N.D.; Dayton, Toledo, Ohio.

Ada, Ardmore, Elk City, Lawton, Okla.; Eugene, Klamath Falls, Medford, Roseburg, Ore.; Altoona-Johnstown, Pa.; Providence, R.I.; Florence, S.C.; Aberdeen, Florence, Lead-Deadwood, Reliance, Rapid City, Sioux Falls, S.D.; Bristol-Johnson City, Jackson, Tenn.

Abilene-Sweetwater, Austin, Big Spring, Brownsville-Harlingen-Weslaco, Bryan-College Station, Corpus Christi, Laredo, Lufkin, Monahans, Odessa-Midland, San Angelo, Texarkana, Tyler, Waco-Temple, Wichita Falls, Tex.

Logan, Ogden, Utah; Harrisonburg, Va.; Bellingham, Wash.; Bluefield, Clarksburg, Wheeling (and Steubenville, Ohio), W.Va.; Eau Claire, LaCrosse, Wausau, Wis.; Casper, Cheyenne, Riverton, Wyo.

Among the markets where the extent of uhf conversion will count are the following:

Bakersfield, Fresno-Tulare, Calif.; Hartford-New Haven-New Britain-Bristol, Conn.; Columbus, Ga.; Harrisburg, Ill.; Rockford, Ill.; Evansville, Ind.-Henderson, Ky.; Baton Rouge, La.; Binghamton, N.Y.; Erie, Pa.; Columbia, S.C.; Knoxville, Tenn.; Norfolk-Portsmouth-Newport News-Hampton, Va., and Madison, Wis.

To make your radio station franchise more valuable . . .

Effective May 15, RADIO PRESS will occupy greatly enlarged, permanent quarters at its present location. In addition to existing receiving and transmission facilities, the most modern available electronic equipment and additional studio space has been committed, thus making RADIO PRESS a complete, self-contained communications center, designed and staffed to operate 24 hours, seven days a week.

This expansion is in line with RADIO PRESS' policy of continually improving and widening service to its subscribers, who now number over seventy of some of the leading radio stations coast-to-coast.

It is this ability, leading from management strength and foresight, to grow and provide expanded service and facilities, which we believe is making a substantial contribution to the welfare of the industry as a whole.

More specifically, however, here are some of the ingredients that benefit stations directly at the local level:

Prestige of a world-wide news organization of experienced correspondents, exclusively identified with the local station.

Highest Standards backed by full-time news bureaus and experienced correspondents throughout the globe.

Exclusivity of Service of complete foreign, national and Washington coverage, with round-the-clock standby for fast news breaks.

We will be glad to supply you with additional information, rates and audition tapes. Please write, wire or telephone:

18 East 50th Street, New, York 22, N.Y., PLaza 3-3822

RADIO PRESS will provide particularly extensive Washington and Overseas material in connection with the forthcoming Summit Meeting. This extensive coverage assures every RADIO PRESS subscriber news leadership in the market at a time of increased tension, when radio listenership will be at a particularly high level.

For Greenville, Mississippi, it's WGVM.

The shape of flight

The shapes of things that fly have always been determined by the materials they are made of. Feathers form wings that are basically alike for all birds—and membrane forms an entirely different wing for insects. It takes thousands of years, but nature improves its materials and shapes, just as technology improves the materials and shapes of aircraft. But here, the improvements in materials are so rapid that designs become obsolete almost as soon as they are functional.

Today, our aeronautical designers and missile experts work with types of materials that didn't exist just a few short years ago. Steels are probably the most important examples: United States Steel has just developed *five* new types of steel for the missile program. They are called "exotic" steels because they have the almost unbelievable qualities necessary for unearthly flights.

The shape and the success of our space birds depend on steel. *USS is a registered trademark*

USS United States Steel

form in the public interest."

The request will be for an amendment to the Communications Act placing catv systems under the FCC's broadcast licensing authority. Antenna operators are unanimously in favor of this move, Mr. Smith stated. They are also unanimously opposed to being considered as common carriers, he added. A common carrier classification would permit the FCC to set rates and regulate other business practices.

In 1957, a group of 13 western broadcasters petitioned the FCC to assert jurisdiction over community antenna systems under the Commission's common carrier authority. The broadcasters claimed that the antenna systems were using their signals without permission and that by bringing in "outside" signals the catv operators were disrupting the tv allocation plan and wreaking economic injury.

In April 1958 the Commission denied this request. The FCC said it had no power to control catv operations.

The subject was also investigated during the 1958 hearings before the Senate Commerce Committee.

No State Control • On the second point, no state is today regulating catv systems. In Wyoming and California, state courts have ruled against public utility commissions which attempted to assert jurisdiction. In Wisconsin and Utah, state utility commissions themselves ruled that they have no authority.

Legislation to bring catv operations under state utility regulation is pending in California and Pennsylvania. In Montana the state legislature passed such a bill, but it was vetoed by the governor.

By placing community antenna systems under FCC control, it was pointed out, the Commission would also be able to enforce engineering standards.

Community antenna systems came into being in the late 1940's in Oregon and Pennsylvania. There, viewers at a distance from big city tv transmitters—or unable to receive tv signals normally because of mountainous terrain—agreed to sign up for a wire service.

Antenna systems place a highly directional, high gain receiving antenna at a mountaintop best suited for picking up the distant or difficult signal. This signal is fed down the mountain-side to subscribers' homes via coaxial cable.

Originally there was a \$100-\$175 installation charge for each subscriber, plus a \$3.50-\$6.00 monthly service charge. Most of today's more than 550 systems—serving an estimated 500,000 subscribers (1.5-2 million people)—have minimum or no installation charges, although the monthly service fee is still about the same.

Voices for Defense • These are the familiar voices heard over the Conelrad frequencies during the drill two weeks ago when all radio and tv stations went silent except those involved in the Conelrad emergency network. Shown at the "secret" civil defense headquarters on the day of the Conelrad drill are: Back row (l to r), Lewis Shollenberger, CBS; Leo A. Hoegh, director, Office of Civilian & Defense Mobilization; Charles Ashley, ABC. Seated, Robert McCormick (l), NBC, and Steve McCormick, MBS.

FCC SATISFIED WITH ALERT

Criticism notwithstanding, Conelrad works

The nation's second Conelrad alert test on April 17 has been termed a success by the FCC, the Office of Civil Defense Mobilization and almost everybody else concerned.

There were some shortcomings and some criticism, but an FCC spokesman said reports from all over the country indicate the emergency radio enemy attack alert "worked like a charm." FCC Comr. Robert E. Lee, the Commission's liaison officer for Conelrad, said he was "pretty happy" with the overall success of the April 17 alert. Howard Handelman, OCDM official, said "We're please with it, of course," and added that OCDM was "extremely happy working with the National Industry Advisory Committee."

The alert was held 11:30-noon (EST), with more than 3,000 radio and tv stations going off the air and 1,200 other am radio stations switching to 640 kc or 1240 kc Conelrad frequencies.

National Coverage • NIAC reported excellent reception on the West Coast, where trouble was encountered in the first Conelrad alert July 16, 1956 (BROADCASTING, July 30, 23, 1956), and similar reports were coming in to the

FCC from other parts of the country last week. An FCC spokesman said it will be several weeks before reports are complete nationwide.

The FCC has worked out detailed engineered plan approaches for Conelrad clusters in 60 major metropolitan areas and expects to work out similar systems for 900 to 1,000 other big population centers and the rest of the U.S. radio communities within six months. This will include microwave "backups" borrowed from industrial radio users and pressed into service to feed network communications to stations participating in Conelrad, a spokesman said. The FCC sent out notices to non-broadcast radio services before the alert ordering extensive curtailment of these operations during the alert, allowing only emergency transmissions to be sent.

Comr. Lee said he understood one station at Butte, Mont., remained on the air despite FCC orders beforehand to go off the air. He said this was during the time of the Montana State Prison riot at Deer Lodge and the FCC is investigating whether there were "mitigating circumstances."

OCDM's Mr. Handelman said an an-

SUCCESS

STORIES

One of a series of salutes to successful Radio and TV stations across the nation . . . and to Northwest Schools graduates who have contributed to their success.

WJIM-TV

CBS

Channel 6

LANSING, MICHIGAN

SALUTE TO: Station WJIM-TV, Channel 6, Lansing, Michigan — owned and operated by Gross Telecasting, Inc.

WJIM-TV serves a vast area of mid-Michigan, including Lansing, Flint and Jackson. Its studios are located in the WJIM "Country House" on the Eastern edge of Lansing. The building is one of the most modern broadcasting plants in the country and is famous as a "Showplace". WJIM-TV is a basic CBS-TV affiliate, but also carries many of the top shows from NBC and ABC.

Mr. Harold F. Gross, president of Gross Telecasting Corporation, operator of WJIM Radio and TV.

The management of WJIM-TV says this of Stuart Hazard, Northwest Schools graduate: "Stu has been a valued member of our staff from the very beginning. His well-rounded working knowledge of broadcasting has made him at home in just about every TV assignment we can think of. His work has always been highly commendable."

