(Cancer Cell 18, 316–328; October 19, 2010)

In Figure 6C, data derived from Lck-Cre mediated inactivation of Snf5 instead of the CD4-Cre mediated inactivation of Snf5 as indicated were mistakenly included. A corrected Figure 6C is shown here. CD4-Cre and Lck-Cre mediated inactivation of Snf5 lead to indistinguishable lymphomas and this change does not affect the conclusions reached in this study. The authors apologize for any potential confusion this might have caused.
