Announcement

Bulletin of Environmental Contamination and Toxicology Styles for WordPerfect 5.1

Springer-Verlag has recently developed a set of styles for authors using WordPerfect 5.1, either on an IBM PC or compatible with a laser printer, to create camera-ready pages for submission to the *Bulletin of Environmental Contamination and Toxicology*. These files are being made available to BECT authors at no charge in 3.5 and 5.25 inch versions. Each disk includes three style files and three sample documents for three different types of printers: PostScript, Hewlett-Packard LaserJet III or similar printers, and Hewlett-Packard LaserJet II or similar printers (and earlier models). Ten pages of instructions accompany each disk ordered. In addition to creating a base style for text, title, author, and affiliation styles for article openers, and heading, acknowledgment, reference, and footnote styles, these style files can create a figure box for convenient pasting in of illustrations, and can even accommodate the use of graphics files. Tables may be created as graphic elements or as part of the text. Complex displayed equations with special symbols can be created on the files with the Equation Editor.

To order, contact BECT, Springer-Verlag New York, Inc., 175 Fifth Avenue, New York, NY 10010, USA. Telephone: (212) 460-1707. Fax: (212) 533-5977.
