## ERRATUM

---

***To the article “Recovery of Impaired Memory and *c-fos* Gene Expression in Brains of Amnestic Animals in Response to Reminder Stimulation” by E. M. Amelchenko, S. V. Zworykina, D. V. Bezriadnov, S. A. Chekhov, and K. V. Anokhin, Vol. 153, No. 5, pp. 707-710, September, 2012***

In this article the Figure 1 should look like the following:

**Fig. 1.** Results of animal testing to the tone 24 h after reminder session. 1) group 2; 2) group 3; 3) group 4; 4) group 5. \* $p < 0.05$ , \*\* $p < 0.01$  (post-hoc analysis, Fisher's test) in comparison with group 4.