Northwest graduate, Stuart Hazard, shown (at left) with Martha Dixon, hostess of WJIM-TV's "Copper Kettle" homemakers program, as he explains how he wants a studio "Zoom" closeup of some of Miss Dixon's cookery.

Mr. Hazard joined the station in 1956 as Film Editor. He serves as Film Director for the station, as well as director of many local "live" shows. Last spring he produced and directed the nationally-acclaimed "What's With My Time" series, produced in cooperation with the Junior League of Lansing.

nouncement over the nationwide live Conelrad network by Defense Mobilization Director Leo A. Hoegh, asking listeners to write to OCDM headquarters in Battle Creek, Mich., for a booklet on building bomb shelters, had drawn more than 20,000 letters by last Thursday (April 23).

Not Total Approval • There were some complaints or criticisms. The *Savannah* (Ga.) *News* complained to its congressional delegation that Conelrad is "obsolete," and Sen. Herman E. Talmadge (D-Ga.), said he has referred the criticism to the Senate Armed Services and Commerce Committees, the OCDM and FCC. Sen. Richard Russell (D-Ga.), chairman of the Armed Services Committee, said he has asked OCDM and the Defense Dept. for a "full report" with any recommendations for improvement.

There have been charges made before that Conelrad is "obsolete," largely because of presumed use of missiles instead of manned aircraft in future wars. The Air Force assured the FCC, however, that Conelrad operation is necessary for at least 10 more years. This, says the Air Force, is because electronic "homing" (automatic direction finding) equipment is used even in modern missiles; if Conelrad were discontinued, an enemy would know this and take advantage of that fact; although there are more intricate devices than radio navigation, radio direction-finding is more useful to the basic navigation problem; and that Conelrad provides a needed strict control of all radiation devices, including commercial aircraft.

OCDM picked Conelrad test period

The National Industry Advisory Committee explained last week that the Office of Civil Defense Mobilization, not NIAC, was responsible for picking the 11:30 a.m.-12 noon EST time for the April 17 Conelrad practice alert.

Southern California broadcasters had complained that eastern broadcasters picked the time (8:30-9 a.m. on the West Coast), when morning traffic there was at its peak and during the heaviest shopping day of the year. (BROADCASTING, April 20).

Joseph Keating of NBC, program chairman *pro tem* for the Conelrad exercise, said the date and time had been selected far in advance by OCDM, which told NIAC and the FCC that the time period was picked to provide the widest possible variety of conditions simultaneously in the various time zones across the country. Since NIAC membership is made up of representatives from NAB and the networks and since

General overhaul

Sen. Warren Magnuson (D-Wash.), chairman of the Senate Commerce Committee, last week introduced nine bills amending the Communications Act. The amendments, all requested by the FCC:

S 1733 — Gives Commission more discretion in sending McFarland letters to applicants.

S 1734—Clarifies and strengthens law relating to *ex parte* contacts before commissioners. Extends ban to all parties as well as those assisting or appearing in case.

S 1735 — Repeals honorarium provision of Act.

S 1736 — Eliminates the requirement that certain documents and applications must be notarized.

S 1737—Grants FCC authority to fine violators of its rules in the common carrier and safety fields.

S 1738 — Gives Commission greater discretion in the utilization of its review staff, now separated by law.

S 1739 — Gives Commission authorization to license already-operating "illegal" boosters.

S 1740 — Gives Commission authority to regulate charges and services of common carriers in all types of broadcasting. Present law covers wires only.

S 1741—Removes requirement that transmitting equipment be operated by licensed operators.

On Thursday, Rep. Oren Harris (D-Ark.), chairman of the House Commerce Committee, introduced measures identical to four of Sen. Magnuson's bills. Rep. Harris already had offered legislation to effect the other FCC recommendations. Rep. Harris' bills: HR 6571 (identical to S 1740), HR 6572 (identical to S 1733), HR 6573 (identical to S 1738) and HR 6574 (identical to S 1737).

all networks have owned stations and/or affiliates on the West Coast, NIAC members were "fully mindful of problems in all areas of the country, and indeed sought to alleviate them," Mr. Keating said.

Mr. Keating said NIAC protested, noting particularly the problem on the West Coast, but that OCDM said it wanted to find how the public would react while enroute to work or school.

25-890 mc hearing is set for May 25

The start of the FCC's in-depth study of the non-government services in the radio spectrum between 25 and 890 mc (BROADCASTING, April 6) will be May 25, it was announced last week.

A tentative list of witnesses for the proceedings, before the Commission *en banc*, included a number of broadcasters: Fm Broadcasters (Ben Strouse), WQXR-AM-FM New York (Elliott M. Sanger), NAB (Harold E. Fellows, A. Prose Walker), Assn. of Maximum Service Telecasters Inc. (Lester W. Lindow, Howard T. Head, Harold G. Ross), National Assn. of Educational Broadcasters (Harry Skornia) and the Joint Council on Educational Television (Ralph Steetle). Most of the broadcasting witnesses are scheduled later in the proceeding and it is estimated that they will not appear until the second week of the hearings.

Other witnesses include: Institute of High Fidelity Manufacturers (Alfred M. Zuckman), RCA Communications Inc. (Thompson H. Mitchell), AT&T (four witnesses), Motorola Inc. (four witnesses), Electronic Industries Assn. (six witnesses), and the American Rocket Society (17 witnesses).

Regional airspace switch to FAA aegis

The new Federal Aviation Agency has issued tentative orders for discontinuance of regional airspace subcommittees to clear radio and tv station applications for tall towers.

But, said Charles W. Carmody, chief of FAA's Airspace Utilization Div., last week, the same people who have served on the subcommittees in the field will handle clearance applications by radio and tv stations and there will be no changes in the mechanics or standards.

Lt. Gen. E. R. Quesada (USAF, ret.), administrator of the FAA, was to have signed the order last week transferring the functions of the regional groups to the Airspace Utilization Div. headed by Mr. Carmody.

Two-Agency Tangle • Mr. Carmody said last week the FAA has begun talks with the FCC looking toward a solution of what he termed an internal government problem—the jurisdiction of each of the two agencies insofar as tall radio-tv towers are concerned. He felt it would be "several months, at least" before FCC and FAA make a joint announcement on which agency will do what. The 1958 Federal Aviation Act creating the FAA, is specific about FAA's authority over utilization of airspace by aircraft, but is much less clear about its authority over use of airspace by tall structures, he said.

BROADCASTING, April 27, 1959

CONDENSING

Big Console Facilities into the Ease of Four Mixing Channels

GATES ***STUDIOETTE*** **SPEECH INPUT CONSOLE**

The Gates Studioette is a perfect blending of workhorse versatility and reliability for day in and day out operation. An unusual generosity of controls, new performance standards, service ease and smart commercial appearance highlight this outstanding speech input console.

Four channel, step type mixer, with generous key switching facilities accommodates four microphones into two preamplifiers, three turntables, two tapes or projectors, network and three remote lines. Three utility keys are provided for your individual needs. The Studioette also includes a high gain program amplifier, 10 watt ultra linear monitoring amplifier, dual muting and warning light relays, 4" illuminated VU meter, self-contained power supply, complete cueing facilities for turntables, net, tapes and remotes, and output emergency key, plus many additional facilities to create wide versatility in meeting the needs of modern radio, television and recording.

PROGRAMMING

AFM head aroused by 'Firestone' fate

The programming policies of television networks were described as "immature, shortsighted and incomprehensible" last week by Herman D. Kenin, president of the American Federation of Musicians. His sharp comment followed the announcement recently that the *Voice of Firestone* program might not return to tv next fall unless a network could allot a suitable time period (BROADCASTING, April 20).

Mr. Kenin, in an article to appear in the forthcoming issue of *The International Musician*, official publication of the AFM, asserted:

"Their [the networks'] refusal to sell prime viewing-listening time once a week to the *Voice of Firestone*—a program that for 31 years has provided a rich feast of fine, live concert music for millions of Americans—is a frightening symptom of dollar policy-making in the broadcast industry."

Mr. Kenin referred to broadcasters' "solemn pledge to serve the public interest," and added:

"It is about time the broadcasters commenced to live up to their responsibilities; it is high time the Federal Communications Commission started enforcing the terms of the contract. And the Congress must make sure this happens."

Mr. Kenin recently issued a statement in Toronto, saying the AFM planned to ask the FCC to look into the amount of "canned music" being used by U.S. radio-tv stations. A spokesman said in New York last week that he has made no formal request as yet to the commission. Mr. Kenin's remarks at that time were prompted by an action of the Board of Broadcast Governors of Canada, which gave seven radio stations there short-term licenses (less than the customary five-year licenses), with the suggestion that they cut down on recorded music and "high-pressure chatter."

Godfrey on leave for chest surgery

Arthur Godfrey entered a New York hospital over the weekend for probable chest tumor surgery.

The 55-year-old CBS personality-supersalesman, currently responsible for some \$9 million in annual billings for tv alone, told his radio audience last Tuesday morning (April 21): "I will be absent from these airwaves for a couple of months I'm afraid, because chest surgery, you know, is not minor and

THE REDHEAD

Medical leave from air selling

it takes a little while to get back on your feet. But if you keep your fingers crossed, I think I'll be back with you again one day. . . ."

