The crystal structure of D-psicose was formerly determined and described by Kwiecień and co-workers; A. Kwiecień, K. Ślepokura, T. Lis, *Carbohydr. Res.* **2008**, 343, 2336.

From the first sentence in the Abstract; *X-ray crystal analysis for D-psicose (C3-position epimer of D-fructose) crystallized from aqueous solution was successfully performed for the first time*; the words “for the first time” must be deleted, and the above-mentioned paper should be cited as a precedent work.

The authors apologize for the inadvertent omission of this paper and thank Dr. Kwiecień for pointing this out.