The network had to do some fast shuffling to compensate for the 30-year broadcasting veteran's unexpected medical leave. Comedian Sam Levenson was signed to pinch-hit on the daily tv show (10:30-11 a.m.), beginning Wednesday (April 29) with Jack Sterling filling in today and tomorrow. Mr. Godfrey's daily radio (9:05-10 a.m.) substitute is to be comedian Robert Q. Lewis, who begins his duties today. *Peck's Bad Girl*, new situation comedy originally scheduled to replace Mr. Godfrey's Tuesday evening tv program (9-9:30 p.m.) May 19, is having its debut moved forward to May 5.

A remaining, long-range uncertainty is the *Person to Person* tv interview show for which Mr. Godfrey has been designated to assume Edward R. Murrow's vacated seat next fall.

TelePrompter in black

TelePrompter Corp., New York, last week reported that net earnings for 1958 amounted to \$41,956, equal to 12 cents per share on 356,591 common shares outstanding. In the previous year TelePrompter had a net loss of \$212,694, or a deficit of 59 cents per share on the same number of shares outstanding.

Gross revenues, the company reports, in 1958 reached a total of \$3,414,499 the largest year-to-year dollar increase in the company's history. The previous year's gross revenue totalled \$2,264,345. TelePrompter's common stock was admitted to trading on the American Stock Exchange on Dec. 16, 1958.

\$10 PER DAY

OR

\$15 PER DAY

THAT'S ALL IT COSTS TO STAY IN EUROPE!

These two new KLM tour plans give you more seeing *and* more saving. For \$10 a day (standard hotels) or \$15 a day (first class hotels), all Europe is your playground. With 59 cities to visit, your choice of tours is almost unlimited! You'll see the sights you've heard about, and plenty you haven't. It's everything you could want in a trip abroad, for the price of an at-home vacation. Your non-stop KLM flight from New York to Europe is budget-priced, too. Example: visit 6 European cities for just \$502.20 round trip. For complete details of these and the many other KLM tours available, mail the coupon.

Rebel musicians win restoration of funds

The American Federation of Musicians had no right to divert wage increases negotiated for musicians employed by phonograph recording companies from the men and into the Music Performance Trust Funds, Judge Clarence L. Kincaid of Los Angeles Superior Court ruled Wednesday (April 22). He ordered that approximately \$1.8 million, which recording companies have paid to a receiver under a court order, be paid to 6,000 recording musicians employed under the AFM 1954-58 agreement.

Cecil F. Read, leader of the group of Hollywood musicians who rebelled against the AFM trust fund policies and in November 1956 went into court to get trust funds monies restored to individual musicians, hailed the decision as the first fruit of "three years of effort sustained by thousands upon thousands of dollars contributed by the recording musicians." Judge Kincaid's ruling, Mr. Read said, gives the musicians a "firm foundation" for an appeal to reverse an earlier decision which denied the right of the plaintiff musicians to sue AFM for some \$13 million they claim was illegally withheld from them as a result of the union's trust fund policies (BROADCASTING, March 16).

Henry Kaiser, general counsel of AFM, announced that the decision awarding the impounded trust fund payments to the plaintiff musicians would be appealed promptly to higher courts. "We are prepared to carry our appeals as far as the U.S. Supreme Court," he stated.

700 exude optimism at Muzak 'convention'

Muzak Corp. last week held its first national "convention" at a three-day session at the Hotel Biltmore in New York. Highlights, several hundred Muzak programmers present from 47 states and seven foreign countries:

- News that Muzak had a 13.9% increase in new subscribers in 1958 over the year previous with a net dollar gain of about \$2 million, in new billings. A still larger increase for 1959, based on a 20% increase in business during the first two months of this year, was predicted. Speaker on Muzak's business health was Joseph W. Roberts, vice president of marketing.

- Announcement by Donald O'Neill, Muzak's program director, that the public's taste in music is changing from concert music and toward popular music. He supported the contention with

figures taken from a Muzak survey.

- Word of an out-of-court settlement between Muzak and ASCAP (see below).

- Presentation of the first Golden Ear Award to Muzak's "man of the year." Wallace A. Moritz of San Angelo, Tex., received the award from Muzak's Board Chairman Jack Wrather.

Muzak, ASCAP sign

The nation's radio stations, dickering for new ASCAP music license contracts, were offered encouragement last week by Muzak. President Charles C. Cowley announced that Muzak had signed a new five-year contract with ASCAP at rates virtually the same as those paid in 1946 and in some cases lower—this despite ASCAP wanting increases ranging from 100% to 200%.

The parallel with radio-ASCAP negotiations is close. Actually, negotiators for ASCAP and the All-Industry Radio Music License Committee have reached a broad agreement calling for approximately 9% reduction in the total that stations will pay to ASCAP. But negotiations are still in progress to fix a formula implementing this overall agreement, with no indication yet that settlement is near. With their own settlement accomplished, Muzak officials termed theirs "the first successful challenge" of ASCAP's royalty rates.

NTA's Unger says pay-tv is inevitable

Toll-tv is bound to come, once the Hollywood feature film vaults run dry, and broadcasters and advertisers must learn to live with it, Oliver A. Unger, president of National Telefilm Assoc., told the Chicago Broadcast Adv. Club Thursday.

In a surprise speech, he gave what he acknowledged to be "qualified approval" of the pay-television concept. It will come if the American public decides it is prepared to "pay for the kind of entertainment it wants and which the advertising budget simply cannot afford," he asserted.

Mr. Unger suggested that "whether this pay-tv will come over the air lanes or whether it will come over a wire system is not important. The fact is certain—it will come. Whether Congressmen will try to create artificial problems that will impede its arrival, or whether various pressure groups speaking for the Theatre Exhibitors of America who fear the coming of toll tv as much as some people in the broadcasting industry fear it, won't make the least bit of difference."

Broadcasters must study the problem, learn to live with it and "make it work for us," he emphasized, while

Study of a Colorful Interviewee • Radio-tv newsmen last week got first-hand examples of the uninhibited nature of Cuban Premier Fidel Castro. Dropping in unannounced at a Washington restaurant (left photo) where WWDC's Steve Allison conducts a late evening interview show, Dr. Castro consented to an impromptu interview marked by fiery moments. And, in a planned appearance at WRC-TV Washington for NBC-TV's *Meet The Press* (right photo), Dr. Castro was no less colorful in his discussion with panel member Richard Wilson, Cowles Publication, and underscored feelings with a flailed fist (blurred in center of photo).

advertisers must ascertain where they fit into the picture because "I don't think they will be locked out." Toll-tv would provide a "greater opportunity" to free creative forces in the industry and may even eliminate advertisers from being the "deciding force" in programming, Mr. Unger said. As in England, he added, it may be "inevitable" that both free and fee systems can work together.

Discussing programming, Mr. Unger emphasized that the quality of entertainment to the American public "is locked in most of the time by the economic limitations imposed on us to create entertainment in the terms of its cost to the advertiser and the amount he can possibly spend."

He continued, tv is compelled to try to make a good show for about 10% of what the motion picture industry spends on an equivalent show for theatre exhibition. "The moment is going to come when the American people will rebel against the mediocrity of television entertainment and are going to demand from the broadcasters the right of getting superior entertainment in their homes," Mr. Unger warned. "I think it will arrive very rapidly the moment the Hollywood vaults have been depleted of their backlogs."

The crisis will come, he suggested, as broadcasters find they need to program "more and more of the on-the-air time out of their own resources."

Shortage of talent could weaken tv

Network television's strength as an advertising medium is seriously threatened by a continuing lack of "some real method for developing new, young personalities to increase today's scarce talent pool and to replace tv personalities now in declining stages of viewer popularity," Philip L. McHugh, radio-tv vice president, Campbell-Ewald Co., Detroit, is to tell the 10th annual Atlanta Advertising Institute today (April 27). "... Talent and new ideas are so scarce and getting scarcer," Mr. McHugh says, "that the advertiser's agency must work harder . . . to deliver a quality program without being trapped by talent costs that won't fit into the advertiser's budget."

The added plus of sponsor-product identification is lost with alternating and multiple-sponsored tv shows, Mr. McHugh opines. "Westerns, for instance, bring a lot of viewers into their tents, but the great majority of the viewers are unaware who brought them there," says Mr. McHugh.

UPI annual report lists 5,628 clients

United Press International serviced 5,628 clients last year, including radio and tv stations, newspapers and commercial subscribers, as compared with 5,063 in 1957, Frank H. Bartholomew, president and general manager, told the company's annual meeting in New York last week. The present number of clients was said to be "an all-time high."

A total of 344 International News Service and news-picture clients, not previously subscribers to United Press, elected to continue service when the merger last year resulted in UPI, according to Mims Thomason, first vice president and general manager. No breakdown was provided on total radio-

tv station customers.

Dean C. Miller, national radio news manager, reported that during 1958, UPI supplied stations with more regional news than in 1957 and with additional "in depth" reports of all developments. UPI, he noted, provides two packaged news shows per hour throughout the day.

William R. Higginbotham, manager of United Press Movietone television film service, stated that expansion in film service continued in 1958. He pointed out that service in Japan was expanded from one client to five, and new subscribers were enrolled in Thailand, Yugoslavia, Denmark, Hungary, Czechoslovakia, Colombia, Alaska, and in 12 U.S. cities. (The Associated Press annual report was covered in BROADCASTING, April 13).

PORTRAIT OF YOUR STRONGEST LINK!

This dedicated chap is your own private genie, the sales-service representative assigned by General to cover the processing and handling of your film. He works for us but answers to you!

Whether it's technical data, production progress, job deadlines or prices about which you inquire, you need deal with only one person; we call him your account supervisor. His job is the linking of General's incomparable production facilities to your particular processing needs.

We're understandably proud of this unique service to our customers, and add it to an already imposing list of other outstanding "firsts," "bests," and "only-at-General-Film."

Whatever type of film you produce, be it educational, industrial, religious, governmental, etc., our background of experience is available to you; a letter or call will put us at your service.

GENERAL
FILM LABORATORIES CORP.
1548 ARDYLE, HOLLYWOOD 28, CALIF., MD 2-6171

• Program notes

• Ziv Television Programs, N.Y., reports a regional sale on *The Cisco Kid* in 10 southern states, to H.W. Lay Potato Chip Co., Atlanta. Twelve major markets are set and others are in the process of being cleared for time. The business was placed through Liller, Neal, Battle & Lindsey, Atlanta.

• The Assn. of Cinema Laboratories Inc. has produced a worldwide directory of motion picture laboratories. It contains 134 American companies and 114 foreign. A single copy costs \$1; ten copies \$5; twenty \$8; forty \$15; over forty, 30 cents each. Address: Dudley Spruill, secretary, 1226 Wisconsin Ave., N.W., Washington 7, D.C.

• KTTV (TV) Los Angeles has sold three of its video-taped shows to three New York City stations. *Peter Potter's Juke Box Jury* (distributed by NTA) goes to WNTA (TV); *Divorce Court* (distributed by Guild Films) to WPIX (TV); *Paul Coates Show* (distributed by KTTV) to WNEW-TV.

• CBS News' video-taped report of the Japanese royal wedding was edited from 5½ hours to 14 minutes. The editing required 35 splices, said to be a record for a tv-tape presentation. CBS News executives acknowledged that there was "some roll-over at the splices."

• Independent WNMP Evanston, Ill., has revamped its programming in favor of semi-classical and classical music. The change in programming is the result of a 10-day poll conducted by WNMP. Results: 75% voted for classical, 24.9% for classics and semi-classics, 0.1% for popular. "The policy has increased our listenership substantially," WNMP says.

• The U. of Texas broadcasting department has produced a documentary, *Vision Across Texas*, for the State Commission for the Blind. *Vision*, 14:30

minutes long on 16 mm film, is being released to the state's tv station next month.

• Hamilton & Bell (radio-tv productions), San Diego and Mexico City, has packaged *Your Show—U.S.A.*, a one-hour music-news program for showing in Mexico City. As well as local sponsors, three national clients have requested availabilities on the show. H&B's offices: 3282 Lincoln Ave., San Diego. Telephone: AT 4-3749. Aud 50-204 Niza, Mexico, D.F. Telephone: 25-89-26.

• *The Ed Sullivan Show* will use European facilities of the newly-organized Intercontinental Television Corp. when it goes to Rome in June to tape a one-

hour show. In September when the show goes to Moscow, Intercontinental will use its \$300,000 mobile video-tape unit. Dave Garroway's *Today* show, starting today (April 27) through May 2, is scheduled to tape five programs in Paris, also using Intercontinental's services. The company has opened offices in Paris and Geneva and maintains a New York sales office.

• Film Producers Assn. of New York appoints Phil Dean Assoc., N.Y., to handle its publicity-public relations.

• A film documentary, *Time and St. Louis*, highlighting that city's 195-year history, has been completed by KMOX-TV St. Louis for telecasting May 12. Douglas Edwards, CBS news commentator, narrates the 60-minute program, incorporating on-the-spot film coverage of various area scenes. The documentary will be sponsored as a public service by Community Federal Savings & Loan and will be offered to audio-visual departments of area educational institutions.

• In a departure from usual programming practices, NBC-TV will present repeat episodes of *Dragnet* earlier than in past years in order to introduce new episodes during the summer months and thereby whet sponsor interest. P&G, the sponsor, will continue with the show through the end of June, with repeats scheduled, starting May 5 (Tues., 7:30-8 p.m.) and continuing through June 30. NBC-TV will schedule new *Dragnet* episodes, starting July 7, and continuing through the end of August. During September, the network plans to program four additional repeats.

• 20th Century-Fox Television has sold *5 Fingers* to NBC-TV for fall viewing and is putting the international spy series in full production next month with Herbert B. Swope Jr., as producer and Robert Stevens directing. In announcing the sale, Martin Manulis, executive production head of 20th Century-Fox Tv, noted that it is the fourth series the organization has sold within the last few weeks, giving it representation on all three networks. CBS-TV will broadcast *The Many Loves of Dobie Gillis* and *The Last Frontier* and ABC-TV will carry *Adventures in Paradise*.

• Writers Guild of America West has issued strike orders against five production companies charged with releasing post-'48 theatrical films to television without making arrangements for additional payments to the writers. The companies are Lippert Pictures Inc., Lippert Productions Inc., Alson Productions Inc., Alco Pictures Corp. and Filmmakers Inc. None of the five firms is currently active.

COLORCASTING

Here are the next 10 days of network color shows (all times are EDT):

NBC-TV

April 27-May 1, 4-6 (2:30-3:00 p.m.) Haggis Baggis, participating sponsors.

April 27-May 1, 4-6 (4-4:30 p.m.) Truth or Consequences, participating.

April 27, May 4 (10-10:30 p.m.) Arthur Murray Party, P. Lorillard through Lennen & Newell and Pharmaceuticals Inc. through Parkson Adv.

April 28, May 5 (8:30-9 p.m.) Jimmie Rodgers Show, Liggett & Myers through McCann-Erickson

April 28 (9:30-11 p.m.) Hallmark Hall of Fame, Hallmark through Foote, Cone, & Belding.

April 29, May 6 (8:30-9 p.m.) The Price Is Right, Speidel through Norman, Craig & Kummel and Lever through J. Walter Thompson.

April 29, May 6 (9-9:30 p.m.) Milton Berle, Kraft through J. Walter Thompson.

April 30 (9:30-10 p.m.) Ford Show, Ford through J. Walter Thompson.

April 30 (10:30-11 p.m.) Masquerade Party, Lorillard through Lennen & Newell

MOST WANTED!

Smilin' Jack Woods

Throughout WOC Radio-land these afternoons, the most-wanted sound for hire is WOC's matinee dandy, Smilin' JACK WOODS.

He's an irrepressible scalawag from out of Chicago. We taught him that good listening comes first at WOC, and he's been stealing listeners (and selling products) ever since.

Check your PGW Colonel or our Pax Shaffer for the price on Jack's head. Let us put your notch on his gun.

Davidson Taylor, formerly a vice president of both CBS and NBC, has been appointed director of the Arts Center Program for Columbia U., effective May 15.

MR. TAYLOR

The \$6½ million Arts Center, when completed, will house a graduate school of modern arts uniting the university's activities in arts and communications. Mr. Taylor's duties, explained university President Grayson Kirk, will not only include fund raising but also the "planning and supervision of the physical structure of the Center, and the main task of directing the activities which will be housed in it."

Mr. Taylor was with CBS from 1933-1949, serving there as vice president of both programs and public affairs. He was vice president of NBC from 1954-58 also in the fields of public affairs and programs.

Tv Daily, named editor of *Film & A-V World*, monthly magazine covering films in educational, industrial, tv, etc., fields.

• LORRAINE GORI, formerly project director, media studies, Alfred Politz Research, N.Y., appointed project director of Audits & Surveys Co., N.Y.

• MRS. ELINOR ROYEN, formerly of NBC and CBS, both Washington, D.C., joins Carl Byoir & Assoc., Washington public relations firm.

International

• TREVOR G. GOODMAN, vp and manager of Toronto, Ont., office of Young & Rubicam Ltd., to vp and managing director of company, with offices in Toronto and Montreal, Que. C. WILLIAM VAN HOUTEN, head of contract department of agency, succeeds Mr. Goodman as vp and manager of Toronto office.

• BARRIE THORNE, BBC's North American representative, named treasurer, radio-tv services, and leaves New York May 6 to take up his appointment in London. DEREK RUSSELL, head of publicity in London, is Mr. Thorne's successor.

• CHARLES C. HOFFMAN, executive vp

BOOKS

- *Freedom of Speech by Radio and Television*, by Elmer E. Smead, Public Affairs Press, 419 New Jersey Ave., S.E., Washington 3, D.C.; 182 pp.; \$4.50.

The problems, present and past, of the broadcaster in walking the precariously balanced line between government regulation and self regulation while serving the public interest and at the same time making a return on his investment is treated by Dr. Smead, professor of government at Dartmouth, who for the past 10 years has concentrated on the field of government regulation of broadcasting.

Dr. Smead's thought-provoking and dispassionate chapters cover programming (and advertising) content in the public interest; public interest problems such as program balance, controversies and commercial-sustaining balance; news and the various influences on news coverage; regulation and the conflicts engendered by it; politics affecting broadcasting, and an appendix on the engineering, political and economic motives that create—and resolve—the many problems of the business.

- *Electronic Communication*, by Robert Shrader, McGraw-Hill Book Co., 330 W. 42nd St., New York 36; 937 pp.; \$13.

The dust jacket of this volume wraps up the contents as including: "Everything you need to know about electricity, electronics and radio to pass FCC amateur or commercial license examinations." The author is an instructor in radio communications at the Laney Trade-Technical Div. of Oakland (Calif.) Junior College.

of Bureau of Broadcast Measurement, Toronto, Ont., resigns effective in June for new post outside broadcasting.

• EDWARD LLOYD MOORE, 68, formerly manager of CFRB Toronto, Ont., died April 18 following heart attack at his home in Toronto. Before joining CFRB he had been manager of CKOC Hamilton, Ont., and of former CKGW Toronto.

• JACK KENT COOKE, owner of CKEY Toronto, Ont., has established Kentco Records Co., N.Y., as subsidiary of Consolidated Frybrook Industries Ltd., Toronto, record manufacturers in Canada. He plans to press records using Canadian and U.S. talent in New York.

• PHIL STONE, announcer of CHUM Toronto, Ont., promoted to director of public service and live talent departments.

VULCAN ΧΑΛΚΕΥΣ ARMORER

VULCAN (Gr. Hephaestus) called God of Fire, was honored by the Olympian gods because he was the workman of the immortals, their armorer and smith. Even though he was ugly and lame, he had his compensations—for not only was he married to the beautiful Aphrodite, he also had the company of golden handmaidens he had made in his forge, to help him with his work for the gods. As Vulcan was armorer to the gods, so the Cincinnati area is an important armorer to the nation. It is highly industrialized—the home of giant machine tool companies, jet aircraft engine plants, automotive plants, atomic energy producing companies, and hundreds of smaller companies, supplying vital machinery and products to other parts of the country. Ranking 15th in national markets, it is important to every advertiser who wishes to reach the 468,000 homes in the Cincinnati trading area—homes of busy, thrifty, prosperous people.

And the wise advertiser and agency man knows that WCKY is the best buy to reach this prosperous market. WCKY offers the advertiser:

1. Responsive adult audience
2. 50,000 watts of SELLING POWER, covering ALL of the Cincinnati trading area
3. Refreshing, modern music and latest news 24 hours a day
4. Experienced air personalities who SELL your product
5. A prestige station with progressive management.

Call Tom Welstead at WCKY's New York office, or AM Radio Sales in Chicago for the latest facts and figures on Cincinnati and WCKY.

WCKY

50,000 WATTS
OF SELLING POWER

Cincinnati, Ohio

Low-power tv station

Electron Corp. of Dallas, Tex., a subsidiary of Ling Electronics Inc., Culver City, Calif., has introduced a complete low-power broadcast television station for vhf or uhf. Components include: cameras, transmitter, film and slide chain, monitors, antenna, audio facilities and all other operating accessories.

The station will give coverage of Class A signal characteristics within a radius of 15-20 miles with a 100-200-ft. antenna. The studio equipment, film chain and transmitter can be housed in a 10 x 12-ft. room and maintained by three persons.

Prices: Installed ready for operating, \$26,500. Variations in equipment suitable for educational tv can bring the price down to \$19,000. Electron has established a department to prepare and submit tv applications to the FCC.

• Technical topics

• Houston Fearless Corp., Los Angeles, is marketing a new automatic rapid spray film processor. The company says 16 mm or 35 mm monochrome positive movie film can be processed at speeds up to 150 ft. a minute while negative film is processed up to 100 ft. a minute with the new machine. This is made possible by high impingement spray application of the developing solution, fix and wash, utilizing improved spray bars that assure uniform results. Impingement drying also is employed. HF address: 11807 W. Olympic Blvd., Los Angeles 64.

• Philco Corp., Philadelphia radio, tv and appliance manufacturer, filed a patent infringement suit last week in the U.S. district court in Wilmington, Del., against Admiral Corp. Philco charged Admiral had used a Philco-patented

portable tv receiver design, without taking out a license from the Philadelphia manufacturer. Philco asked for an injunction and an accounting of profits.

• The Middle Eastern District meeting of the American Institute of Electrical Engineers this month in Baltimore heard John B. Bullock, RCA engineer at Camden, N.J., report on the operation of a privately-owned microwave system. In his paper on "A Medium Haul Private Microwave System for Television," Mr. Bullock described a three-channel, five-hop system carrying programs from Denver, Colo., to Rapid City, S.D., where it feeds a community antenna system. Important aspects of this system, Mr. Bullock said, are: use of equipment which demodulates to baseband at each repeater; high-quality performance on color signals, and the system's antenna multiplexing which is accomplished by using waveguide filters and circulators. Throughout the system the three transmitters at any one location are fed to a single antenna and the three receivers.

• Ampex Corp. during March shipped 40 VR-1000 Videotape recorders to 19 stations and production companies, including these U.S. tv stations: WFLA-TV Tampa, Fla.; KFMB-TV San Diego, Calif.; KGBT (TV) Harlingen, Tex.; KTRK-TV Houston, Tex.; WLW-TV Cincinnati, Ohio; WPRO-TV Providence, R.I.; WDAF-TV Kansas City, Mo. (two units); KFJZ-TV Fort Worth, Tex.; KTNT-TV Tacoma, Wash., and KTEN (TV) Ada, Okla. The machines shipped to San Diego, Harlingen, Cincinnati and Fort Worth are the first vtr recorders to go to those cities, Ampex reported. Also during March, Ampex completed delivery of 12 color tape recorders ordered by NBC. Foreign shipments included seven units to Mexico, two to England, one to West Germany and four to Japan.

Interim "Candelabra" report •

The second phase in the construction of the 730-foot tv tower to be used jointly by WBAL-TV, WMAR-TV and WJZ-TV, all Baltimore, has begun. With mechanical work completed RCA engineers in conjunction with station engineers have started the electrical checkout of the antenna systems.

Boasting the first "Candelabra" top to be built on the East Coast, the tower was designed and fabricated by the Dresser-Ideco Co., Columbus, Ohio. United States Steel's T-1 constructional alloy steel was used in the lower legs to bear the weight of the top and its three 10-ton antennas.

Upon completion of electrical tests, the stations will start the final phase—the installation of the transmitting equipment.

'NICE' CAMPAIGN Thousand vie to name KYW's friendly imp

The friendly imp of KYW Cleveland was around quite a while before he ever acquired a name.

Now, after a two-week contest, climaxing the little fellow's four-month

stand this year on the air and in KYW promotion, he has a name: "Elfis," picked from nearly a thousand entries.

Elfis is an integral figure in a general sales and goodwill campaign, the "Nicest Things Are Happening" promotion. The Westinghouse station for four months this year arranged for nice things to happen to listeners, to advertisers and to their agencies.

KYW planned surprises to brighten winter months and keep attention focused on a happy station image. Some of the "happenings":

... to Listeners • Car cards and posters reminded that the "Nicest things happen to KYW listeners."

Local industry employees were saluted regularly on the air for nice deeds performed on the job.

Special community service projects were undertaken by KYW. These included a star-studded benefit for retarded children, co-sponsorship of an office-girl "Mardi Gras," and participation in the area boat show with special promotions for many thousands of visitors.

"Nice" stories were included in the KYW news whenever possible. "Nice" records and programming got a big play.

Gifts went out to Cleveland parents of babies born on the 11th of each month (KYW is at 1100 on the radio dial).

Elfis, famed in jingle and advertising, made the rounds of Kroger supermarkets, civic, social and fraternal affairs, handing out gifts to those who came up and identified him (see picture).

... to Advertisers • Three advertisers took advantage of the "Nicest Things Happen" campaign for special promotions in cooperation with the Kroger Co. supermarkets ("The nicest things happen when you go Krogering"). Oasis and Chesterfield cigarettes, Schlitz beer and Ideal dog food, all tied in air schedules with special displays at

Kroger stores during designated weeks, with a complete kit of supporting promotion.

... to Agencies • Advertising people got frequent reminders of the theme from January through April. Trade impressions were registered with candy gifts and other mailings. Agency executives got free drinks at plush places in Chicago, Detroit, Cleveland and New York if their birthdays fell within the four months (letters of credit were sent for the toasts). Trade advertising carried the happy faces theme.

Letterheads featured the Elfis drawing in a warm pink, with separate versions each for listeners, advertisers and agencies.

Janet Byers, KYW advertising-promotion manager, is responsible for the nicest-things campaign. Assigned to personifying the imp was Jack Villari, a vocalist on the KYW Road Show. Besides appearing at innumerable functions to hand out gifts, he also took busloads of shoppers on free rides and

ELFIS IN ACTION

They tear his clothes too

picked up grocery tabs from time to time when purchases rang up to include the number 11 on the cash register.

Many vouch for WGY

WGY Schenectady, N.Y., has a backlog of 1,400 recorded testimonials for on-the-air promotion. The tapes were recorded during the station's contest to find the "Smoothest Voice Around" at its booth in the Greater Albany Home Show. The 1,400 women who entered the contest gave permission for their recordings to be broadcast. First and second prizes: 13 cubic-ft. GE refrigerator and a GE washer, respectively to the winners.

KETV (TV) asks 'Brand It'

A KETV (TV) Omaha, Neb., contest that invited viewers to identify de-branded products was staged as a merchandising extra for advertisers. Nearly 3,500 entries were received identifying 15 national products that had been shown on tv with the words "Brand It" masking product names.

Worldwide service

Volunteer WWJ Detroit engineers are manning amateur station W8USA at WWJ-TV's transmitter site round-the-clock to receive messages from local men stationed at distant military bases. The shortwave transmitter that sends the servicemen's messages is aboard a Military Air Transport System plane. Interviews with the servicemen, conducted by WWJ newsman Britton Temby, are recorded and broadcast on station newscasts.

KPLK ups power on birthday

KPLK Dallas, Ore., took advantage of its fourth anniversary to announce that the station's power had been doubled (500 w to 1 kw) and that it would

War Council • WERE Cleveland invited Cherokee, Wotomnes-Mewauk and Sioux tribesmen to the Cleveland Advertising Club luncheon pow-wow opening the baseball season. Here Frank Lane, general manager of the Cleveland Indians team, unrolls a "papoose" bundle just handed him by a squaw-costumed beauty who told him, "This is your baby." Mr. Lane is surrounded by Cherokee Indian Jim Fletcher (c), Joe Gordon (r), Indians field manager, team members and ad clubbers in headbands. WERE originates games for a 41-station Indians network.

spearhead a regional promotion this summer.

The community promotion, brain-child of Ray L. Kozak, station manager, is a bean picking contest patterned after the annual midwest corn harvesting event. It will be conducted mid-August in cooperation with the Oregon State College and Northwest Freezers & Packers. Substantial prizes will be awarded to contestants.

Guest of honor at KPLK's birthday luncheon was Oregon Governor Mark Hatfield.

WKOW-TV helps bank accounts

A Junior Savers Club promotion by the Bank of Madison (Wis.) over WKOW-TV there (BROADCASTING, Feb. 16) has produced more than 1,000 new accounts for the bank within 13 weeks. The bank sponsors a western series Sundays, 5:30-6 p.m.

A ceremony at which the 1,000th Junior Saver was presented with artist's

material for his painting hobby was telecast by WKOW-TV. The bank gives cowboy-apparel premiums and movie tickets to children as their savings accounts grow.

The Junior Saver promotion was conceived and produced by Fred A. Rickli, president of Madison Adv.

Pre-empted but not silent

WMCA New York staged a private "broadcast" when a half-hour of the *Ted Steele Show* was pre-empted by Conelrad April 17. Mr. Steele's d.j. show went to Newark, N.J., to the Memorial Center for Women. For several days prior to the Conelrad test Mr. Steele had asked listeners to send in their reasons for not wanting to miss a half hour of radio. Out of several hundred replies, a card from a patient at the Memorial Center was selected as the winner and Mr. Steele went to the center for a record and interview program over the p.a. system.

• Drumbeats

- The first annual salute to St. Louis food brokers was undertaken by KMOX there yesterday (April 26). The week is proclaimed "Food Brokers' Week" by Mayor Raymond R. Tucker. One of the major features is a Teamwork Breakfast, which is expected to draw 100 food brokers.

- Luke and Zeke, two bearded "hill-billy characters" greeted listeners on the streets of Memphis to help announce the new call letters of country music station KWAM Memphis, formerly KWEM. Accompanying Luke and Zeke were a couple of models wearing radio-equipped barrels. They strolled around giving out candy kisses to passersby. Posters on Memphis buses and billboards augmented the announcement of the "new KWAM."

- Warner Bros., Burbank, Calif., is licensing manufacture of "Kookie combs." The name comes from Kookie, the part played by Edward Byrnes in *77 Sunset Strip* (ABC-TV, Friday 9:30 p.m.) who constantly combs his hair. A flood of requests for Kookie's combs followed Mr. Byrnes' appearance on *Dick Clark's American Bandstand* on ABC-TV.

- WKRC TV Cincinnati got a slogan coined by city Mayor Donald Clancy on its 10th anniversary. The mayor in official congratulations said, "I know it makes you happy when I say, 'Our eyes are always on you.'"

- Pat Landon, d.j. with WRCV Philadelphia, broadcast 47 commercials free April 15 (his birthday) as a bonus to sponsors.

- A dramatic recreation of the first broadcast over KFI Los Angeles 37 years ago was presented April 16 in a special 55-minute anniversary broadcast.

- WMT-TV Cedar Rapids, Iowa, reports a 51% sales increase during Easter weekend for a service-station client who used three tv announcements to promote a special offer. The stations used WMT-TV's western personality, "Marshal J," to announce that gas patrons would get a baby chick with each gas purchase.

- Some 3,000 secretaries of agency media men were designated as recipients of orchids flown in from Hawaii, compliments of Blair-Tv and Blair Tv Assoc., during National Secretaries' Week (April 19-26). The salutation accompanying the flowers: "Sh-h-h, this one's for you!"

Equipping a Radio Station?

Get More Coverage With The New RCA 500- and 1000-Watt AM Transmitters

The ability of these new 500- and 1000-watt AM transmitters to achieve and maintain a higher average level of modulation assures more program coverage. Simplified tuning, ease of installation, built-in provisions for remote control, and low operating cost make the RCA Type BTA-500/1R your best transmitter buy. Color styling adds harmony to station decor—a choice of red, green, blue, or grey doors. Whatever your equipment needs—SEE RCA FIRST!

Or write for descriptive literature to RCA, Dept. SD-22 Building 15-1, Camden, New Jersey.

Hearing Cases

FINAL DECISIONS

By memorandum opinion and order, Commission, on petition by applicant for reconsideration, granted without hearing application of Quad Cities Bcstg. Co. for new am station to operate on 1380 kc, 500 w, D, in Brazil, Ind.; terminated proceeding. Ann. April 22.

By letter, Commission waived Sec. 3.651 (c) and granted U. of New Mexico (*KNME-TV, ch. 5), Albuquerque, N.M., six months' temporary authorization to broadcast from 10:30 p.m. to 11:30 p.m., Monday, utilizing aur. trans. of its station to transmit stereophonic sound broadcasts in conjunction with KHFM (FM) Albuquerque; engineering condition. Ann. April 22.

By report and order, Commission final-

ized rulemaking and amended tv table of assignments by adding ch. 10 to Medford, Ore., in addition to its present ch. 5 assignment. TOT Industries Inc., had petitioned for channel allocation. Effective date of amendment is June 4. Ann. April 22.

INITIAL DECISION

Hearing Examiner Basil P. Cooper issued initial decision looking toward granting application of Santa Monica Bcstg. Co. for new class A fm station to operate on 103.1 mc in Santa Monica, Calif. Ann. April 20.

OTHER ACTIONS

By order, Commission designated Horace Stern to serve as presiding officer in reopened proceeding on applications of Biscayne Television Corp. (WCKT), East Coast Television Corp., South Florida Television Corp. and Sunbeam Television Corp. for new tv stations to operate on ch. 7 Miami, Fla.; ordered that further hearing and hearing conferences shall be held at such times and places as may be designated by presiding officer; and rescinded that part of April 3 order (which reopened proceeding) which provided for holding of further hearings in Washington, D.C. Ann. April 16.

By memorandum opinion and order, Commission dismissed protest and petition for reconsideration filed by Evanston Bcstg. Co. (WNMP), Evanston, Ill., directed against Feb. 25 grant of application of South Cook Bcstg. Inc., for new am station (WCGO) to operate on 1600 kc, 1 kw, DA, D, in Chicago Heights, Ill. Ann. April 22.

By memorandum opinion and order, Commission granted petition by WWDC Inc. (WWDC), Washington, D.C., party intervenor, for enlargement of issues in proceeding on applications of Alkima Bcstg. Co. and Howard Wasserman, both West Chester, Pa., and Herman Handloff, Newark, Del., for new am stations. Ann. April 22.

By memorandum opinion and order, Commission denied petition by Tele-Views News Inc., for reconsideration of Feb. 5 memorandum opinion and order which enlarged issues in Moline, Ill., ch. 8 tv comparative proceeding. Ann. April 22.

By memorandum opinion and order, Commission denied petition for review and motion by Upland Bcstg. Co., Upland, Calif., to dismiss application of South Coast Bcstg. Co., Laguna Beach, Calif. These applications are in consolidated hearing with other am applications. Ann. April 22.

Commission postponed oral argument from April 24 to May 22 on application of United Bcstg. Co. for new fm station in San Jose, Calif. Ann. April 22.

Commission denied petition of City of New York Municipal Bcstg. System for extension of time for oral argument on its application for extension of SSA to operate am station WNYC New York, N.Y., additional hours; rescheduled oral argument from April 30 to May 22. Ann. April 22.

Commission adopted new order correcting one of April 1 which consolidated applications of Sierra Bcstg. Co. (KATO), Reno, Nev.; Finley Bcstg. Co. (KSRO), Santa Rosa, Calif., and Sanval Bcstrs., Oroville, Calif., in hearing with that of James E. Walley, Oroville. New order amends issues only. Proceeding involves proposed operations on 1340 and 1350 kc. Ann. April 22.

Seasoned salesman. Relocate in Florida metropolitan market. Station has excellent ratings. Owned by expanding chain, with executive jobs open on proof of performance. Hospitalization. Paid vacations. Bonus for producers. Include billing figures on current or last job, resume and references. Box 564K, BROADCASTING.

Somewhere in the broadcasting industry there is a real-honest-to-goodness salesman on some station's radio staff. This man feels stymied in his progress. Perhaps the job he wants as sales manager is held by a capable man who is young enough to keep the job for a long time. If you are this man, if you really know radio in all its phases, if you understand how to sell competitively yet cleanly, if you are use to competition and to winning after a scrap for a piece of business then here is your opportunity. We are a network affiliated station that has revamped its programming to conform to its network and as a result has to re-vamp its selling approaches. We have a good job to offer a good man in a fine company located in a top market in the middle west. Our choice will be an intelligent, level headed, experienced man who understands the tricks of the trade, who will go out and sell himself and who can handle people. To him we will entrust the sales destiny of our radio station and to him we offer progress in our radio and television stations as he proves his worth. If you qualify, contact Box 610K, BROADCASTING.

Help Wanted—(Cont'd)

applications for new tv stations to operate on ch. 2 in Terre Haute, Ind.; afforded parties 10 days to object. Action April 15.

By Hearing Examiner Jay A. Kyle

Scheduled prehearing conference for May 1 and continued without date hearing scheduled for May 1 in proceeding on application of Easton Bcstg. Co., for am facilities in Easton, Md. Action April 16.

By Hearing Examiner Herbert Sharfman

Scheduled prehearing conference for May 7 in proceeding on applications of Binder-Carter-Durham Inc., and Herbert T. Graham for am facilities in Lansing, Mich. Action April 17.

Referred to Commission for action petition by Tribune Publishing Co., for leave to amend its application for new tv station to operate on ch. 2 in Portland, Ore., by specifying new trans. site. Action April 16.

By Hearing Examiner Elizabeth C. Smith

Granted petition by Southern General Bcstg. Inc. (WTRO), Dyersburg, Tenn., for continuance of hearing from April 15 to May 6 in proceeding on its am application. Action April 14.

PETITION FOR RULEMAKING FILED

Fisher Bcstg. Co., Portland, Ore. (4-9-59)—Requests change as follows: Salem, Ore. 3+, *18-, 24+, 66. Subject to condition that trans. of any station using ch. 3 be located at distance no less than that specified by sec. 3.610 of rules, from any authorized or proposed trans. site for operation on ch. 2 in Portland, Ore.

KTNT-TV Tacoma, Wash. (4-14-59)—Requests that Commission specifically condition future use of ch. 3 at Salem, Ore., on specification of trans. site at least 60 miles from trans. sites of three existing stations that serve Portland, Ore.

PETITION FOR RULEMAKING DENIED

KFJZ-TV Fort Worth, Tex. (12-23-58)—Requested amendment to substitute ch. 2 for ch. 11 in Fort Worth, Tex. and specifying ch. 11* in place of ch. 2* in Denton, Tex. Further requested issuance to KFJZ-TV of order to show cause why its authorization should not be modified to specify ch. 2 in lieu of ch. 11. Denied by memorandum opinion and order adopted April 8, 1959 and released April 14, 1959.

From the SEC record:

The following stock transactions by officers and directors of companies in radio-tv and allied fields have been released by the Securities & Exchange Commission. Sales, reported to SEC between Feb. 11 and March 10, involved common stock unless otherwise indicated.

American Broadcasting-Paramount Theatres Inc.—James G. Riddell purchased 1,000 shares giving him total of 1,980.

Ampex Corp.—James E. Brown increased holdings to 225 shares by purchasing 100.

CBS Inc.—Louis G. Cowan acquired 721 shares for 1,648 total.

Guild Films Inc.—C.W. Alden Jr. and Gerald Dickler purchased 50,000 and 10,000 shares, respectively, from issuer for their initial ownership in Guild; John J. Cole had pledged 34,000 shares he owned as collateral for loan which were sold by lenders because of inability to meet margin calls.

Paramount Pictures Corp.—Louis A. Novins exercised option to purchase 27,500 shares of capital stock of International Telemeter Corp., which in turn was exchanged for 2,291 shares of Paramount in merger effective Jan. 3.

National Theatres Inc.—E.C. Rhoden sold 9,650 shares held indirectly through Precision Holding Co. Mr. Rhoden retains 26,800 National shares individually and 7,325 indirectly through two investment companies.

RCA—Charles R. Denny purchased 188 shares through incentive plan, for 1,018 total.

Skiatron Electronics & Tv Corp.—Frank V. Quigley sold 100 shares, retaining 435; Kurt Widder disposed of 2,500 shares leaving him with 4,000.

Storer Broadcasting Co.—Abiah A. Church purchased 100 shares for 213 total.

TelePrompter Corp.—Salter Hirshon sold 5,000 shares leaving him with 1,000.

NOTICE TO EDITORS—For more than 30 years, Metropolitan Life has sponsored advertising messages on national health and safety. Because of public interest in the subject matter of these advertisements, Metropolitan offers all news editors (including radio news editors) free use of the text of each advertisement in this series.

The text may be used in regular health features, health columns or health reports with or without credit to Metropolitan. The Company gladly makes this material available to editors as one phase of its public-service advertising in behalf of the nation's health and safety.

Now you can protect him from polio... why don't you?

PERHAPS no medical development was ever so eagerly awaited as the vaccine against polio, or infantile paralysis.

But when the vaccine was perfected and supplies became plentiful, a strange thing happened. Millions of Americans failed to take it—or neglected to get the three injections needed for their protection.

In fact, recent studies show that more than 35 percent of our people under age 40—the period when most cases occur—have not had any shots; only half have had the full series. *Of the pre-school children who are most susceptible, nearly one-third have not been vaccinated at all.*

To help correct this situation, the U. S. Public Health Service, the American Medical Association, the American Academy of Pediatrics, the American Academy of General Practice and The National Foundation (for Infantile Paralysis) are spear-heading a drive for the conquest of polio.

You can strike a blow against polio!

If you have children, now is the time to provide them with protection—well in advance of the polio season which is at its height during hot weather.

Three injections—properly spaced by your physician—are 85 to 90 percent effective

against paralytic polio. If your children completed their series of three injections a year or more ago, ask your doctor about a fourth “booster” shot at this time.

Remember, it is especially important to protect children under age five. Doctors say that polio injections can be started as early as six weeks of age.

If you are under 40, see that you, too,

are vaccinated. Polio isn't limited to children. Although it rarely strikes adults, it is usually severe when it does occur.

So, you could do no wiser thing than to call your physician or clinic *now*—and arrange for your family's injections.

If we all act immediately, we can face the summer of 1959 with the bright hope that there will be no polio epidemics!

OUR RESPECTS TO . . .

Norton William Mogge

"The opportunities for radio selling are today greater than ever before," Norton William Mogge, president of the Los Angeles agency, Atherton Mogge Privett, believes.

"And no one takes better advantage of those opportunities than Nort Mogge," a Los Angeles broadcaster has commented. He described Mr. Mogge as "the most astute user of saturation radio in the West."

Among the accounts under Mr. Mogge's jurisdiction is Seven-Up Bottling Co. of Los Angeles, described as the most profitable soft drink franchise in the country. This enviable position is maintained by a barrage of local radio spots on about a dozen stations at all times of the day and night on all types of programs from music to news to sports to weather, with which the agency supports Seven-Up's national television, magazine and outdoor advertising. Other heavy radio users in the AMP client list include Pacific Hawaiian Pineapple products, Jerseymaid Milk products, Barbara Ann Baking, Luer Packing and Pacific Cracker as well as a number of local accounts.

Yet it is only since 1947, when he and Jack Privett left J. Walter Thompson to start their own agency, that Mr. Mogge has personally had much to do with radio. New business development, client contact, merchandising and marketing have been his specialties and in the major national agencies where much of his more than 40 years in advertising were spent, there had been able media departments to handle the details of buying time and space. But food advertising has always been Nort Mogge's major interest and since the beginning of commercial broadcasting food companies have been major users of radio, and latterly tv as well. So, without really trying, he absorbed a lot of knowledge of the broadcast media that was there when he needed it.

A Start at Sunkist • Nort Mogge may well be the only advertising agency president who prepared for a career in advertising by attending an agricultural college—Michigan State, where he majored in horticulture and received a B.S. in 1914. Peculiarly, his first after-college job was not on a farm but as a fruit auction salesman for Sunkist in New York City. Equally off-beat, he got the job not through his superior knowledge of oranges, but because he'd been captain of the Michigan State baseball team. (The man doing the hiring had been baseball captain at Cornell.)

For two years he spent his days in-

specting deciduous and citrus fruit coming into Pier 20 on ferries from the railroad terminal across the Hudson River and watching auctioneers to see that the fruit brought a reasonably good price. Next he was sent to Chicago as head of the Sunkist premium department and then to Kansas City as manager of dealer service for an area that stretched from Oklahoma City north to the Canadian border and east almost to St. Louis. "I'd be on the road for six to eight weeks at a time," he recalled, "living in my Ford and often without money because my expense and salary checks couldn't catch up with me."

Tired of life in a Model T, Mr. Mogge obtained an interview with an executive of Northwestern Fruit Exchange who turned out to be a fellow native of Buffalo. More important, he was the brother-in-law of a girl Mr. Mogge had dated during his high school days. So Mr. Mogge was off to Seattle as an assistant sales manager of this apple marketing organization.

After World War I, in which Lt. Mogge spent two years teaching close order drill to non-coms at Ft. Lee, Va., he moved to New York to work with

AGENCY CHIEF MOGGE

Spot radio a specialty

Mutual Service Corp. advertising agency whose main account was Northwestern Fruit Exchange's Skookum apples. Five trips back to Seattle in a year (and in 1919 each cross-country trip meant a week on the train each way) made it plain where he was needed most and in 1920 he returned to Seattle as advertising manager.

Out the Window • Two years later a dispute between eastern interests and the western growers' association (which

jointly owned NFE) split the company in half. In the rift "the \$125,000 ad budget went out the window with me after it," Mr. Mogge recalled. He opened a marketing office in Wenatchee, center of Washington's apple country, but in 1923 a record-breaking crop drove apple prices down to the breaking point and Mr. Mogge accepted the post of Pacific Coast manager of Meredith Pub. Co. "Freely translated, that meant I sold space for *Dairy Farmer*, *Better Homes & Gardens* and *Successful Farming* up and down the Coast."

In 1926, when Meredith wanted him to move to the firm's headquarters in Des Moines as advertising manager, Mr. Mogge elected to stay on the Coast and over the next 15 years he successively had charge of food advertising for the Lord & Thomas (now Foote, Cone & Belding) office in San Francisco, was advertising manager of United Prune Growers of California, manager of the Los Angeles office of J. Walter Thompson Co., and opened and managed a Seattle office for JWT (bringing into the agency's client roster the Washington State apple, dairy and progress commissions). Mr. Mogge returned to Los Angeles in 1941 to reopen a general advertising office for JWT, which then was maintaining only a Hollywood radio service branch there. He began with himself and a secretary and six years later had a staff of 52.

Partner and President • In 1947, when JWT decided to transfer some of its top Los Angeles personnel to the agency's Chicago office, Mr. Mogge and Jack Privett, who handled the Ford Dealers of Southern California for JWT, left and opened their own Los Angeles agency, Mogge & Privett. In November 1958 the agency combined with Alfred Atherton to become Atherton Mogge Privett, with Mr. Mogge as president, a post he still holds.

Nort Mogge was born Aug. 26, 1891, in Buffalo, N.Y. In 1924 he married Aileen Brown of Wenatchee. They have two sons: Dwight C., a medical student at UCLA, and John N., also in the advertising agency field, with Keys & Adams, Los Angeles.

Always active in advertising organizations, Mr. Mogge has been president of the Seattle Sales & Advertising Club and of the Advertising Assn. of the West, chairman of AAAA's Southern California chapter, an ad club board member in Seattle, San Francisco and Los Angeles and is currently chairman of the Western Region of AAAA. An ardent golfer, he belongs to the Los Angeles Country Club and is past president of Southern California Advertising Golfers' Assn. He is also a member of the Beverly Hills Club, Big Ten Club and Advertising Club of Los Angeles.

Meritorious

IN nominating Rosel H. Hyde for another seven-year term as a member of the FCC, President Eisenhower recognized dedicated public service, and he disregarded politics.

Others sought the position because a \$20,000 salary, among politicians, is a political plum. By naming Mr. Hyde well in advance of the expiration of his present term on June 30, the President cut off the politicking for the Republican assignment.

Mr. Hyde has been a member of the FCC since 1946. With one exception, he has served as a commissioner longer than anyone in the history of communications regulation, which began with the old Federal Radio Commission in 1927. And when he completes his new seven-year term in 1966 he will have exceeded the tenure of Paul A. Walker by a year. From docket clerk to commissioner, he has been with the FRC and the FCC for 31 years.

Mr. Hyde is an unusually youthful, vigorous man at 59. His background and knowledge of communications, and his judicial temperament are admirable qualifications for the position he has held with such distinction over the years. He is not a politician, but rather one of those rare men in public life who has made public service his career.

Too hot to handle

IN bucking the tv allocations hot potato to Congress the FCC took the most expedient, if not the only, course available in the light of the complexities and the unsettled state of spectrum use.

In proposing temporary or interim action by squeezing new stations into critical markets through shorter separations the FCC opens a new Pandora's box.

It could not by decree order what it regards as the optimum solution—extension of the existing vhf spectrum of 12 channels to cover a contiguous band of 50 channels. That must await negotiations with the present government users. And even if this develops, as the FCC majority optimistically hopes, it would take 10 years or longer, plus legislation for all-band receivers, plus adjustment of foreign commitments, to effectuate.

Thus the FCC did the next best thing by presenting to the Senate Commerce Committee a statement of the various long range alternatives to alleviate the scarcities in assignments. It is a clearly-worded exposition, so simply presented that members of Congress, preoccupied as they are with other matters, should have little difficulty understanding the problem.

Where the FCC foment trouble is in announcing that it intends to abandon existing mileage spacings to shoe-horn new stations into areas having fewer than three vhf stations, but on a "temporary" basis. It would do this before it knows whether it can work out an expanded vhf plan with the government, or before the proposed President's commission to study spectrum use or the House Commerce Committee's spectrum subcommittee are even off the ground.

It could very well be that shorter spacings, directional antennas, precision offset and other techniques will become the main ingredients in the solution of the vexatious shortage problem. But like Comr. Bartley, we feel that to institute the shorter vhf separations now could prejudice any long range plan. It would jerk the rug from under uhf before it is known whether all 70 uhf channels will be needed. The majority holds that it should know in a few months whether the government will play ball on exchange of spectrum space. Certainly it would cause no

onerous hardship to wait that long, particularly since the problem has remained unsolved since 1952.

Meanwhile, there are areas like Syracuse, Rochester, Fresno and Bakersfield, among others, where drop-ins presumably can be authorized without doing violence to the existing separations. Why delay here?

Reducing separations now, even on an interim basis, would be another cruel blow to the 85 operating uhf stations, which certainly should have some priority in succeeding to whatever better assignments become available.

There's no indication as to the extent to which the FCC proposes to reduce vhf separations. What about the effect on existing services which would be impaired or perhaps destroyed? Experience has shown that once standards are compromised, the exception becomes the rule and the degrading process by force of Congressional and other pressures, keeps boring deeper.

If the FCC concludes that shorter separations are inevitable, it should establish a definite outer limit. And it should hold to that line. But first, it must establish to the satisfaction of the public, through Congress, and to the broadcasters who have made their heavy investments, what that line should be. Otherwise the tv allocations are destined for the same fate as am radio.

'News' associations

WE are tempted from now on to refer to the two major news services as the Associated "Press" and United "Press" International.

Both are less press than broadcasting these days.

In a report issued before the annual meetings of the American Society of Newspaper Editors and the American Newspaper Publishers Assn., the AP announced it was serving more U.S. broadcasting stations than newspapers (BROADCASTING, April 13). The figures are 1,878 radio and television stations and 1,638 newspapers.

We asked UPI last week how its score stood. It is even more heavily weighted in favor of broadcasting than AP: 2,226 stations to 1,592 newspapers.

Things have changed rather dramatically in the little more than 20 years since the press associations were refusing to sell their service to radio. They have also changed in the slightly more than 10 years since AP agreed to admit broadcasters to associate membership, a status they still occupy. Associate members have no vote in AP affairs. Newspapers, as full members, control the destinies of the AP. Perhaps it is time they let the majority of AP outlets have at least an equal voice in AP operations.

Drawn for BROADCASTING by Sid Hix
"He's been sent to the showers so often, he's picked up a sponsor."

A map of Florida is shown in the background. Overlaid on the map are several concentric red circles representing radio signal coverage. The circles are centered on a point in central Florida, marked with a red star and the call letters 'W-GTO'. Various cities are labeled with red dots: Jacksonville, Gainesville, Orlando, Cape Canaveral, Tampa, St. Petersburg, W. Palm Beach, and Miami. The text 'THIS IS IT!' is at the top, followed by 'THE MOST POWERFUL COMBINATION IN THE NATION' in large, bold, black letters.
